## BRIEF METHODOLOGY

The CPI measures the average change over time in prices of goods and services consumed by people for day-to-day living. The construction of the CPI combines economic theory, sampling and other statistical techniques using data from other surveys to produce a weighted measure of average price changes in the Nigerian economy. The weighting occurs to capture the importance of the selected commodities in the entire index. The production of the CPI requires skills of economists, statisticians, computer scientists, data collectors and others.

Key in the construction of the price index is the selection of the market basket of goods and services. Every month, 10,534 informants spread across the country provide price data for the computation of the CPI. The market items currently comprise of 740 goods and services regularly priced.

The first stage in the calculation of the CPI is the collection of prices on each item (740 goods and services) from outlets in each sector (rural or urban) for each state. Prices are then averaged for each item per sector across the state. The next step is to use the average price to calculate the basic index for each commodity: The current year price of each commodity is compared with a base year's price to obtain a relative price.

Next we use the Laspeyres formula to compute an aggregated index for each class (which has a multitude of commodities which have similar consumption purposes): Here the sum of the product of weights (obtained from the expenditure survey) and relative prices for each item is divided by the sum of the weight of the items in that class, and the result multiplied by 100 gives the required index number. This index number is still classified according to the urban or rural classification sector for each of the 36 states and the FCT. This yields 85 classes then 48 groups which are then reclassified into 12 Divisions to derive:

1. The country composite index
2. The Urban National index
3. The Rural National index
4. The Combined Urban and Rural State Composite index

The survey methodology generates 3774 all items indices for all states and the FCT.

This edition of the Statistical News contains the revised Consumer Price Index (CPI) based on Nigeria Living Standard Survey (NLSS) 2003/2004. The consumption expenditure data were re-valued to November 2009, which is the base period for the revised CPI.

The May 2003 and September 1985 based indices are being continued using factors derived from the new CPI. These indices will yield the same price change for any commodity group contained in all the series.

A new sub index – Imported Food Index- is available in the revised CPI.

Note: The urban and rural indices were weighted with the ratio of their populations to the national i.e. 0.455 and 0.545 respectively to compute the composite indices at the 12 Classification of Individual Consumption by Purpose (COICOP) functions and all items levels. This may cause variance between a recalculated all items index using the weights published on table 2 and the published all items index because the published weights were computed only from consumption expenditure survey result. The following breakdown highlights a non-exhaustive list of the components of the current CPI:

The following breakdown highlights a non-exhaustive list of the components of the current CPI:

FOOD AND NON-ALCOHOLIC BEVERAGES						
	Food	Bread and cereals	Meat	Fish	Milk, cheese and eggs	Oils and fats
						
	Fruit	Vegetables	Potatoes, Yam & other tubers	Food products n.e.c.	Coffee, tea and cocoa	Soft drinks

ALCOHOLIC BEVERAGES, TOBACCO AND KOLA				
	Spirits	Wine	Tobacco	Narcotics

CLOTHING AND FOOTWEAR					
	Clothing materials, other articles of clothing	Garments	Cleaning, repair and hire of clothing	Shoes and other footwear	Repair and hire of footwear

<b>HOUSING, WATER, ELECTRICITY, GAS</b>				
				<b>Actual and imputed rentals for housing</b>

Water supply      Miscellaneous services relating to the dwelling      Electricity

Gas      Liquid fuel      Solid fuels

<b>FURNISHINGS, HOUSEHOLD EQUIPMENT</b>				
				

**Furniture and furnishings**      **Carpets and other floor coverings**      **Repair of Furniture**      **Household textiles**

**Major household appliances whether electric or not**      **Repair of household appliances**      **Glassware, tableware and household utensils**      **Non-durable household goods**      **Domestic services and household services**

<b>HEALTH</b>					
	<b>Pharmaceutical products</b>	<b>Medical services</b>	<b>Dental services</b>	<b>Paramedical services</b>	<b>Hospital services</b>

<b>TRANSPORT</b>				
	<b>Motor cars</b>	<b>Motor cycles</b>	<b>Bicycles</b>	<b>Vehicle spare parts</b>

**Fuels and lubricants for personal transportation**      **Maintenance and repair of personal transport**      **Passenger transport by road**      **Passenger transport by air**      **Passenger transport by sea and inland waterways**

## ALL ITEM INDEX

The consumer price index, (CPI) which measures inflation increased by 12.26 percent (year-on-year) in March 2020. This is 0.06 percent points higher than the rate recorded in February 2020 (12.20) percent.

