## BRIEF METHODOLOGY

The CPI measures the average change over time in the prices of goods and services consumed by people for day-to-day living. The construction of the CPI combines economic theory, sampling, and other statistical techniques using data from other surveys to produce a weighted measure of average price changes in the Nigerian economy. The weighting occurs to capture the importance of the selected commodities in the entire index. The production of the CPI requires the skills of economists, statisticians, computer scientists, data collectors, and others.

Key in the construction of the price index is the selection of the market basket of goods and services. Every month, 10,534 informants spread across the country provide price data for the computation of the CPI. The market items currently comprise 740 goods and services regularly priced. The first stage in the calculation of the CPI is the collection of prices on each item (740 goods and services) from outlets in each sector (rural or urban) for each state. Prices are then averaged for each item per sector across the state. The next step is to use the average price to calculate the basic index for each commodity: The current year price of each commodity is compared with a base year's price to obtain a relative price.

Next, we use the Laspeyres formula to compute an aggregated index for each class (which has a multitude of commodities that have similar consumption purposes): Here the sum of the product of weights (obtained from the expenditure survey) and relative prices for each item is divided by the sum of the weight of the items in that class, and the result multiplied by 100 gives the required index number. This index number is still classified according to the urban and rural sectors for each of the 36 states

and the FCT. This yields 85 classes then 48 groups which are then reclassified into 12 Divisions to derive:

1. The Country Composite Index

2. The Urban National Index
3. The Rural National Index
4. The Combined Urban and Rural State Composite Index

The survey methodology generates 3774 all-items indices for all states and the FCT.

This edition of the Statistical News contains the revised Consumer Price Index (CPI) based on Nigeria Living Standard Survey (NLSS) 2003/2004. The consumption expenditure data were re-valued to November 2009, which is the base period for the revised CPI.

The May 2003 and September 1985-based indices are being continued using factors derived from the new CPI. These indices will yield the same price change for any commodity group contained in all the series.

A new sub-index Imported Food Index- is available in the revised CPI.

Note: The urban and rural indices were weighted with the ratio of their populations to the national i.e., 0.455 and 0.545 respectively to compute the composite indices at the 12 Classification of Individual Consumption by Purpose (COICOP) functions and all-items levels. This may cause a variance between a recalculated all items index using the weights and the All-Items index published because the weights were computed only from the consumption expenditure survey result.

**The following breakdown highlights a non-exhaustive list of the components of the current CPI:**

## HOUSING, WATER, ELECTRICITY AND GAS

Actual and imputed rentals for housing

Water supply

Liquid fuel

Electricity

Gas

## FURNISHINGS, HOUSEHOLD EQUIPMENT

Furniture and furnishings

Household textiles

Repair of household appliances

Carpets and other floor coverings

Non-durable household goods

## HEALTH

Pharmaceutical products

Medical services

Dental services

Hospital services

Paramedical services

## TRANSPORT

Motor cars

Motor cycles

Passenger transport by air

Passenger transport by road

Passenger transport by sea and inland waterways

## COMMUNICATION

Postal services

Telephone and telefax equipment

Telephone and telefax services

## RECREATION AND CULTURE

Photographic development

Musical instrument

Recreational and sporting services

Games of chance

Audio-visual, photographic and information processing equipment

## EDUCATION

Books & stationery

## RESTAURANTS AND HOTELS

Accommodation services

Catering services

## MISCELLANEOUS GOODS AND SERVICES

Hairdressing salons and personal grooming establishments

Jewellery, clocks and watches

Appliances, articles and products for personal care

Insurance

Other services

## ALL ITEMS INDEX

In November 2023, the headline inflation rate increased to 28.20% relative to October 2023 headline inflation rate which was 27.33%. Looking at the movement, the November 2023 headline inflation rate showed an increase of 0.87% points when compared to October 2023 headline inflation rate.

On a year-on-year basis, the headline inflation rate was 6.73% points higher compared to the rate recorded in November 2022, which was 21.47%. This shows that the headline inflation rate (year-on-year basis) increased in November 2023 when compared to the same month in the preceding year (i.e., November 2022).

Furthermore, on a month-on-month basis, the headline inflation rate in November 2023 was 2.09%, which was 0.35% higher than the rate recorded in October 2023 (1.73%). This means that in November 2023, the rate of increase in the average price level is more than the rate of increase in average price level in October 2023.

The contributions of items on Divisional level to the increase in the Headline index are presented below:

<b>Divisional Level</b>	<b>Contribution YoY (%)</b>
Food & Non-Alcoholic Beverages	14.61
Housing, Water, Electricity, Gas & Other Fuel	4.72
Clothing & Footwear	2.16
Transport	1.84
Furnishings & Household Equipment & Maintenance	1.42
Education	1.11
Health.	0.85
Miscellaneous Goods & Services	0.47
Restaurant & Hotels	0.34
Alcoholic Beverage, Tobacco & Kola	0.31
Recreation & Culture	0.19
Communication	0.19

<b>Divisional Level</b>	<b>Contribution MoM (%)</b>
Food & Non-Alcoholic Beverages	1.08
Housing, Water, Electricity, Gas & Other Fuel	0.35
Clothing & Footwear	0.16
Transport	0.14
Furnishings & Household Equipment & Maintenance	0.11
Education	0.08
Health.	0.06
Miscellaneous Goods & Services	0.03
Restaurant & Hotels	0.03
Alcoholic Beverage, Tobacco & Kola	0.02
Recreation & Culture	0.01
Communication	0.01

The percentage change in the average CPI for the twelve-months period ending November 2023 over the average of the CPI for the previous twelve-months period was 24.01%, showing 5.64% increase compared to 18.37% recorded in November 2022.

