

STATISTICAL REPORT ON WOMEN AND MEN IN NIGERIA

2022

APRIL 2024

TABLE OF CONTENTS

TABLE OF CONTENTS	i
LIST OF TABLES	iv
LIST OF FIGURES	vi
ACRONYMS/ABBREVIATIONS	ix
PREFACE.....	x
EXECUTIVE SUMMARY	xii
CHAPTER 1: POPULATION	1
1.1 Introduction	1
1.2 General Population Patterns	1
1.2.1 Population and Growth Rate	1
CHAPTER 2: HEALTH	3
2.1 Introduction	3
2.2 Life Expectancy at Birth.....	4
2.3 Reproductive Health.....	5
2.3.1 Total Fertility Rate	5
2.3.2 Adolescent Fertility	5
2.3.3 Crude Birth Rate.....	6
2.3.4 Early Childbearing	6
2.3.5 Antenatal Care.....	7
2.3.6 Delivery Care	8
2.3.7 Contraceptive Use Among Married Women.....	9
2.4 Maternal Mortality Ratio.....	10
2.5 Early Childhood Mortality Rate	11
2.5.1 Neonatal Mortality Rate	12
2.5.2 Infant Mortality Rate	12
2.5.3 Child Mortality Rate.....	13
2.5.4 Under 5 Mortality	13
2.6 HIV and AIDS	13
2.7 Reported Cases of Pregnant Women with Malaria	15
2.8 Menstrual Hygiene	16
2.9 Health Insurance.....	17
CHAPTER 3: EDUCATION.....	20
3.1 Introduction	20
3.2 Educational Outcomes.....	21
3.2.1 Literacy	21
3.3 Participation in Education	22
3.3.1 Adult/Basic Literacy Education	22
3.3.2 Nomadic Education	23
3.3.3 Universal Basic Education	24
3.3.4 Primary School	25
3.3.5 Junior Secondary School	27
3.3.6 Senior Secondary School Education	29
3.3.7 Tertiary Education.....	30
3.4 Distribution of Teachers	37

3.4.1	Distribution of Nomadic Primary School Teachers by Sex (2020-2022)	37
3.4.2	Highest Teaching Qualification in Public and Private ECCDE (2020)	37
3.4.3	Highest Teaching Qualification in Public and Private Primary Schools (2020)	38
3.4.4	Highest Teaching Qualification in Public and Private Junior Secondary Schools (JSS) (2020)	39
3.4.5	Percentage Distribution of Qualified Teachers in Public and Private ECCDE/Pre-Primary School (2021)	40
3.4.6	Public and Private Primary School Teachers (2021)	41
3.4.7	Public and Private Junior Secondary School (JSS) Teachers by State and Gender (2021)	41
3.4.8	Teaching Staff of Polytechnics	42
3.4.9	Teaching Staff/Non-Teaching Staff of Nigerian Universities	42
3.4.10	Academic Staff of Federal, State, and Private Universities by Sex (2019/2020)	42
3.4.11	Teaching Staff/Non-Teaching Staff of Nigerian Universities	43
3.4.12	Academic and Non-Academic Staff of Nigerian Universities (2019)	43
3.4.13	Distribution of Academic Staff of Nigerian Universities by Rank and Sex, 2019	44
3.5	National Youth Service Corps	44
3.6	Examinations	46
3.6.1	Distribution of Public and Private School West African Senior Secondary Certificate Examinations (WASSCE) for School Candidates by Sex (May/June 2020-2022)	46
3.6.2	Distribution of West African Senior Secondary Certificate Examinations (WASSCE) for Private Candidates by Sex (May/June, 2020-2022)	47
3.6.3	NECO (SSC) Examination	48
3.6.4	Unified Tertiary Matriculation Examination (UTME)	49
CHAPTER 4: WORK		51
4.1	Labour Force	51
4.2	Gender Gap in Employment Patterns of Primary Job Types	52
4.3	Underemployment by Sector Q4 2022	53
4.4	Unemployment in Nigeria	53
4.5	Labour Market by Status Q4 2022	54
4.6	National Directorate of Employment (NDE)	54
4.7	Security Personnel	59
4.7.1	Police Officers by Rank	60
4.7.2	Nigeria Security and Civil Defence Corps	60
CHAPTER 5: POWER AND DECISION MAKING		62
5.1	Introduction	62
5.2	Politics and Governance	62
5.2.1	Executives	63
5.2.2	Legislators	65
5.2.3	Judiciary	67
CHAPTER 6: VIOLENCE AGAINST WOMEN AND CRIME		70

6.1	Introduction	70
6.2	Prevalence and Increase of Violence against Women and Children.....	71
6.2.1	Physical Violence against Women	71
6.2.2	Women and Men Who Believed a Husband is Justified in Beating His Wife if She Neglects the Children	76
6.2.3	Women and Men Who Believed a Husband is Justified in Beating His Wife If She Goes out without Telling Him.....	77
6.2.4	Women and Men Who Believed a Husband is Justified in Beating His Wife If She Burns the Food	78
6.3	Female Genital Mutilation (FGM) Among Girls	78
6.4	Child Marriage	79
6.5	Crime	80
6.5.1	Bank Fraud in Nigeria by Category and Year (2020-2022).....	80
6.5.2	Cases of Missing Persons in Nigeria.....	81
6.5.3	Suspects Arrested for Drug-Related Offences	81
6.5.4	Trafficking in Person	82
6.5.5	Number of Trafficked Person by Age Group, Sex and Year	82
6.5.6	Identified Victims of Trafficking for Forced Labour by Age Group and Year	83
6.5.7	Identified Trafficking for Prostitution.....	84
6.5.8	Distribution of Rape Incidences by State	84
6.5.9	Prison Inmates	85
6.5.10	Prison Admission	86
6.5.11	Percentage Distribution of Custodial Centre Admissions by Age Group 88	
6.5.12	Distribution of Custodial Centre Admissions by Religion (Nigerian) .	88
CHAPTER 7: EXPOSURE TO MASS MEDIA		90
7.1	Introduction	90
7.2	Exposure to Mass Media	90
7.2.1	Percentage Who Read a Newspaper at Least Once a Week.....	90
7.2.2	Percentage of those Who Listen to Radio at Least Once a Week	91
7.2.3	Percentage of Men and Women Who Watch Television at least Once a Week	92
7.2.4	Percentage Who Use all Three Media and those Who Use Any Media at Least Once a Week	92
7.3	Use of Computer	93
7.4	Use of Mobile Phone	94
7.5	Use of Internet	94
ANNEXES.....		100

PREFACE

Statistics offer an essential numerical representation of realities and thus provide an important basis for evidence-based policymaking. Gender statistics spanned different facet of statistics such as economics, health, education, employment, and other social sectors to explore the differences that exist between women and men in the society. Just like the rest of the world, most socio-economic issues being faced by Nigeria are gender related, this necessitates production of gender-disaggregated statistics more often. It provides vital information for policy and decision-makers towards achieving gender equality and other objectives.

The resolutions of the Convention on the Elimination of All Forms of Discrimination against Women (CEDAW), and the Beijing Platform of Action adopted at the Fourth World Conference on Women in 1995; the adoption of the 2030 Agenda for Sustainable Development Goals (SDG); the Africa We Want, Agenda 2063, as well as national priorities condensed in the Economic Recovery and Growth Plan (ERGP), provide the legal framework and platform for the use and production of gender statistics.

The Beijing Declaration laid out a comprehensive agenda to advance gender equality globally. Governments from around the world expressed their commitment " to promote the goals of equality, development and peace for all women, everywhere" as part of a broader mandate to realize the human rights of women and girls. The platform identified twelve critical areas of concern in ensuring women's empowerment such as full participation in economic, social, and political decision- making, poverty, education, health, gender-based violence (domestic violence), armed conflict, economic participation, inequality in power and decision making, lack of advancement opportunities, human rights, women and the media, natural resources, and the environment, as well as issues around the girl child. Similarly, Sustainable Development Goals (SDGs) gender-based indicators are aimed to measure involvement in economic activities, empowerment, access to resources, education, health, and other related-social sectors which include public life and decision-making, human rights of women and the girl child. These indicators and critical areas of concern underscore the significant need for information on the socio-economic status of women and men, precipitate an action to generate and disseminate gender-disaggregated information for important policy-making business.

In alignment with this platform and the UN Sustainable Development Goals' gender metrics, the National Bureau of Statistics (NBS) produces an annual Statistical Report on Women and Men to assess the country's progress on gender equality commitments. As the national repository of statistical information on the socio-economic phenomenon in Nigeria, the NBS is determined more than ever before to continue to collaborate with all data producers/stakeholders in the production of gender-disaggregated data which will adequately reflect the inequalities and gaps between women and men. The data included in this publication have been carefully and systematically collected, compiled, processed, and analyzed from a wide variety of primary and administrative data sources which will serve as a useful resource for policymakers at all levels (federal, state, & local governments), civil societies, private sector organizations, development partners, and the public.

The NBS wishes to appreciate all the relevant Ministries, Departments, and Agencies (MDAs) for their assistance in supplying useful administrative data to produce this publication. It is hoped that this publication will be useful to different users of gender-based statistics, including policy makers and government at all levels in Nigeria.

Prince Adeyemi Adeniran

Statistician-General of the Federation/CEO

April 2024

EXECUTIVE SUMMARY

This statistical report analyzes the status of women and men across Nigeria from 2020 to 2012 using statistics from agencies at the Federal, and State levels. The report covers six key economic policy domains: Population, Health, Education, Employment, Power and Decision-Making in Governance, and Violence Against Women & Crime. It benchmarks gender equality across these critical areas annually to measure progress, by compiling and analyzing comprehensive national statistics disaggregated by sex. The report aims to support policies and programs enhancing equal rights, responsibilities, and opportunities for women and men in Nigeria, using data from relevant agencies at Federal, State and Local Government levels.

Nigeria is the most populous country in Africa and the seventh most populous country in the world. In 2020, Nigeria's population was estimated at 206 million, which is projected to increase to 211 million in 2021 and 216 million in 2022 (NPC). In 2021, population growth was projected at 2.53 per cent. Women account for 49.99 per cent of Nigeria's total population, compared to men with 50.01 per cent.

Nationally, there has been an upward trend in the life expectancy of both males and females during the period under review. The life expectancy of females in 2020 was 56.6 years, it increased to 56.9 years in 2021 and 57.2 years in 2022, while males recorded 54.6 years, 54.8 years, and 55.1 years respectively. According to the 2021 MICS/NICS report, Nigeria recorded 75 live births per 1,000 women among adolescents. Under-5 mortality rate stood at 102 per 1,000 live births, the adolescent fertility was 75 live births per 1,000 women and the crude birth rate was 31.7 live births per 1,000 women. In addition, the neonatal mortality rate in Nigeria was 34 per 1,000 live births, while the infant mortality rate stood at 63 per 1,000 live births.

Also, the 2021 MICS/NICS report shows that the percentage of pregnant women who attended antenatal care and were seen at least once by skilled health personnel was 69.60 per cent. Furthermore, 18.20 per cent of women who are currently married or in union use any modern method of contraceptive for pregnancy prevention and family planning, 21.70 per cent of women use any method, while 78.30 per cent do not use any method.

The percentage of males and females aged 15 to 49 with knowledge of HIV stood at 74.10 per cent and 70.70 per cent in 2020 and 2022 respectively. The percentage of females

with access to treatment was 66.46 per cent in 2020, which decreased to 64.99 per cent in 2021, and 64.00 per cent in 2022.

The percentage of female doctors in 2020 was 36.03 per cent, which increased to 37.16 per cent in 2021 and declined to 35.42 per cent in 2022. Also, the percentage of female Dentists in Nigeria was below 50 per cent across the period under review. In 2020, it stood at 42.00 per cent, rose to 42.49 per cent and 42.94 per cent in 2021 and 2022 respectively.

Moreso, 72.30 per cent of women and 77.30 per cent of men between ages 15 and 24 were literate in English according to the Nigeria Living Standard Survey (NLSS) 2019. The percentage of female enrolments in adult/basic literacy education was 40.55 per cent in 2020, 46.10 per cent in 2021, and 38.32 per cent in 2022 (National Commission for Mass Literacy, Adult and Non-Formal Education 2022).

Furthermore, according to the National Commission for Nomadic Education data, the percentage of female pupils in Nomadic Primary Schools stood at 49.28, 49.11, and 44.21 percent in 2020, 2021, and 2022 respectively. The percentage of female enrolments in Public and Private primary schools in 2020 was 48.50 per cent, it increased to 49.03 per cent in 2021, and declined to 48.92 per cent in 2022. Female enrolments in Public and Private JSS in 2020 stood at 49.80 per cent, it decreased to 48.73 per cent in 2021 and rose to 51.47 per cent in 2022. Similarly, 49.10 per cent of enrolled SSS students in 2020 were female, which stood at 48.82 per cent in 2021. According to the National Universities Commission, the percentage of female enrolments in 2019/2020 and 2020/2021 academic sessions were 43.46 per cent and 44.49 per cent.

In Nigeria, the underemployment rate of females in Q4 2022 stood at 16.70 per cent, compared to males with 11.00 per cent. Unemployment among women in Q4 2022 stood at 6.60 per cent, while the percentage of unemployed males was 4.00 per cent.

According to the National Directorate of Employment data, the percentage of females who benefited from the Enterprise Development Programme was 59.81 per cent in 2020, it declined to 11.14 per cent in 2021 and increased to 55.00 per cent in 2022. Also, females were the highest beneficiaries in the National Open Apprenticeship Scheme (NOAS) in 2020, 2021, and 2022 with 54.94 per cent, 57.86 per cent, and 61.93 per cent respectively.

The number of female senators in 2015 and 2019 was 7, which further decreased to 3 in 2022. This accounts for approximately 3.90 per cent of the total number of senators. Similarly, there has been a consistent decrease in the number of female representatives in the House of Representatives, declining from 23 in 2015 to 12 in 2019, and 11 in 2022.

The available statistics reveal that the lifetime prevalence of physical violence experienced by women aged 15-49 has increased in Nigeria from 27.80 per cent in 2013 to 31.00 per cent in 2018. Women aged 15-49 who experienced sexual violence, regardless of the perpetrator, was 7.40 per cent in 2013, and 9.10 per cent in 2018. The prevalence of physical or sexual violence against women aged 15-49 increased from 29.60 per cent in 2013 to 33.40 per cent in 2018.

The number of females that were trafficked increased consistently from 865 in 2020 to 1,227 in 2021 and 2,229 in 2022. The number of female inmates in 2020, 2021, and 2022 was low with 1.90 per cent, 1.88 per cent, and 2.12 per cent respectively. However, under the reporting period, the percentage of females admitted into prison stood at 4.90 per cent, 4.48 per cent, and 4.82 per cent in 2020, 2021, and 2022 respectively.

According to the 2021 MICS/NICS report, 7.40 per cent of women and 17.20 per cent of men read newspapers at least once a week. Females who listened to the radio at least once a week constituted 34.40 per cent as against 50.80 per cent of males, while about 42.70 per cent of females and 48.90 per cent of males watched television at least once a week nationwide. Females accounted for 13.40 per cent and males constituted 21.80 per cent of those that ever used a computer. In addition, 78.60 per cent of females and 88.40 per cent of males used a mobile phone during the last three months. The percentage of females and males that used a mobile phone at least once a week during the last three months stood at 78.10 and 65.80 per cent respectively.

CHAPTER 1: POPULATION

Key Findings

- *Nigeria's population for 2022 was projected to be over 216 million people.*
- *Women constituted 49.99 per cent and men 50.01 per cent in 2021.*
- *The population growth rate was estimated at 2.53 per cent.*
- *The sex ratio was 100.1 men to 100 women in 2021.*

1.1 Introduction

Population size and its growth trajectory exert a profound influence on human living standards worldwide. This chapter delves into the intricacies of population dynamics and patterns within the country, with a particular focus on the elderly population, encompassing both men and women.

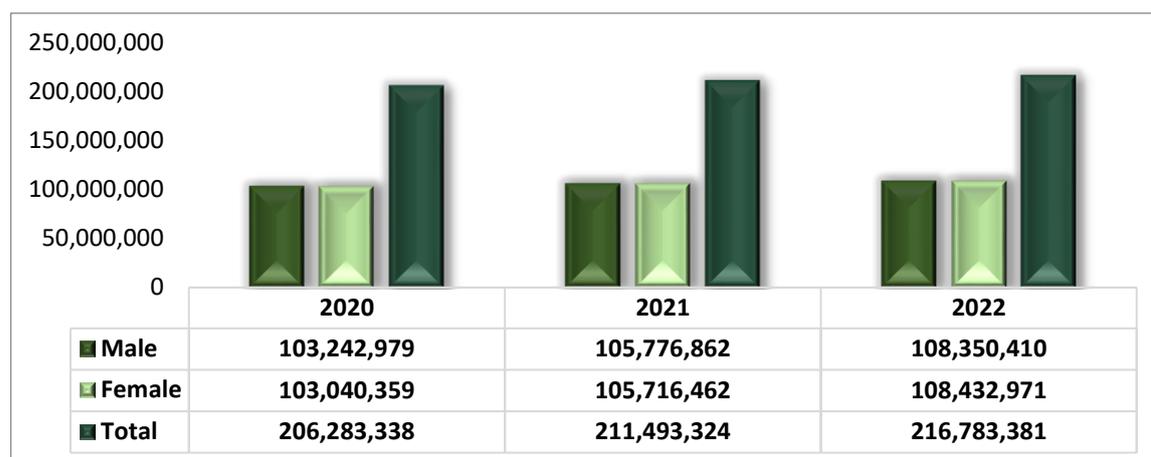

1.2 General Population Patterns

1.2.1 Population and Growth Rate

Nigeria is the most populous country in Africa and the seventh most populous country in the world. In 2020, the Nigeria population was estimated to be 206 million, which was projected at 211 million in 2021 and 216 million in 2022. The annual growth rate in 2022 stood at 2.50 per cent (NPC).

Looking at the trend from 2020, Nigeria's male and female populations were estimated at 103.2 million males and 103 million females in 2020; and 105.8 million males and 105.7 million females in 2021. It was projected to increase further to 108.3 million males and 108.4 million females in 2022. Women represented about 49.99 per cent of Nigeria's total population, while men constituted 50.01 per cent in 2021. In addition, the sex ratio in 2021 stood at 100.1 men to 100 women (See figure 1 and Appendix S.T 1).

Figure 1: Nigeria Projected Population by Sex (2020 – 2022)

Source: National Population Commission (NPC)

a. Distribution of Population of the Elderly (60+ Years) by Sex

In Nigeria, individuals aged 60 and above are considered elderly. This demographic segment encompassing both women and men, are steadily increasing, representing a significant demographic shift in the country's population structure.

