BRIEF METHODOLOGY

The CPI measures the average change over time in the prices of goods and services consumed by people for day-to-day living. The construction of the CPI combines economic theory, sampling, and other statistical techniques using data from other surveys to produce a weighted measure of average price changes in the Nigerian economy. The weighting occurs to capture the importance of the selected commodities in the entire index. The production of the CPI requires the skills of economists, statisticians, computer scientists, data collectors, and others.

Key in the construction of the price index is the selection of the market basket of goods and services. Every month, 10,534 informants spread across the country provide price data for the computation of the CPI. The market items currently comprise 740 goods and services regularly priced. The first stage in the calculation of the CPI is the collection of prices on each item (740 goods and services) from outlets in each sector (rural or urban) for each state. Prices are then averaged for each item per sector across the state. The next step is to use the average price to calculate the basic index for each commodity: The current year price of each commodity is compared with a base year's price to obtain a relative price.

Next, we use the Laspeyres formula to compute an aggregated index for each class (which has a multitude of commodities that have similar consumption purposes): Here the sum of the product of weights (obtained from the expenditure survey) and relative prices for each item is divided by the sum of the weight of the items in that class, and the result multiplied by 100 gives the required index number. This index number is still classified according to the urban and rural sectors for each of the 36 states

and the FCT. This yields 85 classes then 48 groups which are then reclassified into 12 Divisions to derive:

1. The Country Composite Index

2. The Urban National Index
3. The Rural National Index
4. The Combined Urban and Rural State Composite Index

The survey methodology generates 3774 all-items indices for all states and the FCT.

This edition of the Statistical News contains the revised Consumer Price Index (CPI) based on Nigeria Living Standard Survey (NLSS) 2003/2004. The consumption expenditure data were re-valued to November 2009, which is the base period for the revised CPI.

The May 2003 and September 1985-based indices are being continued using factors derived from the new CPI. These indices will yield the same price change for any commodity group contained in all the series.

A new sub-index Imported Food Index- is available in the revised CPI.

Note: The urban and rural indices were weighted with the ratio of their populations to the national i.e., 0.455 and 0.545 respectively to compute the composite indices at the 12 Classification of Individual Consumption by Purpose (COICOP) functions and all-items levels. This may cause a variance between a recalculated all items index using the weights and the All-Items index published because the weights were computed only from the consumption expenditure survey result.

The following breakdown highlights a non-exhaustive list of the components of the current CPI:

HOUSING, WATER, ELECTRICITY AND GAS

Actual and imputed rentals for housing

Water supply

Liquid fuel

Electricity

Gas

FURNISHINGS, HOUSEHOLD EQUIPMENT

Furniture and furnishings

Household textiles

Repair of household appliances

Carpets and other floor coverings

Non-durable household goods

HEALTH

Pharmaceutical products

Medical services

Dental services

Hospital services

Paramedical services

TRANSPORT

Motor cars

Motor cycles

Passenger transport by air

Passenger transport by road

Passenger transport by sea and inland waterways

COMMUNICATION

Postal services

Telephone and telefax equipment

Telephone and telefax services

RECREATION AND CULTURE

Photographic development

Musical instrument

Recreational and sporting services

Games of chance

Audio-visual, photographic and information processing equipment

EDUCATION

Books & stationery

RESTAURANTS AND HOTELS

Accommodation services

Catering services

MISCELLANEOUS GOODS AND SERVICES

Hairdressing salons and personal grooming establishments

Jewellery, clocks and watches

Appliances, articles and products for personal care

Insurance

Other services

ALL ITEMS INDEX

In June 2023, the Headline inflation rate rose to 22.79% relative to May 2023 headline inflation rate which was 22.41%. Looking at the movement, the June 2023 Headline inflation rate showed an increase of 0.38% points when compared to May 2023 headline inflation rate.

On a year-on-year basis, the Headline inflation rate was 4.19% points higher compared to the rate recorded in June 2022, which was 18.60%. This shows that the Headline inflation rate (year-on-year basis) increased in June 2023 when compared to the same month in the preceding year (i.e., June 2022).

The contributions of items on the divisional level to the increase in the Headline index are presented below:

Divisional Level	Contribution YoY (%)
Food & Non-Alcoholic Beverages	11.81
Housing Water, Electricity, Gas & Other Fuel	3.81
Clothing & Footwear	1.74
Transport	1.48
Furnishings & Household Equipment & Maintenance.	1.15
Education	0.90
Health.	0.68
Miscellaneous Goods & Services	0.38
Restaurant & Hotels	0.28
Alcoholic Beverage, Tobacco & Kola	0.25
Recreation & Culture.	0.16
Communication	0.15

On a month-on-month basis, the Headline inflation rate in June 2023 was 2.13%, this was 0.19% points higher than the rate recorded in May 2023 (1.94%). This means that in June 2023, on average, the general price level was 0.19% higher relative to May 2023.

