PREFACE

Statistics offer an essential numerical representation of realities and thus provide an important basis for evidence-based policymaking. Gender statistics is not a discrete or isolated field as it cuts across the traditional field of statistics such as Economics, Health, Education, Employment, etc. to explore the differences that exist between Women and Men in society. Such information is vital to inform policy and decision-makers and to make advances toward achieving gender equality.

Numerous socio-economic issues are still being faced by Nigeria and the rest of the world. As a result, efforts should be made to produce gender-disaggregated statistics more regularly. The resolutions of the Convention on the Elimination of All Forms of Discrimination against Women (CEDAW), and the Beijing Platform of Action adopted at the Fourth World Conference on Women in 1995; the adoption of the 2030 Agenda for Sustainable Development; the Africa We Want, Agenda 2063, as well as national priorities encapsulated in the Economic Recovery and Growth Plan (ERGP), provide the legal framework and platform for the use and production of gender statistics.

The Beijing Platform for Action identified twelve critical areas of concern in ensuring women's empowerment through full participation in economic, social, and political decision- making, poverty, education, health, gender-based violence (domestic violence), armed conflict, economic participation, inequality in power and decision making, lack of advancement opportunities, human rights, women and the media, natural resources, and the environment, as well as issues around the girl child. Similarly, the Sustainable Development Goals (SDGs) list 82 different gender indicators which aim to measure economic structures, participation in productive activities and access to resources, education, health and related services, public life and decision-making, human rights of women, and the girl child. These indicators and critical areas of concern underscore the significant need for information on the socio-economic status of women and men, and the platform for action that specifically requires the government to generate and disseminate gender-disaggregated information for planning and evaluation as part of institutional mechanisms to advance women (BPA, 1995 - Strategic Objectives A1, A4, A3).

As the national repository of statistical information on the social and economic phenomena in Nigeria, the National Bureau of Statistics is determined more than ever before to continue to collaborate with all data producers/stakeholders in the production of gender-

disaggregated data which will adequately reflect the inequalities and differences between women and men. The data included in this publication have been carefully and systematically collected, compiled, processed, and analysed from a wide variety of primary and administrative data sources across the National Statistical System and should serve as a useful resource for policymakers at all levels (National, State, & Local Governments), Civil Societies, Private Sector Organizations, Development Partners and the Public.

The conceptual approach of the Statistical Report on Women and Men in Nigeria is in line with those published from 2008 to date i.e., gender-disaggregated analysis of key social and economic indicators across several areas of contemporary life within the country.

This edition covers seven crucial policy areas of the economy- Population, Health, Education, Work and Security, Power and Decision Making, Violence Against Women and Girls, and Exposure to Media. In each of these areas, statistics from primary, and secondary sources are presented, highlighting some differences between the status of girls, boys, women, and men. Through effective use of graphical presentations and non-technical and easy-to-understand language, efforts were made to make these findings simple to understand and accessible. Additionally, survey tools have been enhanced to enable better gender streamlining. For instance, the identification of gender profiles from non-traditional gender domains like economics has been modified to be more intuitive rather than subjective.

The National Bureau of Statistics would like to thank all the relevant Ministries, Departments, and Agencies (MDAs) for their assistance in supplying useful administrative data to produce this publication.

It is hoped that this publication will help develop an enabling social, political, and economic environment that supports policymaking for the equal treatment of all its citizens, with special consideration for the status of women in the nation.

Prince Semiu Adeyemi Adeniran Statistician-General of the Federation/ Chief Executive Officer National Bureau of Statistics (NBS)

EXECUTIVE SUMMARY

Introduction

In the Beijing Declaration adopted at the Fourth World Conference in 1995 on Women, the participating governments expressed their commitment "to advance the goals of equality, development and peace for all women everywhere in the interest of humanity". This Statistical Report of Women and Men is produced annually by the National Bureau of Statistics (NBS), under the requirements of the Beijing Platform for Action and the SDGs gender indicators to assess the success of the previously stated goals. This 2021edition takes a look at the status of women and men in the country over time, based on statistics from relevant Federal and State MDAs, and it covers six focal policy areas of the economy: Population, Health, Education, Works, Power and Decision Making, and Violence against Women/Crime (VAW/C).

Concepts and Methods

Data were sourced from relevant Federal MDAs including but not limited to the Federal Ministry of Health, Federal Ministry of Education, National Examination Council (NECO), West Africa Senior Secondary Certificate Examination (WASSCE), National Board for Technical Education (NBTE), National Agency for the Prohibition of Trafficking in Persons (NAPTIP), National Assembly (NASS), Office of the Secretary to the Government of the Federation (OSGF) as well as from previous publications such as Nigeria Living Standard Survey (NLSS, 2019/2020), Multiple Indicator Cluster Survey (MICS/NICS, 2022) and Nigeria Demographic and Health Survey (NDHS, 2018). The analyses of data inferential statistics and graphics were performed on Excel software and where possible, indicators have been disaggregated to the state level. A summary of indicators for each key thematic area is given below.

Population

Nigeria is the most populous country in Africa and the seventh most populous country in the world¹. According to the estimates, Nigeria's population is over 211 million in 2021, up from over 206 million in 2020 and over 201 million in 2019 (NPC). In 2021, population growth is anticipated to be 2.53 per cent. Women make up 49.99 per cent of the population, while men make up 50.01 per cent. In 2021, there are 100.1 men for every 100 women.

¹ https://www.infoplease.com/world/population/worlds-most-populous-countries

The estimated number of elderly people in 2019 was 8,986,055, which rose to 9,370,131 and 9,777,339 in 2020 and 2021 respectively. For 2019, 2020, and 2021, the proportions of older women were 46.20 per cent, 46.38 per cent, and 46.58 per cent respectively (NPC).

Health

The average number of years a newborn child is anticipated to live, based on the country's current mortality rates, is the life expectancy at birth. According to the National Population Commission, the life expectancy for men in 2022 was 55.1 years, and for women, it was 57.2 years.

According to the MICS/NICS, 2021, the crude birth rate was 31.7 live births per 1,000 women, the overall fertility rate was 4.6 births per woman, and the adolescent fertility rate was 75 live births per 1,000 women. Pregnant women who attended Antenatal Care and were received at least once by skilled health personnel in 2021 were 69.6 per cent (MICS/NICS, 2021). According to the same report, it was shown that 18 per cent of women who are currently married or in a union or with partners are using "any contraceptive method" for pregnancy prevention and family planning, while only 16 per cent are using 'any modern method' and 66 per cent are not using 'any method'.

In 2018, the maternal mortality rate was 512 per 100,000 live births (NDHS, 2018). The under-5 mortality rate was recorded at 102 per 1,000 live births (MICS/NICS, 2021). Available data from NACA shows that the percentage of people aged 15-49 who are knowledgeable of HIV prevention was 74.1 per cent for males and 70.7 per cent for females. Women living with HIV having access to Antiretroviral Treatment was 68.93 per cent in 2018 but declined to 68.40 in 2019 and rose slightly to 68.46 per cent in 2020 (NACA).

Data from the Federal Ministry of Health (FMoH) shows that the number of pregnant women with malaria was 372,577 in 2019 and rose to 954,615 and 1,233,002 in 2020 and 2021 respectively. Nationally, 91.2 per cent of women were using menstrual hygiene materials with a private place to wash and change at home, while 16.6 per cent of women were excluded from activities during menstruation. Nationally, 2.8 and 2.7 per cent of Women and Men were covered by Health Insurance respectively (MICS/NICS, 2021). The percentage of female medical Doctors was below 35 per cent in 2018 (34.60 per cents) and slightly increased to 35.56 in 2019 and 37.03 per cent in 2020. Also, the percentage of

female dentists was 44.40 per cent in 2018 and slightly increased to 42.16 per cent in 2019 and 42.28 per cent in 2020 (Medical and Dental Council of Nigeria).

Education

According to the NLSS 2019, 72.3 per cent of females and 77.3 per cent of males in Nigeria aged 15-24 were literate in English. Available data from the National Commission for Mass Literacy, Adult and non-formal Education shows that the percentage of enrolment for females in adult/basic literacy education was 49.19 per cent in 2019 but reduced to 45.92 per cent in 2020 and slightly increased in 2021 to 46.10 per cent.

Fewer than average students at Nomadic Primary Schools in 2018 and 2020 were females (49.72 and 49.28 per cent respectively). However, in 2019, female enrolment rose to 64.76 per cent, while male enrolment fell to 35.24 per cent (National Commission for Nomadic Education). From Universal Basic Education, data shows that females enrolled less on public and private primary schools nationwide than males, the percentage of girls' enrolment was 48.39, 48.49, and 48.55 percent in 2018, 2019, and 2020 respectively. Male pupils were more likely than average to complete primary school in both public and private schools in 2018 and 2019. Available data shows that the total number of pupils that completed primary 6 in public and private primary schools in 2018 stood at 3, 079,691 and 425,974 respectively, whereas, in 2019, 3,067,121 and 432,709 pupils completed primary 6 in Public and Private schools respectively. According to the Universal Basic Education Commission's (UBEC), 2018 Digest of Basic Education Statistics, females accounted for 37.80 per cent of the total 10,193,917 out-of-school children while males made up 62.2 per cent.

Female enrolment into JSS in 2018 was 48.31 per cent and increased to 50.07 per cent in 2019 but dropped slightly to 49.80 per cent in 2020. For the males, enrolment was more than average in the three years. Also, in the SSS, female students' enrolment in 2018 and 2019 were 47.13 and 47.41 per cent respectively as against 52.87 and 52.59 per cent males. Female enrolment into Federal, State, and Private College of Education was in the range of 30-36 per cent in 2017/2018, 32.43 per cent for Federal, 30.37 per cent for the state, and 35.14 for Private College of Education. In comparison to male students' enrollment, which accounted for 60.37 per cent and 56.76 per cent respectively for the National Diploma (ND) and Higher National Diploma (HND), female students' enrolment was 39.63 and 43.24 per cent in 2017/2018. College of Health Technology's National Diploma Program has 66.69 per cent more female students than the College of Agriculture (36.23) and Specialized

Institutions (31.59 per cent). Similarly, the percentage of female students enrolled in the College of Health Technology's Higher National Diploma program was 63.28 per cent, while those enrolled in specialized institutions and the College of Agriculture were only 33.3 and 33.43 per cent, respectively in 2017/2018.

In the 2017/2018 academic session, female graduates from the National diploma of Colleges of Health Sciences were 69.51 per cent, while 37.17 and 33.84 per cent graduated from Specialized Institutions and Colleges of Agriculture respectively. For the Higher National diploma, 69.51 per cent of females graduated from Colleges of Health Sciences, 51.56 per cent of females graduated from Specialized Institutions, and 40.26 per cent from the College of Agriculture (National Board for Technical Education (NBTE), Kaduna).

Overall undergraduate female enrolment in Nigeria Universities were 43.82 per cent and 43.46 per cent in the year 2018 and 2019 respectively, further breakdown shows that Private Universities female enrolment was highest (50.99 per cent) followed by State Universities with 45.84 per cent and Federal Universities with 42.17 per cent in 2018. In 2019, female enrolment in Private Universities reduced to 48.77 per cent, while State and Federal Universities had 45.32 and 42.18 per cent respectively.

For postgraduate enrolment, female students that enrolled in Engineering and Technology were far below their male counterparts; 12.06 per cent as against 87.4 per cent of males. The female also recorded lower enrolment in sciences than males; 27.6 per cent compared to 72.4 per cent of male enrolment. However, females out-enrolled males in Basic Medical & Health Sciences, Medicine, and Education disciplines with 58.05, 53.59, and 52.83 per cent respectively. Further, in the same year, 40.75, 39.25 and 33.49 per cent of female enrolled for PGD, Master and PhD.

In 2020, 43.6 per cent of female teachers in ECCDE were not qualified, compared to 56.39 per cent who did. In a similar vein, 46.34 per cent of male teachers had at least one teaching certificate, compared to 53.66 per cent of them who were unqualified. In Public and Private Primary Schools in 2020, about three out of every four (73.78%) female teacher held teaching certificates, compared to 62.01 per cent male teachers who also had such certificates. Female teachers in Public and Private JSS who were qualified made up 78.86 per cent, while 21.14 per cent were not. Also, 70.42 per cent of male teachers were qualified while the remaining 29.58 per cent were not. As regards Public and Private SSS teachers, among the male and female teachers, 60.79 per cent of males and 54.01 per cent of females

were qualified in 2018. In 2019, qualified male teachers increased to 66.13 per cent and qualified female teachers also increased to 72.36 per cent.

From 2018-2020, data from National University Commission (NUC) reveals a consistently lower ratio of female staff in both academic and non-academic positions. In comparison to males, females made up 24.06, 23.65, and 23.66 per cent of academic staff in the 2018, 2019 and 2020 academic years, respectively. Similarly, female represents 36.26, 36.0, and 37.04 per cent of non-academic staff in the 2018, 2019, and 2020 academic years, respectively. In 2017, the percentage of female professors in Nigerian universities was 15.43 per cent compared to 84.57 per cent of male professors. Also, in 2019, female professors were lower than the male, 15.17 per cent as against 84.83 per cent for male.

Work

Available data from the National Directorate of Employment (NDE) shows that only 19 states and FCT benefited from Enterprise Development Programme (EDP) in 2018 where 54.88 per cent of males and 45.12 per cent of females were beneficiaries. Similarly in 2019, aside from Edo and Yobe states where data were not available, data from the remaining 34 states and FCT reveals that 60.59 per cent of males and 39.41 per cent of females benefited from the program. In 2020, all states including FCT benefited and 54.05 per cent of males and 45.95 per cent of females were beneficiaries. Females were the major beneficiaries of the Basic-National Open Apprenticeship Scheme (B-NOAS) from 2018-2020. In 2018, 72.8 per cent of females benefited compared to 27.2 per cent of males, 70.23 per cent of females' beneficiaries compared to 29.78 per cent of males in 2019. Female beneficiaries in 2020 were 61.38 per cent as against 29.72 per cent of males. For the School on Wheels (SOW) programme, male beneficiaries increased from 54.71 per cent in 2018 to 61.38 per cent in 2019 but dropped in 2020 to 44.97 per cent. Female beneficiaries were below average in 2018 and 2019 but increased to 55.03 per cent in 2020. Females that benefited from Advanced-National Open Apprenticeship Scheme (A-NOAS) were more than average in 2018 (53.41 per cent) but reduced to 45.25 per cent in 2019. Male beneficiaries accounted for 46.59 per cent in 2018 and 54.75 per cent in 2019. Edo was the only state that took part in NDE training in 2018 with 123 female youths and all were provided with tools and equipment to establish their businesses. In 2019, of all 9,715 youths that took part, male youths made up only 11.03 per cent compared to 88.97 per cent of females, and they were all provided with tools and equipment to establish their businesses.

Two states namely, Kebbi and Benue with a total of 1,200 youths took part, again, the female had a higher proportion of beneficiaries (97.92 per cent) as against 2.08 per cent of males and they were provided with tools and equipment to establish their businesses.

