GDP by Income	4
Compensation of Employees	4
Operating Surplus	5
National Disposable Income (NDI)	5
Domestic Savings	5

### Expenditure on GDP driven by:

- Increase in government final consumption expenditure
- High net exports of goods and services

# National Income driven by:

- Increase in compensation of employees
- Higher operating surplus
- Positive net current transfers from abroad

### 1.0 Introduction

Nigeria has been consistent in compiling Gross domestic product (GDP) by output on quarterly basis. Recently, in an effort to provide data to formulate and monitor the effectiveness of polices in short and medium terms, the National Bureau of Statistics (NBS) and the Central Bank of Nigeria (CBN) embarked on a joint venture to compile GDP by expenditure and income approaches on quarterly basis to complement the GDP by production approach.

This effort is in further realization of the important role that both the monetary and fiscal authorities play in the nation's economic growth, development and wealth creation.

The synergy between the supply and demand sides of the economy cannot be over-emphasised as their disequilibrium signals ineffectiveness in policies. This publication will be revised as more information is made available.

We remain grateful to all agencies that supplied data to us, and Central Bank of Nigeria for its financial support.

Dr. Yemi Kale
Statistician General
National Bureau of Statistics
February 2013

#### 2.0 GDP by Expenditure

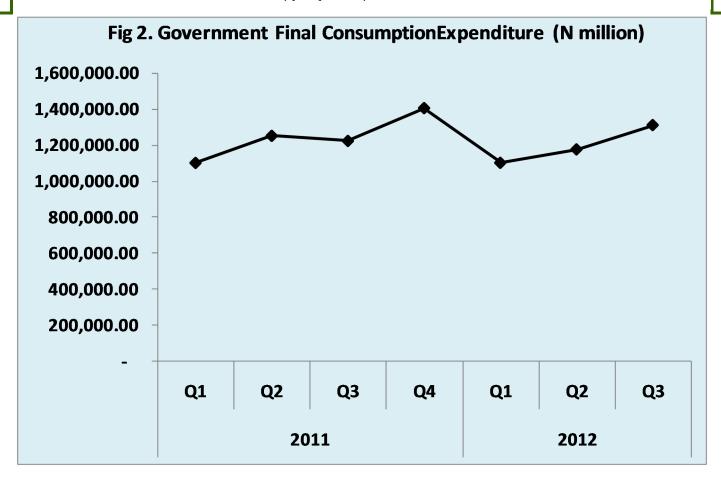

The expenditure on the nominal gross domestic product (GDP) stood at \$\frac{1}{4}\$ 10,007,314.13 million and \$\frac{1}{4}11,117,747.02 million in the second and third quarters of 2012 respectively compared with \$\frac{1}{4}9,595,469.38 million and \$\frac{1}{4}10,022,436.67 million recorded in the corresponding periods in 2011. In real terms, the expenditure on GDP measured in market prices rose by 6.50 per cent and 6.15 per cent in the second and third quarters of 2012 respectively, as against 6.36 per cent and 7.04 per cent growth recorded in the second and third quarters of 2011, revealing a 0.14 percentage point increase in the second quarter and 0.88 percentage point decrease in the third quarter of 2012.

### 2.1 Government Final Consumption Expenditure

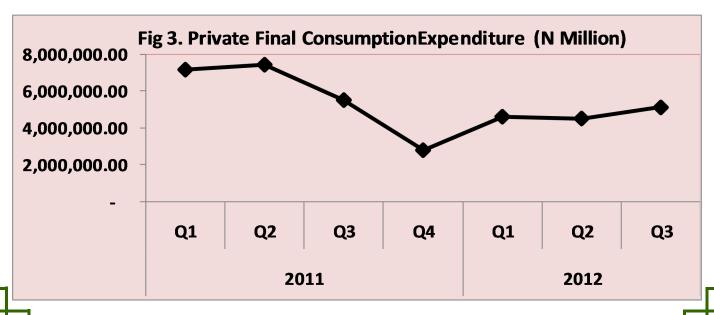

The total nominal government final consumption expenditure (GFCE) was recorded at N1,175,845.07 million and  $\frac{1}{1}$ ,311,036.04 in the second and third quarters of 2012, compared to  $\frac{1}{1}$ ,251,103.10 million and  $\frac{1}{1}$ ,222,878.83 million in the second and third quarters of 2011, representing a -6.02 per cent decline and a 7.21 per cent increase (year on year) over the second and third quarters respectively.

During the third quarter of 2012, The increase in nominal government final consumption expenditure was mainly as a result of increase in wages and salaries paid by the three tiers of government arising from recruitment of new workers into the public service and other government expenditures on final goods.