Great changes are more likely to occur in communities where majority of the population is young, active, and energetic. However, societies with a significant proportion of elderly individuals face unique challenges, particularly in ensuring access to appropriate living conditions throughout their extended lifespans.

The elderly population in Nigeria increased from 9.3 million in 2020 to 9.8 million in 2021 and is projected to increase to 10 million in 2022. The percentage of female elderly also increased slightly over the same period from 46.38 per cent in 2020 to 46.80 per cent in 2022 (See table 1).

Table 1: Distribution of Population of the Elderly (60+ Years) by Sex

AGE GROUP	2020					2021					2022				
	MALE	FEMALE	TOTAL	% M	% F	MALE	FEMALE	TOTAL	% M	% F	MALE	FEMALE	TOTAL	% M	% F
60-64	1,986,951	1,709,385	3,696,336	53.75	46.25	2,073,056	1,806,148	3,879,204	53.44	46.56	2,153,817	1,900,536	4,054,353	53.12	46.88
65-69	1,331,506	1,116,482	2,447,988	54.39	45.61	1,391,127	1,179,065	2,570,192	54.13	45.87	1,460,421	1,251,477	2,711,898	53.85	46.15

CHAPTER 2: HEALTH

Key Findings

- *In Nigeria, life expectancy in 2022 for females stood at 57.2 years and 55.1 years for males.*
- *In 2021, Nigerian women aged 15-49 had a total fertility rate of 4.6 children during their reproductive years.*
- *Under 5 mortality rate was 102 per 1000 live births in 2021.*
- *Adolescent fertility rate stood at 75 live births per 1,000 women in 2021.*
- *The crude birth rate was 31.7 live births per 1,000 women in 2021.*
- *The percentage of pregnant women who attended Antenatal Care and were received at least once by skilled health personnel was 69.60 per cent in 2021.*
- *The percentage of females aged 15-49 with knowledge of HIV in 2022 was 74.01 per cent and 70.70 per cent for males.*
- *The percentage of females with access to antiretroviral treatment in 2020, 2021 and 2022 were 66.46 per cent, 64.99 per cent, and 64.00 per cent respectively.*
- *We have more male medical doctors compared to female, the percentage of female doctors in 2020, 2021 and 2022 were 36.03 per cent, 37.16 per cent and 35.42 per cent respectively.*

2.1 Introduction

According to the World Health Organization, health is not solely defined by the absence of illness or infirmity, it encompasses a broader scope, including the overall state of an individual's physical, mental, and social well-being. In addition to biological factors, it is profoundly influenced by the socio-political and economic situations of people's lives. The 1995 Beijing Platform for Action emphasizes that women are entitled to the highest attainable level of physical and mental health, which is essential for their overall well-being and their active participation in both public and private life (BPA, 1995).

Empowering women with the necessary knowledge and skills to achieve their health potential, while ensuring the availability and accessibility of primary healthcare services, is not only crucial for their own well-being but also for the well-being of their children

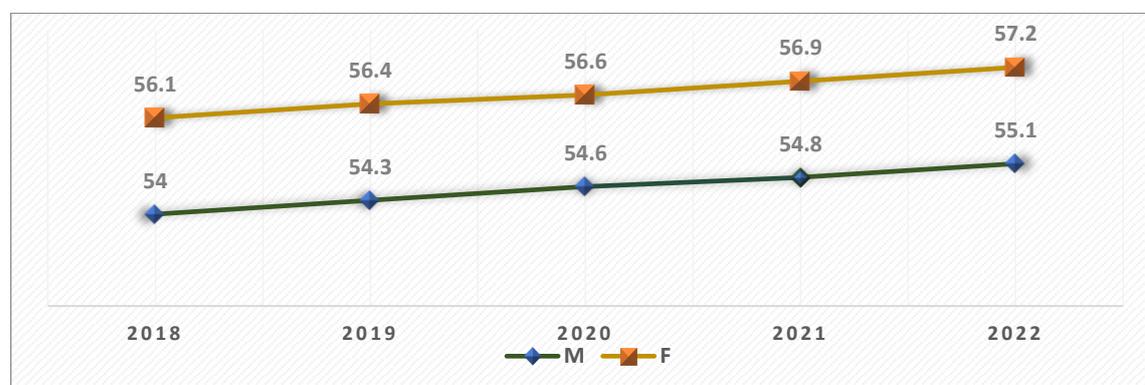

and families. Gender inequality significantly impacts health, primarily because women and men have unequal access to, and utilization of fundamental healthcare resources. Moreover, women face specific health risks related to aspects like sexuality and reproduction, they are also vulnerable to adverse health outcomes due to poverty, economic dependence, exposure to violence and discrimination (EIGE, the European Institute for Gender Equality). However, addressing gender inequalities in healthcare delivery can lead to improved health outcomes for both women and men, contributing to greater gender equality in all aspects of life. This, in turn, aligns with the Sustainable Development Goal (SDG) set for 2030, which aims to "ensure healthy lives and promote well-being for all at all ages."

2.2 Life Expectancy at Birth

Life expectancy at birth is a vital demographic and health indicator that provides insights into the overall well-being and longevity of a population. It is defined as the average number of years a newborn is expected to live, supposing that current mortality rates persist throughout their entire life and based on the prevailing mortality rates in a given country. This statistic is a powerful tool for understanding the health and living conditions within a society. It is a vital health indicator, calculated from age-specific death rates which provides valuable insights into the overall health status of a population and allows for a gender-specific analysis of life expectancy.

On a national scale, there has been an upward trend in life expectancy of both males and females over the years. The life expectancy of females in 2020 was 56.6 years, it increased to 56.9 years in 2021 and 57.2 years in 2022, while males recorded 54.6 years, 54.8 years, and 55.1 years respectively (See figure 2).

Figure 2: Distribution of Life Expectancy by Year and Sex (National)

Source: National Population Commission

2.3 Reproductive Health

"Reproductive health is a state of complete physical, mental and social well-being and not merely the absence of disease or infirmity in all matters relating to the reproductive system and to its functions and processes. Reproductive health implies that people are able to have a satisfying and safe sex life, that they have the capability to reproduce, and the freedom to decide if, when, and how often to do so." (WHO/UNFPA,1994).

The reproductive phase in a woman's life spans from the onset of puberty to the onset of menopause. This period encompasses significant life milestones such as starting a family, entering marriage, and engaging in sexual activity. However, for many women of childbearing age, this period can also be marked by health challenges that may result in illness and, in severe cases, even mortality. The SDG (3.7), with its target of achieving "universal access to sexual and reproductive healthcare services, including family planning, education, and the integration of reproductive health into national strategies and programs," is set to be realized by 2030. This goal specifically addresses the reproductive health needs of individuals in the age group of 15 to 49 years.

2.3.1 Total Fertility Rate

Fertility is the capacity of humans to reproduce. It is typically assessed by measuring the total number of children a person has during their lifetime. Factors influencing childbearing practices include cultural norms, traditions, educational levels, and the overall development of a society. The key determinants of fertility rates include the age at which individuals initiate sexual activity and the availability of contraception. The Total Fertility Rate (TFR), a widely used measure of fertility represents the total number of children a woman bears throughout her entire reproductive years. According to the 2021 MICS/NICS results, Nigerian women (15-49 years) had a total fertility rate of 4.6 children during their reproductive years, with urban women having a total fertility rate of 3.6 children and rural women having a total fertility rate of 5.4 children.

2.3.2 Adolescent Fertility

The adolescent birth rate specifically refers to the number of live births per 1,000 adolescent females (typically aged 15-19) in a specific population during a given period. It focuses solely on the number of live births among adolescents. This rate, also known as the age-specific fertility rate for women in this age group, serves as an indicator of teenage pregnancies. The global Sustainable Development Goal (SDG) indicator 3.7.2 tracks the adolescent birth rate, which is a critical component of achieving Target (3.7),

focused on securing universal access to sexual and reproductive healthcare services. According to the 2021 MICS/NICS report, Nigeria recorded 75 live births per 1,000 women among adolescents. Furthermore, the results revealed a difference between urban and rural areas, with 32 live births per 1,000 women among urban residents and 108 live births per 1,000 women among rural residents.

2.3.3 Crude Birth Rate

The Crude Birth Rate (CBR) is the annual number of live births per 1,000 population in a given year. According to the 2021 MICS/NICS report, the crude birth rate stood at 31.7 live births per 1,000. Notably, there was a variation between urban and rural population, with urban areas having a crude birth rate of 26.2 live births per 1,000 women and rural areas having a crude birth rate of 35.7 live births per 1,000 women.

Table 2: Age-specific, Total Fertility Rates, General Fertility Rate, and Crude Birth Rate for the 3 Years Preceding the Survey According to Residence, MICS 2021

Age Group	Residence		Total
	Urban	Rural	
15-19	32	108	75
20-24	140	242	197
25-29	190	243	219
30-34	184	208	197
35-39	114	154	134
40-44	50	78	65
45-49	9	45	28
TFR (15-49)	3.6	5.4	4.6
GFR	110.7	167.9	141.5
CBR	26.2	35.7	31.7

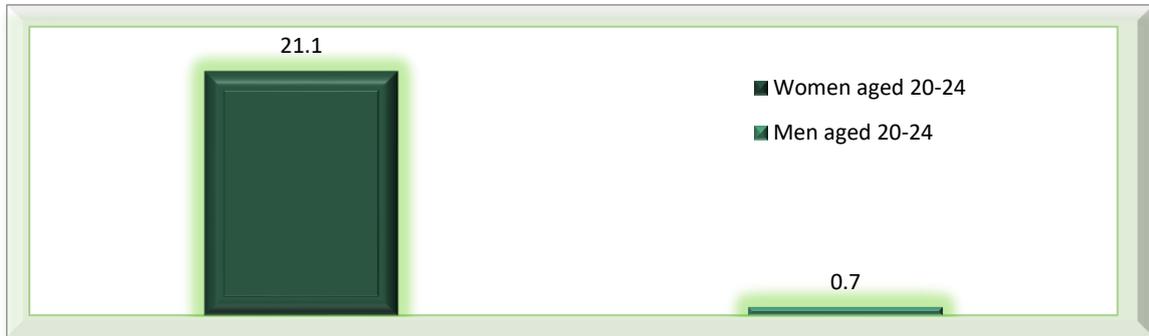

Source: MICS/NICS, 2021

2.3.4 Early Childbearing

Early childbearing can have adverse health consequences for both young mothers and their infants. It often leads to higher rates of maternal and infant mortality, as well as an increased risk of complications during pregnancy and childbirth. SDG (3) seeks to ensure healthy lives and promote well-being for all, and reducing early childbearing is a crucial component of achieving this goal. The indicators related to early childbearing and fatherhood for young women and men aged 15-19 and 20-24 are essential for understanding reproductive health, gender dynamics, and social development. According to 2021 MICS report, 21.1 per cent of women aged 20-24 had a live birth before reaching

the age of 18 years, while men in the same age group who fathered a live birth before turning 18 was 0.7 per cent.

Figure 3: Percentage of Women Aged 20-24 who have had a Live Birth before Age 18 (National)

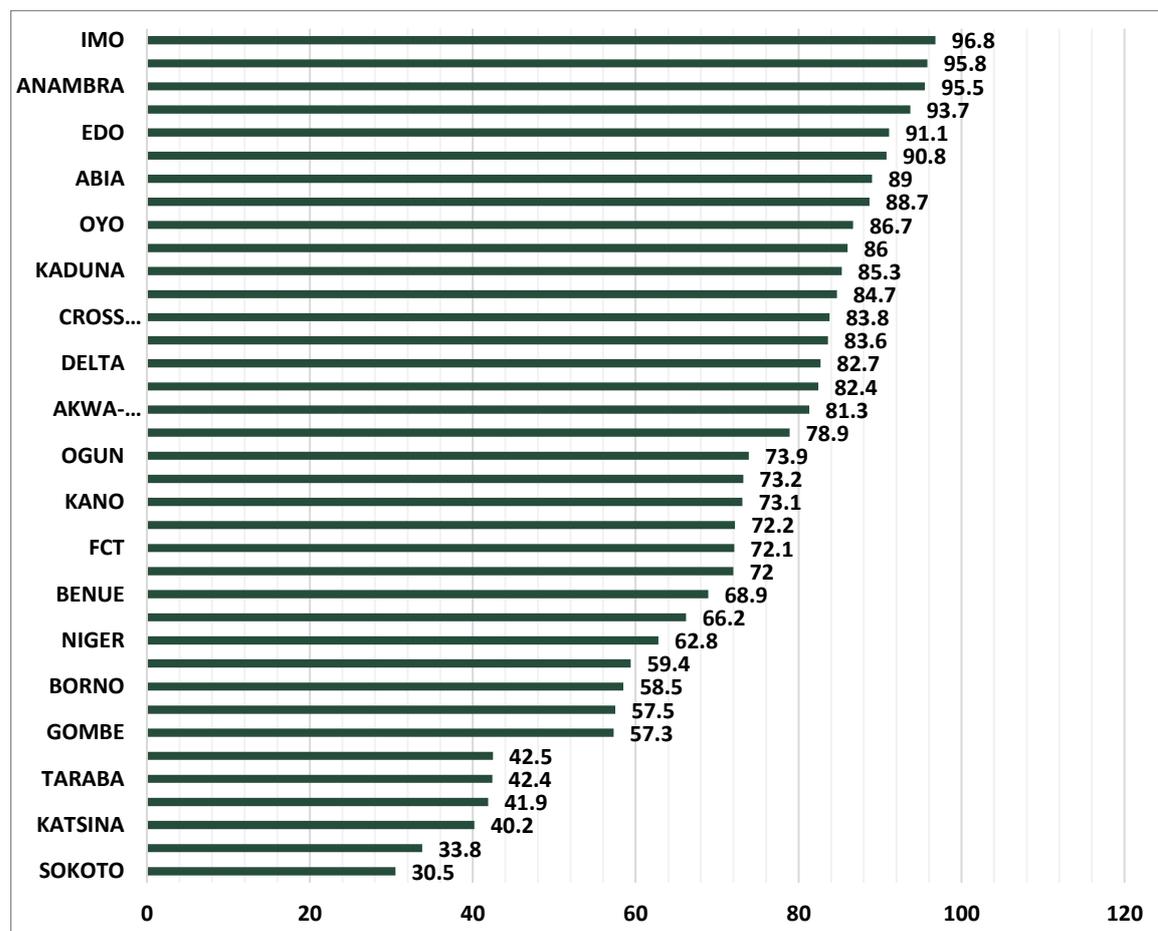

Source: MICS/NICS, 2021

2.3.5 Antenatal Care

Antenatal care refers to the medical care provided to expectant mothers from the early stages of pregnancy through the third trimester and up to the delivery of the baby. This care, often administered in hospitals or Primary Health Care (PHC) facilities by skilled health personnel plays a vital role in improving pregnancy and delivery outcomes. It involves monitoring the health of both the mother and the fetus, detecting potential complications, and educating women about proper nutrition during pregnancy and breastfeeding.

According to 2021 MICS/NICS report, the percentage of pregnant women who attended antenatal care and were seen at least once by skilled health personnel was 69.60 per cent. Across the states, Imo state recorded the highest rate with 96.80 per cent, while Sokoto had the lowest with 30.50 per cent (See figure 4).

Figure 4: Percentage Distribution of Pregnant Women Aged 15 – 49 with a Live Birth in the Last Two Years Who Attended Antenatal Care and Were Received at Least Once by a Skilled Health Personnel, 2021

Source: MICS/NICS, 2021

2.3.6 Delivery Care

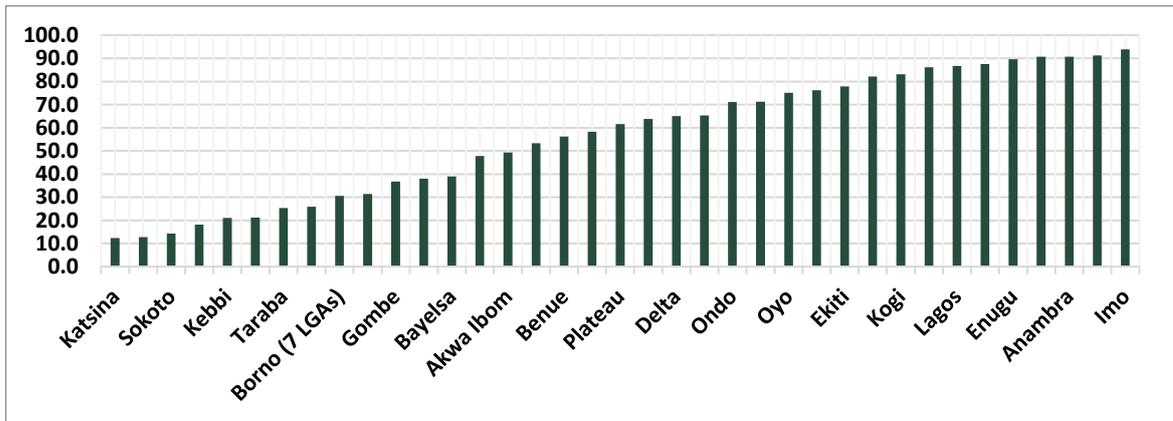

Promoting delivery care aligns with the United Nations Sustainable Development Goal (3), which focuses on "Good Health and Well-being." Specifically, SDG 3.1 aims to reduce the global maternal mortality ratio by ensuring universal access to sexual and reproductive health care services, including safe delivery care.

2.3.6.1 Place of Delivery

Through the provision of high-quality delivery care services, we contribute to achieving SDG (3.1) by reducing maternal mortality and improving maternal health, ultimately advancing the overall well-being and health of communities worldwide. Increasing the rate of births that take place within healthcare facilities is a critical factor in reducing health risks for both mothers and newborns.

According to the 2021 MICS/NICS report, 49.00 per cent of women aged 15-49 who had a live birth within the two years preceding the survey did so in a healthcare facility. Specifically, urban areas reported a notably higher rate of 74.30 per cent for deliveries in healthcare facilities, whereas rural areas had a lower rate of 34.50 per cent. Imo state had the highest deliveries in healthcare facilities with 93.80 per cent, while Katsina state had the least with 12.40 per cent (See figure 4).