### **URBAN INFLATION**

On a year-on-year basis, in November 2023, the Urban inflation rate was 30.21%, this was 8.13% points higher compared to the 22.09% recorded in November 2022. On a month-on-month basis, the Urban inflation rate was 2.23% in November 2023, this was 0.41% points higher compared to October 2023 (1.81%). The corresponding twelve-month average for the Urban inflation rate was 25.45% in November 2023. This was 6.56% points higher compared to the 18.90% reported in November 2022.

### **RURAL INFLATION**

The Rural inflation rate in November 2023 was 26.43% on a year-on-year basis; this was 5.55% points higher compared to the 20.88% recorded in November 2022. On a month-on-month basis, the Rural inflation rate in November 2023 was 1.99%, up by 0.31% points compared to October 2023 (1.67%). The corresponding twelve-month average for the Rural inflation rate in November 2023 was 22.71%. This was 4.83% points higher compared to the 17.88% recorded in November 2022.

## FOOD INFLATION

The Food inflation rate in November 2023 was 32.84% on a year-on-year basis, which was 8.72% points higher compared to the rate recorded in November 2022 (24.13%). The rise in Food inflation on a year-on-year basis was caused by increases in prices of Bread and cereals, Oil and fat, Potatoes, Yam and other Tubers, Fish, Fruit, Meat, Vegetables and Coffee, Tea and Cocoa.

On a month-on-month basis, the Food inflation rate in November 2023 was 2.42% this was 0.51% higher compared to the rate recorded in October 2023 (1.91%). The rise in Food inflation on a month-on-month basis was caused by rise in the rate of increase in the average prices of Bread and Cereals, Oil and fat, Meat, Coffee, Tea and Cocoa, Potatoes, Yam & Other Tubers.

The average annual rate of Food inflation for the twelve-months ending November 2023 over the previous twelve-month average was 27.09%, which was 6.68% points increase from the average annual rate of change recorded in November 2022 (20.41%).

## ALL ITEMS LESS FARM PRODUCE AND ENERGY (CORE INFLATION)

*Before now, "all items less farm produces" is referred to as the Core inflation. This was because the prices of items that constitute energy were regulated by the government e.g, Petroleum Motor Spirit (PMS). Due to the deregulation of the sector and the removal of the fuel subsidy, all the items that constitute energy are now determined by market forces and hence their prices are termed volatiles. Therefore, Core inflation is referred to as all items index less farm produces and energy.*

The "All items less farm produces and energy" or Core inflation, which excludes the prices of volatile agricultural produces and energy stood at 22.38% in November 2023 on a year-on-year basis; up by 4.39% when compared to the 17.99% recorded in November 2022. The highest increases were recorded in prices of Passenger Transport by Road, Medical Services, Passenger Transport by Air, Actual and Imputed Rentals for Housing, Pharmaceutical products, Accommodation service etc.

On a month-on-month basis, the Core Inflation rate was 1.53% in November 2023. It stood at 1.39% in October 2023, up by 0.14%. The average twelve-month annual inflation rate was 20.35% for the twelve-months ending November 2023; this was 4.66% points higher than the 15.69% recorded in November 2022.

## STATE PROFILES

In analysing price movements under this section, it should be noted that CPI is weighted by consumption expenditure patterns which differ across States and locations. Accordingly, the weight assigned to a particular Food or Non-Food item may differ from State to State making interstate comparisons of consumption basket inadvisable and potentially misleading.

### **All Items Inflation**

In November 2023, All Items inflation rate on a Year-on-Year basis was highest in Kogi (33.28%), Lagos (32.30%), Rivers (32.25%), while Borno (22.47%), Katsina (24.91%) and Plateau (25.53%) recorded the slowest rise in Headline inflation on Year-on-Year basis. On a Month-on-Month basis, however, November 2023 recorded the highest increases in Kano (3.55%), Kebbi (3.34%), Borno (3.24%), while Taraba (0.74%), Anambra (1.00%) and Enugu (1.18%) recorded the slowest rise on Month-on-Month inflation.

### **Food Inflation**

In November 2023, Food inflation on a Year-on-Year basis was highest in Kogi (41.29%), Kwara (40.72%) and Rivers (40.22%), while Bauchi (26.14%), Borno (27.34%) and Jigawa (27.63%) recorded the slowest rise in Food inflation on Year-on-Year basis. On a Month-on-Month basis, however, November 2023 Food inflation was highest in Cross River (4.37%), Edo (3.95%) and Rivers (3.91%), while Anambra (0.63%), Oyo (0.91%) and Bauchi (1.00%) recorded the slowest rise in inflation on Month-on-Month basis.