Data from the Nigeria Security and Civil Defence Corps (NSCDC) shows that fewer female folks were recruited into the organization compared to their male counterpart and this is reflected in the ranks of officers of both sexes in the three years reviewed. In 2018, 2019 and 2020, the percentages of female Superintendent cadre were 26.53, 26.82, and 27.97 per cent respectively. The Female Inspectorate cadre was 31.11 per cent in 2018 but rose slightly to 31.32 per cent in 2019 and dropped to 30.82 per cent in 2020. Males also dominate the Females Assistant Cadre positions for three years. For instance, in 2018, the Females Assistant cadre was 22.61 per cent as against 77.39 per cent of males, 22.88 per cent females as against 77.12 per cent of males in 2019 and decreased to 22.31 per cent females compared to 77.69 per cent of males in 2020.

Power and Decision Making

Despite all efforts to promote the contribution of women in the domain of politics and decision-making, women have continued to record low representation at all tiers and levels of governance although they constitute almost half of the electorate. Available data from the Office of the Secretary to Government of the Federation (SGF) reveals the number of males and females appointed as Ministers from 2016 - 2019. In 2016 only 7 females were appointed, this decreased in 2017 to only 5 females. Female Ministers appointed in 2018 and 2019 were 6 and 7 respectively. In Nigeria, women have never been appointed as secretary to the government of the federation nor elected as President or Vice President since independence and the return of democracy in 1999 to the last election in 2019. Also, women have been underrepresented in the National Parliament. The highest representation in the National Parliament of 7.2 per cent was recorded in 2007-2011, it was 6.6 per cent each in 2011 - 2015 and 2015 - 2019. A total of 6 women and 73 men occupied principal positions in the Senate in 2016 and 2017. The years, 2018 and 2019 have the same figure of 7 women and 72 men as principal officers. In 2016 - 2019, only 6 women occupied the position of committee chairperson for each year. In 2018 and 2019, a woman occupied the position of Minority Senate Leader in the Senate. The current Women's representation in National Parliament (National Assembly) 2019 was 6.2 per cent.

In Nigeria, 31.87 and 31.98 per cent were female members of National Judicial Officers in 2016 and 2017 respectively, while 2018 recorded 28.86 per cent. No female had been the Chief Justice of Nigeria, President of the National Industrial Court, and the Chief Registrar of the Supreme Court from 2016 to 2018. For the same period, females had been the President of the Court of Appeal (National Judicial Council).

Violence Against Women and Crime

The percentage of women aged 15 - 49 who have ever experienced physical violence since age 15 increased from 27.8 per cent in 2013 to 31 per cent in 2018. Among 'ever married women' who reported experiencing physical violence, 60.6 per cent suffered it from their 'Current Husband/Partner' in 2013 and slightly decreased to 58.0 per cent in 2018. Among women aged 15-49, the percentage that ever-experienced sexual violence irrespective of the person that committed the act was 7.4 per cent in 2013 and increased to 9.1 per cent in 2018. A greater percentage of incidence of sexual violence against women aged 15-49 'ever married', was committed by their 'Current Husband/Partner' (57.9 per cent in 2013 and increased to 64.8 per cent in 2018) followed but not close by their 'Former Husband/Partner' (21.6 per cent in 2013 and decrease to 18.4 per cent in 2018). In Nigeria, about one out of three women (33.4 per cent) aged 15-49 have experienced physical or sexual violence in 2018 while it was 29.6 per cent in 2013. The 'Never Married' women were not left out as a reasonable percentage of them suffered this violence from 'Stranger' at 29.2 and 27.6 per cent in 2013 and 2018 respectively. Physical or Sexual Violence was highest among the age group 30-39 (31.5 per cent) in 2013 and increased to 34.4 per cent in 2018. All forms of violence against women were higher in 2018 than in 2013, as the overall prevalence of spousal physical or sexual or emotional violence increased from 24.5 per cent in 2013 to 36.2 per cent in 2018 (NDHS, 2013 and 2018).

According to MICS/NICS, 2021 report, nationally 42 per cent of men believe that a husband is justified in beating his wife if she refuses sex with him, while 58 per cent of women had the same believe. However, 14.0 per cent of women believe that a husband is justified in beating his wife if she argues with him, while 10.0 per cent of men had the same believe nationwide. Nationally, 8.1 per cent of both women and men had this believe that a husband is justified in beating his wife if she burns the food'. In 2021, 8.2 per cent of females aged 0-14 had been circumcised in Nigeria.

No female was convicted for bank fraud as against 13 males convicted in 2018, three (3) females as against 19 males, and 1 female as against 21 males were convicted in 2017 and

2019 respectively. Few females were convicted for advance fee fraud, out of 118 females arrested in 2017 only 5 were convicted, only 1 out of 349 females arrested in 2018 was convicted and 4 out of 337 females arrested were convicted in 2019. There was a huge gap in the ratio of females to males convicted of economic crime across the years, it was 1 to 101 in 2017, 1 to 104 in 2018, and 13 to 145 in 2019. Seven (7) females were convicted of money laundering in 2019 and no female was convicted in 2017 and 2018. There was no female convicted for the crime of embezzlement and bribery/corruption throughout the three years (2017-2019). Only 8 females were convicted of Cyber Crime in 2019 and none in 2017 and 2018 (EFCC). The percentage of female suspects arrested for drug-related offences was between 6.72 per cent in 2012 to 8.06 per cent in 2021 (NDLEA). Women were the most trafficked than their male counterparts, women aged 16-25 and 26-35 were trafficked at 91.82 per cent and 91.08 per cent respectively. In 2021, the percentage of females aged 1-17 that were trafficked for forced labour was 64.15 per cent (NAPTIP). Females were the major victims of human trafficking for prostitution, in 2021 it was 99.72 per cent. Data from Nigeria Correctional Services shows that one out of ten persons admitted into prison in Nigeria is a female (4.9 per cent in 2020).

Exposure to Mass Media

Nationally, in 2021 available data from (MICS/NICS, 2021) shows that 7.4 per cent of women and 17.2 per cent of men read newspapers at least once a week. Women aged 30-34 and men aged 40-44 are highest among those that read a newspaper at least once a week. Urban and rural females constitute 12.9 and 2.7 per cent of those who read a newspaper at least once a week respectively, whereas 28.1 per cent of Urban males and 8.4 per cent of rural males read newspapers at least once a week.

Females who listen to the radio at least once a week constitute 34.4 per cent as against 50.8 per cent of males nationally. The attitude to listening to the radio also varies between men and women and between urban and rural dwellers. For instance, 22.0 per cent of females and 39.0 per cent of males in the rural areas listen to the radio at least once a week, while it was 49.1 and 65.3 per cent of females and males in urban areas respectively.

Still from the 2021 MICS/NICS report, 42.7 per cent of females and 48.9 per cent of males watch television at least once a week nationwide. Females and males residing in urban areas who watch television at least once a week constitute 73.6 and 68.1 per cent respectively. Similarly, 21.2 per cent of females and 28.8 per cent of males watch television at least once a week in rural areas. While 66.3 per cent of males and 53.9 per cent used any media at

least once a week, only 12.7 per cent of males and 5 per cent of females used all three media at least once a week.

Females accounted for 13.4 per cent and males constitute 21.8 per cent of those that ever used a computer. Similarly, the percentage of those who used a computer during the last three months was 12.1 per cent for males and 6.4 per cent for females. Males were found to be more of those that used a computer at least once a week during the last three months with 9.2 per cent while females represent 4.6 per cent.

Furthermore, 78.6 per cent of females and 88.4 per cent of males used a mobile phone during the last three months. The percentage of females and males that used a mobile phone at least once a week during the last three months were 78.1 and 65.8 per cent respectively (MICS/NICS, 2021).

Males who ever used the internet were found to be more (41.6 per cent) than females (24.0 per cent). Those that ever used the internet in the urban area were also found to be more when compared to the rural dwellers. Males and females accounted for 61.3 and 39.8 per cent respectively in the urban areas, however, in the rural areas, about 1 out of 4 (25.5 per cent male) and 1 out of ten (10.6 per cent female) used the internet.

CHAPTER 1: POPULATION

Key Findings

- Nigeria's population for 2021 is estimated at over 211 million people.
- Women constituted 49.99 per cent and men 50.01 per cent in 2021.
- The population growth rate was estimated at 2.53 per cent.
- The sex ratio was 100.1 men to 100 women in 2021.

1.1 Introduction

Population size and growth patterns directly affect human living conditions across the globe. This chapter elaborates on the general population dynamics and patterns in the country and the population of elderly men and women.

1.2 General Population Patterns

1.2.1 Population and Growth Rate

Nigeria is the most populous country in Africa and the seventh most populous country in the world². In 2021, the population of Nigeria was estimated to be 211,493,324 compared to 206,283,338 in 2020 and 201,135,262 in 2019 (NPC). Between 2019-2021, it is observed that the population growth rate has declined annually due to changes in fertility, mortality, and migration. The growth rate which was 2.60 per cent in 2019 declined to 2.56 per cent in 2020 and 2.53 per cent in 2021.

Women constitute 49.99 per cent of the total population, while men constitute 50.01 per cent in 2021. The sex ratio was 100.1 men to 100 women in 2021 (Figure 1 and Appendix ST 1).

Source: National Population Commission (NPC)

a. Distribution of Population of the Elderly (60+ Years) by Sex

In Nigeria, both women and men who are 60 years and above are regarded as elderly. The proportion of young people in Nigeria is constantly rising, which is a demographic phenomenon.

Great changes typically take place in communities where most people are young, active, and vigorous, but societies with a sizable proportion of the elderly confront obstacles, particularly in guaranteeing that access to appropriate living circumstances is ensured throughout the prolonged lifespan.

In 2019, the estimated elderly population was 8,986,055, while in 2020 and 2021 it increased to 9,370,131 and 9,777,339 respectively. The percentages of female elderly were 46.20%, 46.38%, and 46.58% for 2019, 2020, and 2021 respectively (Table 1).

Table 1: Distribution of Population of the Elderly (60+ Years) by Sex

Year	Total Elderly 60+ Years	Male Elderly 60+ Years	Female Elderly 60+ Years	% Female
2019	8,986,055	4,834,809	4,151,246	46.20
2020	9,370,131	5,023,895	4,346,236	46.38
2021	9,777,339	5,222,623	4,554,716	46.58

Source: National Population Commission (NPC)

CHAPTER 2: HEALTH

Key Findings

- Life expectancy in Nigeria is 57.2 years for females and 55.1 years for males in 2022.
- The total fertility rate was 4.6 per woman, with 3.6 for Urban and 5.4 for Rural in 2021.
- Adolescent fertility was 75 live births per 1,000 women in 2021.
- The crude birth rate was 31.7 live births per 1,000 women in 2021.
- The percentage of pregnant women in Nigeria who attended Antenatal Care and were received at least once by skilled health personnel in 2021 was 69.6 per cent.
- Women who are currently married or in a union or whose partners are using any contraceptive method for pregnancy prevention and family planning is 18 per cent in 2021.
- The maternal mortality rate was 512 per 100,000 live births in 2018.
- Under 5 mortality rate was 102 per 1000 live births in 2021.
- The percentage of people aged 15-49 who are knowledgeable of HIV prevention is 74.1 per cent for males and 70.7 per cent for females in 2020.
- Pregnant women with malaria were 372,577 in 2019 and rose to 954,615 and 1,233,002 in 2020 and 2021 respectively.
- Women who were using menstrual hygiene materials in a private place to wash and change while at home recorded 91.2 per cent, while 16.6 per cent of women were excluded from activities during menstruation in 2021.

2.1 Introduction

According to the 1995 Beijing Platform for Action, women have a right to the highest degree of physical and mental health that is feasible and necessary for their life and wellbeing, as well as their ability to engage in all spheres of public and private life (BPA, 1995). To reach their greatest potential, women must be in good health. This covers healthy eating, sexual and reproductive rights, mental health, and the absence of violence. In light of this, the World Health Organization states that "health" is a condition of whole physical, mental, and social well-being and not just the absence of sickness or infirmity (WHO). However, gender inequality persists in the provision of health services and women often find it challenging to access proper healthcare. Empowering women with the necessary knowledge and skills to fulfil these health potentials, while ensuring the availability and accessibility of primary healthcare, is not only essential to their well-being but also to that of their children and families. By addressing gender disparities in the delivery of health services, all women and men would have healthier lives, which will ultimately result in greater gender equality in all aspects of life and the achievement of Sustainable

Development Goal (SDG) 3 by 2030, which is to "ensure healthy lives and promote well-being for all at all ages."

2.2 Life Expectancy at Birth

Life expectancy at birth represents the typical number of years that a newborn child can be anticipated to live given the current levels of mortality in a country. This health indicator, which is derived from age-specific death rates, gives an overview of a population's general health state and makes it possible to look into the lifespan of men and women individually.

Nationally, there was a continuous increase in the life expectancy of both males and females over the years. In 2020, 2021, and 2022, life expectancies for females were 56.6, 56.9, and 57.2 years, while males stood at 54.6, 54.8, and 55.1 years respectively (Figure 2)

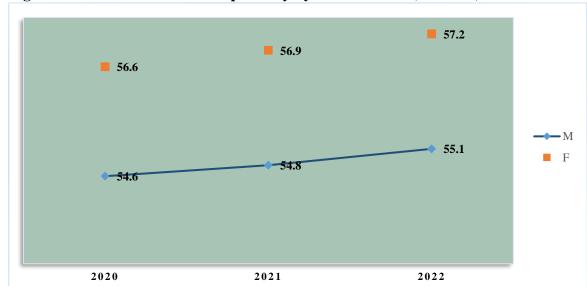

Figure 2: Distribution of Life Expectancy by Year and Sex (National)

Source: National Population Commission

2.3 Reproductive Health

Women's reproductive years start at puberty and end with menopause. During this time, most women go through significant life events like starting a family, getting married, and engaging in sexual activity. Additionally, many women of childbearing age experience problems during this time, often leading to illness and even death. SDG 3.7, which aims to 'ensure universal access to sexual and reproductive health care services, including for family planning, information, education, and the integration of reproductive health into national strategies and programmes." is set to end by 2030. The reproductive age is between 15-49 years.

2.3.1 Total Fertility Rate

Fertility is the ability of a human to reproduce another human being. It is currently assessed by the total number of children ever born. Practices around childbearing depend on the civilization or community's culture, tradition, level of education, and general level of development. The age at which someone first engages in sexual activity and the availability of contraception are two prominent factors that affect fertility rates. The total fertility rate (TFR), which is the total number of children a woman bears during her whole reproductive years, is the most widely used indicator or measure of fertility. According to MICS/NICS 2021, Nigerian women had a total fertility rate of 4.6 children throughout their whole reproductive years. The total fertility rates for urban and rural women were 3.6 and 5.4 children respectively.

2.3.2 Adolescent Fertility

Adolescent Fertility Rate is the annual proportion of births to women between ages 15-19 per 1,000 women. It is also known as the age-specific fertility rate for women between ages 15-19. According to MICS/NICS 2021, there were 75 live births per 1,000 women among adolescents in Nigeria. Also, there were 32 live births per 1,000 women among urban residents and 108 live births per 1,000 women among rural residents.

2.3.3 Crude Birth Rate

Crude Birth Rate (CBR) is the number of live births per 1,000 population in a given year. The crude birth rate in Nigeria in 2021 was 31.7 live births per 1,000. For urban and rural populations during the period under review, the crude birth rates were 26.2 and 35.7 live births per 1,000 women (Table 2).

