Methodology

The National Bureau of Statistics publishes this Trade statistics report quarterly. Trade statistics compilation by NBS is largely from secondary data sources.

Data Sources:

The Nigerian Customs through the Nigeria Integrated Customs Information System, Cobalt International Plc (on export COMMOdities), Nigerian National Petroleum Corporation and various oil companies in the upstream and downstream sectors of the oil industry, Nigerian Ports, Petroleum Products Price Regulatory Agency, Central Bank of Nigeria.

Validation & Quality Assurance:

After collecting data from the above sources, it is verified for outliers, Data validation is undertaken through a sample of the various Nigerian Customs outposts in Nigeria. Weight harmonization is carried out through the various entry posts of imports and exports in Nigeria.

Processing/Analysis:

Data processing is done using the Global Eurotrace software and the processed data is banked in the trade database. We use the Standard International Trade Classification (SITC) to categorize trade items.