Figure 5: Percentage Distribution of Women Aged 15-49 who Had a Live Birth within the Two Years Preceding the Survey and Delivered in a Healthcare Facility by State, 2021

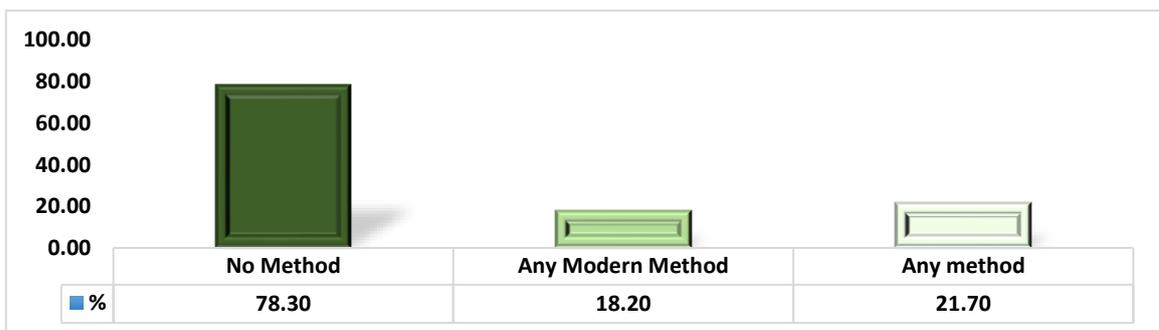

Source: MICS/NICS, 2021

2.3.7 Contraceptive Use Among Married Women

According to 2021 MICS/NICS report, the percentage of women currently married or in union who are using (or whose partner is using) any modern method of contraceptive stood at 18.20 per cent. However, 21.70 per cent of women used any method. while 78.30 per cent did not use any method (See figure 5a).

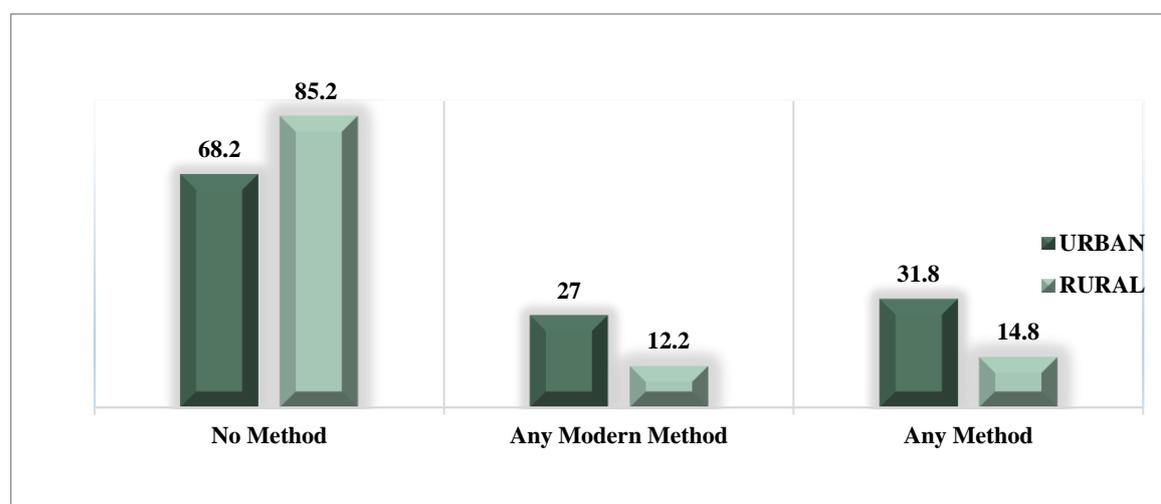

Figure 5a: Percentage of Women Currently Married or in a Union Who are Using or Whose Partner is Using Contraceptive Methods (National), 2021

Source: MICS/NICS, 2021

Figure 5b shows the percentage of women currently married or in a union who are using or whose partner is using contraceptive methods by locality. In urban areas, the percentage of women currently married or in a union who are using or whose partner is using any method of contraceptive for pregnancy prevention and family planning was 31.80 per cent, within this group, 27.00 per cent used any modern method. However, 68.20 per cent did not use any method. In rural areas, 14.80 per cent of these women used any method of contraceptive for pregnancy prevention and family planning, with 12.20 percent of women or partner who used any modern methods, while 85.20 percent did not use any method. When examining contraceptive use across the state, Jigawa state had the highest percentage of women not using any contraceptive method with 93.00 per cent, followed by Borno state with 92.50 per cent. Lagos state recorded the lowest percentage with 54.70 per cent (See Appendix, ST 5).

Figure 5b: Percentage of Women Currently Married or in a Union Who are Using or Whose Partner is Using Contraceptive Methods by Locality, 2021

Source: MICS/NICS, 2021

2.4 Maternal Mortality Ratio

Maternal mortality refers to the death of a mother during pregnancy, childbirth, within 42 days after childbirth, or due to pregnancy termination. The maternal mortality ratio is a measure of the number of maternal deaths per 100,000 live births. This ratio is consistent with Sustainable Development Goal (3.1), which aims to reduce global maternal mortality to less than 70 per 100,000 live births. In Nigeria, the maternal mortality ratio stood at 512 maternal deaths per 100,000 live births during the seven years prior to the National Demographic and Health Survey (NDHS) conducted in 2018.

2.5 Early Childhood Mortality Rate

Infant and child mortality plays a crucial role in evaluating a country's population dynamics, socioeconomic progress, and quality of life. These statistics are integral to achieving Sustainable Development Goal (3.2), which aims to end preventable deaths of newborns and children under 5 years of age by 2030.

Table 3: Distribution of Early Child Mortality Rate by State

State	Neonatal Mortality Rate	Post-neonatal Mortality rate	Infant Mortality Rate	Child Mortality Rate	Under Five Mortality Rate
ABIA	19	(35)	(55)	(64)	(115)

2.5.1 Neonatal Mortality Rate

Neonatal mortality refers to the likelihood of a child passing away within the first month of birth. According to the most recent data from 2021 MICS, the neonatal mortality rate in Nigeria was 34 per 1,000 live births. Among Nigerian states, Ogun state had the highest neonatal mortality rate at 56 per 1,000 live births, while Ebonyi state had the lowest rate at 1 per 1,000 live births for weighted children.

Additionally, for unweighted children's categories, Rivers state recorded the highest neonatal mortality rate at 70 per 1,000 live births, while Enugu state had the lowest rate at 8 per 1,000 live births (See table 3).

2.5.2 Infant Mortality Rate

The infant mortality rate quantifies the likelihood of a child dying before reaching their first birthday. According to the 2021 MICS report, Nigeria's infant mortality rate was 63 per 1,000 live births. The highest infant mortality rate for weighted children was 104 per 1,000 live births in Sokoto state, while Ebonyi state recorded the lowest at 3 per 1,000 live births.

However, for unweighted children, Rivers state had the highest infant mortality rate at 87 per 1,000 live births, while Lagos state had the lowest rate at 15 per 1,000 live births (See table 3).

2.5.3 Child Mortality Rate

Child mortality reflects the probability of a child passing away between the ages of one and five. Nationally, Nigeria recorded 42 child deaths per 1,000 live births. Sokoto state had the highest child mortality rate at 109 per 1,000 live births, while Akwa Ibom had the lowest at 8 per 1,000 live births for weighted children. Within the unweighted children category, Oyo state had the highest child mortality rate at 180 per 1,000 live births, while Lagos state reported no child mortality in this category, 0.0 per 1,000 live births (See table 3).

2.5.4 Under 5 Mortality

Under-5 mortality estimates the probability of a child's death before their fifth birthday, encompassing the period from birth to age five. In the 2021 MICS report, Nigeria's under-5 mortality rate was 102 per 1,000 live births.

Kebbi state had the highest under-5 mortality rate, with 179 child deaths per 1,000 live births, while Lagos state had the lowest rate at 15 per 1,000 live births for weighted children. Among unweighted children, Abia state recorded the highest rate at 115 per 1,000 live births, while Anambra state had the lowest at 22 per 1,000 live births (See table 3).

2.6 HIV and AIDS

Human Immune Deficiency Virus (HIV) and Acquired Immune Deficiency Syndrome (AIDS) are two closely related viruses and conditions that have had a significant global impact on public health since their discoveries. The virus can be transmitted through unprotected sexual intercourse, sharing of contaminated needles or syringes, from mother to child during pregnancy, childbirth, or breastfeeding, and through blood transfusions or organ transplants from infected donors. HIV and AIDS have indeed been a significant health concern in Nigeria since the early 1980s, affecting both men and women. It has had a disproportionate impact on populations already dealing with extreme poverty, which has hindered social and economic development as well as family structures. The epidemic has also increased the financial burden of caring for affected family members and negatively impacted household finances. Additionally, Sustainable Development Goal (3:3) aims to ensure overall health and well-being for people of all ages. This includes reducing maternal and child mortality, fighting major diseases like HIV/AIDS and malaria,

ensuring access to sexual and reproductive healthcare, and achieving universal health coverage, which encompasses financial protection and quality healthcare services.

a. Percentage Distribution of People Aged 15-49 with Knowledge of HIV Prevention (2020 – 2022)

According to the National Agency for the Control of AIDS (NACA) data, the percentage of males and females aged 15-49 with knowledge of HIV from 2020 to 2022 were the same over the period, with 74.10 per cent and 70.70 per cent respectively. Enugu state recorded the highest percentage of males who are knowledgeable about HIV prevention in 2020, 2021 and 2022 with 98.50 per cent, while Bauchi state had the lowest across the years with 46.30 per cent. Also, Benue state recorded the highest percentage of females who are knowledgeable of HIV prevention in 2020 to 2022 with 93.70 per cent, while Niger state had the least across the years with 46.90 percent (See Appendix, ST 6).

Figure 6: Percentage Distribution of People Aged 15-49 with Knowledge of HIV Prevention (National) (2020 – 2022)

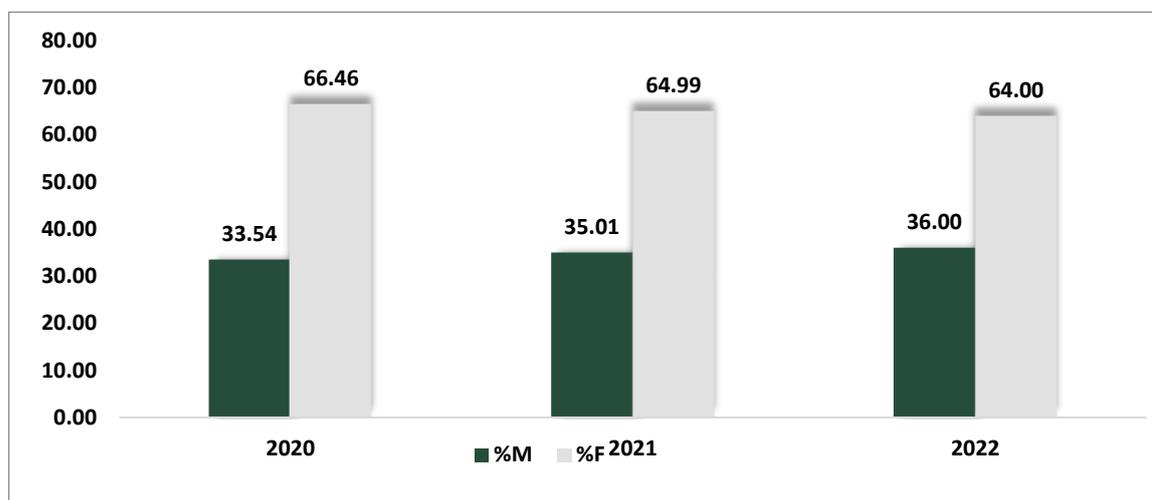

Source: National Agency for Control of Aids (NACA)

b. Percentage of HIV/AIDS Patients with Access to Antiretroviral Treatment (2020 - 2022)

Figure 7 below shows the percentage distribution of HIV/AIDS patients with access to antiretroviral treatment from 2020 to 2022. The percentage of females with access to treatment was 66.46 per cent in 2020, which decreased in both 2021 and 2022 to 64.99 per cent and 64.00 per cent respectively. For males, the percentages with access to treatment in 2020, 2021, and 2022 were 33.54 per cent, 35.01 per cent and 36.00 per cent respectively. Across the states, Benue state recorded the highest number of females with

access to treatment in 2020 with 149,477, while in 2021 and 2022 it recorded 167,566 and 163,566 respectively. Ekiti state had the least number of females with access to treatment in 2020 with 3,153, while Zamfara state recorded the lowest in 2021 with 3,584 and Yobe state in 2022 with 2,710 (See Appendix, ST 7).

2.7 Reported Cases of Pregnant Women with Malaria

Malaria is a significant public health concern, particularly in regions where the disease is endemic such as sub-Saharan Africa, Southeast Asia, and parts of South America. Pregnant women are more vulnerable to malaria, as the infection can have serious consequences for both the mother and the developing fetus. Malaria during pregnancy can lead to spontaneous miscarriages, stillbirths, premature births, and low birth weight, especially in areas with low malaria transmission.

The Federal Ministry of Health (FMOH) data reveals a progressive increase in the number of pregnant women with malaria across the states in Nigeria, from 372,577 cases in 2019 to 954,615 cases in 2020 and further to 1,233,002 cases in 2021 (See figure 8). In 2019, Borno state reported the highest number of pregnant women with malaria with 55,161 cases, followed by Sokoto state with 44,609 cases. In 2020 and 2021, Kogi state recorded the highest number of cases with 90,937 cases. Conversely, Ekiti state had the lowest number of cases in 2019 with 304 cases, but this increased to 1,232 cases in 2020 and 1,709 cases in 2021 (See Appendix, S.T 8).

Figure 8: Number of Pregnant Women with Malaria by Year

Source: Federal Ministry of Health (FMOH)

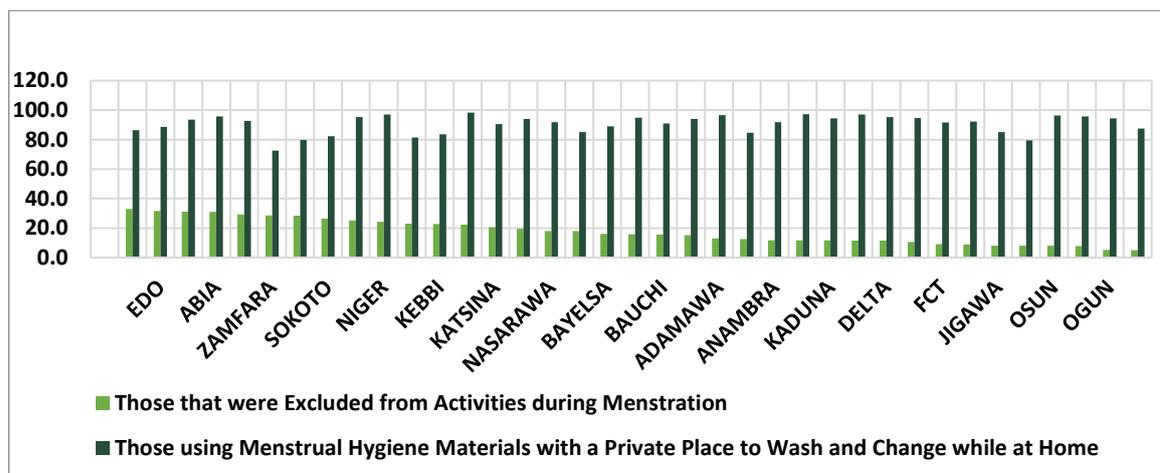

2.8 Menstrual Hygiene

Menstrual health plays a vital role in improving global population health, promoting Sustainable Development Goal (6), and realizing gender equality and human rights. The attainment of menstrual hygiene signifies that women and girls experiencing menstruation can effectively manage their bodily needs during this time, ensuring that their preferences, hygiene, comfort, privacy, and safety are respected.

Figure 9 represents the 2021 statistics on the percentage of women aged 15 to 49 who had access to menstrual hygiene. Nationally, the percentage of women who had access to menstrual hygiene materials along with a private space for washing and changing at home was 91.20 per cent. In contrast, 16.60 per cent of women reported were excluded from activities during their last menstruation.

Disaggregated by state, Gombe state recorded the highest percentage of women who were using menstrual hygiene materials with a private place to wash and change with 98.3 per cent, while Zamfara state reported the lowest at 72.50 per cent. In terms of exclusion from activities during menstruation, Borno state reported the highest at 32.90 per cent, while Benue state had the lowest at 5.00 per cent (See Appendix, S.T 9).

Figure 9: Percentage Distribution of Women Aged 15 – 49 with Menstrual Hygiene by Year

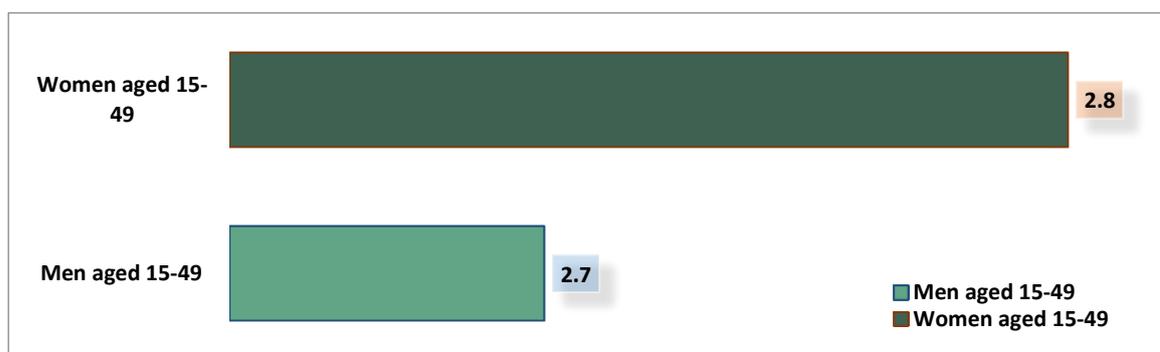

Source: Multiple Indicator Cluster Survey (MICS) 2021

2.9 Health Insurance

Health insurance provides financial coverage for medical expenses, spreading the risk across a large population. It encompasses both adults and infants. Figure 10 shows the percentage of women and men aged 15-49 who are covered by health insurance in 2021. According to 2021 MICS report, 2.8 per cent of women were covered by health insurance, while 2.7 per cent of men had health insurance coverage. In FCT, 12.40 per cent of women had health insurance coverage, whereas Sokoto state in the North-West reported the lowest coverage with 0.00 per cent. Additionally, FCT had the highest percentage of men covered by health insurance with 12.50 per cent, while Kogi state recorded the lowest with 0.00 per cent (for data on children, please refer to Appendix ST 10).

Figure 10: Percentage of Women and Men Covered by Health Insurance

Source: MICS/NICS, 2021

2.10 Health Personnel

The availability and distribution of health personnel are indeed crucial in the overall healthcare system. The Medical and Dental Council of Nigeria (MDCN) regulates and oversees healthcare personnel in the fields of medicine and dentistry in Nigeria, ensuring their competence and ethical behavior. This helps to safeguard the health and well-being of the Nigerian population. MDCN also collaborates with other healthcare agencies and organizations to improve healthcare delivery in the country. SDG (3) aims to promote the well-being for all, and Target (3) specifically focuses on strengthening the capacity of all countries, including developing ones, to manage health risks. This includes building and retaining a skilled and well-distributed healthcare workforce, including doctors and dentists.