The percentage change in the average CPI for the twelve months period ending June 2023 over the average of the CPI for the previous twelve months period was 21.54%, showing a 5.00% increase compared to 16.54% recorded in June 2022.

URBAN INFLATION

On a year-on-year basis, the Urban inflation rate in June 2023 was 24.33%, this was 5.23% points higher compared to the 19.09% recorded in June 2022. On a month-on-month basis, the Urban inflation rate was 2.31% in June 2023, which was 0.21% points higher compared to May 2023 (2.09%). The corresponding twelve month average for the Urban inflation rate was 22.38% in June 2023. This was 5.30% points higher compared to the 17.09% reported in June 2022.

RURAL INFLATION

The Rural inflation rate in June 2023 was 21.37% on a year-on-year basis; this was 3.25% points higher compared to the 18.13% recorded in June 2022. On a month-on-month basis, the Rural inflation rate in June 2023 was 1.96%, up by 0.16% points compared to May 2023 (1.80%). The corresponding twelve months average for the Rural inflation rate in June 2023 was 20.76%. This was 4.75% points higher compared to the 16.02% recorded in June 2022.

FOOD INDEX

The Food inflation rate in June 2023 was 25.25% on a year-on-year basis; this was 4.65% points higher relative to the rate recorded in June 2022 (20.60%). The rise in Food inflation on a year-on-year basis was caused by increases in prices of Oil and fat, Bread and cereals, Fish, Potatoes, Yam and other tubers, Fruits, Meat, Vegetable, Milk, Cheese, and Eggs.

On a month-on-month basis, the Food inflation rate in June 2023 was 2.40%, this was 0.21% points higher compared to the rate recorded in May 2023 (2.19%).

The average annual rate of Food inflation for the twelve months ending June 2023 over the previous twelve month average was 24.03%, this was 5.41% points increase from the average annual rate of change recorded in June 2022 (18.62%).

ALL ITEMS LESS FARM PRODUCE

The “All items less farm produce” or Core inflation, which excludes the prices of volatile agricultural produce stood at 20.27% in June 2023 on a year-on-year basis; up by 4.53% when compared to the 15.75% recorded in June 2022. The highest increases were recorded in prices of Passenger Transport by Air, Gas, Vehicles Spare Parts, Liquid Fuel, Fuels and Lubricants for Personal Transport Equipment, Medical Services, Passenger Transport by Road etc. On a month-on-month basis, the Core Inflation rate was 1.74% in June 2023. It stood at 1.81% in May 2023, down by 0.07%. The average twelve months annual inflation rate was 18.71% for the twelve months ending June 2023; this was 4.65% points higher than the 14.06% recorded in June 2022.

STATE PROFILES

In analysing price movements under this section, it should be noted that CPI is weighted by consumption expenditure patterns which differ across States and locations. Accordingly, the weight assigned to a particular Food or Non-Food item may differ from State to State making interstate comparisons of consumption basket inadvisable and potentially misleading.

All Items Inflation

In June 2023, all items inflation rate on a year-on-year basis was highest in Lagos (25.75%), Ondo (25.40%), Kogi (25.23%), while Borno (20.44%), Zamfara (20.93%) and Ekiti (21.06%) recorded the slowest rise in headline inflation on a year-on-year basis. On a month-on-month basis, however, June 2023 recorded the highest increases in Ogun (3.21%), Plateau (3.05%), Jigawa (3.00%), while Zamfara (1.40%), Delta (1.42%) and Rivers (1.54%) recorded the slowest rise on month-on-month inflation.

Food Inflation

In June 2023, Food inflation on a year-on-year basis was highest in Kwara (30.80%), Lagos (30.37%), and Kogi (29.71%), while Zamfara (21.38%), Sokoto (21.60%) and Borno (21.75%) recorded the slowest rise in Food inflation on a year-on-year basis. On a month-on-month basis, however, June 2023 Food inflation was highest in Kwara (3.82%), Abuja (3.64%), and Ogun (3.56%), while Rivers (0.75%), Zamfara (1.33%) and Adamawa (1.47%) recorded the slowest rise in Food inflation on a month-on-month basis.
