

NO. 439

16th November 2007

CONSUMER PRICE INDEX: OCTOBER 2007

ALL ITEMS INDEX

The Composite Consumer Price Index declined by 2.1 percent to 166.7 points in October 2007. This was compared to 170.2 observed in September 2007. The fall in the index was caused mainly by decrease in the price of some food and non food items. The Urban All items index fell by 0.4 percent while the corresponding Rural index was down by 2.9 percent over the period.

The year on year average Consumer Price level as at October 2007 rose by 4.6 percent. This was higher than 4.1 observed in September 2007. The corresponding urban and rural indices rose by 8.4 and 2.7 percent respectively over the period.

The percentage change in the average Composite CPI for the twelve-month period ending October 2007 over the average of the CPI for the previous twelve-month period was 5.7. This was slightly lower than that recorded by making similar comparison in September 2007.

The corresponding urban and rural indices rose by 8.6 and 3.4 percent respectively.

FOOD INDEX

The Composite Food Index fell by 2.2 percent in October 2007. The fall in the index was caused by decrease in the prices cereals and tubers due to impact of the on-going harvest season. The level of the composite food index was lower than the corresponding level a year ago by 0.1 percent. The average annual rate of rise of the index was 1.7 percent for the twelve-month period ending October 2007.

ALL ITEMS LESS FARM PRODUCE

The "All Items Less Farm Produce" index which excludes the prices of agricultural produce fell by 1.5 percent in October 2007 when compared with September 2007 figure. The decline in the index was caused mainly by decrease in the prices of some building materials; while fuel prices remained fairly stable in most areas because of government intervention.

In the twelve-month to October 2007, the index rose by 10.7 percent while the average annual rate of rise of the index was also 10.7 percent for the twelve-month period ending October 2007.