2.10.1 Percentage Distribution of Doctors by Sex and Year

Figure 11 shows that the percentage of female doctors in 2020 was 36.03 per cent, which increased in 2021 to 37.16 per cent and declined in 2022 to 35.42 per cent. Meanwhile, the percentage of male doctors in the same period under review were 63.97 per cent, 62.84 per cent and 64.58 per cent respectively. Across the state, Lagos state recorded the highest number of both male and female doctors during the period under review, followed by FCT. Taraba state recorded the least for males and females in 2020 to 2022 (See Appendix, ST. 11).

Figure 11: Percentage Distribution of Doctors by Sex and Year

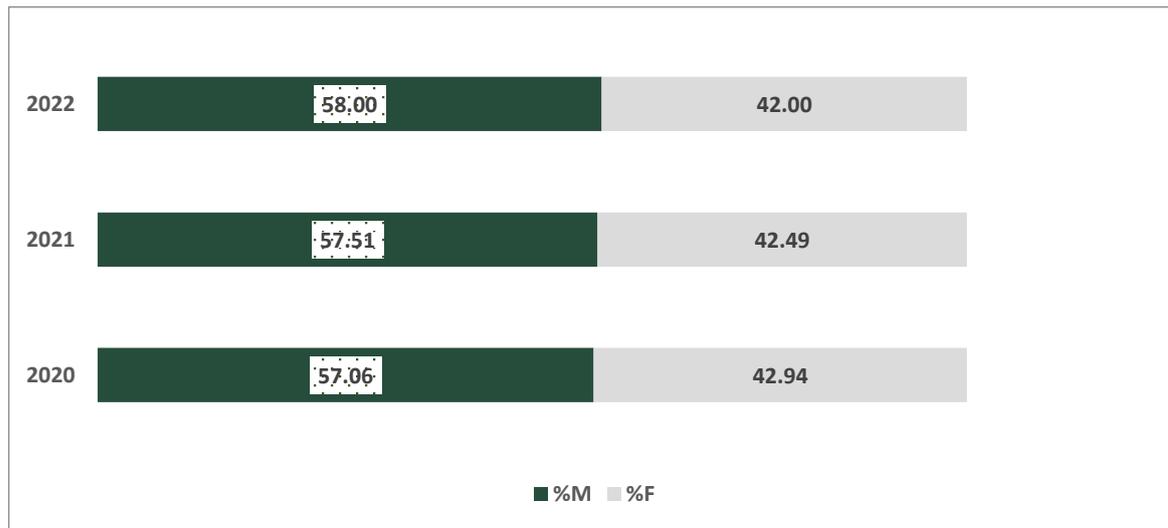

Source: Medical and Dental Council of Nigeria

2.10.2 Percentage Distribution of Dentists by Sex and Year

The percentage of female Dentists in Nigeria was below 50.00 per cent across the three years under review. In 2020, it stood at 42.94 per cent and fell in 2021 and 2022 to 42.49 per cent and 42.00 per cent respectively. On the other hand, the percentage of male Dentists was 57.06 per cent in 2020 and rose in 2021 and 2022 to 57.51 per cent and 58.00 per cent respectively (See Appendix, ST. 12).

Figure 12: Percentage Distribution of Dentists by Sex and Year

Source: Medical and Dental Council of Nigeria

CHAPTER 3: EDUCATION

Key Findings

- *Female enrolments into Adult/Basic Literacy increased from 40.55 per cent in 2020 to 46.10 per cent in 2021 and dropped to 38.32 per cent in 2022.*
- *From 2020 to 2022, female enrolments into Nomadic Schools were found below average; from 49.28 per cent in 2020 to 49.11 per cent in 2021 and 44.21 per cent in 2022.*
- *In both Public and Private ECCDE, female enrolments dropped, in Private ECCDE, it fell from 50.11 per cent in 2021 to 49.37 per cent in 2022, whereas in Public ECCDE, it declined from 50.00 per cent in 2021 to 49.44 per cent in 2022.*
- *The percentage of girls' enrolments in Public and Private Primary Schools in 2020, 2021, and 2022 were 48.50 per cent, 49.03 per cent and 48.92 per cent respectively.*
- *Enrolments of female into Public and Private JSS stood at 49.80 per cent, 48.73 per cent and 51.47 per cent in 2020, 2021 and 2022 respectively. However, in SSS, it fell from 49.10 per cent in 2020 to 48.82 per cent in 2021.*
- *The percentage of female that completed JSS Schools (Private and Public) stood at 49.94 per cent in 2020, it dropped slightly to 48.50 per cent in 2021, but rose to 49.34 in 2022.*
- *Female enrolments were below average in all categories of universities at the undergraduate level, average female enrolment slightly rose from 43.46 per cent in 2019 to 44.49 per cent in 2020.*
- *In 2020, the percentage of female and male teachers without a teaching certificate stood at 14.03 per cent and 4.32 per cent in Public and Private ECCDE; 6.47 per cent and 15.45 per cent in Public and Private Primary Schools, 6.13 per cent and 9.85 per cent in Public and Private JSS respectively.*
- *Female school candidates in WASSCE May /June with 5 credit and above including Mathematics and English Language were 51.04 per cent, 50.86 per cent and 51.31 per cent in 2020, 2021 and 2022 respectively, whereas for female private candidates in May/June, it stood at 51.44 per cent, 51.25 per cent and 51.66 per cent in 2020, 2021 and 2022 respectively.*

3.1 Introduction

Education encompasses the continuous process of imparting or acquiring knowledge, fostering critical thinking skills and discernment, and generally preparing oneself or

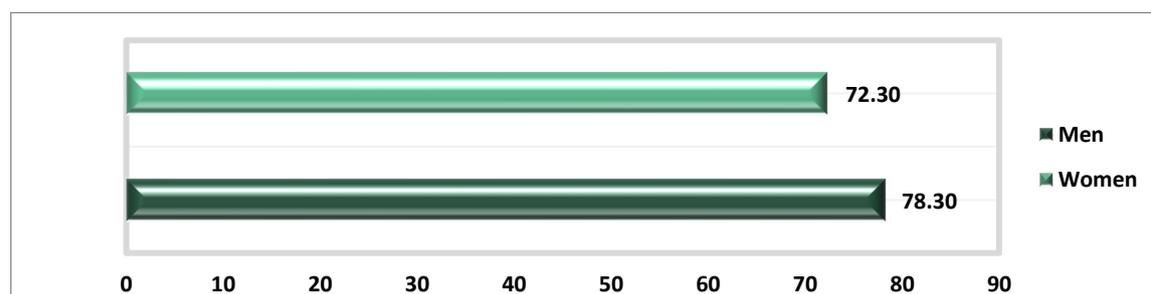

others intellectually for a mature life. It acts as a dynamic agent of change, seeking to impact and mold the social behavior of those engaged in the educational process. Given this context, the Beijing Platform for Action underscored the significance of education in fostering women’s progress. It specifically identifies education as one of the 12 pivotal areas of concern, emphasizing its essential role in achieving gender equality and empowering women. The platform outlined crucial measures, including but not limited to, the elimination of gender-based discrimination in education at all levels, the eradication of illiteracy among women, the enhancement of access to vocational training among women, and promotion of continuous education. Furthermore, the commitment to inclusive and equitable quality education is echoed in Sustainable Development Goal (4) for 2030 and African agender 2063. Both initiatives aim to ensure that education is accessible to all, promoting lifelong learning opportunities for everyone.

3.2 Educational Outcomes

3.2.1 Literacy

According to the United Nations Educational, Scientific and Cultural Organization (UNESCO), literacy is the ability to identify, understand, interpret, create, communicate, and compute, using printed and written materials associated with varying contexts. It signifies a continuous process of education that empowers individuals to reach their objectives, expand their understanding and capabilities, and engage actively in their local community and broader society (UNESCO, 2004; 2017).

Figure 13: Percentage of Women and Men Aged 15-24 Who are Literate in English Language (2018/2019)

Source: Nigerian Living Standard Survey 2018/2019

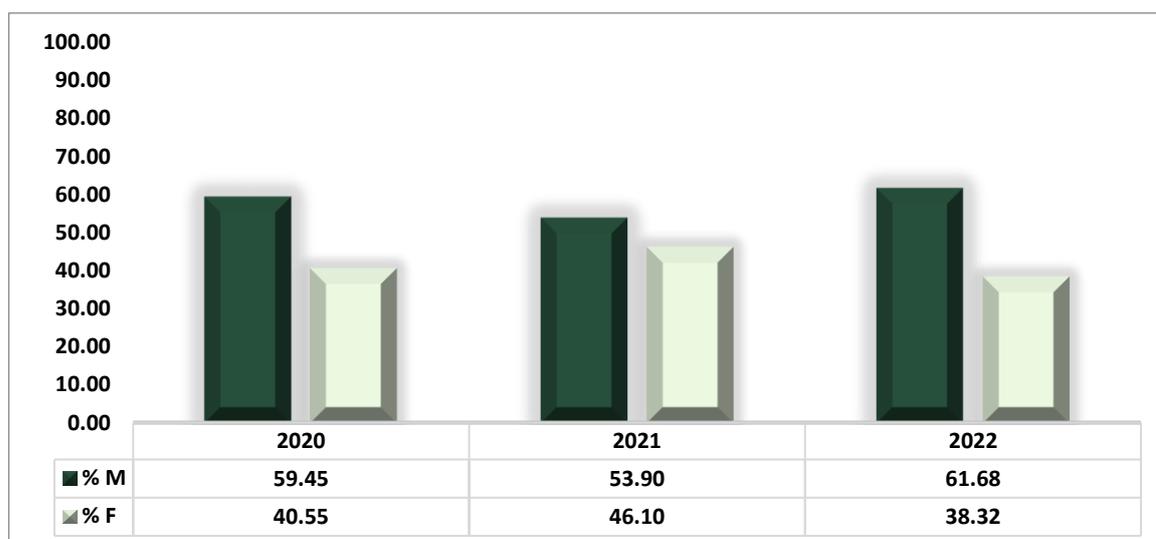

3.3 Participation in Education

3.3.1 Adult/Basic Literacy Education

Total Enrolments in Adult/Basic Literacy Education by State and Sex (2020 - 2022)

According to the National Commission for Mass Literacy, Adult, and Non-formal Education data, female enrolments in Adult/Basic Literacy Education stood at 40.55 per cent in 2020, it increased to 46.10 per cent in 2021 and declined to 38.32 per cent in 2022. In the period under review, male enrolments were higher compared to the female enrolments in 2020, 2021, and 2022 with 59.45 per cent, 53.90 per cent and 61.68 per cent respectively. Across the states in 2020, Lagos state had the highest female enrolments with 20,345, while Sokoto state recorded the highest with 203,608 in 2021, and Bauchi state had the highest with 60,698 in 2022. Adamawa state recorded the least female enrolments in 2020 and 2021 with 37 and 320 respectively, while Yobe State had the least with 6,508 in 2022.

Figure 14: Percentage Enrolment in Adult/Basic Literacy Education by Sex (2020-2022)

Source: National Commission for Mass Literacy, Adult and non-formal Education

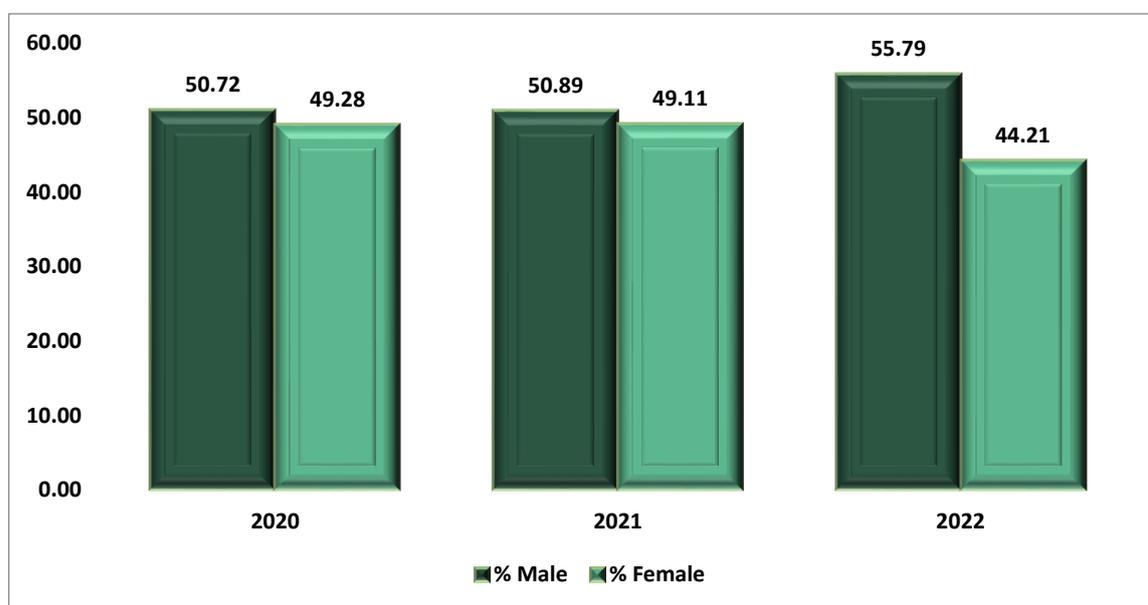

3.3.2 Nomadic Education

The establishment of the National Commission for Nomadic Education in 1989 by the Federal Government of Nigeria demonstrates the commitment to address the educational needs of marginalized and disadvantaged populations, including socially excluded, and migrant groups. Nomadic education, which is not dependent on a specific location or traditional school setting, aims to ensure equal access to education for all individuals, irrespective of their ethnic background, geographical location, gender, or social status. This form of education recognizes the importance of inclusivity and aims to provide equitable educational opportunities for all.

Distribution of Nomadic Primary School Pupils Enrolments by Sex (2020-2022)

According to the National Commission for Nomadic Education data, female enrolments in Nomadic Primary Schools in 2020 stood at 567,127 (49.28 per cent), 596,332 (49.11 per cent) in 2021 and 516,015 (44.21 per cent) in 2022. Also, percentage of male enrolments in Nomadic primary school stood at 50.72 per cent in 2020, 50.89 per cent in 2021 and 55.79 per cent in 2022.

Figure 15: Percentage Distribution of Nomadic Primary School Pupils Enrolments by Sex (2020-2022)

Sources: National Commission for Nomadic Education

Based on state distribution, Kano state had the highest female enrolments in 2020 and 2021 with 90,745 and 94,526 respectively, while Oyo state recorded the highest with 79,603 in 2022. Ekiti state had the least female enrolments in 2020 and 2021 with 289

and 395 respectively, while Delta state recorded the least with 499 in 2022 (See Appendix, ST. 15)

3.3.3 Universal Basic Education

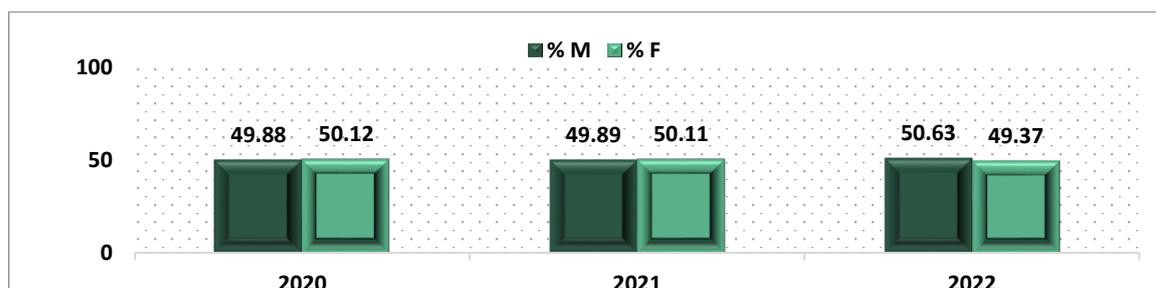

a. Early Childhood Care Development Education (ECCDE)

According to UNESCO, Early Childhood Care Development Education (ECCDE) should not be narrowly perceived as mere preparation for Primary school. Instead, it seeks to create a robust and comprehensive foundation for lifelong learning and overall well-being by addressing a child's holistic needs, including their social, emotional, cognitive, and physical development. By embracing these principles, ECCDE holds the potential to cultivate future citizens who demonstrate traits of compassion, responsibility, and adaptability.

i. Early Childhood Care Development Education Enrolments by State and Sex 2020-2022 (Private)

Statistics from Federal Ministry of Education shows that nationally, ECCDE female enrolments in private schools in 2020 stood at 50.12 per cent, it decreased slightly to 50.11 per cent in 2021 and further decreased to 49.37 per cent in 2022. Across the states, Lagos state recorded the highest ECCDE enrolments for both male and female in the period under review. In 2020, the ECCDE enrolments for Lagos stood at 177,173 males and 177,081 females. In 2021, the enrolments for males and females were 257,606 and 256,268 respectively, while in 2022, the enrolments for males stood at 208,867 and females recorded 201,516. However, Yobe state recorded the lowest ECCDE enrolments in 2020 with 7,468 males and 7,213 females, while Kogi state had the least for males and females with 1,132 and 1,093 respectively in 2021. In addition, Sokoto state recorded the lowest in 2022 with 9,201 males and 8,515 females (See Appendix, ST 16).