Table 2: Age-specific, Total Fertility Rates, General Fertility Rate, and the Crude Birth Rate for the 3 Years Preceding the Survey According to Residence, MICS 2021

	Residence		Total
Age Group	Urban	Rural	
15-19	32	108	75
20-24	140	242	197
25-29	190	243	219
30-34	184	208	197
35-39	114	154	134

40-44	50	78	65
45-49	9	45	28
TFR (15-49)	3.6	5.4	4.6
GFR	110.7	167.9	141.5
CBR	26.2	35.7	31.7

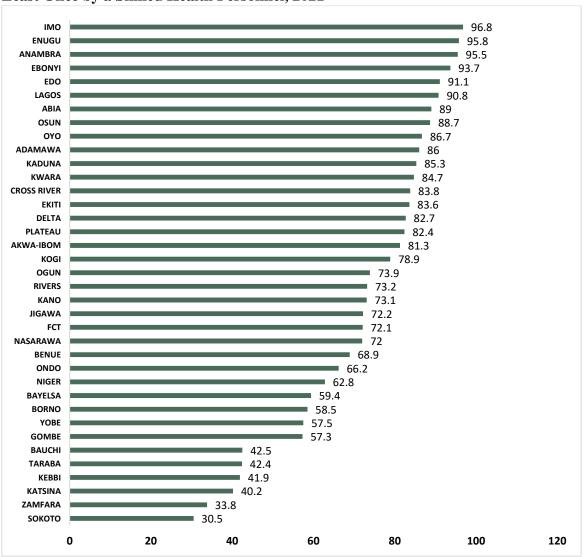

Source: MICS/NICS, 2021

2.3.4 Antenatal Care

An expectant mother receives care from the first through the third trimester of her pregnancy, including the time it takes until the baby is delivered. To improve the outcome of pregnancy and delivery, the standard of antenatal care mandates pregnant women to visit a hospital or Primary Health Care (PHC) and be attended to by skilled health personnel during their pregnancy. In addition to keeping an eye on the mother's and foetus' health, this ensures prospective difficulties are spotted. It also informs women on the proper nutrients to consume throughout pregnancy and breastfeeding.

In Nigeria, pregnant women who attended Antenatal Care and were received at least once by skilled health personnel in 2021 was 69.6 per cent. Imo state had the highest with 96.8 per cent, while Sokoto had the least with 30.5 per cent (Figure 3).

Figure 3: Percentage Distribution of Pregnant Women Aged 15-49 With a Live Birth in the Last Two Years Who Attended Antenatal Care and Were Received at Least Once by a Skilled Health Personnel, 2021

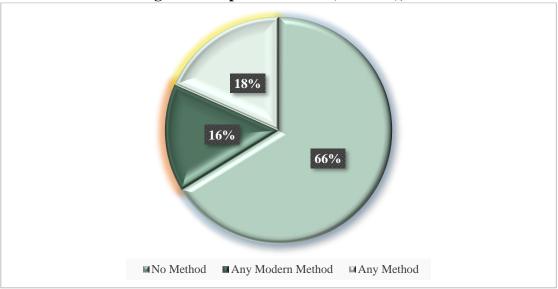

Source: MICS/NICS, 2021

2.3.5 Contraceptive Use

To achieve part of SDG 3.7 on family planning, couples can use any contraceptive technique to reduce or space out the number of children they should have. Statistics on the use of any method of contraceptives or none are provided in MICS/NICS, 2021.

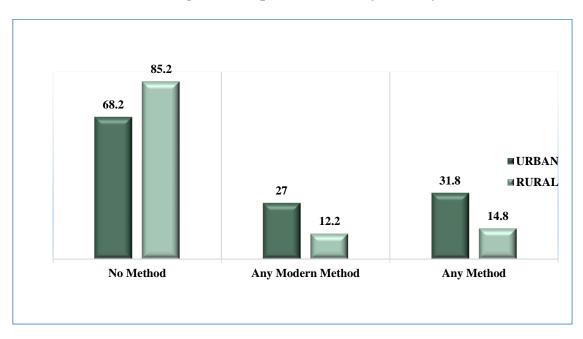

Source: MICS/NICS, 2021

According to the Multiple Indicator Cluster Survey/National Immunization Coverage Survey, 2021, 18 per cent of women who are currently married or in a union are using any contraceptive method for pregnancy prevention and family planning. However, 16 per cent are using 'any modern method', while 66 per cent are not using 'any method' (Figure 4a).

Figure 4b: Percentage of Women Currently Married or in a Union Who are Using or Whose Partner is Using Contraceptive Methods by Locality, 2021

Source: MICS/NICS, 2021

In urban areas in Nigeria, the percentage of women who are currently married or in a union who are using or whose partner is using a contraceptive method for pregnancy prevention and family planning was 31.8 per cent. Only 27 per cent are using modern methods, while 68.2 per cent do not use any method at all (Figure 4b).

However, in rural areas, 14.8 per cent of these women use contraceptive methods for pregnancy prevention and family planning, while only 12.2 per cent use modern methods and 85.2 per cent do not use any method.

Across the states, Jigawa state recorded the highest percentage of women who do not use 'Any method' at all at 93.0 per cent, followed by Borno state with 92.5 per cent and Lagos state had the lowest percentage with 54.7 per cent (Appendix, ST 4).

2.4 Maternal Mortality Ratio

Maternal mortality occurs when a mother dies during pregnancy, childbirth, within 42 days of the child's birth, or when the pregnancy is terminated. The maternal mortality ratio measures how many women die for every 100,000 live births. The desire of the international community to lower the worldwide maternal death rate to fewer than 70 per 100,000 live births has been sparked by (SDG3:1). In Nigeria, there were 512 maternal mortalities for every 100,000 live births during the seven years prior to the NDHS, 2018.

2.5 Early Childhood Mortality Rate

Data on infant and child mortality is important for assessing a nation's population, socioeconomic progress, and standard of living. As stated in SDG 3.2, it can also assist in identifying children who may be at a high risk of death and lead to initiatives to lower such risks (end preventable deaths of newborns and children under 5 years of age by 2030).

Table 3: Distribution of Early Child Mortality Rate by State

STATE	Neonatal Mortality Rate	Post-neonatal Mortality rate	Infant Mortality Rate	Child Mortality Rate	Under Five Mortality Rate
ABIA	19	(35)	(55)	(64)	(115)
ADAMAWA	25	25	51	13	63
AKWA-IBOM	31	10	41	8	49

Note: () means unweighted children

2.5.1 Neonatal Mortality Rate

Neonatal mortality is the likelihood that a child will pass away during the first month of birth. Neonatal mortality rates nationwide were found to be 34 per 1,000 live births according to the results of the most recent MICS 6 report, 2021. Ogun state had the highest newborn mortality rate at 56 per 1,000 live births and Ebonyi state had the lowest rate at 1 per 1,000 live births for weighted children.

Meanwhile, Rivers state had the greatest neonatal mortality rate at 70 per 1,000 live births and Enugu state had the least rate at 8 per 1,000 live births under the categories of unweighted children (Table 3).

2.5.2 Infant Mortality Rate

The infant mortality rate is the likelihood that a child will pass away before turning one. According to the MICS 2021 report, the infant mortality rate was 63 per 1,000 live births in 2021 nationwide. The highest infant death rate for weighted children was 104 per 1,000 live births in Sokoto state, while the lowest was 3 per 1,000 live births in Ebonyi state.

However, Rivers state recorded the most infant mortality rate for unweighted children with (87) per 1,000 live birth, while Lagos state had the lowest with (15) per 1,000 live births (Table 3).

2.5.3 Child Mortality Rate

Child mortality is the likelihood that a child will pass away between the ages of one and five. Nationally, there were 42 deaths of children for every 1,000 live births. The highest

child mortality rate was recorded in Sokoto State at 109, while the lowest was in Akwa-Ibom at 8 per 1,000 live births for weighted children.

Meanwhile, under the categories of unweighted children, Oyo state had the highest with (180) per 1,000 live births, while Lagos state had the least with (0.0) per 1,000 live births (Table 3).

2.5.4 Under 5 Mortality

Under-5 mortality is the likelihood that a child will pass away before their fifth birthday, or between birth and their fifth birthday. According to MICS 2021, under 5 mortality rate was 102 per 1,000 live births.

Kebbi state had the highest in under-5 mortality with 179 deaths of under-5 children per 1,000 live births and Lagos state had the lowest rate at 15 per 1000 live births for weighted children. Also, for unweighted children, Abia state was the highest with (115) per 1,000 live births, while Anambra state had the lowest with (22) per 1,000 live births (Table 3).

2.6 HIV and AIDS

Acquired Immune Deficiency Syndrome (AIDS) is one of the most significant problems with public health and development that the world is currently confronting. The Human Immune Deficiency Virus is what causes AIDS (HIV). HIV impairs immunity, leaving the body vulnerable to opportunistic illnesses and secondary infections. HIV infection progresses to AIDS, which is always lethal if left untreated. The main method of HIV transmission is through sexual activity. Unsafe injections, usage of contaminated blood during blood transfusions, and mother-to-child transmission (in which the mother passes HIV to her child during pregnancy, delivery, or breastfeeding) are additional means of transmission. Through the efforts of the government and the assistance of development partners, HIV/AIDS programs nationwide have received a boost, leading to an expansion of prevention, care, and treatment programs that are aimed at combating the disease (NDHS, 2018).

HIV/AIDS has been a serious health concern for both women and men in Nigeria since the early 1980s. Most of the populations affected by the epidemic were those already suffering from extreme poverty, thereby undermining global development efforts. It has been observed that it disproportionately affects the working population, limiting both men and women from making significant contributions to social and economic development and having a significant negative impact on family structure. The epidemic increases the cost

of caring for family members and depletes savings at the household level. By 2030, SDG Goal 3 - Target 3 seeks to tackle hepatitis, water-borne diseases, and other communicable diseases, while putting an end to the epidemics of AIDS, tuberculosis, malaria, and neglected tropical diseases.

a. Percentage of People Aged 15-49 With Knowledge of Hiv Prevention By Sex,2020

Available data from NACA shows the percentage of people aged 15-49 who are knowledgeable of HIV prevention nationally, 74.1 per cent were males and 70.7 per cent were females (Figure 5). Subsequently, Enugu state had the highest percentage of the male population who are knowledgeable of HIV prevention at 98.5 per cent and Bauchi had the least at 46.3 per cent. Also, Benue state had the highest percentage of the female population who are knowledgeable of HIV prevention at 93.7 per cent, while Niger state had the lowest at 46.9 per cent (Appendix, ST 5).

b. Percentage of HIV/AIDs Patients Having Access to Antiretroviral Treatment (2018-2020)

Data from the National Agency for Control of Aids (NACA) shows that all patients with HIV/AIDS have access to Antiretroviral treatment (Appendix, ST 6). Figure 6 below illustrates the percentage distribution of patients who had HIV/AIDS and had access to antiretroviral treatment from 2018 to 2020. In the three years reviewed, HIV/AIDS infection is more rampant among females than in males. In 2018, 2019, and 2020, the percentage of females infected and had access to antiretroviral treatment were 68.93, 68.40, and 66.46 per cent, while males accounted for 31.07, 31.60, and 33.54 per cent respectively.

Figure 6: Percentage of HIV/AIDS Patients Having Access to Antiretroviral Treatment (2018-2020)

2.7 Reported Cases of Pregnant Women with Malaria

The World Health Organization (WHO) states that pregnancy-related malaria infection is a serious public health issue with severe hazards to the pregnant woman, her feotus, and the newborn infant. Malaria can cause spontaneous miscarriage, stillbirths, premature births, and low birth weight in areas with low transmission (where patients have relatively little acquired immunity to malaria), whereas in areas with high transmission, malaria may result in infant mortality.

Data from the Federal Ministry of Health (FMoH) indicates that the number of pregnant women with malaria across states had increased progressively from 372,577 in 2019 to 954,615 in 2020 and 1,233,002 in 2021 (Figure 7).

Borno state recorded the highest number of pregnant women with malaria in 2019 with 55,161, followed by Sokoto state with 44, 609. Meanwhile, Kogi state had the highest number of pregnant women with malaria in 2020 and 2021 with 90,937, while Ekiti state recorded the lowest across the three-year interval with 304 in 2019, though increased to 1,232 in 2020 and 1,709 in 2021 (Appendix, ST 7).

2.8 Menstrual Hygiene

Menstrual Health is essential to improving global population health, achieving Sustainable Development Goals, and realizing gender equality and human right. Achieving menstrual hygiene implies that women and girls who experience a menstrual cycle were able to care for their bodies during menstruation such that their preferences, hygiene, comfort, privacy, and safety are supported. Figure 8 below, shows the percentage of women aged 15 – 49 with menstrual hygiene in 2021. Nationally, 91.2 per cent of women were using menstrual hygiene materials with a private place to wash and change at home, while 16.6 per cent of women were excluded from activities during menstruation.

However, across the states, Gombe state recorded the highest percentage of women who were using menstrual hygiene materials with a private place to wash and change at home at 98.3 per cent, while Zamfara state had the least with 72.5 per cent. Also, Borno state recorded the highest percentage of women who were excluded from activities during menstruation at 32.9 per cent, while Benue state had the least with 5.0 per cent (Appendix ST 8).

2.9 Health Insurance

Health insurance is a type of insurance that covers the whole or a part of the risk of a person incurring medical expenses, spreading the risk over a large number of persons. It covers both adults and infants.

Statistics from the Multiple Indicator Cluster Survey (MICS/NICS, 2021) show the distribution of women and men aged 15 – 49 covered by health insurance. Nationally, only 2.8 per cent of women were covered by health insurance, while 2.7 per cent of men were covered. Meanwhile, across the state, FCT in the North-central recorded the highest percentage of women with 12.4 per cent and Sokoto state in the North-west had the least with 0.0 per cent. FCT, also, recorded the highest percentage of men covered by health insurance with 12.5 per cent, while Kogi state in North-centra had the least with 0.0 per cent. For data on children see (Appendix ST 9).

2.10 Health Personnel

2.10.1 Doctors and Dentists

From Table 4 below, on average, the percentage of female Medical Doctors was less than 40 per cent for the three years under review. It was 34.60 per cent in 2018, 35.56 per cent in 2019 and 37.03 per cent in 2020, while that of the male Medical Doctors was above average at 65.40 per cent in 2018, 64.44 per cent in 2019 and 62.97 in 2020. Also, the percentage of female Dentists was below average at 44.40 per cent in 2018, 42.16 per cent in 2019 and 42.28 per cent in 2020. Subsequently, the percentage of male Dentists was slightly above average at 55.60 per cent in 2018, 57.84 per cent in 2019 and 57.72 per cent in 2020.