*The lock down in Abuja, Lagos and Ogun States and various major disruptions in normal economic activity in several States since then, started in April 2020 and accordingly would not have any major impact on March 2020 Inflation which this report focusses on.*

Increases were recorded in all COICOP divisions that yielded the Headline index.

On month-on-month basis, the Headline index increased by 0.84 percent in March 2020. This is 0.05 percent higher than the rate recorded in February 2020 (0.79 percent).

The percentage change in the average composite CPI for the twelve months period ending March 2020, over the average CPI for the previous twelve months period was 11.62 percent, showing 0.08 percent point from 11.54 percent recorded in February 2020.

The urban inflation rate increased by 12.93 percent (year-on-year) in March 2020 from 12.85 percent recorded in February 2020, while the rural inflation rate increased by 11.64 percent in March 2020 from 11.61 percent in February 2020.

On a month-on-month basis, the urban index rose by 0.88 percent in March 2020, up by 0.06 from 0.82 percent recorded in February 2020, while the rural index also rose by 0.80 percent in March 2020, up by 0.04 points from the rate recorded in February 2020 (0.76 percent).

The corresponding twelve-month year-on-year average percentage change for the urban index was 12.15 percent in March 2020 (this is higher than 12.03 percent reported in February 2020), while the corresponding rural inflation rate in March 2020 was 11.14 percent compared to 11.09 percent recorded in February 2020.

4. Inflation -Urban All Items (%)

# FOOD INDEX

The composite food index rose by 14.98 percent in March 2020 compared to 14.90 percent in February 2020.

This rise in the food index was caused by increases in prices of Bread and Cereals, Fish, Potatoes, Yam and other tubers, Oils and fats, Vegetables, and Fruits.

On month-on-month basis, the food sub-index increased by 0.94 percent in March 2020, up by 0.07 percent points from 0.87 percent recorded in February 2020.

The average annual rate of change of the Food sub-index for the twelve-month period ending March 2020, over the previous twelve-month average was 14.11 percent, 0.13 percent points from the average annual rate of change recorded in February 2020 (13.98) percent.

## ALL ITEMS LESS FARM PRODUCE

The "All items less farm produce" or Core inflation, which excludes the prices of volatile agricultural produce stood at 9.73 percent in March 2020, up by 0.3 percent when compared with 9.43 percent recorded in February 2020.

On month-on-month basis, the core sub-index increased by 0.80 percent in March 2020. This was up by 0.07 percent when compared with 0.73 percent recorded in February 2020.

The highest increases were recorded in prices of Passenger transport by air, Tobacco, Household textiles, Major household appliances, Domestic services and household services, Pharmaceutical products, Maintenance and repair of personal transport equipment, Water supply and Catering services.

The average 12-month annual rate of change of the index was 9.11 percent for the twelve-month period ending March 2020. This is 0.02 percent points higher than 9.09 percent recorded in February 2020.

## STATE PROFILES

In analysing price movements under this section, note that the CPI is weighted by consumption expenditure patterns which differ across states. Accordingly, the weight assigned to a particular food or non-food item may differ from state to state making interstate comparisons of consumption basket inadvisable and potentially misleading.

### All Items Inflation

In March 2020, all items inflation on year on year basis was highest in Bauchi (15.55%), Niger (14.04%) and Kebbi (13.90%), while Lagos (10.82%), Abuja (10.19%) and Kwara (9.94%) recorded the slowest rise in headline Year on Year inflation.

On month on month basis however, March 2020 all items inflation was highest in Bayelsa (1.64%), Bauchi (1.63%) and Ondo (1.60%), while Kano (0.21%), Abia (0.17%), recorded the slowest rise on month on month inflation with Lagos recording price deflation or negative inflation (general decrease in the general price level or negative inflation rate).

### Food Inflation

In March 2020, food inflation on a year on year basis was highest in Sokoto (16.81%), Edo (16.63%) and Ogun (16.39%), while Jigawa (13.69%), Bauchi (13.40%) and Lagos (13.06%) recorded the slowest rise.

On month on month basis however, March 2020 food inflation was highest in Bayelsa (2.36%), Kogi (2.18%) and Kebbi (2.17%), while Kano (0.22%), Cross River (0.09%) recorded the slowest rise on month on month inflation with Lagos recorded price deflation or negative inflation (general decrease in the general price level of food or a negative food inflation rate).