Figure 16: Percentage Distribution of ECCDE Enrolments in Private Schools by Sex (2020-2022)

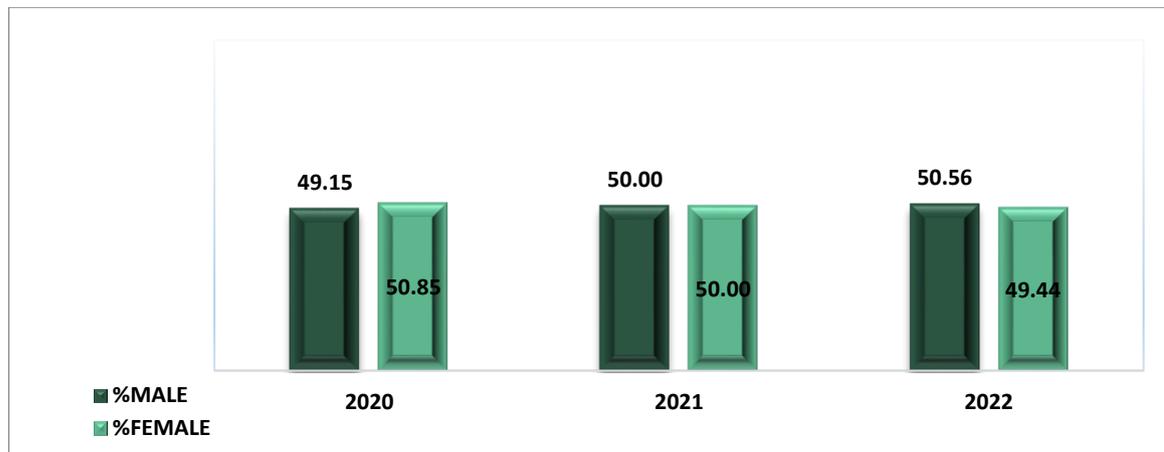

Source: Universal Basic Education (UBE)

ii. Early Childhood Care Development Education Enrolments by State and Sex 2020-2022 (Public)

Moreover, in public schools the female ECCDE enrolments in 2020, 2021 and 2022 were 50.85 per cent, 50.00 per cent and 49.44 per cent respectively, while the male enrolments in 2020 stood at 49.15 per cent, which increased slightly in 2021 to 50.00 per cent and to 50.56 per cent in 2022 (See figure 17).

Figure 17: Percentage Distribution of ECCDE Enrolments in Public Schools by Sex (2020-2022)

Source: Universal Basic Education (UBE)

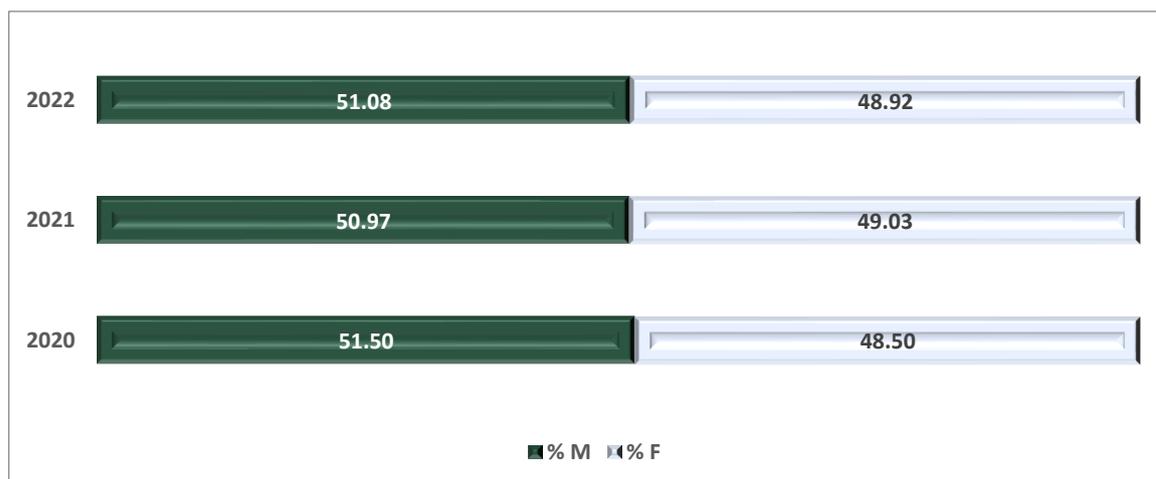

Kano state recorded the highest number of male and female students enrolled in public ECCDE during the period under review. In 2020, the male had 245,629 and the female recorded 266,901, while in 2021 and 2022 the male and female students enrolled were the same with 198,771 and 190,206 respectively. Also, Osun state had the least enrolments across the three years under review. In 2020, 2021 and 2022, male enrolments stood at 103, 1,501 and 1,072, while female enrolments were 121, 1,560 and 800 respectively (See Appendix, ST 17).

3.3.4 Primary School

a. Primary School Enrolments by Sex (2020 - 2022)

According to the Universal Basic Education (UBEC) data, female enrolments in 2020 stood at 48.50 per cent, it increased to 49.03 per cent in 2021, and declined to 48.92 per cent in 2022. These rates are lower compared to the male enrolments in 2020, 2021 and 2022 recorded at 51.50 per cent, 50.97 per cent and 51.08 per cent respectively.

Figure 18: Public and Private Primary School Enrolments by Sex (2020 - 2022)

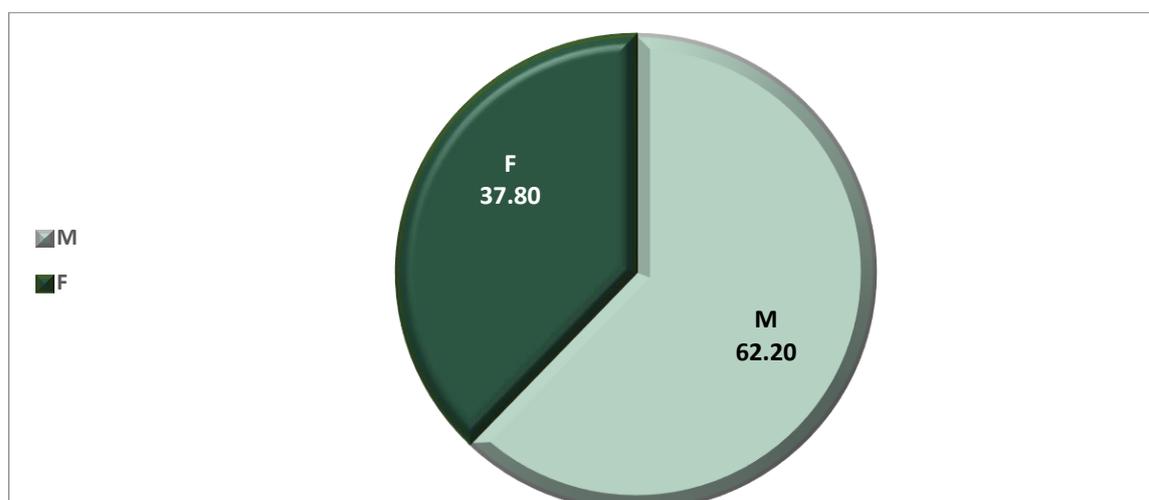

Source: Universal Basic Education (UBE)

During the period under review, Kano state recorded the highest number of female enrolments in Public Primary Schools. The female enrolments in Public Primary Schools in 2020 stood at 1,561,609 and 1,798,888 in 2021, while 1,555,445 was recorded in 2022. Bayelsa recorded the lowest number of female enrolments during the period under review with 40,271 in 2020, 47,158 in 2021 and 40,187 in 2022. On the other hand, in Private Primary Schools, Lagos state had the highest number of female enrolments in 2020 with 241,664 and Yobe state had the lowest with 14,971. In 2021, Ogun state recorded the highest with 433,967 and Kogi state had the least with 1,752, while Kano state had the highest with 369,888, and Sokoto had the least with 22,036 in 2022 (See Appendix, ST 18).

b. Estimated Number of Out-of-School Children at Primary School Level (2017/2018)

According to the Universal Basic Education Commission's 2018 Digest of Basic Education Statistics, there were over 10 million Nigerian children of primary school age estimated to be out of school in 2018. Of these out-of-school children, 62.20 per cent were males and 37.80 per cent were females. The report also shows significant differences between states. Edo state had the highest percentage of out of school primary school-aged girls at 94.27 per cent. In contrast, Delta state had the lowest percentage of out of school girls with 2.51 per cent. This highlights a wide variance in access to education for girls depending on the state. Overall, the 2018 statistics indicate continued gaps in achieving universal basic education in Nigeria, particularly for girls in certain state.

Figure 19: Percentage of Out-of-School Children at Primary School Level by Sex (2016/2017)

Source: Universal Basic Education, Digest of Education Statistics, 2018

c. Distribution of Pupils that Completed Public and Private Primary 6 (2020-2022)

Table 4 presents the distribution of male and female that completed primary 6 in both public and private schools from 2020 to 2022. The number of female pupils that completed primary 6 in 2020 was 1,693,877, it rose in 2021 and 2022 to 1,900,910 and 2,279,453 respectively. There was also a consistent increase in the number of male pupils that completed Primary 6 in both Public and Private schools from 2020 to 2022.

Table 4: Percentage of Pupils that Completed Public and Private Primary School by Sex (2020-2022)

YEAR	PUBLIC				PRIVATE				PUBLIC AND PRIVATE			
	M	F	% M	% F	M	F	% M	% F	M	F	% M	% F
2020	1,587,749	1,481,173	51.74	48.26	220,264	212,704	50.87	49.13	1,808,013	1,693,877	51.63	48.37
2021	1,717,225	1,596,922	51.81	48.19	286,578	303,988	48.53	51.47	2,003,803	1,900,910	51.32	48.68
2022	2,024,491	1,936,099	51.12	48.88	341,110	343,354	49.84	50.16	2,365,601	2,279,453	50.93	49.07

Source: Universal Basic Education Commission

3.3.5 Junior Secondary School

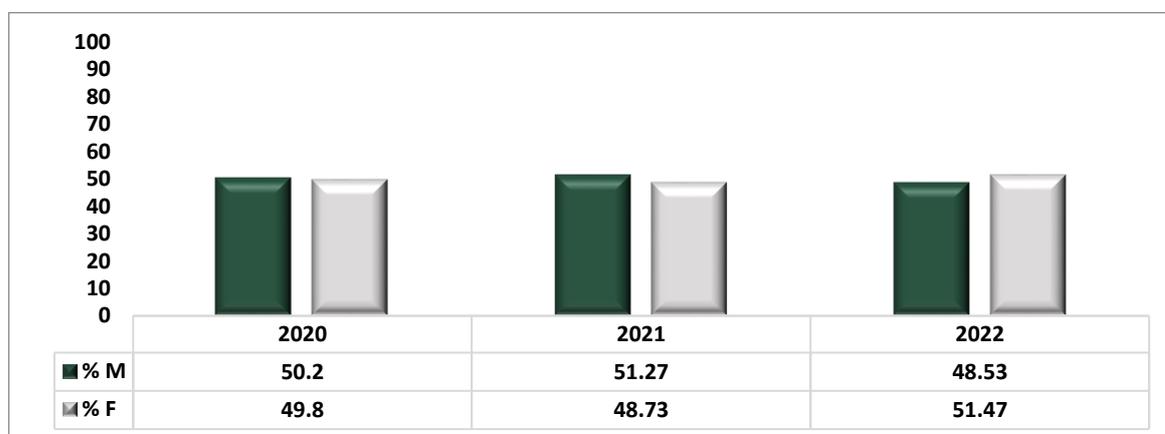

a. Junior Secondary School Enrolments in Public and Private Schools (2020-2022)

Figure 20 shows the percentage distribution of male and female enrolments in Public and Private Junior Secondary Schools from 2020 to 2022. The female enrolments in 2020

stood at 49.80 per cent, it decreased to 48.73 per cent in 2021 and rose to 51.47 per cent in 2022. However, the male enrolments in 2020 and 2021 stood at 50.20 per cent and 51.27 per cent respectively, however, it declined to 48.53 per cent in 2022.

Lagos state had the highest female enrolments in 2020 with 291,810, it dropped to 273,855 in 2021 and increased to 311,013 in 2022. Whereas Bayelsa state recorded the least female enrolments in both 2020 and 2022 with 27,813 and 36,107 respectively, while Kogi state had the least in 2021 with 22,756.

Figure 20: Percentage Distribution of Public and Private Junior Secondary Schools (JSS) Enrolments (2020-2022)

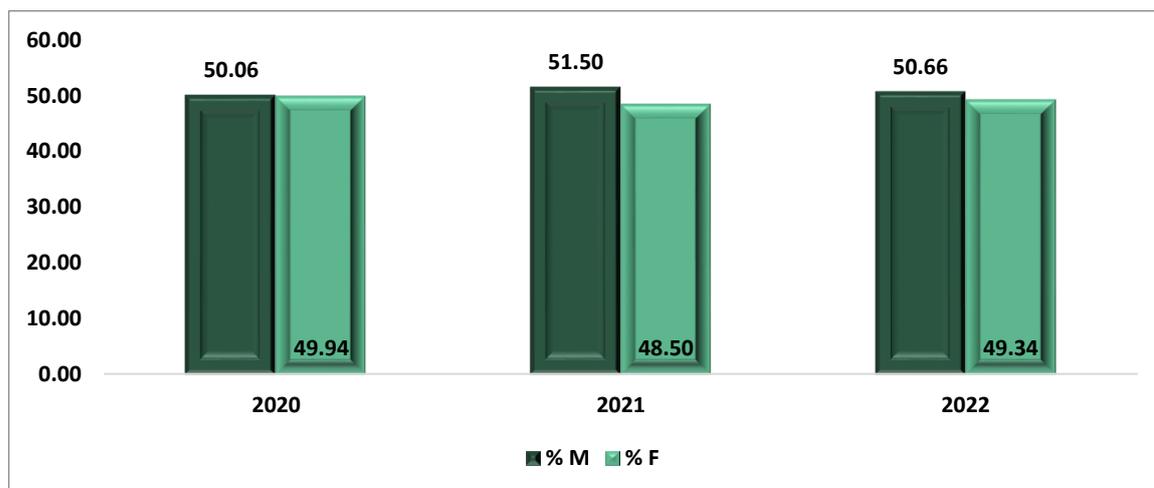

Source: Universal Basic Education Commission

b. Percentage Distribution of Students that Completed Junior Secondary Schools (Public & Private) (2020-2022)

Figure 21 shows the percentage distribution of students that completed Junior Secondary in both public and private schools from 2020 to 2022. The percentage of females that completed JSS 3 (Private and Public) in 2020 was 49.94 per cent, it dropped to 48.50 per cent in 2021 and rose to 49.34 per cent in 2022.

Figure 21: Percentage of Students that Completed JSS 3 by Sex in Public and Private Junior Secondary Schools (2020-2022)

Source: Universal Basic Education Commission

Lagos state had the highest number of females that completed JSS3 in 2020 with 83,973. This increased to 90,200 in 2021 and dropped to 87,319 in 2022. Conversely, Bayelsa state recorded the least number of females that completed JSS3 in 2020 and 2022 with 8,623 and 10,007 respectively, while Kogi state had the least in 2021 with 7,031.

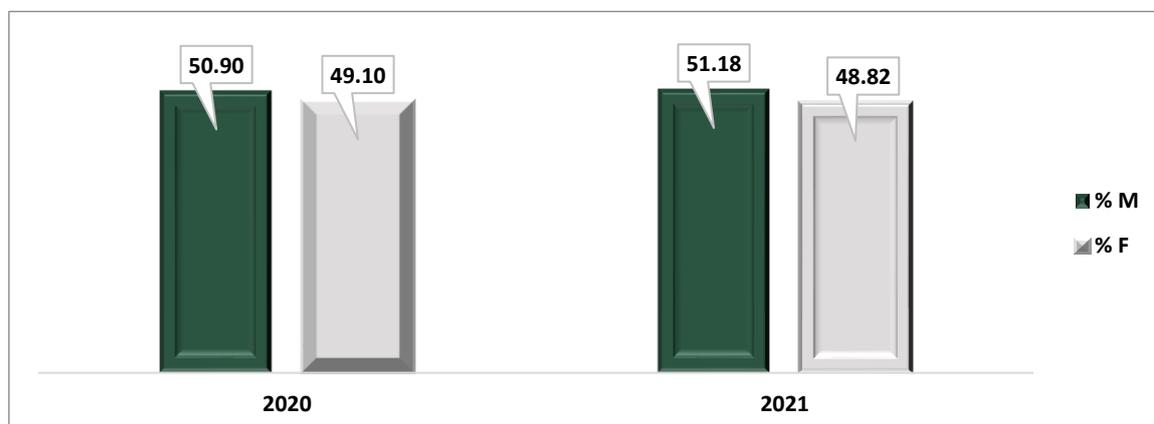

3.3.6 Senior Secondary School Education

a. Enrolments of Students into Senior Secondary School (SSS)

According to the Senior Secondary School (SSS) data, enrolments in 2020 and 2021 indicate that males continue to outnumber females in Nigerian public and private institutions. From figure 22, 49.10 per cent of enrolled SSS students in 2020 were females, this decreased slightly to 48.82 per cent in 2021. Conversely, the percentage of male students rose from 50.90 per cent in 2020 to 51.18 per cent in 2021.

In public senior secondary schools, Imo state registered the highest number of enrolled females with 185,765 in 2020 and 192,750 in 2021. In contrast, Benue state recorded the lowest enrolments of female public SSS students with 9,876 in 2020 and 9,446 in 2021. For private schools, Ogun state recorded the highest female enrolments with 96,782 in 2020 and 106,959 in 2021, while Jigawa state recorded the lowest with 1,005 in 2020 and 384 in 2021 (See Appendix, ST 25).

Figure 22: Percentage Distribution of Enrolments of Students into Senior Secondary School (SSS) by Year and Sex (2020-2021)

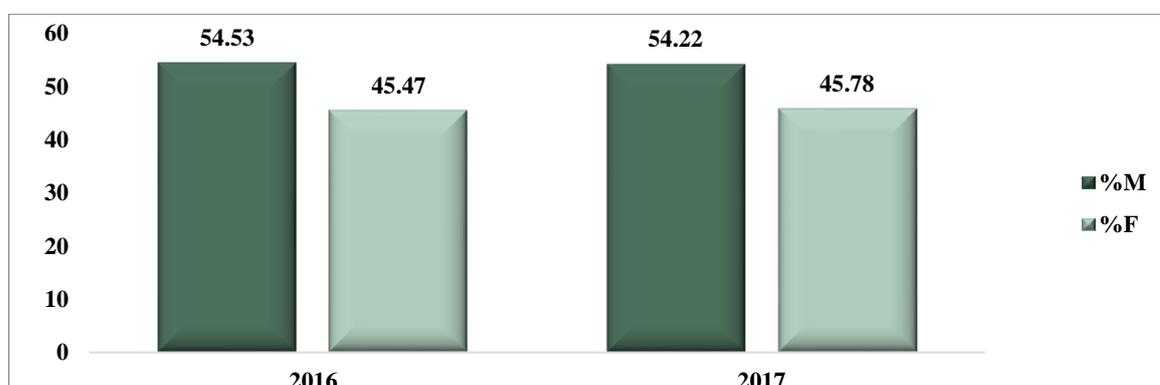

Source: Federal Ministry of Education (FME)

b. Distribution of Students that Completed Senior Secondary Schools (Public & Private) by Year, and Sex (2016-2017)

Nationally, in public and private Senior Secondary School, 1,305,176 and 1,247,051 students reached completion rate, of which female students accounted for 45.47 per cent in 2016 and 45.78 per cent in 2017 (See figure 23).