CHAPTER 3: EDUCATION

Key Findings

- The literacy rate in the English Language among young women and men aged 15-24 was 72.3 per cent for females and 78.3 per cent for males in Nigeria (NLSS 2019).
- Female enrolment in Adult/Basic Literacy Education in 2019 was 49.19, decreased to 45.92 per cent in 2020 and increased slightly in 2021 to 46.10 per cent.
- In both public and private Primary Schools, the percentage of girls' enrolment was 48.39 in 2018, 48.49 in 2019 and 48.55 per cent in 2020.
- The total estimated number of children in primary school in Nigeria that are out of school in 2017/18 was 10,193,917; the percentage of females and males was 37.80 per cent and 62.20 per cent respectively.
- Female enrolments into JSS were 48.31, 50.07 and 49.80 per cent in 2018, 2019 and 2020, whereas, in the SSS category, female enrolments were 47.13 and 47.41 per cent in 2018 and 2019 respectively.
- The percentage of females who enrolled on the three categories of colleges of education in Nigeria for the 2017/2018 academic sessions ranged between 30-36 per cent; 32.43 per cent in Federal, 30.37 per cent in State and 35.14 per cent in Private colleges of Education.
- In the 2017/2018 academic sessions, 39.63 per cent and 43.24 per cent of female students enrolled for the National Diploma (ND) and Higher National Diploma (HND) respectively.
- Female enrolment in Nigerian universities at the undergraduate level was almost the same for the two academic sessions under review (43.82 in 2018 and 43.46 per cent in 2019).
- In 2019, female enrolment into 'Engineering and Technology' and Sciences was far below that of males, 12.06 per cent of females and 87.4 per cent of males enrolled for 'Engineering and Technology', 27.6 per cent of females and 72.4 per cent of males enrolled for 'Sciences'. However, females enrolled more in Basic Medical and Health Sciences where 58.05 per cent of females enrolled as against 41.95 per cent of males.
- The distribution of females among Academic staff in Nigerian University was 24.06, 23.65 and 23.66 per cent for the 2018, 2019 and 2020 academic years respectively. Further, the distributions were 36.26, 36.0 and 37.04 per cent for non-academic staff in the same years.
- The percentage of female professors in Nigeria Universities in 2017 and 2019 was low at 15.43 per cent as against 84.57 per cent of males, and 15.17 per cent as against 84.83 per cent males respectively.

3.1 Introduction

Education is the social institution through which society provides its members with important knowledge, including basic facts, job skills, and cultural norm values. It improves personal lives and enables society to run smoothly³. In addition, education serves as the foundation upon which human development and social progress rest. In view of this, the importance of education for women's advancement was stressed in the Beijing Platform for

_

³ (www.dictionary.com)

Action, where it was designated as one of the 12 crucial areas of concern and underlined as essential for gender equality and women's empowerment. Those important measures on the platform include but are not limited to, eliminating gender-based discrimination in education at all levels as well as eradicating illiteracy among women, improving access to vocational training, science and technological education, and continuing education. The Sustainable Development Goal (SDG) goal 4, 2030, and Africa Agenda 2063 ensure inclusive and equitable quality education as well as promote lifelong learning opportunities for all.

3.2 Educational Outcomes

3.2.1 Literacy

The United Nations Educational, Scientific and Cultural Organization (UNESCO) defines a literate person as someone who can with understanding both read and write a short and simple statement on his/her everyday life, while an illiterate person is one who cannot with understanding both read and write a short and simple statement on his/her daily life.

The literacy rate in English Language among young women and men aged 15-24 interviewed was 72.3 per cent and 78.3 per cent respectively (NLSS 2018/2019) as shown in figure 10 below.

3.3 Participation in Education

3.3.1 Adult/Basic Literacy Education

Total Enrolment in Adult/Basic Literacy Education by State, Sex (2019 - 2021)

Figure 11 below shows that female enrolment in Adult/Basic Literacy Education in 2019 was 49.19 per cent and decreased to 45.92 per cent in 2020 and increased slightly in 2021 to 46.10 per cent. Kebbi state recorded the lowest percentage of female enrolment in 2019 and 2021 with 12.48 and 7.92 per cent respectively. Further in 2020, Kogi state recorded the least female enrolment with 7.92 per cent. On the other hand, the highest female enrolment was recorded in Kano state with 94.58 per cent in 2019, while in 2020 and 2021 only females enrolled in Katsina and Kano respectively (Appendix, ST 12).

3.3.2 Nomadic Education

Nomadic education is an important component of the formal educational system that aims to provide equitable educational opportunities to all social groups, regardless of ethnicity, geography, gender, or social class.

Distribution of Nomadic Primary School Pupils Enrolment by Sex (2018-2020)

According to National Commission for Nomadic Education, female enrolment in Nomadic Primary Schools in 2018 was 49.72 per cent but increased significantly to 64.76 per cent in 2019. However, this declined to 49.28 per cent in 2020 (Figure 12).

In 2018, Sokoto state had the highest percentage of female enrolment, at 73.28 per cent, while Yobe state had the lowest (37.32 per cent). In 2019, Bauchi state recorded the highest female enrolment (90.53 per cent) and Yobe state still recorded the lowest female enrolment at 43.79 per cent. In 2020, Akwa Ibom had the highest female enrolment of 58.19 per cent, while Zamfara had the lowest female enrolment of 32.08 per cent (Appendix, ST 13).

3.3.3 Universal Basic Education

a. Early Childhood Care Development Education (ECCDE)

ECCDE seeks to provide a firm and comprehensive basis for lifetime learning and well-being by addressing a child's social, emotional, cognitive, and physical needs holistically. This educational program can produce future citizens that are compassionate, responsible, and responsive.

i. Early Childhood Care Development Education Enrolment by State and Sex 2018-2020 (Private)

According to UBEC, girls' enrolment nationwide in private schools was almost at par with their male counterparts in the three years under review. Female enrolment in 2018 was 49.82 per cent as against male with 50.18%. In 2019 and 2020, female enrolments were 50.09 and 50.12 per cent, while males were 49.91 and 49.88 per cent respectively (Figure 13).

From 2018-2020, Akwa Ibom ranked as the state having the highest female enrolment of

52.08, 52.29, and 52.38 per cent respectively. On the other hand, Kebbi state ranked as the state with the least female enrolment of 47.6, 47.87, and 47.89 per cent respectively (Appendix, ST 14).

ii. Early Childhood Care Development Education Enrolment by State and Sex 2018-2020 (Public)

2019

2020

Female enrolment was only slightly different from male enrolment in all the three years under review nationwide. While female enrolment was 49.93 per cent in 2018, it increased slightly to 50.09 per cent in 2019 and then to 50.85 per cent in 2020.

Figure 14: Percentage Distribution of ECCDE Enrolment in Public Schools by Gender, 2018-2020

Source: Universal Basic Education (UBE)

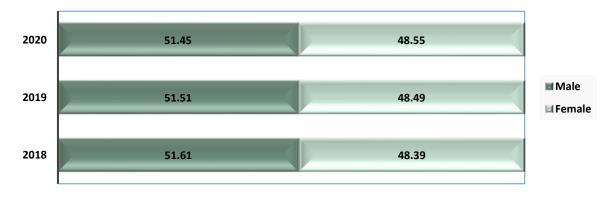

Oyo state had the highest percentage of female students enrolled in public ECCDE in 2018 with 52.31 per cent, while Akwa –Ibom state had 52.29 per cent in 2019. In 2020, Osun state recorded the highest female enrolment (54.01 per cent). Zamfara state had the lowest number of female students enrolled in public ECCDE with 43.64 and 44.60 per cent in 2018 and 2020 respectively, while Kebbi state recorded the lowest in 2019 with 47.87 per cent (Appendix, ST 15).

3.3.4 Primary School

a. Primary School Enrolment by Sex (2018 - 2020)

Figure 15 below shows the enrolment among school-age boys and girls in Public and Private Primary schools (2018 - 2020). The percentage of girls' enrolment was 48.39, 48.49, and 48.55 per cent in 2018, 2019, and 2020 respectively. Male students were more than average in the three years of review (51.61, 51.51 and 51.45 per cent for 2018, 2019 and 2020 respectively)

Figure 15: Primary School Enrolment by Sex (2018 - 2020)

Source: Universal Basic Education (UBE)

Oyo state had the highest percentage of female enrolment in 2018 and 2019, with 51.94 and 52.04 per cent respectively, while Abia state recorded the highest (56.21 per cent) in 2020. Female enrolment was lowest in Zamfara state with 38.26 per cent in 2018, 38.41 per cent in 2019, and 38.42 per cent in 2020.

(Appendix, ST 16).

b. Estimated Number of Out-of-School Children at Primary School Level by Sex, 2017/2018

According to the 2018 Digest of Basic Education Statistics from the Universal Basic Education Commission (UBEC), the total anticipated number of children in primary school in Nigeria who are out of school was 10,193,917, with females accounting for 37.80 per cent and males accounting for 62.20 per cent (Figure 16 below).

In Edo state, the highest percentage of primary school girls out of school was 94.27 per cent, while Delta state had the lowest (2.51 per cent) of primary school girls out of school (Appendix, ST 17).

c. Distribution of Pupils that Completed Public and Private Primary 6 by Sex, 2018-2019

For 2018, pupils that completed primary 6 in public and private primary schools were 3, 079,691 and 425,974 respectively. Of these, 48.05 per cent of the pupils in public primary

school and 49.36 per cent of the pupils in private primary school were females implying that males that completed both public and private were more than average.

Similarly, in 2019, pupils that completed primary 6 in public and private primary schools were 3,067,121 and 432,709 respectively. Male pupils that completed primary school in both public and private schools were more than average. Females that completed public primary school accounted for 48.24 per cent, while 49.16 per cent of them completed private primary schools (Figure 17 and Appendix, ST 18 &19).

3.3.5 Junior Secondary School

a. Junior Secondary School Enrolment in Public and Private Schools (2018-2020)

■PUBLIC ■PRIVATE

Female enrolment into JSS was less than average in 2018 and 2020, however, in 2019, it was slightly above average. In 2018, female enrolment was 48.31 per cent, it increased to 50.07 per cent in 2019 and dropped slightly to 49.80 per cent in 2020 (Figure 18).

In the years under review, Bayelsa state had the least female enrolment of 24, 841; 27,749, and 27,813 students in 2018, 2019, and 2020 respectively. On the other hand, Lagos state had the highest female enrolment of 260,744 and 291,107 in 2018 and 2019. This further increased to 291,810 in 2020 (Appendix, ST 20).

b. Percentage Distribution of Students that Completed Junior Secondary Schools (Public &Private) by State, Year, and Sex (2018-2019)

2019

2020

According to Universal Basic Education Commission, 51.55 and 49.78 per cent of female students completed Junior Secondary School in public and private secondary schools in 2018 and 2019 respectively. Also, 48.45 per cent of male students completed Junior Secondary School in public and private secondary schools in 2018, while 50.22 per cent of male students completed JSS 3 in 2019 (Figure 19 below).

3.3.6 Senior Secondary School Education

a. Enrolment of Students into Senior Secondary School (SSS)

Figure 20 below shows the enrolment of students into senior secondary school (SSS) between 2018 and 2019 nationally. Female student enrolments in 2018 and 2019 were 47.13 and 47.41 per cent, while the male student enrolments into senior secondary school in 2018 and 2019 were 52.87 and 52.59 per cent respectively.

However, across the state, Kwara state recorded the highest female student enrolment with 196,443 in 2018, while Taraba state had the least with 13,913. Also, in 2019, Gombe state recorded the highest number of female student enrolment with 243,374 and Abia state had the least enrolment with 16,267 (Appendix, ST 23).

Figure 20: Percentage Distribution of Enrolment of Students into Senior Secondary School (SSS) by Year and Sex (2018-2019)

3.3.7 Tertiary Education

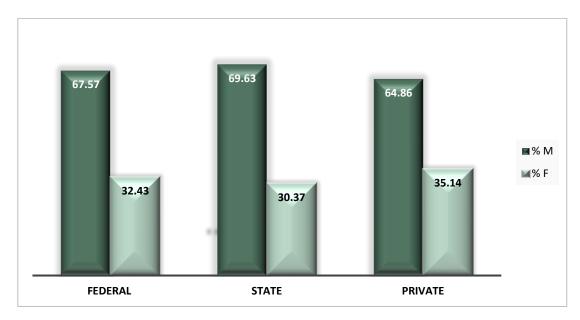

Tertiary institutions refer to all formal post-secondary education, including Colleges of Education, Colleges of Health Science, Polytechnics, Universities in Nigeria etc. On average, enrolment into tertiary institutions across the country was dominated by men.

a. Nigerian Colleges of Education

i. Enrolment into Nigerian Colleges of Education in the 2017/2018 Academic Session

Figure 22 below shows the percentage of females who enrolled in Federal, State, and Private College of education in Nigeria during the 2017/2018 -2019/2020 academic session. Female enrolments in all three categories of the institutions in 2017/18 were below average (32.43 per cent in the Federal, 30.37 per cent in the state, and 35.14 in the Private College of Education).

Figure 22: Summary of Student Enrolment in Nigerian Colleges of Education by Type, Year and Sex (2017/2018)

Source: National Commission for Colleges of Education

b. Polytechnics

i. Enrolment in Polytechnics by Programme (2017/2018)

Table 5 shows that in the 2017/2018 academic session, female students who enrolled for National Diploma (ND) and Higher National Diploma (HND) were less than average with 39.63 per cent, and 43.24 per cent compared to male students' enrolment which accounted for 60.37 per cent and 56.76 per cent respectively.

Table 5: Enrolment in Polytechnics by Programme (2017/2018)

Programme	Sex	Number	Percentage
National Diploma	Male	100,439	60.37
	Female	65,931	39.63
	Total	166,370	100
Higher National Diploma	Male	51,139	56.76
	Female	38,955	43.24
	Total	90,094	100

Source: National Board for Technical Education (NBTE)

ii. Out-turn in Polytechnics by Programme (2017/2018)

In 2017/2018, the percentage of female that graduated with a National Diploma (ND) and Higher National Diploma (HND) was less than 40 per cent (37.68 and 39.64 per cent), while

the male student's out-turn was above 60 per cent (62.32 and 60.36 per cent) respectively (Table 6).

Table 6: Out-turn in Polytechnics by Programme (2017/2018)

Program	Sex	Number	Percentage
	Male	44,852	62.32
National Diploma	Female	27,120	37.68
	Total	71,972	100.00
	Male	29,717	60.36
Higher National Diploma	Female	19,516	39.64
	Total	49,233	100.00

Source: National Board for Technical Education (NBTE)

c. Monotechnic

i. Monotechnic Enrolment by Institution (2017/2018)

According to NBTE, a total of 25,435 students enrolled in Mono-technic Institutions in 2017/2018. In the academic session, 15,917 students enrolled in the College of Agriculture, while 5,719 students enrolled in the College of Health Technology and 3,799 in Specialised Institutions. Overall, female students had a larger share of enrolment in the College of Health Technology (65.4) per cent but were far below average in Specialized Institutions (32.4) and College of Agriculture (35.42) per cent (Table 7).

Analysis shows further that, more females enrolled in the National diploma program of the College of Health Technology (66.69 per cent) than in Specialized Institutions (36.23) and the College of Agriculture (31.59 per cent). Similarly, females had the highest enrolment of 63.28 per cent in the Higher National Diploma program of the College of Health Technology, while the percentages of enrolment in Specialized Institutions and the College of Agriculture were just 33.3 and 33.43 per cent respectively (Figure 23).