## 2.2 Private Final Consumption Expenditure

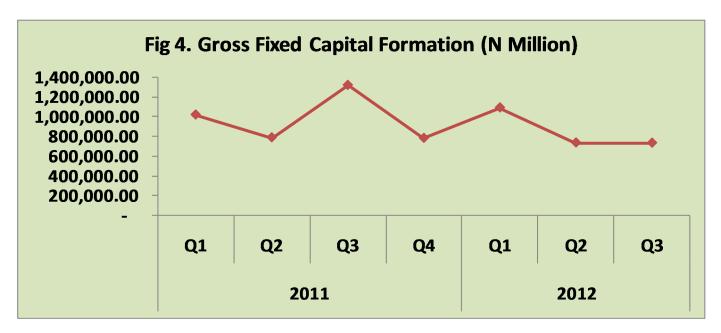

The nominal value of private final consumption expenditure (PFCE) stood at  $\Re 4,492,423.61$ million and  $\Re 5,096,531.01$  million for the second and third quarters of 2012, and constituted 44.89 per cent and 45.84 per cent of the expenditure on GDP during the period, as against 77.37 per cent and 54.85per cent respectively recorded in the corresponding quarters of 2011.

The decline in PFCE was attributable to a number of factors which include:- high value of merchandize export and relative low level of Gross fixed capital formation.

### 2.3 Gross Fixed Capital Formation

The gross fixed capital formation (GFCF), which captures investment activities carried out in the economy, decreased in nominal terms, from \$786,131.42 million in the second quarter and \$1,322,383.38 million in the third quarter of 2011 to \$733,253.01 million in the second quarter and \$731,089.51 in third quarter of 2012. The decrease was largely a result of declining investments in transport and machinery equipment.

## 2.4 Net Exports of Goods & Services

In the second and third quarters of 2012, net exports of goods and services stood at N3,605,199.46 million and N3,978,409.26 million respectively compared to N134,131.30 million and N1,979,280.76 million in the corresponding period of 2011.

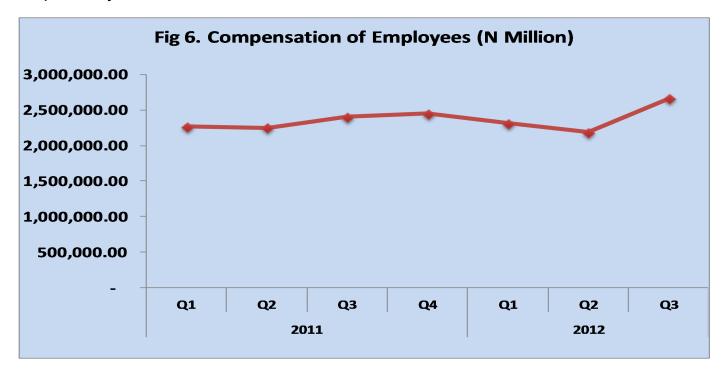

# 3.0 GDP by Income

The income side of the gross domestic product is made up of compensation of employees in the economy, operating surplus, consumption of fixed capital and net taxes on production and imports. Other economic aggregates obtained from the income approach include gross national income and gross national savings.

# 3.1 Compensation of Employees

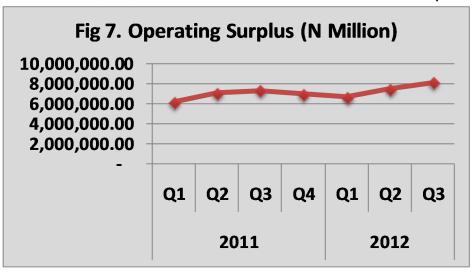

The total compensation of employees (COE) in nominal terms in the economy stood at ₹2,185,492.25 million in the second quarter and ₹2,661,114.27 million in the third quarter of 2012 as against ₹2,248,958.35 million and ₹2,401,275.22 recorded in the corresponding quarters of 2011. This represents a decline of 2.82 percent and an increase of 10.82 per cent over the corresponding periods in 2011 respectively.

### 3.2 Operating Surplus

In the second and third quarters of 2012, the nominal operating surplus in the economy stood at ₹7,478,395.31 million and ₹8,129,612.59 million respectively, representing 74.73 per cent and 73.12 per cent of the expenditure on GDP as against ₹7,032,929.86 million and ₹7,297,090.05 million with shares of 73.29 per

cent and 72.81 per cent expenditure on GDP for the corresponding quarters of 2011. This reflected the improvement in business activities in the economy during the period under review.

### 3.3 National Disposable Income (NDI)

The national disposable income (NDI) in the Nigerian economy rose in the second and third quarters of 2012 to №9,730,177.88 million and №10,915,384.30 million as against №9,287,139.44 million and №9,745,054.87 million respectively recorded in the corresponding quarters of 2011. This represents an increase of 4.77 per cent and an increase of 12.01 per cent over the corresponding periods in 2011 respectively.

The increase in NDI was largely driven by increases in operating surplus, compensation of employees and a positive net position in *other current transfers from the rest of the world*.