Figure 23: Percentage Distribution of Students that Completed Senior Secondary School by Sex (2016-2017)

Source: Federal Ministry of Education (FME)

3.3.7 Tertiary Education

Tertiary institutions in Nigeria encompass all formal higher education beyond the secondary level, including Colleges of Education, Health Sciences, Polytechnics and Universities. Overall enrolment data reveals that male students dominated Nigeria's combined post-secondary participation. On average, male students outnumber female students across the country's aggregated tertiary education sector. This indicates a

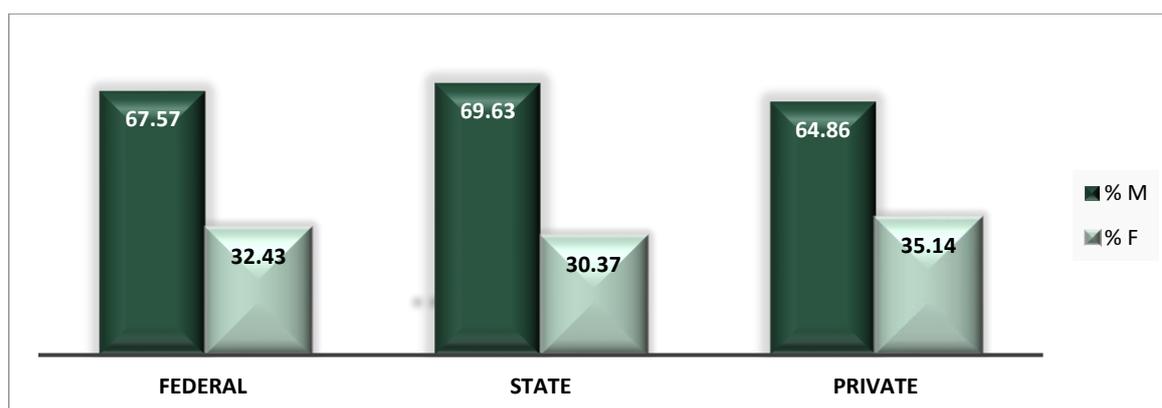

substantial gender imbalance in accessing critical skills and qualifications beyond secondary school.

a. Nigerian Colleges of Education

i. Enrolments into Nigerian Colleges of Education in the 2017/2018 Academic Session

Figure 24 illustrates the percentage of women enrolled across federal, state, and private colleges of education in Nigeria in 2017/2018 academic sessions. Overall, the data reveals low levels of female participation within teacher’s training institutions. In the 2017/2018 academic year, women constituted only 32.43 per cent of federal college attendees. State and private colleges recorded 30.37 per cent and 35.14 per cent female enrolments respectively.

Figure 24: Summary of Student Enrolments in Nigerian Colleges of Education by Type, Year and Sex (2017/2018)

Source: National Commission for Colleges of Education

b. Polytechnics

i. Enrolments in Polytechnics by Programme (2019/2020)

Enrolment data for the 2019/2020 academic year shows that female representation in Nigeria's polytechnic institutions was below gender parity. Of National Diploma (ND) students, only 41.89 per cent were females compared to 58.11 per cent males. For Higher National Diploma (HND) programmes, females accounted for 43.68 per cent of enrolled students as against males with 56.32 per cent.

Table 5: Enrolments in Polytechnics by Programme (2019/2020)

Programme	Sex	Number	Percentage
National Diploma	Male	70,829	58.11
	Female	51,065	41.89

	Total	121,894	100
Higher National Diploma	Male	40,073	56.32
	Female	31,084	43.68
	Total	71,157	100

Source: National Board for Technical Education (NBTE)

ii. Out-turn in Polytechnics by Programme (2019/2020)

According to the Nigeria's polytechnic National and Higher National Diploma programs data in 2019/2020 academic year, of the 59,956 students who completed National Diploma programmes, only 39.39 per cent were females compared to 60.61 per cent male graduates. Similarly, the Higher National Diploma data shows that out of 42,161 graduates, 42.18 per cent were females, while 57.82 per cent were males. Women still have inequitable representation among polytechnic programmes across both National Diploma certificates and Higher National Diploma certificates, having less than half of total qualifications awarded.

Table 6: Out-turn in Polytechnics by Programme (2019/2020)

Program	Sex	Number	Percentage
National Diploma	Male	36,342	60.61
	Female	23,614	39.39
	Total	59,956	100
Higher National Diploma	Male	24,379	57.82
	Female	17,782	42.18
	Total	42,161	100

Source: National Board for Technical Education (NBTE)

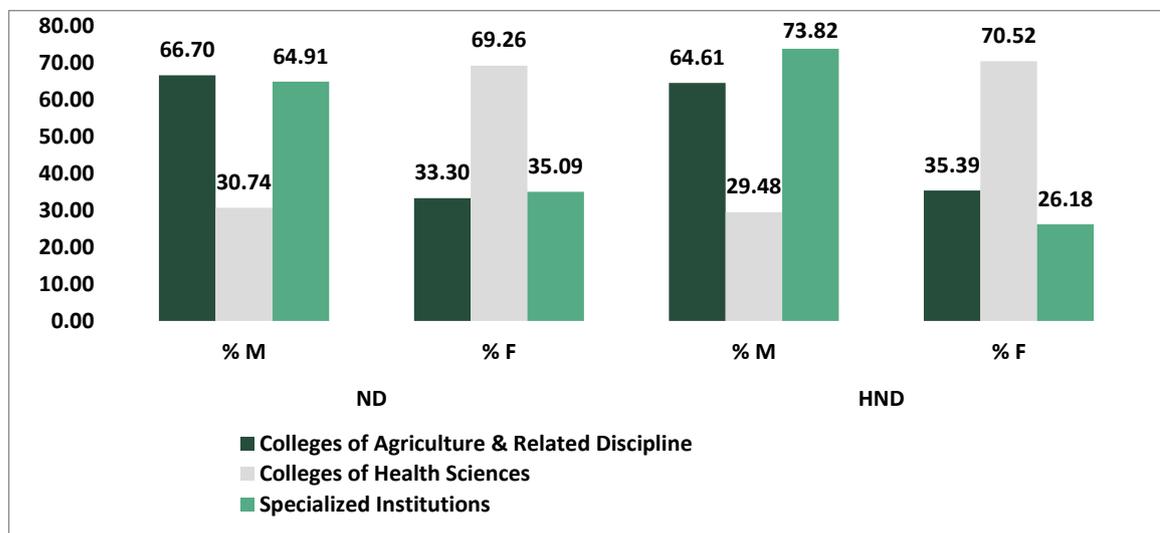

c. Monotechnic

i. Monotechnic Enrolments by Institution (2019/2020)

Enrollment data in Monotechnic shows that women attended Nigeria's polytechnic institutions focused on health sciences at higher rates than other technical colleges in 2019/2020. Females accounted for 69.26 per cent of National Diploma and 70.52 per cent of Higher National Diploma students at Health Sciences colleges. In contrast, female participation was less than males at Colleges of Agriculture & Related Disciplines as well as Specialized Institutions. Only 33.30 per cent and 35.39 per cent of female students enrolled in Agriculture Colleges' National and Higher Diplomas respectively. The gender

gap widens further at Specialized Institutions, with females accounting for 35.09 per cent of the National Diploma and 26.18 per cent of Higher National Diploma (See figure 25).

Figure 25: Percentage Distribution of Enrolments in Monotechnic by Institutions (2019/2020)

Source: NBTE, Kaduna

ii. Percentage Distribution of Out-turn in Monotechnic (National Diploma & Higher National Diploma) by Institution (2019/2020)

According to the Nigeria's polytechnic National Diploma (ND) programmes data in 2019/2020 academic year, out of the total of 11,967 ND graduates, females accounted for only 5,917 (49.44 per cent). In the College of Agriculture and Related Disciplines, 37.08 per cent of the 5,119 ND graduates were females, compared to 62.92 per cent male graduates. However, the reverse was the case for the College of Health Sciences, where female represented 70.28 per cent of ND graduates, with 29.72 per cent of males. Meanwhile, female had low representation among Specialized Institutions with 32.43 per cent of ND programme graduates in contrast to 67.57 per cent of males.

Similarly, gender inequity remains an issue with Higher National Diploma (HND) completion rates. Female constituted 35.68 per cent of HND graduates at Colleges of Agriculture and Related Disciplines and 28.23 per cent of those at Specialized Institutions. One exception was Health Sciences, where 65.14 per cent of HND graduates were females and 34.86 per cent were males.

Table 7: Percentage Distribution of Out-turn in Monotechnic (National Diploma & Higher National Diploma) by Institution (2019/2020)

MONOTECHNIC	ND					HND				
	M	F	Total	% M	% F	M	F	Total	% M	% F
Colleges of Agriculture & Related Discipline	3,221	1,898	5,119	62.92	37.08	1,639	909	2,548	64.32	35.68
Colleges of Health Sciences	1,412	3,339	4,751	29.72	70.28	941	1,758	2,699	34.86	65.14
Specialized Institutions	1,417	680	2,097	67.57	32.43	1,256	494	1,750	71.77	28.23

d. Nigerian Universities

i. Enrolments in Nigeria Universities by Ownership, Level, Academic Session, and Sex

According to the National Universities Commission data, the total number of female enrolments in 2019/2020 and 2020/2021 academic session were 805,916 and 812,277 which are equivalent to 43.46 per cent and 44.49 per cent respectively. This indicates that in the years under review, approximately 56.00 per cent of males were enrolled into the Nigerian Universities (See table 8).

Table 8: Enrolments in Nigeria Universities by Ownership, Year, and Sex

University	2019			2020		
	M	F	% F	M	F	% F
Federal	697,833	508,992	42.18	683,638	520,753	43.24
State	297,997	246,939	45.32	266,288	232,906	46.66
Private	52,515	49,985	48.77	63,436	58,618	48.03
Total	1,048,345	805,916	43.46	1,013,362	812,277	44.49

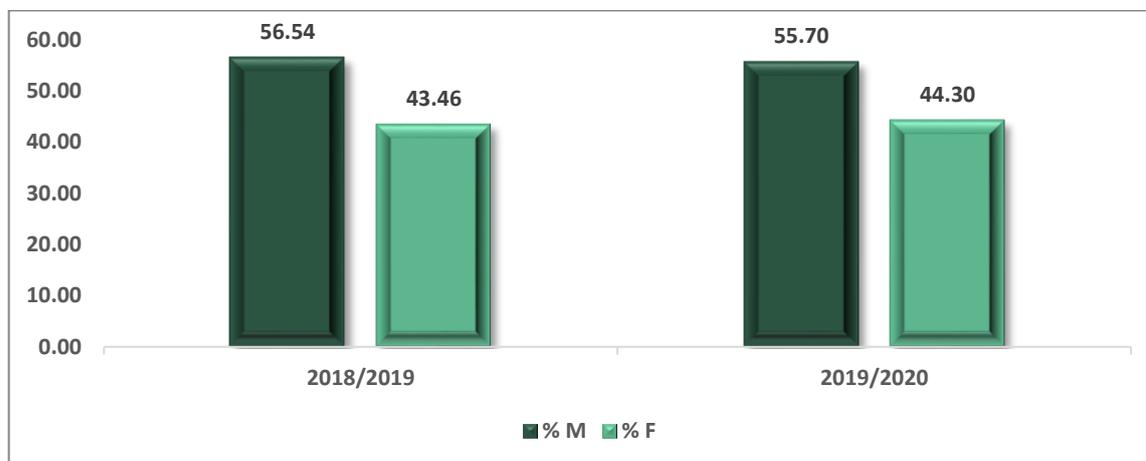

Source: National Universities Commission

ii. Students Enrolment in Nigerian Universities by Institution and Academic Sessions (2018/19 - 2019/20)

Figure 26 below shows that female undergraduate's enrolment at Nigerian Universities in the two academic sessions were 43.46 per cent in 2018/2019 and 44.30 per cent in

2019/2020. This shows that across the two academic sessions, male student enrolments were above 55 per cent (See Appendix, ST 29).

Figure 26: Students' Enrolments in Nigerian Universities by Sex (2018/19 -2019/20)

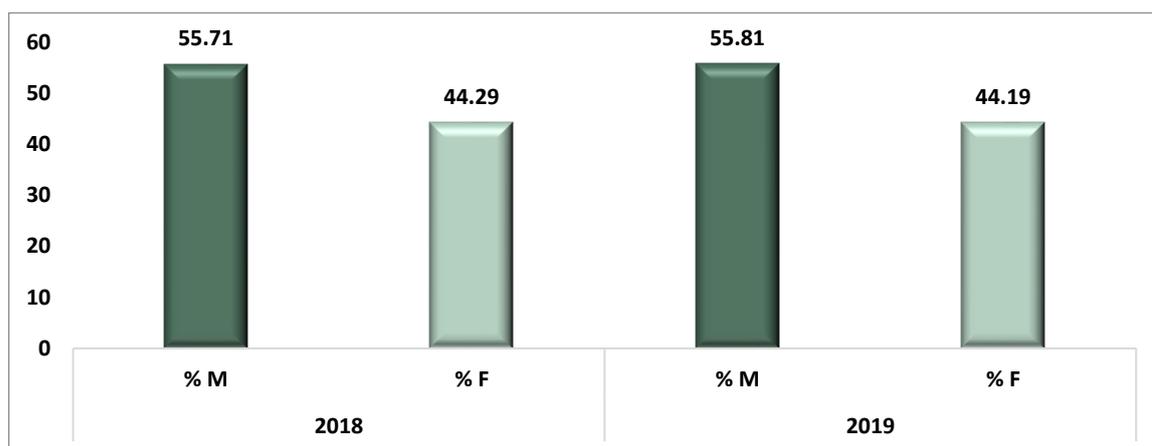

Source: National Universities Commission (NUC)

iii. Undergraduate New Entrants to Nigeria Universities by Mode of Entry and Sex

Admission into Nigeria's university system occurs primarily through two channels - by achieving compulsory minimum scores on the Unified Tertiary Matriculation Examination (UTME) or via direct entry enrolment. According to the Joint Admissions and Matriculation Board (JAMB) data, there is a consistent and significant gender imbalance in students admitted through both means from 2018 to 2019.

Of all students accepted into university programmes in 2018 and 2019, female enrolments were less than the male enrolments recorded. In 2018, females constituted 44.29 per cent of incoming students compared to 55.71 per cent for males. The gap persisted in 2019 with females having 44.19 per cent and males recording 55.81 per cent.

Figure 27: Undergraduate New Entrants to Nigeria Universities by Sex and Year

Source: NUC

iv. Full -Time Graduate Output by Major Discipline, Class of Degree and Sex (2019)

Measuring gender equality in education can be done by examining the class of degree obtained by male and female graduates from the university. Achieving high grades in Sciences, Engineering & Technology, and Medicine can foster innovation and creativity.

According to the National Universities Commission (NUC) data, male students that made first-class degree in Engineering and Technology accounted for 82.97 per cent compared to females with 17.03 per cent. Similarly, in Medicine, 61.97 per cent of males obtained first-class degree as against 38.03 per cent of females. The percentages for second-class upper and second-class lower degrees were also higher for males in Sciences and Engineering & Technology.

However, in Law, 65.32 per cent of females achieved first-class degree and 54.50 per cent obtained second-class upper degree. In Education, 55.16 per cent of females achieved first-class degree and 55.64 per cent obtained second-class upper degree (See table 9).

Table 9: Full Time Graduate Output by Major Discipline, Class of Degree and Sex (2019)

3.4 Distribution of Teachers

3.4.1 Distribution of Nomadic Primary School Teachers by Sex (2020-2022)

From figure 28, female teachers in nomadic schools constituted 33.69 per cent in 2020 and 2021 each and rose slightly to 31.52 per cent in 2022 (See Appendix, ST 70).

Figure 28: Percentage Distribution of Nomadic Primary School Teachers by Sex (2020-2022)

Sources: National Commission for Nomadic Education

3.4.2 Highest Teaching Qualification in Public and Private ECCDE (2020)

Table 10 shows the distribution of teachers in Public and Private ECCDE nationally. In public schools, a total of 33,045 teachers recorded comprised 3,796 males and 29,249 females. Out of this, 14.03 per cent of female teachers did not possess any teaching certificate. Furthermore, 61.70 female teachers had NCE certificate, less than 1 per cent female teachers had PGDE Certificate, while 11.80 per cent female teachers had B.Ed./B.A.ED/B.Sc. Also, less than 1 per cent female teachers had M.Ed/M.A.ED/M.Sc, three female teachers had Ph.D, with no male teacher with Ph.D certificate.

Similarly in Private ECCDE, out of the 111,584 teachers nationally, 102,666 were females. Female teachers without teaching certificates were 47.40 per cent, while 36.43 per cent possessed NCE certificates and 6.64 per cent of the female teachers had B. Ed/B. A.ED/B.Sc. As much as 13 female teachers had Ph.D, while 2 male teachers had Ph.D certificates.

Table 10: Highest Teaching Qualification in Public and Private ECCDE (2020)

3.4.3 Highest Teaching Qualification in Public and Private Primary Schools (2020)

The nationwide distribution of teachers in Public and Private Primary Schools in 2020 is shown in table 11. The overall number of teachers in public schools was 451,238, of which 222,987 were males and 228,251 were females. 6.47 per cent of female teachers were without teaching certificate. Moreover, 33.66 per cent of females had NCE certificates, 0.59 per cent were PGDE certificate holders, 9.64 per cent had B.Ed./B.A.ED/B.Sc., and 0.23 per cent had M.Ed./M.A.ED/M.Sc. certificates. In addition, 24 female and 23 male teachers had doctorate degree accounting for 0.01 per cent each.

Also, in Private Primary schools more than half of the total number of teachers were females (238,831). The percentage of female teachers without a teaching certificate was 26.43 per cent. However, 29.71 per cent of female teachers had NCE qualification, 1.76 per cent had PGDE certificates, 9.37 per cent had B.Ed., B.A., or B.Sc. certificates and 0.37 per cent had M.Ed./M.A./M.Sc. certificates. There were 83 female teachers (0.02 per cent) and 49 male teachers (0.01 per cent) that had doctorate degree.

Table 11: Highest Teaching Qualification in Public and Private Primary Schools (2020)

3.4.4 Highest Teaching Qualification in Public and Private Junior Secondary Schools (JSS) (2020)

Table 12 shows the distribution of teachers with highest teaching qualification in both Public and Private JSS across the states in 2020. In Public Schools, the total number of teachers were 167,872, of which 141,042 had teaching qualification (70,908 females and 70,134 males). Female teachers with NCE, PGDE, B.Ed./B. A/B.Sc., M.Ed./M. A/M.Sc., qualification constituted 16.29 per cent, 3.39 per cent, 21.14 per cent, 0.93 per cent respectively, while the female with Ph.D qualification was 0.03 per cent.

