BRIEF METHODOLOGY

The CPI measures the average change over time in prices of goods and services consumed by people for day-to-day living. The construction of the CPI combines economic theory, sampling and other statistical techniques using data from other surveys to produce a weighted measure of average price changes in the Nigerian economy. The weighting occurs to capture the importance of the selected commodities in the entire index. The production of the CPI requires skills of economists, statisticians, computer scientists, data collectors and others.

Key in the construction of the price index is the selection of the market basket of goods and services. Every month, 10,534 informants spread across the country provide price data for the computation of the CPI. The market items currently comprise of 740 goods and services regularly priced.

The first stage in the calculation of the CPI is the collection of prices on each item (740 goods and services) from outlets in each sector (rural or urban) for each state. Prices are then averaged for each item per sector across the state. The next step is to use the average price to calculate the basic index for each commodity: The current year price of each commodity is compared with a base year's price to obtain a relative price.

Next we use the Laspeyres formula to compute an aggregated index for each class (which has a multitude of commodities which have similar consumption purposes): Here the sum of the product of weights (obtained from the expenditure survey) and relative prices for each item is divided by the sum of the weight of the items in that class, and the result multiplied by 100 gives the required index number. This index number is still classified according to the urban or rural classification sector for each of the 36 states and the FCT. This yields 85 classes then 48 groups which are then reclassified into 12 Divisions to derive:

- 1. The country composite index
- 2. The Urban National index
- 3. The Rural National index
- 4. The Combined Urban and Rural State Composite index

The survey methodology generates 3774 all items indices for all states and the FCT.

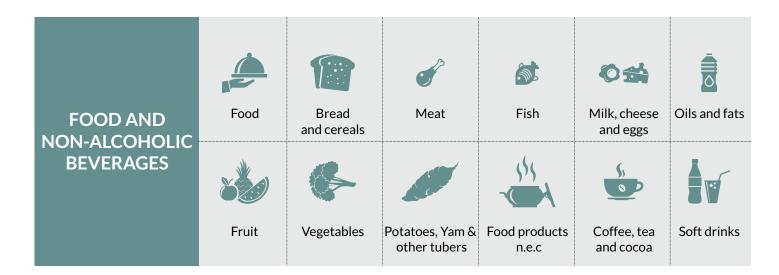

This edition of the Statistical News contains the revised Consumer Price Index (CPI) based on Nigeria Living Standard Survey (NLSS) 2003/2004. The consumption expenditure data were re-valued to November 2009, which is the base period for the revised CPI.

The May 2003 and September 1985 based indices are being continued using factors derived from the new CPI. These indices will yield the same price change for any commodity group contained in all the series.

A new sub index – Imported Food Index- is available in the revised CPI.

Note: The urban and rural indices were weighted with the ratio of their populations to the national i.e. 0.455 and 0.545 respectively to compute the composite indices at the 12 Classification of Individual Consumption by Purpose (COICOP) functions and all items levels. This may cause variance between a recalculated all items index using the weights published on table 2 and the published all items index because the published weights were computed only from consumption expenditure survey result. The following breakdown highlights a non-exhaustive list of the components of the current CPI:

The following breakdown highlights a non-exhaustive list of the components of the current CPI:

Shoes and other footwear

Repair and hire of footwear

Actual and imputed rentals for housing

Water supply

Miscellaneous services relating to the dwelling

Electricity

Gas

Liquid fuel

FURNISHINGS, **HOUSEHOLD EQUIPMENT**

Furniture and furnishings

Carpets and other floor coverings

Repair of Furniture

Household textiles

Major household appliances whether electric or not

Repair of household appliances

Glassware, tableware and household utensils

Non-durable household goods

Domestic services and household services

HEALTH

Pharmaceutical products

Medical services

Dental services

Paramedical services

Hospital services

TRANSPORT

Motor cars

Motor cycles

Bicycles

Vehicle spare parts

Fuels and lubricants for personal transportation

Maintenance and repair of personal transport

Passenger transport by road

Passenger

Passenger transport by air transport by sea and inland waterways

RECREATION AND CULTURE

Audio-visual, photographic and information processing equipment

Photographic development

Musical instrument

Recreational and sporting services

Games of chance

EDUCATION

Books & stationery

RESTAURANTS AND HOTELS

Catering services

Accommodation services

MISCELLANEOUS GOODS AND SERVICES

Hairdressing salons and personal grooming establishments

Appliances, articles and products for personal care

Jewellery, clocks and watches

Insurance

Other services

ALL ITEM INDEX

The consumer price index, (CPI) which measures inflation increased by 16.47 percent (year-on-year) in January 2021. This is 0.71 percent points higher than the rate recorded in December 2020 (15.75 percent).

