CONSUMER PRICE INDEX: JANUARY 2007

ALL ITEMS INDEX

The Composite Consumer Price Index stood at 156.4 in January 2007. This represented a decrease of 0.4 percent below 157.1 observed in December 2006. The decrease in the index was caused mainly by decrease in the prices of some food items. The Urban All Items index fell marginally by 0.1 percent while the corresponding Rural index fell by 0.6 percent over the period.

The year on year average Consumer Price level as at January 2007 rose by 8.0 percent. This was lower than 8.5 observed in December 2006. The corresponding urban and rural indices rose by 11.9 and 6.1 percent respectively over the period. The fall in this indicator was caused by decrease in the prices of some food items.

The percentage change in the average Composite CPI for the twelve-month period ending January 2007 over the average of the CPI for the previous twelve-month period was 8.0. This was lower than that recorded by making similar comparison in December 2006.

FOOD INDEX

The Composite Food Index declined by 3.4 percent in January 2007. The fall in the index was caused by decrease in the prices of most agricultural produce due to the continued influence of the harvest season. The level of the composite food index was lower than the corresponding level a year ago by 0.1 percent. The average annual rate of rise of the index was 4.4 percent for the twelve-month period ending January 2007.

ALL ITEMS LESS FARM PRODUCE

The "All Items Less Farm Produce" index which excludes the prices of agricultural produce rose by 3.2 percent in January 2007 when compared with December 2006 figure. The rise in the index was caused mainly by increase in the prices of drinks, liquid fuels, solid fuels, transport fare, education materials and services.

In the twelve-month to January 2007, the index rose by 19.3 percent while the average annual rate of rise of the index was 14.0 percent for the twelve-month period ending January 2007.