Additionally, the total number of teachers in Private Schools was 193,856. The teachers with teaching qualifications were 127,535, which comprised of 68,319 males and 59,216 females. The percentage of female teachers with NCE, PGDE, B.Ed./B.A/B.Sc., M.Ed./M.A/M.Sc., qualifications was 12.56 per cent, 3.02 per cent, 14.11 per cent, and 0.81 per cent respectively, while female teachers with Ph.D was 0.04 per cent (79 females).

Table 12: Highest Teaching Qualification in Public and Private Junior Secondary Schools (JSS) (2020)

3.4.5 Percentage Distribution of Qualified Teachers in Public and Private ECCDE/Pre-Primary School (2021)

Figure 29 shows the percentage distribution of qualified teachers in Public and Private ECCDE/Pre-Primary in 2021. Public ECCDE/Pre-Primary has a total number of 96,026 teachers, with 18,857 males and 55,923 females as qualified teachers accounting for 25.22 per cent and 74.78 per cent respectively. In Private ECCDE/Pre-Primary, the total number of teachers was 196,207, of which the number of qualified teachers was 45,478 males and 150,729 females, equivalent to 23.95 per cent and 76.05 per cent respectively. This indicates that in both public and private ECCDE/Pre-Primary School, there are more qualified female teachers.

Figure 29: Percentage Distribution of Qualified Teachers in Public and Private ECCDE/Pre-Primary School (2021)

Source: Federal Ministry of Education

3.4.6 Public and Private Primary School Teachers (2021)

The total number of teachers in Public Primary schools in 2021 was 534,857. Out of this figure, 185,305 males and 190,765 females were qualified teachers representing 49.27 per cent and 50.73 per cent respectively. Similarly, in Private Primary Schools for the same year, the total number of teachers was 378,448, out of which 105,573 males and 173,236 females were qualified teachers, accounting for 37.87 per cent and 62.13 per cent respectively.

Table 13: Number of Qualified Teachers in Public and Private Primary Schools by State, 2021

Category	Number Of Teachers			Number Of Qualified Teachers			% Of Qualified Teachers	
	Male	Female	Total	Male	Female	Total	% M	% F
Public	267,480	267,377	534,857	185,305	190,765	376,070	49.27	50.73
Private	141,377	237,071	378,448	105,573	173,236	278,809	37.87	62.13

3.4.7 Public and Private Junior Secondary School (JSS) Teachers by State and Gender (2021)

Table 14 presents the distribution of teachers in Junior Secondary schools in 2021. There were 100,472 male and 94,881 female teachers in Public JSS, comprising 50.19 per cent of male and 49.81 per cent of female qualified teachers. Also, Private JSS had 126,675 male and 136,431 female teachers. Qualified female teachers were higher than their male counterparts with 52.22 per cent and 47.78 per cent respectively.

Table 14: Number of Qualified Teachers in Public and Private JSS by State and Gender, 2021

Category	Number Of Teachers			Number Of Qualified Teachers			% Of Qualified Teachers	
	Male	Female	Total	Male	Female	Total	% M	% F
Public	100,472	94,881	195,353	73,258	72,705	145,963	50.19	49.81
Private	126,675	136,431	263,106	94,634	103,419	198,053	47.78	52.22

3.4.8 Teaching Staff of Polytechnics

i. Percentage Distribution of Teaching Staff in Polytechnics by Qualification 2019/2020

According to the National Board for Technical Education data, among the teaching staff, 23.47 per cent of females had HND/bachelor's degrees, 20.06 per cent had PGD/master's degree and 18.45 per cent had PhD degree in 2019/2020. In contrast, males recorded over 75.00 per cent across all qualification categories (See figure 30).

Figure 30: Percentage Distribution of Teaching staff in Polytechnics by Qualification 2019/2020

Source: National Board for Technical Education (NABTEB)

3.4.9 Teaching Staff/Non-Teaching Staff of Nigerian Universities

The competence of teachers greatly impacts the quality of education students receive. To promote gender equity and non-discrimination in education, it is vital to have balance in the gender makeup of the teaching workforce. As more women join the teaching ranks, especially in areas where women have lower status, it could encourage girls to study further and prompt parents to support their daughters in schools. Female teachers serve as important role models and their presence signals that education systems value the advancement of girls and women.

3.4.10 Academic Staff of Federal, State, and Private Universities by Sex (2019/2020)

According to the National Universities Commission data, the teaching workforce at federal, state, and private universities is still largely dominated by men. During the 2019/2020 academic year, 73.30 per cent (31,362) of the 42,784 academic staff at Federal universities were males, while 26.70 per cent (11,422) were females. The imbalance

persists at State and Private universities, when males constituted 76.20 per cent and 72.96 per cent of staff respectively, females recorded 23.80 per cent and 27.04 per cent respectively.

Table 15: Academic staff of Federal, State, and Private Universities by Sex 2019/2020)

University	2019/2020				
	M	F	Total	% M	% F
Federal	31,362	11,422	42,784	73.30	26.70
State	15,421	4,817	20,238	76.20	23.80
Private	8,703	3,225	11,928	72.96	27.04
Total	55,486	19,464	74,950	74.03	25.97

Source: National Universities Commission

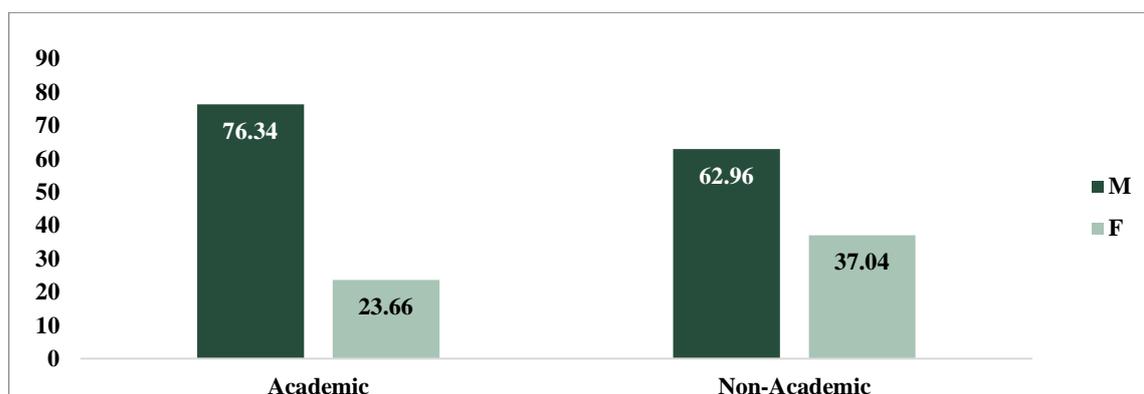

3.4.11 Teaching Staff/Non-Teaching Staff of Nigerian Universities

The quality of education relies heavily on the competence and expertise of the teaching staff. A significant factor in ensuring equal access and achievement in education for both genders is having a gender-balanced representation among the teaching personnel. This is particularly important in areas where women have lower socio-economic status, as it can positively influence young women's choices to pursue further education and persuade parents to prioritize their daughters' education. Creating a supportive and non-discriminatory learning environment for both men and women is of utmost importance.

3.4.12 Academic and Non-Academic Staff of Nigerian Universities (2019)

Figure 31 shows that males dominate both the academic and non-academic staff of the Universities. In the academic category, females recorded 23.66 per cent and males had 76.34 per cent, while in the non-academic category, females recorded 37.04 per cent and males had 62.96 per cent.

Figure 31: Academic and Non-Academic Staff of Nigerian Universities by Year and Sex, 2019

Source: National Universities Commission

3.4.13 Distribution of Academic Staff of Nigerian Universities by Rank and Sex, 2019

Table 16 shows that in the rank of Professors, 15.17 per cent were females, while 84.83 per cent were males in 2019. Also, the percentage of female Senior Lecturers and Lecturer 1 and below were 22.94 per cent and 26.79 per cent respectively.

Table 16: Distribution of Academic Staff by Nigeria University by Rank and Sex, 2019

Academic Staff of the University	M	F	Total	% F	% M
Professors	10,075	1,802	11,877	15.17	84.83
Reader	4,774	1,262	6,036	20.91	79.09

3.5 National Youth Service Corps

3.5.1 Distribution of National Youth Service Corps (NYSC) members deployed (2020-2022)

The distribution of NYSC members deployed to various states from 2020 to 2022 is shown in figure 32 below. The percentage of female Corps members deployed increased from 47.10 per cent in 2020 to 52.47 per cent in 2021, and 52.55 per cent in 2022. In 2020, the percentage of male participation was 52.90 per cent, it dropped to 47.53 and 47.45 per cent in 2021 and 2022 respectively.

Figure 32: Percentage Distribution of NYSC Participation (2020-2022)

Source: NYSC

3.5.2 Percentage Distribution of NYSC Members by Major Discipline (2020-2022)

Table 17 shows percentage distribution of NYSC members with background in some major disciplines. Female corps' members deployed were more in disciplines such as Administration, Arts, Education, Pharmacy and Science, but were found to be less predominant in Engineering/Technology, Agriculture, Environmental Science, Medicine, Social Science and Veterinary Medicine. In 2020, female corps members from Arts accounted for 62.24 per cent but increased to 66.06 per cent and 67.49 per cent in 2021 and 2022 respectively. In Law, the percentage of female corps members rose from 52.59 per cent in 2020 to 59.29 per cent in 2021 and 61.29 per cent in 2022. Also, in sciences, female corps members accounted for 50.47 per cent in 2020, 55.00 per cent in 2021 and 56.37 per cent in 2022. On the other hand, in Engineering/Technology, female corps members accounted for 26.98 per cent in 2020, 29.99 per cent in 2021, and 28.88 per cent in 2022.

3.5.3 Percentage Distribution of National Youth Service Corp (NYSC) Members by Age Group (2020-2022)

Figure 33 shows percentage distribution of National Youth Service Corps members by age group from 2020 to 2022. In 2020, the percentage of females who participated in NYSC was 47.10 per cent, it increased to 52.47 per cent and 52.55 per cent in 2021 and 2022 respectively. Nevertheless, the distribution of males who participated in 2020 was 52.90 per cent, it declined to 47.53 per cent in 2021 and 47.45 per cent in 2022. Females and males within the age groups of 20-24 years and 25-29 years participated more in the National Youth Service Corps (See Appendix, ST. 64).

3.6 Examinations

3.6.1 Distribution of Public and Private School West African Senior Secondary Certificate Examinations (WASSCE) for School Candidates by Sex (May/June 2020-2022)

Figure 34 shows the number of school candidates who wrote WASSCE May/June from 2020 to 2022. The total number of candidates that sat for the examination decreased from 1,514,994 in 2020 to 1,503,973 in 2021 but increased to 1,678,185 in 2022. Generally, the percentage of students that passed with 5 credits including Mathematics and English Language in 2020, 2021, and 2022 were 62.59 per cent, 61.70 per cent, and 72.35 per cent

respectively. The percentage of female candidates that passed with 5 credits and above including English Language and Mathematics in 2020 was 51.04 per cent, which declined to 50.86 per cent in 2021 and increased to 51.31 per cent in 2022. On the other hand, the percentage of males recorded 48.96 per cent, 49.14 per cent and 48.69 per cent respectively during the period under review.

Figure 34: Distribution of West African Senior Secondary Certificate Examinations (WASSCE) for School Candidates by Sex (MAY/JUNE 2020 -2022)

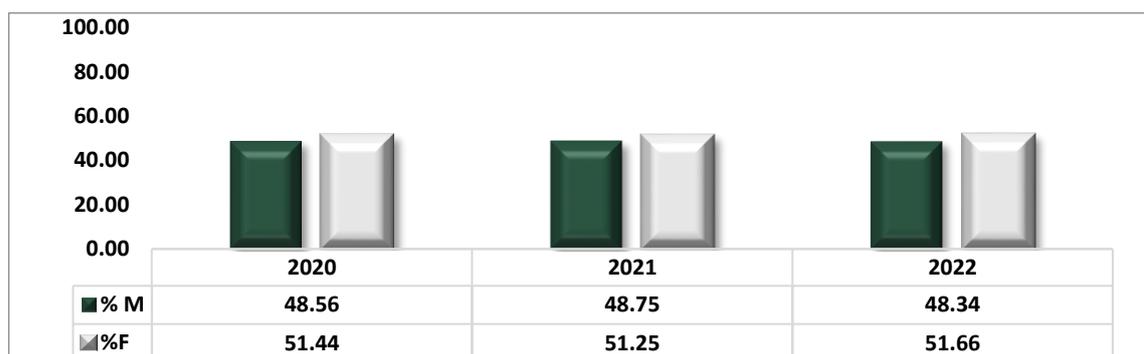

Source: West Africa Examination Council, Lagos

3.6.2 Distribution of West African Senior Secondary Certificate Examinations (WASSCE) for Private Candidates by Sex (May/June, 2020-2022)

The total number of private candidates who sat for the WASSCE in May/June from 2020 to 2022 is shown in figure 35. The number of female candidates that passed the exam in 2020 with five credits, including English language and mathematics accounted for 51.44 per cent. This decreased to 51.25 per cent in 2021 and rose to 51.66 percent in 2022. For the male candidates, 2020 recorded 48.56 per cent, 2021 stood at 48.75 per cent and 2022 was 48.34 per cent.

Figure 35: Distribution of West African Senior Secondary Certificate Examinations (WASSCE) for Private Candidates by Sex (May/June 2020 -2022) (Private)

3.6.3 NECO (SSC) Examination

a. Distribution of NECO (SSC) Examination by Year and Sex (June/July), 2018 - 2020

In the June/July 2018 NECO (SSS) examinations, a total of 1,038,644 candidates sat for the exams, with 588,477 males and 450,167 females. The percentage of candidates with a minimum of 5 credits including Mathematics and English Language was 69.06 per cent of males and 74.65 per cent of females. In 2019, the number of candidates increased to 643,462 males and 515,484 females, which represented 69.51 per cent males and 74.21 per cent of females that passed the exams with a minimum of 5 credits, including Mathematics and English Language. In 2020, 659,796 males and 550,126 females sat for the examination of which 71.55 per cent males and 76.72 per cent females passed with 5 credits or more, including Mathematics and English Language (See table 18).

Table 18: Distribution of NECO (SSC) Examination by Year and Sex (June/July 2018-2020)

Year	Total Number of Candidates who Sat for the Examination			Credit pass in English Language			Credit pass in Mathematics			Candidates with a minimum of 5 Credits including Mathematics and English language			Percentage of Candidates with a minimum of 5 Credits including Mathematics and English language		
	M	F	Total	M	F	Total	M	F	Total	M	F	Total	% M	% F	% Total
2018	588,477	450,167	1,038,644	482,284	393,180	875,464	474,102	376,229	850,331	406,420	336,035	742,455	69.06	74.65	71.48
2019	643,462	515,484	1,158,946	535,755	448,397	984,152	522,946	431,453	954,399	447,256	382,531	829,787	69.51	74.21	71.60

Source: National Examination Council (NECO)

The number of male students who sat for the Nov/Dec 2018 examination was 33,161, while the number of female students was 26,164. Among the male students, 60.10 per cent passed with a minimum of five credits, including Mathematics and English Language, while 65.50 per cent of female students, passed with the same records.

In 2019, the number of candidates who sat for the examination increased to 38,238 males and 30,740 females. The number of candidates who passed up to 5 credits including Mathematics and English Language decreased to 17,871 males and 15,705 females. In 2020, the number of candidates who sat for the examination decreased to 22,887 males and 17,871 females. However, the number of candidates who passed up to 5 credits including Mathematics and English Language further decreased to 14,183 males and 12,094 females.

Table 19: Distribution of NECO (SSC) Examination by Year and Sex (Nov/Dec 2018-2020)

3.6.4 Unified Tertiary Matriculation Examination (UTME)

a. Unified Tertiary Matriculation Examination (UTME) Application and Admission by Year and Sex (2018-2020)

The Unified Tertiary Matriculation Examination (UTME) is conducted by the Joint Admission and Matriculation Board for students who are applying to Nigerian Universities, Polytechnics, and Colleges of Education. In 2018, a total of 1,653,127 candidates applied for the UTME, out of which 582,593 candidates were admitted. The number of males admitted accounted for 19.33 per cent, while females represented 15.91 per cent. In 2019, the total number of applicants increased to 1,886,488 which comprised of 1,022,161 males and 864,327 females. The female and male candidates admitted were 280,753 and 328,106 respectively. Similarly, in 2020, there was also an increase in the number of applicants for both males and females with 1,063,146 and 886,837 respectively. Of these, 240,580 males and 218,048 females were admitted.

Table 20: Unified Tertiary Matriculation Examination (UTME) Application and Admission by Year and Sex (2018-2020)

Year	Application			Admission			% of Applicants given Admission	% share of Males given Admission	% Share of Females given Admission
	M	F	TOTAL	M	F	TOTAL

Key Findings

- *In Q4 2022 NLFS, 67.31 per cent females and 77.35 per cent males were employed at work.*
- *The underemployment rate of females in Q4 2022 was 16.70 per cent and 11.00 per cent for males.*
- *In Q4 2022, the percentage of unemployed female was 6.6 per cent, while the percentage of unemployed male was 4.0 per cent.*
- *The percentage of females who benefited from the Enterprise Development Programme in 2020 was 59.81 per cent, but declined in 2021 to 11.14 per cent, and increased in 2022 to 55.00 per cent.*
- *Females were the highest beneficiaries in the National Open Apprenticeship Scheme in 2020, 2021 and 2022 with 33,074, 21,510 and 14,379 respectively.*

4.1 Labour Force

Work is frequently the primary asset and key factor influencing household income, as well as determining whether individuals will reside in poverty or not. Consequently, understanding people's employment status, the duration of their work, and the specific nature of their occupations, categorized by female and male is crucial.

In 2021, NBS commenced work with the World Bank and the International Labour Organization (ILO) to update the methodology and processes for conducting the Nigeria Labour Force Survey (NLFS), using the guidelines of the 19th International Conference of Labour Statisticians (ICLS) Resolutions in terms of working age population, which is now reviewed to be 15 years and above, employed, and unemployed persons. Employed are all those of the working age population engaged in any activity to produce goods or provide services for pay or profit. Unemployed means those who are not in employment, but are actively searching for and available, presently doing nothing for pay or profit. The underemployed are those who work less than 40 hours in a week but willing and available for more hours of work.

4.1.1 Status of Work (Employment)

Employment status of male and female in Q4 2022 was 77.35 per cent males employed at work, while 67.31 per cent females were also engaged in one form of economic activity or the other.