Increases were recorded in all COICOP divisions that yielded the Headline index.

On month-on-month basis, the Headline index increased by 1.49 percent in January 2021. This is 0.12 percentage points lower than the rate recorded in December 2020 (1.61 percent).

The percentage change in the average composite CPI for the twelve months period ending January 2021 over the average of the CPI for the previous twelve months period was 13.62 percent, representing a 0.37 percentage point increase over 13.25 percent recorded in December 2020.

The urban inflation rate increased by 17.03 percent (year-on-year) in January 2021 from 16.33 percent recorded in December 2020, while the rural inflation rate increased by 15.92 percent in January 2021 from 15.20 percent in December 2020.

On a month-on-month basis, the urban index rose by 1.52 percent in January 2021, down by 0.13 percentage points when compared to the rate recorded in December 2020, while the rural index also rose by 1.46 percent in January 2021, down by 0.12 compared to the rate that was recorded in December 2020 (1.58 percent).

The corresponding twelve-month year-on-year average percentage change for the urban index was 14.23 percent in January 2021. This is higher than the 13.86 percent reported in December 2020, while the corresponding rural inflation rate in January 2021 was 13.04 percent compared to 12.67 percent recorded in December 2020.

FOOD INDEX

The composite food index rose by 20.57 percent in January 2021 compared to 19.56 percent in December 2020.

This rise in the food index was caused by increases in prices of Bread and cereals, Potatoes, Yam and other tubers, Meat, Fruits, Vegetable, Fish and Oils and Fats.

On month-on-month basis, the food sub-index increased by 1.83 percent in January 2021, down by 0.22 percent points from 2.05 percent recorded in December 2020.

The average annual rate of change of the Food sub-index for the twelve-month period ending January 2021 over the previous twelve-month average was 16.66 percent, 0.49 percent points higher than the average annual rate of change recorded in December 2020 (16.17 percent).

ALL ITEMS LESS FARM PRODUCE

The "All items less farm produce" or Core inflation, which excludes the prices of volatile agricultural produce stood at 11.85 percent in January 2021, up by 0.48 percent when compared with 11.37 percent recorded in December 2020.

On month-on-month basis, the core sub-index increased by 1.26 percent in January 2021. This was up by 0.16 percent when compared with 1.10 percent recorded in December 2020.

The highest increases were recorded in prices of Passenger transport by air, Medical services, Hospital services, Passenger transport by road, Pharmaceutical products, Paramedical services, Repair of furniture, Vehicle spare parts, Motor cars, Miscellaneous services relating to the dwelling, Maintenance and repair of personal transport equipment,

The average 12-month annual rate of change of the index was 10.52 percent for the twelve-month period ending January 2021. This was 0.21 percent points higher than 10.31 percent recorded in December 2020.

STATE PROFILES

In analysing price movements under this section, note that the CPI is weighted by consumption expenditure patterns which differ across states. Accordingly, the weight assigned to a particular food or non-food item may differ from state to state making interstate comparisons of consumption basket inadvisable and potentially misleading.

All Items Inflation

In January 2021, all items inflation on year on year basis was highest in Kogi (21.38%), Oyo (20.17%) and Bauchi (19.52%), while Kwara (13.96%), Abuja (12.96%) and Cross River (12.22%) recorded the slowest rise in headline Year on Year inflation.

On month on month basis however, January 2021 all items inflation was highest in Oyo (4.28%), Ebonyi (3.95%) and Lagos (3.33%), while Abuja, Edo and Cross River recorded price deflation or negative inflation (general decrease in the general price level of food or a negative food inflation rate).

Food Inflation

In January 2021, food inflation on a year on year basis was highest in Kogi (26.64%), Oyo (23.69%) and River (23.49%), while Ondo (17.20%), Abuja (16.73%) and Bauchi (16.37%) recorded the slowest rise.

On month on month basis however, January 2021 food inflation was highest in Oyo (4.47%), Lagos (3.86%) and River (3.11%), while Akwa Ibom (0.25%) and Bayelsa (0.13%) recorded the slowest rise with Edo recording price deflation or negative inflation (general decrease in the general price level of food or a negative food inflation rate).