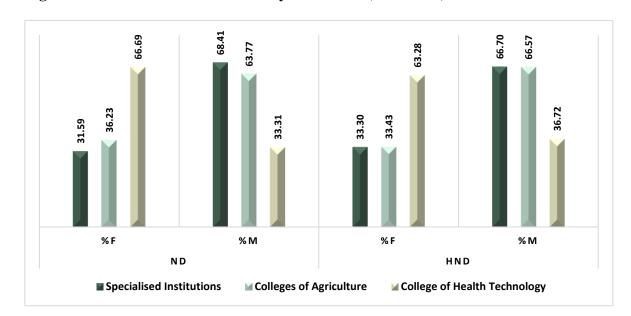

Figure 23: Monotechnic Enrolment by Institution (2017/2018)

ii. Percentage Distribution of Out-turn in Mono-technics (National Diploma) by Institution (2017/2018)

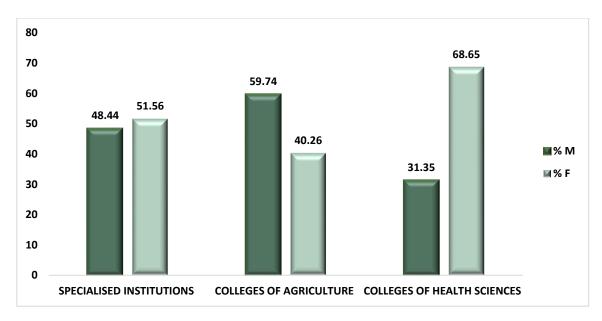

In the 2017/2018 academic session, female graduates from Colleges of Health Sciences were more than average (69.51 per cent), while 37.17 and 33.84 per cent graduated from Specialized Institutions and Colleges of Agriculture respectively. Furthermore, the percentages of males that graduated from Specialized Institutions, Colleges of Agriculture, and Colleges of Health Sciences were 62.83, 66.16, and 30.49 per cent respectively (Figure 24).

Figure 24: Percentage Distribution of Out-turn in Mono-technics (National Diploma) by Institution (2017/2018)

Source: NBTE, Kaduna

Figure 25: Percentage Distribution of Out-turn in Mono-technics (Higher National Diploma) by Institution (2017/2018)

Source: NBTE, Kaduna

iii. Percentage distribution of Out-turn in Mono-technics (National Diploma) by Institution (2017/2018)

Nearly seventy per cent (68.65) of females graduated from the Colleges of Health Sciences in the 2017/2018 academic session. This was followed by 51.56 per cent of females who graduated from Specialized Institutions, and 40.26 per cent from the College of Agriculture. Furthermore, males had the highest percentage of graduates from Colleges of Agriculture

(59.74 per cent) and the least from Colleges of Health Sciences (31.35 per cent). Males that graduated from Specialized Institutions accounted for 48.44 per cent (Figure 25).

d. Nigerian Universities

i. Enrolment in Nigeria Universities by Ownership, Level, Academic Session, and Sex

Female enrolment in Nigeria Universities was below average (43.82 per cent and 43.46 per cent) in the year 2018 and 2019 respectively. A further breakdown shows that in Private Universities female enrolment recorded the highest (50.99 per cent), followed by State Universities with 45.84 per cent and Federal Universities with 42.17 per cent in 2018. The same pattern was observed in 2019 where female enrolment in Private Universities was 48.77 per cent, State Universities with 45.32 per cent, and Federal Universities 42.18 per cent. (Table 8 below).

Table 8: Enrolment in Nigeria Universities by Ownership, Year, and Sex

University		2018		2019				
	M	F	% F	M	F	% F

ii. Full-Time Postgraduate Enrolment by Discipline and Sex (2019)

Figure 26 below depicts postgraduate enrolment in 2019 by discipline and sex. Among all disciplines considered, the greatest disparity was found between Female and Male enrolment in Engineering and Technology. Female enrolment in Engineering and Technology was 12.06 per cent, while male enrolment was 87.4 per cent. In Sciences, Female enrolment was also lower (27.6 per cent) compared to 72.4 per cent of male enrolment. On the other hand, females out-enrolled males in Basic Medical & Health Sciences, Medicine, and Education disciplines with 58.05, 53.59, and 52.83 per cent respectively. Male and female enrolments were almost at par in Pharmacy with 50.84 and 49.16 per cent respectively. Furthermore, in the same year, 40.75, 39.25 and 33.49 per cent of females enrolled in PGD, Masters and PhD programmes respectively (Appendix ST 31).

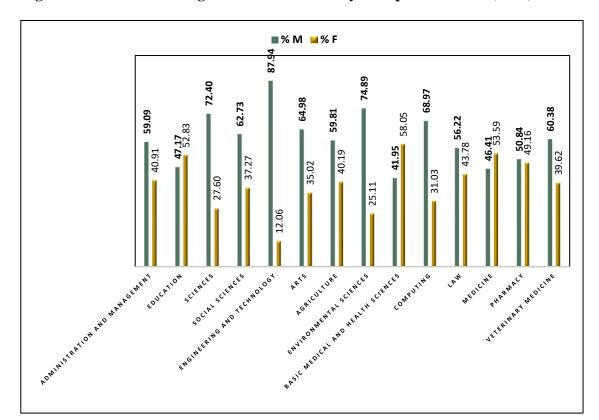

Figure 26: Full-Time Postgraduate Enrolment by Discipline and Sex (2019)

Source: National University Commission (NUC)

iii. Undergraduate New Entrants to Nigeria Universities by Mode of Entry and Sex

Admission to Nigeria Universities is either through passing the mandatory University Tertiary Matriculation Examination (UTME) and Post UTME or by Direct Entry mode. Data from Joint Admission and Matriculation Board (JAMB) depicts the total number of new entrants (UTME and Direct Entry) to Nigeria University in 2018 & 2019.

Female students admitted through (UTME and Direct Entry) were found to be below average in the two years, at 44.29 and 44.19 per cent in 2018 and 2019 respectively. Male student admission accounted for 55.71 and 55.81 per cent in 2018 and 2019 respectively which was above average compared to female admission (Figure 27 and Appendix ST 32).

iv. Full -Time Graduate Output by Major Discipline, Class of Degree and Sex (2019)

The quality of the 'class of degree' obtained from the university by male and female graduates can be a good measure to ascertain whether gender equality is attained in education or otherwise. The greater the disparity in the grades ('first class, "second class upper,' and 'second class lower,') among males and females, the wider the gender inequality in education. Particularly, obtaining good grades in Sciences, Engineering & Technology, and Medicine can stimulate ingenuity and creativity in individuals which by extension can lead to new ideas and innovations.

Data from the National University Commission depicts that male graduates with First class are more in Sciences courses, Sciences, Engineering and Technology, Environmental Science, Medicine and Veterinary Medicine than their female counterparts. In Engineering and Technology, 17.03 per cent of females had 'first classes' relative to 82.97 per cent of males, 16.97 per cent of females had 'second class upper' as against 83.03 per cent of males, 14.07 per cent of females had 'second class lower' compared to 85.93 per cent of males. In medicine, 38.03 per cent of females had 'first class' compared to 61.97 per cent of males, 60.27 per cent of females had 'second class upper' relative to 39.73 per cent of males, 58.26 per cent of females had 'second class lower' relative to 41.74 per cent of males.

However, females performed better than their male counterparts in Law and Education. The percentage of females with 'first classes' and 'second class upper' in law were 65.32 and 54.50 per cent respectively, while 55.16 and 55.64 per cent obtained 'first classes' and 'second class upper' respectively in Education (Table 9 & Appendix ST 33).

Table 9: Full Time Graduate Output by Major Discipline, Class of Degree and Sex (2019)

Discipline	FIRST CLASS		CLASS		SECON CLASS UPPER	\$	CLASS	SECOND CLASS LOWER		THIRD PASS CLASS		UNCLAS	SSIFIED
	% M % F		% M	% F	% M	% F	% M		% M	% F	% M	% F

3.4.2 Teachers with and Without Qualification in Public and Private ECCD by Sex, 2020

In 2020, out of 144,630 teachers, females made up 131,915, while male teachers were only 12,715. The percentage of teachers (male and female) not qualified was 44.49 per cent, while 55.51 per cent had at least one teaching certificate or the other.

Among the female teachers, 43.6 per cent of them were not qualified, whereas 56.39 per cent had qualifications. Similarly, among the male teachers, 53.66 per cent of them were not qualified, while 46.34 per cent had at least one teaching certificate or the other (Table 10).

3.4.3 Teachers with and Without Qualification in Public and Private Primary Schools (2020)

In 2020, there were 804,164 teachers of which females accounted for 467,082, while 337,082 were males. Among the female teachers, about three out of four (73.78 per cent) of them had teaching qualifications, however, 62.01 per cent of male teachers had teaching qualifications (Table 11 below).

3.4.4 Teachers with and Without Qualification in Public and Private Junior Secondary Schools (JSS), 2020

The total number of teachers in public and private JSS in 2020 was 361,728 consisting of 164,016 females and 197,712 males. Of the total female teachers, 78.86 per cent of the teachers were qualified, while 21.14 per cent were not. Furthermore, 70.42 per cent of male teachers were qualified, while the remaining 29.58 per cent were not qualified (Table 12).

3.4.5 Public and Private SSS Teachers (2018-2019)

Table 13 shows the distribution of teachers in Public and Private schools between 2018 and 2019. In 2018, the total number of teachers was 393,702 comprising 205,542 male and 188,160 female teachers of which 57.55 per cent were qualified. Among the male and female teachers, 60.79 and 54.01 per cent were qualified respectively. In 2019, the total number of teachers was 441,818 with 243,651 males and 198,167 females of which 68.92 per cent were qualified. Among the males, the percentage of qualified teachers increased to 66.13 per cent and that of qualified female teachers increased to 72.36 per cent.

Table 13: Public and Private SSS Teachers (2018-2019)

3.4.6 Teaching Staff/Non-Teaching Staff of Nigerian Universities

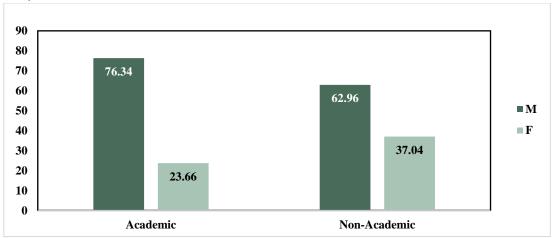

The quality of the teaching staff is a crucial determinant of the quality of education provided. Most importantly, fostering gender equity in educational access and achievement, as well as creating a supportive and non-discriminatory learning environment for both women and men, requires gender balance among the teaching personnel.

The appropriate representation of females in the teaching profession, especially in states where women have lower socio-economic status can have a positive impact on young women's decision to continue their education and on parents' decision to educate their girl child.

3.4.7 Academic and Non-Academic Staff of Nigerian Universities (2019)

According to Nigeria University Commission, male dominates both the academic and non-academic staff of the Universities. In the academic category, 23.66 per cent are females relative to 76.34 per cent of males. Also, about 2 out of 5 non-academic staff are females (37.04 per cent), while males accounted for 62.96 per cent (Figure 29).

Figure 29: Academic and Non-Academic Staff of Nigerian Universities by Year and Sex, 2019

Source: National University Commission

3.4.8 Distribution of Academic Staff by Nigeria University by Rank and Sex, 2019 Table 14 below shows that in the rank of Professors, only 15.17 per cent are females compared to 84.83 per cent of males. Also, one out of 5 Readers are females (20.91 per cent). The percentage of female Senior Lecturers, Lecturer 1 and below were 22.94, 26.79 and 23.66 per cent respectively.

Table 14: Distribution of Academic Staff by Nigeria University by Rank and Sex, 2019

Academic Staff of the University	M	F	Total	% F	% M
Professors	10,075	1,802	11,877	15.17	84.83
Reader	4,774	1,262	6,036	20.91	79.09
Senior Lecturer	11,185	3,329	14,514	22.94	77.06

3.5 National Youth Service Corps

3.5.1 Distribution of National Youth Service Corps (NYSC) Members Deployed by Sex and Year (2018-2020)

Figure 30 below depicts the distribution of NYSC members deployed from 2018-2020. In 2018, the percentage of female youth corps members deployed across the country was 48.53 per cent compared to 51.47 per cent for males, the figure increased slightly in 2019 to 48.56 per cent, while male corps members reduced to 51.44 per cent. However, in 2020, female corps members decreased to 47.22 per cent relative to 52.78 per cent for males.

Figure 30: Percentage Distribution of NYSC Participation by Sex and Year (2018-2020)

Source: National Youth Corps Service (NYSC)

3.5.2 Percentage Distribution of NYSC Members by Major Discipline (2018-2020)

The analysis of data reveals that the proportion of females that participated in the NYSC Scheme was found to be higher than males in some disciplines such as Arts, Law, Pharmacy

and Sciences, but lower in others such as Agriculture, Engineering & Technology, Medicine, and Veterinary Medicine nationwide in all the years under reference.

In 2018, female youth corps members that participated in NYSC from the Arts discipline accounted for 63.53 per cent, followed by Law at 56.97 per cent and Pharmacy at 56.88 per cent. Males, on the other hand, dominated Engineering and Technology with 73.58 per cent. Also, in 2019 and 2020, the same pattern was observed. Female youth corps members' participation in Engineering and Technology was found to be less than 30 per cent in all the years.

3.5.3 Participation of National Youth Service Corp (NYSC) Members by Age Group and Sex (2018-2020)

Table 16 shows the distribution of NYSC members by age group. Females in the age bracket 15-19 years participated most in the scheme than other age groups. Also, as the age advances, the percentage of female participation drops. For instance, the percentage of females in the age group 15-19 years was 62.95 in 2018, it decreased to 61.57 in 2019 and increased slightly to 62.44 in 2020. The male participation in that age group was less than

40 per cent in all the years. In the age group 20-24 years, female participation was also found to be above average but lower than those in the age group 15-19 years. On the other hand, males in the age group 25-29 years and aged 30 participated more in all the years. Generally, male participations in 2018, 2019, and 2020, were 52.49, 51.75 and 53.77 per cent respectively.

Table 16: Distribution of National Youth Service Corp (NYSC) Members by Age Group and Sex (2018-2020).

3.6 Examinations

3.6.1 NECO (SSC) Examination

a. Distribution of NECO (SSC) Examination by Year and Sex (June/July), 2018 - 2020

During June/July 2018 examination, a total of 1,038,644 candidates comprising 588,477 males and 450,167 females wrote NECO (SSC) examinations, 69.06 per cent of males and 74.65 per cent of females passed with 5 credits and above including Mathematics and English Language. The candidates that sat for the examination increased in 2019 to 643,462 males and 515,484 females, while 69.51 per cent of males and 74.21 per cent of females passed with a minimum of 5 credits including Mathematics and English Language. The enrolment further increased in 2020, when 659,796 males and 550,126 females sat for the examination. Therefore, 71.55 per cent of males and 76.72 per cent of females passed with 5 credits including Mathematics and English (Table 17 below).

Source: National Examination Council (NECO)

Data from the National Examination Council (NECO) reveals that a total of 33,161 male and 26,164 female students sat for Nov/Dec 2018 examination. From the table below, 60.10 and 65.50 per cent male and female students respectively passed with a minimum of five (5) credits including English Language and Mathematics. In 2019, enrolment increased for both sexes to 38,238 males and 30,740 females. The pass rate (candidates that passed with a minimum of five (5) credits including English Language and Mathematics) dropped in 2018 from 60.10 to 46.74 per cent in 2019 for male students. Similarly, it dropped from 65.50 per cent in 2018 to 51.09 per cent in 2019 for female students. In 2020, there was a significant drop in enrolment, while the pass rate hiked compared to 2019. Out of 22,887 male and 17,871 female candidates, 61.97 and 67.67 per cent of male and female candidates passed with five (5) credits and above including English Language and Mathematics (Table 18).

3.6.2 West African Senior Secondary Certificate Examinations (WASSCE)

a. Distribution of West African Senior Secondary Certificate Examinations (WASSCE) by Sex (May/June 2018-2020)

Table 19 below shows the number of students who wrote WASSCE in May/June 2018, 2019, and 2020. The total number of candidates that sat for the examination increased from

1,571,536 in 2018 to 1,590,107 in 2019 but decreased to 1,538,340 in 2020. The percentages of students that passed with 5 credits including Mathematics and English Language overall in 2018, 2019 and 2020 were 48.15, 64.85, and 65.74 per cent respectively.

Among the candidates that sat for the examination in 2018, the number of females that passed with 5 credits including Mathematics and English Language was 51.01 per cent, while the percentage of males was 45.55 per cent. The pass rate increased in 2019 and 2020 for both sexes. In 2019, the percentage that passed with 5 credits including Mathematics and English Language increased to 67.45 per cent for females and 62.43 per cent for males. Similarly, in 2020, it was 67.37 per cent for females and 64.16 per cent for males.

b. Distribution of West African Senior Secondary Certificate Examination (WASSCE) by Sex (NOV/DEC, 2018-2020)

In 2018, a total of 54,405 male and 55,550 female students sat for the exam, out of which 35.79 per cent of males and 35.65 per cent of females passed with five (5) credits and above including Mathematics and English Language. Similarly, in 2019, 47,220 male and 47,638 female students sat for the exam of which 34.93 per cent of males and 35.53 per cent of females passed with five (5) credits including English Language and Mathematics. The number of candidates that sat for the exam significantly dropped in 2020 for both sexes, 30,505 for males and 31,000 for females. Of these figures, 39.52 per cent of males and 40.19 per cent of females passed with 5 credits including Mathematics and English Language (Table 20).

3.6.3 National Business for Technical Examinations Board

a. Distribution of Enrolment for National Business for Technical Examinations Board (NABTEB) May/June by Trade, Year, and Sex (2017-2019)

The National Business for Technical Examination was taken by 32,334 students in May/June 2017. This figure comprised 6,876 females, 25,350 males, and 108 unindicated students. The total enrolment declined to 31,441 in 2018 and 31,395 in 2019. In each of the years, female enrolment was about 22 per cent, while male enrolment accounted for 78 per cent. Specifically, the percentage of females was 21.34 per cent in 2017, 22.02 per cent in 2018, and 21.93 per cent in 2019 among the 'indicated' candidates (Table 21).

b. Distribution of Enrolment for National Business for Technical Examinations Board (NABTEB) Nov/Dec by Trade, Year, and Sex (2017-2019)

In November/December 2017, a total of 16,881 students enrolled for the NABTEB examination, with 542 'unindicated' and 16,339 'indicated' students. Out of 16,339 'indicated' students, 37.69 per cent were females and 62.31 per cent were males. In 2018, enrolment fell to 14,045, of which females accounted for 38.68 per cent compared to 61.32 per cent of males. Enrolment further declined in 2019 to 13,901, of which females made up 37.82 per cent, while males recorded 62.18 per cent. Generally, male candidates outnumbered female candidates in the three years under review (Table 22).

3.6.4 Unified Tertiary Matriculation Examination (UTME)

a. Unified Tertiary Matriculation Examination (UTME) Application and Admission by Year and Sex (2018-2020)

The Joint Admission and Matriculation Board conduct the Unified Tertiary Matriculation Examination (UTME) for prospective students to Nigerian universities, polytechnics, and colleges of education.

In 2018, a total of 1,653,127 candidates applied for UTME, of which 582,593 (35.24 per cent) were admitted. The percentage of males admitted was 19.33 per cent, while females made up 15.91 per cent. In 2019, the number of applicants rose to 1,886,488, but only 608,859 (32.27 per cent) got admission, of which the males admitted was 2.51 per cent more than the female (17.39 per cent of males and 14.88 per cent of females). The year 2020 similarly witnessed an upsurge in the number of candidates that applied; of 1,949,983 applicants, only 23.52 per cent (458,628) of the candidates was admitted. Among the successful candidates, males accounted for 12.34 per cent, while females recorded 11.18 per cent (Appendix ST. 58 and 59).

Table 23: Unified Tertiary Matriculation Examination (UTME) Application and Admission by Year and Sex (2018-2020)

CHAPTER 4: WORK

Key Findings

- Males benefited more than females in the Enterprise Development Programme (EDP) of NDE in all three years 2018-2020 as male beneficiaries were found to be more than average.
- Females were the major beneficiaries of the Basic-National Open Apprenticeship Scheme (B-NOAS) in all three years reviewed, as female beneficiaries' range between 60-75 per cent.
- Female beneficiaries of the School on Wheel program were 45.29 per cent in 2018, 38.62 per cent in 2019 and 55.03 per cent in 2020.
- Females also benefited more than males in Advanced-National Open Apprenticeship Scheme (A-NOAS) in 2018, they accounted for 53.41 but reduced to 45.25 per cent in 2019.
- All 123 female youths trained by NDE in 2018 in Edo state were provided with tools and equipment to start their businesses. In 2019, male youths accounted for 11.03 compared to 88.97 per cent of females and in 2020, 2.08 per cent of males and 97.92 per cent of female youths trained were provided with tools and equipment to start their businesses.
- In 2018, 2019 and 2020, the percentage of female Superintendent cadre was 26.53, 26.82 and 27.97 per cent respectively.
- Female Inspectorate cadre was 31.11 per cent in 2018, 31.32 per cent in 2019 and dropped to 30.82 per cent in 2020, while female Assistant cadre was 22.61 per cent compared to 77.39 per cent of males in 2018, 22.88 per cent of females compared to 77.12 per cent of males in 2019 and 22.31 per cent females compared to 77.69 per cent of males in 2020.

4.1 National Directorate of Employment (NDE)

The National Directorate of Employment (NDE) is a manpower development agency established to create employment opportunities for self-employment and enhance employability through appropriate training. In so doing, it is expected that the nation will achieve attitudinal change, employment generation, poverty reduction, and wealth creation ⁴. The agency embarks on training and empowerment programs for various categories of people. Some of them include the Enterprise Development Programme (EDP), the Basic National Open Apprenticeship Scheme (B-NOAS), the school on wheels (SOW) etc.

⁴ www.iproject.com.ng

a. Percentage Distribution of Enterprise Development Programme (EDP) Beneficiaries by State, Sex, and Year (2018-2020)

Enterprise Development Programme is a 5-year programme, funded by Access-The Foundation for Social Investment to develop small and medium-scale enterprises to generate employment and widen the scope of industrial ownership among other objectives⁵.

Figure 31 depicts the distribution of beneficiaries of EDP from 2018-2020. In the three years, males were found to benefit more than their female counterparts. Available data from 19 states and FCT from NDE in 2018 indicates that 54.88 per cent of males benefited from the program compared to 45.12 per cent of females. Similarly, in 2019, aside from Edo and Yobe states where data were not available, data from the remaining 34 states and FCT reveals that 60.59 per cent of males and 39.41 per cent of females benefited from the program. Furthermore, data from all the states of the Federation and FCT in 2020 shows that 54.05 per cent of males and 45.95 per cent of females benefited.

Lagos state had the highest number of beneficiaries in the years under review. The total number of beneficiaries was 10,666 in 2018 but decreased to 6,514 in 2019 and 5,790 in 2020. On the other hand, Enugu state recorded the least number of beneficiaries with 60 in 2018, 166 in 2019 and 509 in 2020.

b. Percentage Distribution of Basic-National Open Apprenticeship Scheme (B-NOAS) Beneficiaries by State, Sex, and Year (2018-2020)

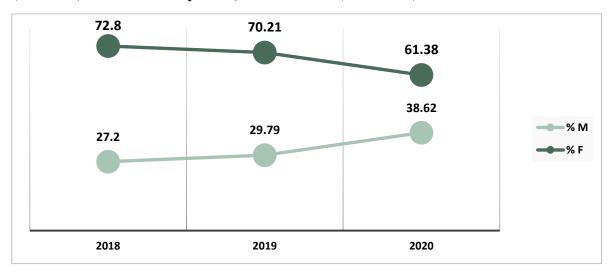

B-NOAS is a scheme through which unemployed school leavers are recruited and attached to master craftsmen and women in the informal sector or to NDE Skills Acquisition centres to acquire marketable vocational skills for decent job opportunities.

Figure 32 below illustrates the percentage distribution of beneficiaries of the Basic-National Open Apprenticeship Scheme (B-NOAS). It was noted that even though females benefited more than males in all three years, the figure reveals a downward trending for female beneficiaries and an upward trend for males.

In 2018, 72.8 per cent of females benefited compared to 27.2 per cent of males, 70.23 per cent of female beneficiaries compared to 29.78 per cent of males in 2019. Female beneficiaries in 2020 were 61.38 per cent compared to 29.72 per cent of male beneficiaries.

Kano state benefited most in 2018 and 2020 with 2,045 and 3,277 beneficiaries respectively. In 2019, Delta state emerged highest with 1,210 beneficiaries. Rivers, Jigawa, and Zamfara states in that order had the least beneficiaries of 174, 552 and 428 in 2018, 2019 and 2020 respectively.

Figure 32: Percentage Distribution of Basic-National Open Apprenticeship Scheme (B-NOAS) Beneficiaries by State, Sex and Year (2018-2020)

Source: National Directorate of Employment

c. Percentage Distribution of School on Wheels (SOW) Beneficiaries by State, Sex and Year (2018-2020)

School on Wheels (SOW) is a skill acquisition programme and a mobile training workshop that is usually deployed to rural areas where there are no competent master craftsmen to serve as trainers to impart skills to the unemployed.

Only fourteen (14) states with 50 beneficiaries each out of 36 states and FCT benefited in 2018 and 2019. However, in 2020, 16 states benefited, each state having 50 beneficiaries except Kogi and Jigawa states having 195 and 100 beneficiaries respectively.

Male beneficiaries increased from 54.71 per cent in 2018 to 61.38 per cent in 2019 but dropped in 2020 to 44.97 per cent. Female beneficiaries were below average in 2018 and 2019 but increased to 55.03 per cent in 2020 (Figure 33).

d. Percentage Distribution of Advanced-National Open Apprenticeship Scheme (A-NOAS) Beneficiaries by State, Sex, and Year (2018-2020)

A-NOAS is a scheme designed for artisans who graduated from B-NOAS to upgrade their skills to a higher level of competence.

Though data was not available in 2020, female beneficiaries were more than average in 2018 (53.41 per cent) but reduced to 45.25 per cent in 2019. Male beneficiaries accounted for 46.59 per cent in 2018 and 54.75 per cent in 2019.

Kebbi and Niger states had the highest number of beneficiaries (60), while other states received 50 and below. All the 24 states that benefited in 2019 had 50 beneficiaries each.

e. Percentage Distribution of Youth that were Provided with Tools and Equipment to Establish and Run their Own Business by State, Sex, and Year (2018-2020)

Edo was the only state that benefited from this initiative in 2018. One hundred and twenty-three (123) female youths took part and all were provided with tools and equipment to establish their businesses.

In 2019, the programme was extended to 14 states, Kano state with 1,300 females, followed by Kaduna state with 1,200 females and Borno state with 1,150 females. All other states had beneficiaries less than 600. Of all 9,715 youths that took part, males stood at 11.03 per cent compared to 88.97 per cent for females, and they were all provided with tools and equipment to establish their businesses.

Two states namely, Kebbi and Benue benefited in 2020 with 900 and 300 beneficiaries respectively. Again, females had a higher proportion of beneficiaries (97.92 per cent) compared to 2.08 per cent of male and they all were provided with tools and equipment to establish their businesses.

4.2 Security Personnel

Crime and Insecurity remain major challenges to governments globally. Governments (National, State and Local) invest chunks of their resources in fighting crimes and insecurity. In Nigeria, many security agencies were established and each of them was given the specific mandate(s) to enforce laws, combat different forms of crimes and prosecute defaulters.

4.2.1 Nigeria Security and Civil Defence Corps (2018-2020)

NSCDC has the mandate to maintain peace and order and to save civil society during the period of emergency such as war and terrorism. Aside from protecting lives and properties, they also ensure government properties are protected against vandalization.

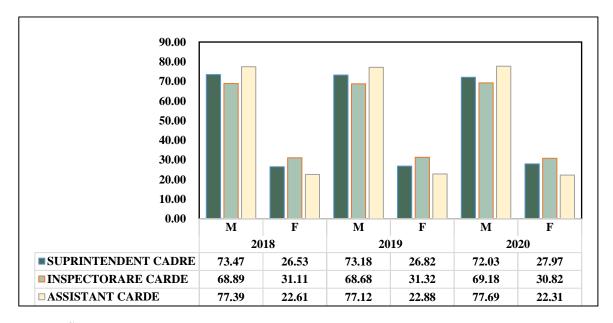

a. Distribution of Nigeria Security and Civil Defence Corps Officers by Rank Year and Sex

Data from the NSCDC shows that females had the least recruitment in the paramilitary organisation compared to their male counterpart. In 2018, the percentage of female Superintendent cadre was 26.53 per cent, it increased slightly in 2019 and 2020 to 26.82 and 27.97 per cent respectively). The male Superintendent Cadre for the three years had figures above 70 per cent, recorded at 73.47, 73.18 and 72.03 per cent in 2018, 2019 and 2020 respectively.

The percentage of female Inspectorate Cadre was 31.11 per cent in 2018 but rose slightly to 31.32 per cent in 2019 and dropped to 30.82 per cent in 2020, while the male counterparts recorded 68.89, 68.68 and 69.18 per cent in 2018, 2019 and 2020 respectively.

Similarly, men dominate the Assistant Cadre position for three years. In 2018, the female Assistant cadre was 22.61 per cent, but it increased slightly to 22.88 per cent in 2019 and decreased to 22.31 per cent in 2020. In 2018, 2019 and 2020, Male Assistant cadre recorded 77.39, 77.12 and 77.69 per cent respectively (Figure 36).

CHAPTER 5: POWER AND DECISION MAKING

Key Findings

- Since independence, women have never been the president or the vice President in Nigeria.
- Representation at National Parliament was 93.8 per cent of males and 6.2 per cent of females in 2019.
- Only 7 women were among 43 appointed Ministers in 2019.
- A total of 7 women and 72 men occupied principal positions in the Senate in 2019.
- Only 9 women out of 106 members of the House of Representatives occupied principal positions.
- Female members of National Judicial Offices decreased from 31.98 per cent in 2017 to 28.86 per cent in 2018.

5.1 Introduction

From antecedents, men have been predominant and still dominate the world of politics. Though, the marginalization of women is caused by patriarchy, poverty, illiteracy, religious and cultural norms. The Universal Declaration of Human Rights recognizes the right of every individual to take part in the government of his or her country. Equal access to power, decision making and leadership at all levels are necessary for a proper and effectively functioning democracy. SDG goal 5, also ensures women's full and effective participation as well as equal opportunities for leadership at all levels of decision-making in political, economic, and public life.

This chapter provides an assessment of the current situation as well as recent trends in the participation of women and men in positions of power and decision-making across the country. The chapter covers three main areas, politics and governance in the Executive, Legislature and Judiciary.

5.2 Politics and Governance

The high-levelled disparities between the participation of men and women in the domain of politics and decision-making limit women's political, social, and economic opportunities. The gender inequality in the domains stated above is owing to the limited number of female participations in government, especially, where key policy decisions are made and resource allocations are decided. Women have continued to suffer in all facets of politics and leadership positions, despite the recognition of the importance of women's political empowerment within the framework of the SDGs.

5.2.1 Executives

a. Representation in the Executive Arm of the Government

Since independence in Nigeria, the male has been the major actors in politics. Women had rarely been represented in any of the three arms of government. It is becoming a norm that men play the most important roles in politics, particularly at the federal level with regards to the position of president, vice president and secretary to the government of the federation as well as appointive ministerial positions.

Table 24 below clearly shows the current status quo with regard to gender representation as president or vice President, with all the positions held by men.

Table 24: Distribution of Number Occupying Elective Positions as President and Vice President in the Executive Arm and Number of Available Seats (1999 – 2015)

b. Appointive Ministerial Political Position

Appointive positions cut across the three levels of governance, that is, the federal, state and local government. However, available data allows us to focus the report only on the ministerial appointees at the federal level.

Figure 37 below shows the number of males and females appointed as ministers from 2016 - 2019. In 2016, only 7 females were appointed, and this decreased in 2017 to only 5 females. Female Ministers appointed in 2018 and 2019 were 6 and 7 respectively.

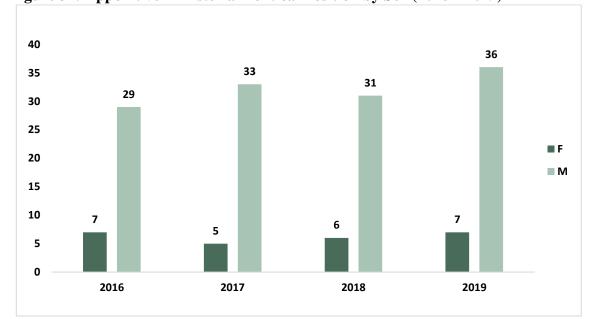

Figure 37: Appointive Ministerial Political Position by Sex (2016 – 2019)

c. Secretary to the Government of the Federation

In Nigeria, women have never been appointed as secretaries to the government of the federation since independence (Table 25).

Table 25: Distribution of Secretaries to the Government of the Federation from 1999 – 2019

5.2.2 Legislators

a. Representation at the National Parliament

Women population is estimated to account for almost half of the total population in Nigeria. Representation at the National Parliament is measured as the proportion of seats held by men and women in the lower and upper houses of the National Assembly.

Since the return of democracy in 1999 to the last election in 2019, women have been underrepresented in the National Parliament. The highest representation of 7.2 per cent was recorded in 2007-2011, it was 6.6 per cent each in 2011 - 2015 and 2015-2019. The current women's representation in National Parliament (2019) is 6.2 per cent (Table 26).

b. Principal Positions at the National Assembly by Sex

Table 27 below shows that males dominated the principal office in the Senate. A total of 6 women and 73 men occupied principal positions in the Senate in 2016 and the figures stood for 2017. 2018 and 2019 recorded the same figures of 7 women and 72 men as principal officers. From 2016 - 2019, only 6 women occupied the position of committee chairperson each year. In 2018 and 2019, a woman occupied the position of Minority Senate Leader in the Senate.

c. Number Occupying Principal Positions at the National Assembly by Type of Office, Sex and Year (House of Representatives)

From Table 28 above, men also dominated the House of Representatives in Nigeria, only 9 women were among the 106 principal officers in each of the years (2016 - 2019). A woman

held the position of Deputy House Minority Whip and only 8 women were among 96 Committee Chairpersons across the years (2016 - 2019).

a. National Judicial Officers by Position, Year and Sex

In Nigeria, female members of National Judicial Officers in 2016 and 2017 were 31.87 and 31.98 per cent respectively, while in 2018 recorded 28.86 per cent. No female had been Chief Justice of Nigeria, President of the National Industrial Court and Chief Registrar of the Supreme Court from 2016 to 2018. In the same period, a female had been the President of the Court of Appeal.

Figure 38: Percentage Representation of Female National Judicial Officers by Year and Sex

CHAPTER 6: VIOLENCE AGAINST WOMEN AND CRIME

Key Findings

- In Nigeria about 58 per cent of women aged 15 49 in 2021, still believe in their culture that a husband is justified in beating his wife if she refuses him sex.
- The percentage of women aged 15 49 who have ever experienced physical violence since age 15 increased from 27.8 per cent in 2013 to 31 per cent in 2018.
- In 2021, 8.2 per cent of females aged 0 14 had been circumcised in Nigeria.
- Among women aged 15-49, the percentage that ever-experienced sexual violence irrespective of the person that committed the act was 7.4 per cent in 2013 and increased to 9.1 per cent in 2018.
- Nationally, one out of ten persons admitted into prison in 2018, 2019 and 2020 was a female with 5.11, 4.97 and 4.9 per cent respectively.
- Female suspects arrested for drug-related offences were 8.06 per cent in 2021.
- The percentage of females aged 26 35 trafficked increased continuously from 2019 -2021 with 76.38, 87.86 to 91.08 per cent respectively.
- The percentage of females trafficked for forced labour in 2019 was 19.30 per cent but increased significantly in 2020 to 64.87 per cent and dropped in 2021 to 59.93 per cent.
- In 2019, all victims trafficked for prostitution were females (100 per cent), however, it was 97.82 per cent and 99.72 per cent in 2020 and 2021 respectively.

6.1 Introduction

Violence and crime are social ills that threaten peaceful co-existence and the realization of the objectives of equality, development and peace. Violence prevents women from enjoying their fundamental human rights and freedom. In all societies, women and girls are vulnerable to physical, sexual or psychological abuse that cuts across lines of income, class and culture. The low social and economic status of women can be both a cause and a consequence of violence. The Beijing Platform for Action requires all governments and the United Nations to promote research, collect data and compile statistics related to the prevalence of different forms of violence against women (especially domestic violence). The initiative also urges stakeholders to encourage research into the causes, nature, seriousness and consequences of violence against women, as well as effectiveness of measures implemented to prevent and redress violence against women. The Goal 16 of the Sustainable Development Goals (SDGs) promotes peaceful and inclusive societies which

.

⁷ United Nations, 2005

provide access to justice for all and build effective, accountable and inclusive institutions at all levels.

6.2 Prevalence and Increase of Violence against Women and Children

6.2.1 Physical Violence against Women

Physical violence consists of acts aimed at hurting the victim and include, but not limited to pushing, grabbing, twisting the arm, biting or hitting with the fist or an object, to trying to straggle or suffocate, burning or scalding on purpose and attacking with some sort of weapon, a gun or knife.

a. Percentage of Women Aged 15-49 Who Have Experienced Physical Violence Since Age 15 and Percentage Who Experienced Physical Violence During the 12 Months Preceding NDHS 2013 and 2018 Survey

From ST 66 in the Statistical Annexes, the percentage of women aged 15 - 49 who have ever experienced physical violence since age 15 increased from 27.8 per cent in 2013 to 31 per cent in 2018. In 2013, the percentage of women aged 15-49 who experienced physical violence since age 15 irrespective of the perpetrator was highest in Edo state with 75.4 per cent, followed closely by Benue state with 72.1 per cent, while Kano state had the lowest with 1.1 per cent. In 2018, Taraba state had the highest percentage with 67.6 per cent, followed closely by Edo state with 64.7 per cent, while Jigawa state recorded the lowest with 4.4 per cent.

Among women aged 15-49 who experienced physical violence in the past 12 months preceding the survey, greater percentage was reported for those who experienced it 'often or sometimes' (11.2 per cent in 2013 and 13.7 per cent in 2018), followed by 'sometimes' (9.5 per cent in 2013 and 11.7 per cent in 2018) across the two years under review. It was 1.6 per cent in 2013 and 2.0 per cent in 2018 for those that experienced it often.

b. Percentage of Persons Committing Physical Violence

Among ever married women who reported being involved in physical violence in 2013, 60.6 per cent suffered it from their 'Current Husband/Partner'. This slightly decreased to 58.0 per cent in 2018. Another category of persons that committed physical violence against ever married women significantly was 'Mother/Stepmother' (25.7 per cent in 2013 but decreased to 19.4 per cent in 2018), while 'Father-in-law', 'Police/Soldier' and 'Current Boyfriend' were the least perpetrators of physical violence against ever married women in the two years under review. Current boyfriend recorded 0.2 per cent each in 2013 and 2018,

while police/soldiers recorded 0.1 per cent each for the same period. Father-in-law was responsible for 0.1 per cent in 2013 but did not commit physical violence against ever married women in 2018.

Never married women also suffered significantly from physical violence from their mother/step mother, it was reported as 42.5 per cent in 2013 but decreased to 35.4 per cent in 2018. This was followed by 'Sister/Brother at 31.7 per cent in 2013 and declined to 22.5 per cent in 2018, just as 'Teacher' contributed 29.5 per cent in 2013 but reduced significantly to 17.1 per cent in 2018. Of all categories of persons that committed physical violence against never married women 'Police/Soldier' contributed the least in the two years period under review with 0.2 per cent in 2013 and 0 per cent in 2018 (Table 30).

c. Prevalence of Sexual Violence

From table 31 above, among women aged 15-49, the percentage that ever-experienced sexual violence irrespective of persons that committed it was 7.4 per cent in 2013 and increased to 9.1 per cent in 2018. Adamawa state had the highest with 38.4 per cent, followed by Taraba state with 28.1 per cent, while Katsina and Kwara states had the least with 0.6 per cent each, followed closely by Kano state with 0.7 per cent. Gombe state took the lead in 2018 with 44.9 per cent, while Kebbi state recorded the least with 0.4 per cent, followed by Sokoto state with 1.0 per cent. The percentage of women who suffered sexual violence in the 12 months preceding the survey increased from 3.3 per cent in 2013 to 4.1 per cent in 2018. The highest was recorded as 24.1 per cent for Adamawa state in 2013 and 22.0 per cent for Gombe in 2018, while Zamfara recorded the least at 0.1 per cent in 2013 and Ogun state had no incidence of sexual violence in 2018.

d. Persons Committing Sexual Violence

Table 32 below reveals that greater percentage of incidence of sexual violence against women aged 15-49 'ever married' was committed by their 'Current Husband/Partner' (57.9 per cent in 2013 and increased to 64.8 per cent in 2018), followed by their 'Former Husband/Partner' (21.6 per cent in 2013 and decreased to 18.4 per cent in 2018). The 'Never Married' women were not left out as some of them suffered violence from Strangers recorded at 29.2 and 27.6 per cent in 2013 and 2018 respectively, followed by 'Current/Former Boyfriend' with 22.9 per cent in 2013 and 26.7 per cent in 2018. The

Police/Soldier and Others are the least perpetrators of sexual violence against women in the two years under review.

e. Experience of Different Forms of Violence

In Nigeria, about one out of every three women (33.4 per cent) aged 15-49 have experienced physical or sexual violence in 2018, while it was 29.6 per cent in 2013. In 2013 and 2018, 22.2 and 24.4 per cent of women respectively experienced 'Physical Violence Only'. About 2 per cent experienced sexual violence only for both years, while 'Physical and Sexual Violence' accounted for 5.6 per cent in 2013 and increased to 6.7 per cent in 2018.

Physical or sexual violence was highest among the age group of 30-39 years in 2013 (31.5 per cent) and increased to 34.4 per cent in 2018. 'Physical violence only' was 23.8 per cent in 2013 and increased slightly to 23.9 per cent in 2018 (Table 33).

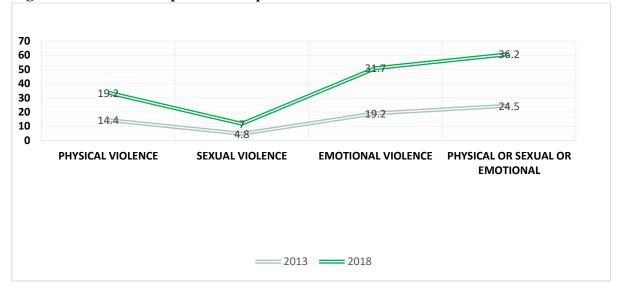

Figure 39: Women's experience of spousal violence

f. Women's Experience of Spousal Violence

Figure 39 above shows that all forms of violence against women was higher in 2018 than 2013, as overall prevalence of spousal physical or sexual or emotional violence increased from 24.5 per cent in 2013 to 36.2 per cent in 2018.

6.3 Women and Men Attitude towards Domestic Violence

Domestic Violence affects people of all socioeconomic backgrounds and education levels. It is a pattern of behavior in any relationship that is used to show power and control over an intimate partner. Anyone can be a victim of domestic violence, regards of age, race, gender, faith or class

The Figure below shows attitude of women and men towards domestic violence and wife beating. Some women and men in Nigeria believe that a husband is justified in beating his wife if she does the following; she goes out without telling him, she neglects the children, she argues with him, she refuses sex with him, or she burns the food.

According MICS 2021 report, nationally 42 per cent of men believed that a husband is justified in beating his wife if she refuses sex with him, while 58 per cent of women had the same opinion. Meanwhile, across the state, Katsina state recorded the highest number of women who believed that a husband is justified in beating his wife if she refuses sex with him with 51.5 per cent, while Osun state had the least with 1.0 per cent. For men, Kogi state recorded the highest number of men who believed that a husband is justified in beating

his wife if she refuses sex with him with 45.5 per cent, while Anambra state had the least with 0.0 per cent

6.3.1 Women and Men Who Believed a Husband is Justified in Beating His Wife If She Argues with Him

However, 14.0 per cent of women believed that a husband is justified in beating his wife if she argues with him, while 10.0 per cent of men had the same opinion nationwide. Also, across the state, Katsina state had the highest percentage of women who believed that a husband is justified in beating his wife if she argues with him with 37.4 per cent and Lagos state had the lowest with 1.2 per cent. Meanwhile, for men, Kebbi state recorded the highest percentage with 43.1 per cent, while Anambra state had the least with 0.0 per cent (Figure 40b).

6.3.2 Women and Men Who Believed a Husband is Justified in Beating His Wife If She Burns the Food

Figure 40c below shows the percentage of women and men who believed a husband is justified in beating his wife if she burns the food. Nationally, 8.1 per cent of both women and men shared this opinion. Meanwhile, Jigawa state recorded the highest percentage of women who believed a husband is justified in beating his wife if she burns the food with 25.5 per cent, while Lagos state had the least with 1.0 per cent. Under the categories of men, Kebbi state had the highest with 39.7 per cent, while Anambra state recorded the least with 0.0 per cent.

6.4 Female Genital Mutilation (FGM) Among Girls

Female Genital Mutilation (FGM) is a cultural practice involving the ceremonial circumcision of a female child. Though the ceremony can be carried out at any age, it is mostly done before a female child attains the age of 15 years. This practice has been widely criticized due to its immediate and long-term medical negative implications to the well-being of the female and her reproductive health and well-being. Therefore, FGM is considered violence against women because it is a breach of the right of women as captured in SDG 5.3.

According to MICS/NICS 2021, 8.2 per cent of daughters aged 0 - 14 had been circumcised in Nigeria. Daughters in the age group of 10 -14 had the highest percentage who had been circumcised (9.6 per cent), while aged 0 - 4 had the lowest percentage (6.7 per cent). The data also reveals that about one out of 10 daughters (10.2 per cent) in urban area are circumcised, while 6.9 per cent was recorded in rural area (Figure 41).

6.5 Crime

6.5.1 Economic and Financial Crime

The Economic and Financial Crimes Commission (EFCC) was established in 2003 by Government of Nigeria to investigate financial crimes such as advance fee fraud (419) and money laundering. The Commission is empowered to prevent, investigate, prosecute, and penalize economic and financial crimes. It is also charged with the responsibility of enforcing the provisions of other laws and regulations relating to economic and financial crimes, including Bank Fraud, Advance Fee Fraud, Economic Fraud, among others.

a. Economic Crime

Economic crime refers to illegal acts committed by an individual or a group of individuals to obtain a financial or professional advantage. The principal motive in such crimes is economic gain.

Arrest and conviction of people for economic crime over the period were on the increase for both male and female, except in 2017 and 2018 with 1 conviction each. There was a huge gap in the ratio of female to male convicted of economic crime across the years, it was 1 to 101 in 2017, 1 to 104 in 2018 and 13 to 145 in 2019 (Table 34).

b. Financial Crime Cases in Nigeria

The number of males arrested for financial crime was on the increase from 1,532 in 2017 to 1,746 and 2,176 for 2018 and 2019 respectively. The number of males convicted for financial crime was consistently more than that of females in the reference period with no female convicted at all as against 48 males in 2019. Similarly, 2 females were convicted as against 34 males and 5 females convicted as against 58 males in 2017 and 2018 respectively (Table 34).

c. Money Laundering

Money Laundering refers to illegal process of concealing the origin of money obtained fraudulently by passing it through a complex sequence of banking and commercial transactions. The objective of a money launderer is to obscure the origin of money especially money obtained illegally. Data from table 34 below shows that males were more involved in the crime of money laundering during the three years under review. The analysis further reveals that both arrest and conviction were decreasing, 211 males were arrested as against 64 females in 2017, Moreso, 154 males were arrested as against 12 females in 2018 and 102 males arrested as against 17 females in 2019. No female was convicted for the crime of money laundering in 2017 and 2018 but 7 males and 21 males were convicted respectively. In 2019, no male was convicted but 7 females were convicted.

d. Bank Fraud

Bank fraud is the use of potentially illegal means to obtain money, assets, or other property owned or held by a financial institution, or to obtain money from depositors by fraudulently posing as a bank or other financial institution. In many instances, bank fraud is a criminal offence. From table 34 below, bank fraud was more in 2019 as both males and females recorded the highest number of arrest and conviction in the year. The number of females

arrested for bank fraud is less than that of males across the reference period, it was 315 males as against 179 females arrested in 2017, 303 males as against 160 females arrested in 2018 and 344 males as against 205 females arrested in 2019. The ratio of female to male convicted for bank fraud was significant across the three years. There was no female convicted in 2018 as against 13 males convicted. Three females were convicted as against 19 males and 1 female as against 21 males convicted in 2017 and 2019 respectively (ST. 68).

e. Advance Fee Fraud

Advance fee fraud or "419" refers to the act of obtaining property or money by false pretense ("obtain by tricks"). Table 39 shows that males were more in advance fee fraud than the females and increased exponentially across the years under review. The number of males convicted was 48 as against 5 females in 2017, 107 males as against 1 female and 285 males as against 4 females in 2018 and 2019 respectively. Few females were convicted for advance fee fraud, out of 118 females arrested in 2017 only 5 were convicted, and only 1 out of 349 females arrested in 2018 was convicted. Moreover, 4 out of 337 females arrested were convicted in 2019.

a. Embezzlement

This is a financial fraud that involves withholding assets for the purpose of conversion of same by one or more persons to whom the assets were entrusted either to be held or to be used for specific purposes. Though, arrest and conviction of offenders due to embezzlement witnessed a downward trend from 2017 to 2019. Table 34 below further shows that males were more than females in the embezzlement. 252, 151 and 129 males were arrested as against 36, 16 and 25 females in 2017, 2018 and 2019 respectively. Only one male was convicted each in 2017, 2018 and 2019 respectively for embezzlement, while no female was convicted for the crime in the three years reviewed.

b. Bribery and Corruption

Bribery is giving or receiving an unearned reward to influence someone's behavior while corruption is any unlawful or improper behavior that seeks to gain an advantage through illegitimate means. Bribery and corruption do not just enrich the criminals, they inflict untold damage to society and business by undermining trust.

From table 34 below, the proportion of males involved in bribery and corruption is significantly higher than that of females in the three years under review. 54, 53 and 45

males were arrested compared to 1, 0 and 3 females in 2017, 2018 and 2019 respectively. No female was convicted throughout the three years, also no male was convicted in 2018. However, one (1) male was convicted in 2017, while three (3) males were convicted for the crime in 2019.

c. Cyber Crime

Cyber Crime refers to several internet-assisted crimes. Cybercrime has remained a challenging issue despite increasing awareness and conscious attention devoted to addressing it both at local and international levels. It poses danger to the nation, institutions, and people at large. Among its numerous adverse effects are huge monetary losses, reputational damage, productivity and rising costs and many more. Variants of cybercrime are cyber terrorism, cyber fraud, malware, password sniffing, wiretapping, spam, cyber stalking etc.

Table 34 below shows an exponential increase in both arrest and conviction of offenders due to cybercrime. In 2017, 2018 and 2019, total males arrested for cybercrime stood at 277, 319 and 878 as against 21, 48 and 73 females respectively. Out of these, 134, 151 and 390 males were convicted in 2017, 2018 and 2019 respectively, while only 8 females were convicted in 2019.

6.7 Trafficking in Person

6.7.1 Number of Trafficked Person by Age Group, Sex and Year

Human trafficking remains both a domestic and global crime with victims trafficked either for sex trade, forced labor or domestic servitude within their own country to neighboring countries or inter states. Vulnerabilities because of poverty, unemployment, displacement, lack of knowledge/experience and other forms of difficult situations influence the traffickers to prey on weaknesses of the victims. Human trafficking can cause physical, emotional and psychological trauma to the survivors. Many of the victims can end up experiencing depression, memory loss, shame, fear and anxiety and other severe forms of mental trauma.

Table 35 below shows that women are mostly trafficked than their male counterparts. Furthermore, females in the age groups of 16 - 25 and 26 - 35 years and above were mostly trafficked. In 2019, 2020 and 2021, women of age group 16 - 25 years trafficked were 89.46, 85.49 and 91.82 per cent respectively. Among the trafficked persons aged 26 – 35, females recorded 91.08 per cent in 2021 compared to 76.38 and 87.86 per cent in 2019 and 2020 respectively. Children in the age group (0 - 5) years were not excluded from trafficking, female children aged 0 - 5 trafficked dropped in 2020 to 43.55 per cent from 50.00 per cent in 2019, but increased in 2021 to 59.34 per cent.

6.7.2 Identified Victims of Trafficking for Force Labour by Age Group, Sex and Year

In 2019, males were mostly trafficked than females for force labour. In 2019, females recorded 19.30 per cent, this increased significantly to 64.87 per cent in 2020 and decreased to 59.93 per cent in 2021.

The age group 18 - 27 years recorded the highest females trafficked for force labour in 2019 (23.73 per cent). In 2020 and 2021, females aged 1 - 17 that were trafficked for force labour recorded the highest with 65.41 and 64.15 respectively (Table 36)

6.7.3 Identified Trafficking for Prostitution

From table 37 below, females were the major victims of human trafficking for prostitution from 2019 - 2021. In 2019, all victims trafficked for prostitution were females. The

percentages of females trafficked for prostitution in 2020 and 2021 were 97.8 and 99.72 per cent respectively.

6.8 Prison Admission

6.8.1 Prison Admission by Types of Offence, Sex and Year

Figure 34 below shows that one out of ten persons admitted into prison in Nigeria was a female (5.11, 4.97 and 4.9 per cent for 2018, 2019 and 2020 respectively), while about 95 per cent were males for the three years under review (94.89, 95.03 and 95.10 per cent for 2018, 2019 and 2020 respectively).

Figure 43: Summary of prison admission by types of offence, sex and year

Source: Nigeria Correctional Service

Stealing is the most common crime perpetrated by women and men as shown in the tablebelow. The number of men recorded for stealing in 2018 was 50,061, while it decreased in 2019 to 42,648 and further decreased to 40,555 in 2020. In 2018, females that were admitted into prison for stealing were 2,344, the number also decreased in 2019 and 2020 to 2,108 and 1,981 respectively.

CHAPTER 7: EXPOSURE TO MASS MEDIA

Key Findings

- The percentages of women and men that read a newspaper at least once a week are 7.4 and 17.2 per cent respectively.
- Females who listen to the radio at least once a week constitute 34.4 per cent relative to 50.8 per cent males nationally.
- Almost half (48.9 per cent) of males and 42.7 per cent of females watch television at least once a week nationwide.
- Females account for 13.4 per cent, while males constitute 21.8 per cent of those that ever used a computer.
- 2021 MICS report indicates that 78.6 per cent of females and 88.4 per cent of males used a mobile phone during the last three month.
- Also, the percentage of males who ever used the internet was 41.6 per cent, while it was
 24.0 per cent for females.

7.1 Introduction

The media's role in society has greatly benefited information dissemination. More adults are turning to radio and television for information in addition to reading printed materials. Questions like "how often they generally read newspaper or magazine, listen to the radio, or watch television in a week" are questions asked from respondents during MICS6, 2021 surveys. This information can be used to choose the media outlets to reach target audiences. Understanding the possibility of reaching people through the media is also crucial.

Access to better and effective Media will aid the promotion of Goal 16 of the Sustainable Development Goal (SDGs) which seeks to promote peaceful and inclusive societies that provide access to justice for all and build effective, accountable and inclusive institutions at all levels.

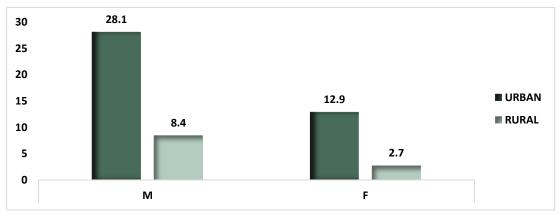

7.2 Exposure to Mass Media

7.2.1 Percentage Who Read a Newspaper at Least Once a Week

According to Multiple Indicator Cluster Survey (MICS), 2021, 7.4 per cent of women and 17.2 per cent of men read newspaper at least once a week. The report further shows that women in the age bracket of 30-34 years and men in the age group of 40-44 years had the

highest record of those that read a newspaper at least once a week with 9.0 and 25.4 per cent for women and men respectively.

Figure 44: Percentage of those who read a newspaper at least once a week by residence

Source: MICS/NICS, 2021

Also, the percentage of those who read newspapers in the urban was higher than the rural for both male and female respectively. Females who read a newspaper was 12.9 per cent for urban and 2.7 per cent for rural resident, while the percentage of Males was 28.1 per cent for urban and 8.4 per cent for rural residents respectively.

Lagos state had the highest report for those that read a newspaper at least once a week, with 53.7 per cent of males and 27.5 per cent of females, while Yobe had the least with 0.4 per cent of females and 1.3 per cent of males.

7.2.2 Percentage Who Listened to Radio at Least Once a Week

Available data indicates that 34.4 per cent of females and 50.8 per cent of males listened to radio at least once a week nationally. It was reported that in the rural areas, 22.0 per cent of females and 39.0 per cent of males listened to radio at least once a week, while 49.1 and 65.3 per cent of females and males respectively listened to radio at least once a week in the urban areas (Figure 45).

7.2.3 Percentage Who Watched Television at Least Once a Week

In addition, the data from the MICS/NICS, 2021 report indicates that 42.7 per cent of females and 48.9 per cent of males watched television at least once a week nationwide (Figure 46). Females and males residing in urban centers recorded 73.6 and 68.1 per cent respectively. Similarly, 21.2 per cent of females and 28.8 per cent of males were recorded for rural residence who watched television at least once a week.

Figure 46: Percentage of those who watched television at least once a week in Nigeria by sector 2021

Source: MICS/NICS, 2021

7.2.4 Percentage Who Used all Three Media and those Who Used Any Media at Least Once a Week

From the table 39 above, men were more exposed to the three media (read a newspaper, listen to radio and watch television) at least once a week than women (12.5 and 5.0 per cent

of men and women respectively). Also, on exposure to any media, males recorded 66.3 per cent as against female who had 53.9 per cent.

Table 39: Summary of those who used all three media and those who use any media at least once a week by sex, 2021

ТҮРЕ	MALE	FEMALE
All three Media at least once a week	12.7	5.0
Any media at least once a week	66.3	53.9

Source: Source: MICS6, 2021

7.3 Use of Computer

Computers play a role in every field of life, they are used in homes, business, educational institutions, research organisations, medical field, government offices and entertainment industries. The use of computer is endless, as it is in the front drive of modern technology.

Table 40: Summary of those ever used computer, those that use during the last three month and those that use it at least once a week during last three month

TYPES	F	M
Ever use computer	13.4	21.8
During the last three month	6.4	12.1
At least once a week during the last three month	4.6	9.2

Source: MICS/NICS, 2021

From Table 40 above, the data of those that ever used computer shows 13.4 per cent of females compared to 21.8 per cent of males. Similarly, the percentage of males who used computer during the last three month was 12.1 per cent, while female's was 6.4 per cent. Among those that used computer at least once a week during the last three month, males dominated with 9.2 per cent and females recorded 4.6 per cent.

Also, for females, Enugu state had the highest number of those that ever used computer with 35.5 per cent, followed by Lagos state (33.8 per cent), while Bauchi had the least with 2.0 per cent. Lagos state recorded the highest with 20.6 per cent and Enugu with 18.7 per cent of females that used computer during the last three month, while Jigawa had the least

of 0.5 per cent. Lagos and Federal Capital Territory also had the highest for females who used computer at least once a week during the last three month with 17.0 and 13.4 per cent respectively.

7.4 Use of Mobile Phone

Mobile phones are considered an important human invention, as it has been one of the most widely used gadget in recent times. It provides means of communication with friends and family, coworker and indeed must of the world's population. Available data from 2021 Multiple Indicator Cluster Survey (MICS)/National Immunization Coverage Survey (NICS) shows that 58.2 per cent of females and 73.4 per cent of males owned a mobile phone.

100 80 60 40 20 AT LEAST ONCE A WEEK **DURING THE LAST THREE OWN A MOBILE PHONE DURING THE LAST THREE** MONTH **MONTH** ■F 78.6 58.2 65.8 73.4 88.4 78.1

Figure 47: Those who used a mobile phone in Nigeria

Source: MICS/NICS, 2021

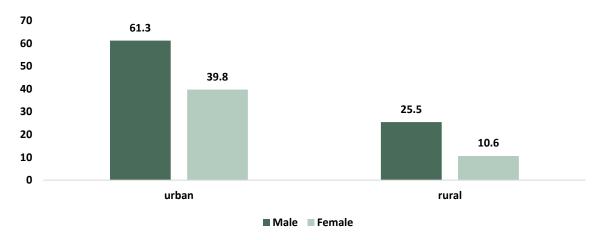

Furthermore, the data reveals that 78.6 per cent of females used a mobile phone during the last three month, while 88.4 per cent of males used same. The percentages of females and males that used mobile phone at least once a week during the last three month preceding the MICS Survey in 2021 were 78.1 and 65.8 per cent respectively (Figure 47 above).

7.5 Use of Internet

Internet is a handy platform to upload, download and share data. The internet also provides a good source of knowledge, as well as entertainment as it aids the inter-connectivity of various people all over the globe. The percentage of those who ever used the internet was 41.6 per cent for men, while 24.0 per cent was recorded for women.

Those that ever used internet at the urban areas were more when compared to those that used it in the rural areas. In urban and rural areas, males recorded 61.3 and 25.5 per cent respectively. About 2 out of 5 females (39.8 per cent) in urban areas used internet and about one out of ten females (10.6 per cent) in the rural residence used the internet.