Figure 36: Status of Work (Employment) By Sex and Year

Source: NLFS Q4, 2022

4.2 Gender Gap in Employment Patterns of Primary Job Types

Table 21 shows the gender gap in employment patterns of primary job types according to NLFS 2022. Males are employed majorly in wage jobs, while females are engaged mainly in businesses or farming activity. In Q4 2022, the percentage of males and females employed in wage jobs were 17.2 per cent and 9.2 per cent respectively. In contrast, females are more likely to own businesses or be involved in farming activity than their male counterparts. The percentage of females who own businesses or are involved in farming activity was 76.9 per cent, compared to 69.6 per cent for males.

The percentage of females who helped in household business was 11.7 per cent compared to their male counterpart, which was 9.8 per cent.

Table 21: Gender Gap in the Employment Patterns of Primary Job Types among employed Nigerian by Sex and Year (Q4 2022)

Year	Employee		Own Business/Farming Activity		Helping in Household Business		Apprentice/Intern		Helping Household Members who work for someone else	
	Male	Female	Male	Female	Male	Female	Male	Female	Male	Female
Q4 2022	17.2	9.2	69.6	76.9	9.8	11.7	3.2	2.0	0.2	0.2

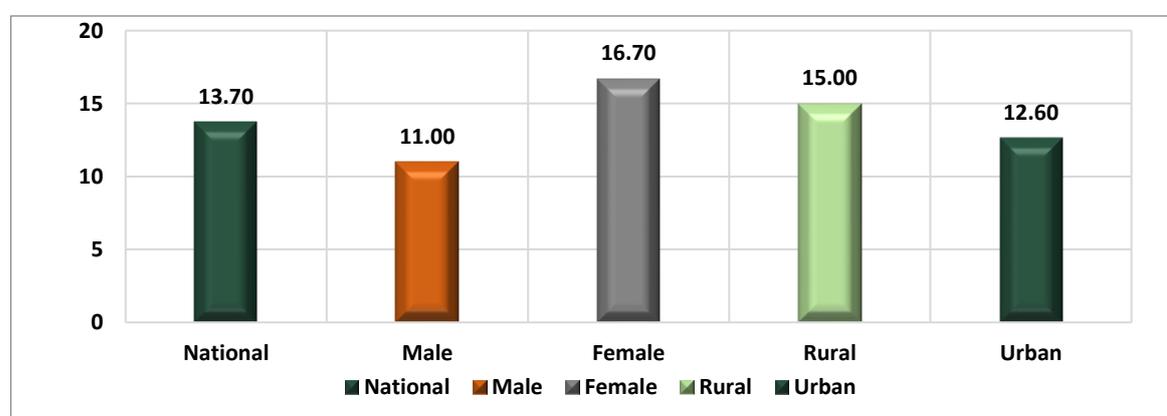

Source: NLFS Q4, 2022

4.3 Underemployment by Sector Q4 2022

Under-employment refers to a situation where individuals work fewer hours than they desire and are available for additional work. The under-employment rate, as defined, measures the proportion of employed individuals who fall under this category.

In Nigeria, the underemployment rate of females in Q4 2022 stood at 16.70 per cent, compared to males that recorded 11.00 per cent. While in the rural area, under-employment was 15.00 per cent and in contrast urban under-employment was 12.60 per cent as shown in figure 37.

Figure 37: Under-employment by Sector Q4 2022

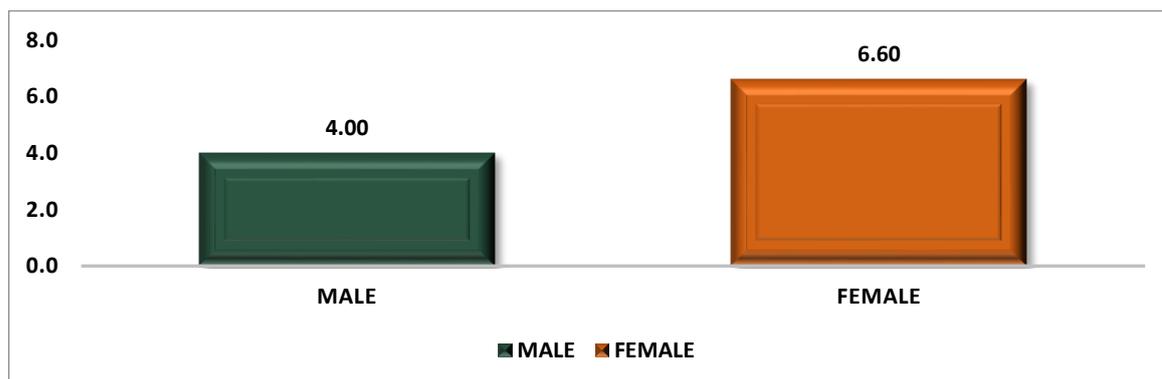

Source: NLFS Q4, 2022

4.4 Unemployment in Nigeria

The unemployment rate is defined as the proportion of the labour force (employed and unemployed persons) that is actively seeking work but unable to find it. This measure captures those who are ready and willing to work but lack suitable employment opportunities.

Figure 38 shows that unemployment was higher among women in Q4 2022, the percentage of unemployed females was 6.60 per cent, while the percentage of unemployed males was 4.00 per cent.

Figure 38: Percentage Distribution of Unemployed Individual by Sex Q4 2022

Source: NLFS Q4, 2022

4.5 Labour Market by Status Q4 2022

Table 22 shows the labour market status in Q4 2022, the percentage of employed males was 78.4 per cent, while employed female was 69.0 per cent. The labour market status for unemployed males was 3.3 per cent, while females accounted for 4.9 per cent. The percentage of males out of the labour force was 18.3 per cent, while the percentage of females out of labour force was 26.1 per cent.

Table 22: Labour Market by Status, Sex and Year

Year	Employed		Unemployed		Out of Labour Force	
	Male	Female	Male	Female	Male	Female
Q4 2022	78.40	69.00	3.30	4.90	18.30	26.10

Source: NLFS Q4, 2022

4.6 National Directorate of Employment (NDE)

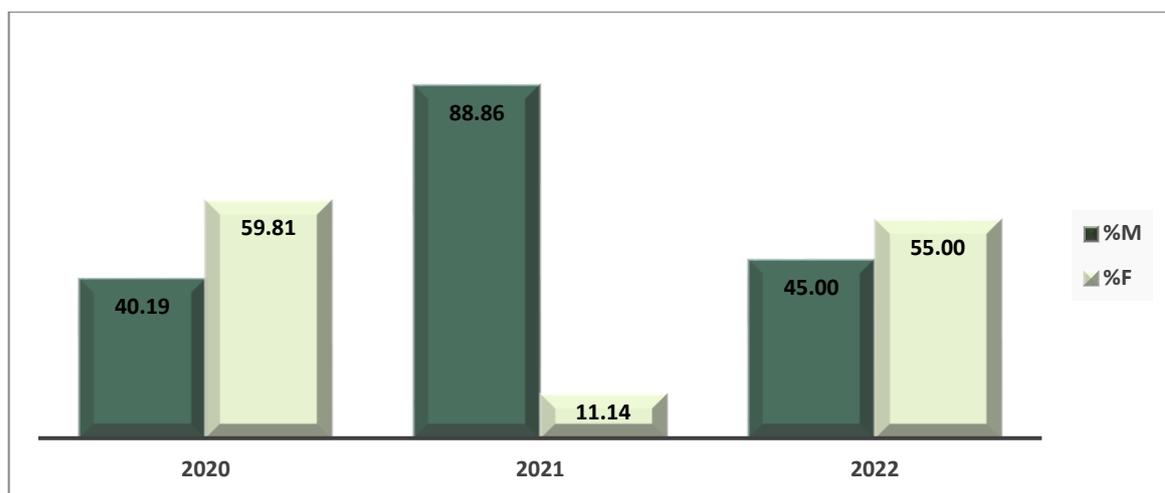

The National Directorate of Employment (NDE) functions as a workforce development organization with the primary goal of fostering self-employment and enhancing employability through tailored training initiatives. By doing so, it aims to bring about a transformation in attitudes, foster job creation, alleviate poverty, and facilitate wealth generation within the nation⁴. The agency initiates training and empowerment programs for diverse groups of individuals, including offerings such as the Enterprise Development Programme (EDP) and the National Open Apprenticeship Scheme (B-NOAS), among others.

a. Percentage Distribution of Enterprise Development Programme (EDP) Beneficiaries by State, Sex, and Year (2020-2022)

The Enterprise Development Programme is a five-year initiative whose primary mission is to nurture small and medium-scale enterprises with the aim of creating job opportunities and expanding the realm of industrial ownership, among other objectives.

According to the National Directorate of Employment data, in 2020 females who benefited from the Enterprise Development Programme constituted 59.81 per cent, it declined in 2021 to 11.14 per cent, and increased in 2022 to 55.00 per cent. While the percentage of males in 2020 was 40.19 per cent, it increased significantly to 88.86 per cent in 2021 and declined to 45.00 per cent in 2022. Meanwhile in the states, Kaduna state recorded the highest female beneficiaries in 2020 with 4,010, while Kano state had the highest male beneficiaries with 3,856 in the same year. In contrast, in 2020, FCT recorded the lowest male beneficiaries with 30, while Edo and Yobe states had no female beneficiaries in the same reference year. Also, in 2021 and 2022, Lagos state had the highest female beneficiaries with 3,588 and 3,867 respectively, while Jigawa state had the lowest female beneficiaries in 2021 with 158 and Benue state recorded 0 for both male and female beneficiaries in 2022.

Figure 39: Percentage Distribution of Enterprise Development Programme (EDP) Beneficiaries by Sex and Year, National (2020-2022)

Source: National Directorate of Employment

b. Percentage Distribution of National Open Apprenticeship Scheme (NOAS) Beneficiaries by State, Sex, and Year (2020-2022)

The National Open Apprenticeship Scheme (NOAS) is a program that enrolls unemployed school graduates and places them under the mentorship of skilled craftsmen and women in the informal sector, or within the National Directorate of Employment (NDE) skills acquisition centers. This initiative aims to equip participants with valuable vocational skills, enhancing their prospects for decent job opportunities.

Figure 40 shows that nationally, females were the highest beneficiaries in the National Open Apprenticeship Scheme in 2020, 2021 and 2022 with 33,074, 21,510 and 14,379 which is equivalent to 54.94 per cent, 57.86 per cent and 61.93 per cent respectively. Meanwhile, across the states, Kano state recorded the highest female beneficiaries in 2020, 2021 and 2022 with 3,011, 1,279 and 885 respectively. Also, Katsina state had the highest male beneficiaries in 2020 with 1,620, Kano state had the highest male beneficiaries in 2021 with 833 and in 2022, Jigawa state recorded the highest male beneficiaries with 530. However, Kebbi state had the least female beneficiaries in 2020 with 276, while FCT had the least female beneficiaries in both 2021 and 2022 with 225 and 150 respectively (See ST .75 in Appendix)

Figure 40: Percentage Distribution of National Open Apprenticeship Scheme (NOAS) Beneficiaries by Sex and Year

Source: National Directorate of Employment

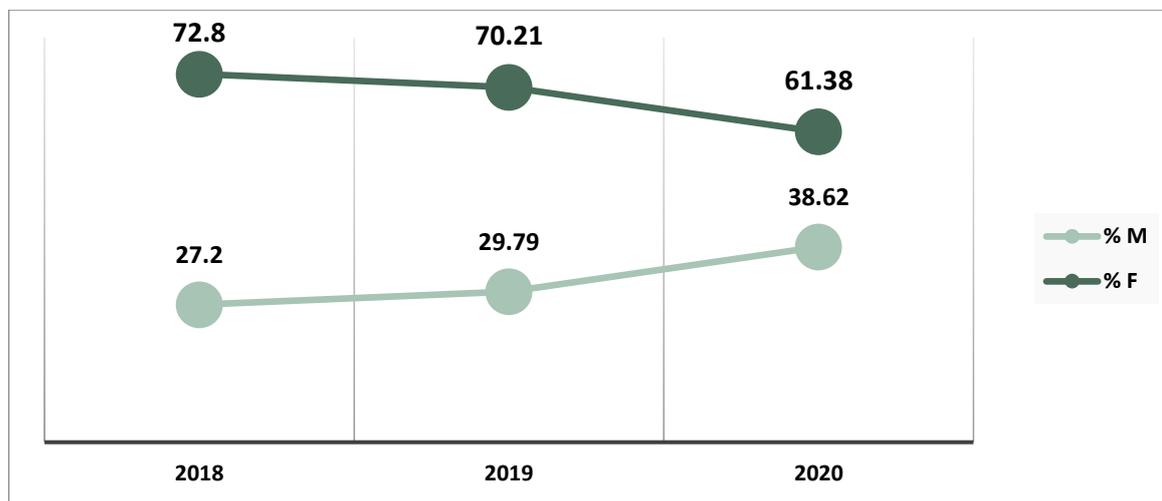

c. Percentage Distribution of Basic-National Open Apprenticeship Scheme (B-NOAS) Beneficiaries by State, Sex, and Year (2018-2020)

The Basic-National Open Apprenticeship Scheme (B-NOAS) is designed to provide vocational skills to unemployed school leavers, either by attaching them to master craftsmen and women in the informal sector or by placing them in NDE Skills Acquisition Centres. This enables them to acquire marketable skills and access better job opportunities. The distribution of B-NOAS beneficiaries is presented in figure 41.

In 2018, 72.80 per cent of the beneficiaries were females, while only 27.20 per cent were males. This trend continued in 2019 with 70.21 per cent of female beneficiaries and 29.79 per cent of male beneficiaries. In 2020, the percentage of female beneficiaries further decreased to 61.38 per cent, while the percentage of male beneficiaries rose to 38.62 per cent.

Kano state had the highest number of beneficiaries in 2018 and 2020 with 2,045 and 3,277 respectively. However, in 2019, Delta state had the highest number of beneficiaries with 1,210. On the other hand, Rivers, Jigawa, and Zamfara states had the lowest number of beneficiaries in 2018, 2019, and 2020, with 174, 552, and 428 respectively.

Figure 41: Percentage Distribution of Basic-National Open Apprenticeship Scheme (B-NOAS) Beneficiaries by State, Sex and Year (2018-2020)

Source: National Directorate of Employment

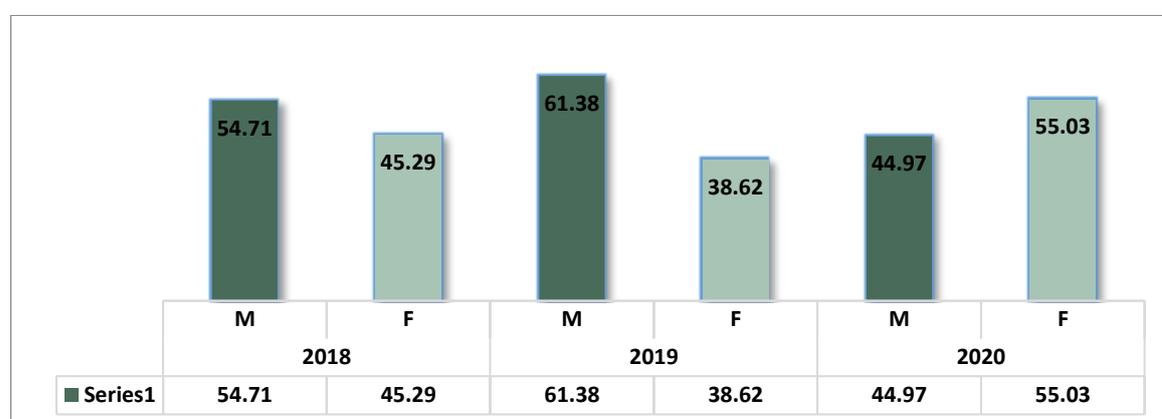

d. Percentage Distribution of School on Wheels (SOW) Beneficiaries by State, Sex and Year (2018-2020)

The School on Wheels (SOW) program is a mobile training workshop designed to provide skills to unemployed individuals in rural areas where there is a lack of qualified trainers.

In 2018 and 2019, only 14 out of 36 states and the FCT were able to benefit from the program, with each state having 50 beneficiaries. However, in 2020, the program expanded to include 16 states, with 50 beneficiaries in each state except for Kogi and Jigawa states, which had 195 and 100 beneficiaries respectively.

In terms of gender distribution, the percentage of male beneficiaries increased from 54.71 per cent in 2018 to 61.38 per cent in 2019. However, in 2020, the percentage dropped to 44.97 per cent. On the other hand, the percentage of female beneficiaries was below average in 2018 and 2019 but increased to 55.03 per cent in 2020 (See figure 42).

Figure 42: Percentage Distribution of School on Wheels (SOW) Beneficiaries by State, Sex and Year (2018-2020)

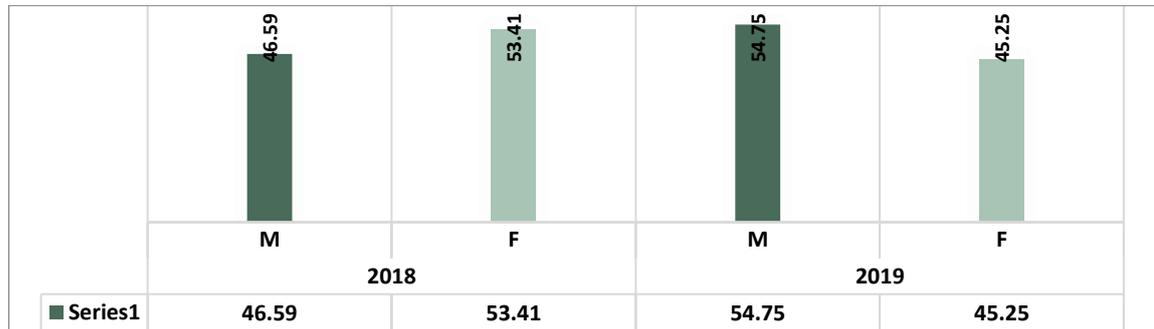

Source: National Directorate of Employment

e. Percentage Distribution of Advanced-National Open Apprenticeship Scheme (A-NOAS) Beneficiaries by State, Sex, and Year (2018-2020)

A-NOAS is a scheme designed for artisans who graduated from B-NOAS to upgrade their skills to a higher level of competence. Though data was not available in 2020, female beneficiaries accounted for 53.41 per cent in 2018 but reduced to 45.25 per cent in 2019. Male beneficiaries accounted for 46.59 per cent in 2018 and 54.75 per cent in 2019.

Kebbi and Niger states had the highest number of beneficiaries (60), while other states received 50 and below. All the 24 states that benefited in 2019 had 50 beneficiaries each.

Figure 43: Percentage Distribution of Advanced-National Open Apprenticeship Scheme (A-NOAS) Beneficiaries by State, Sex and Year (2018-2019)

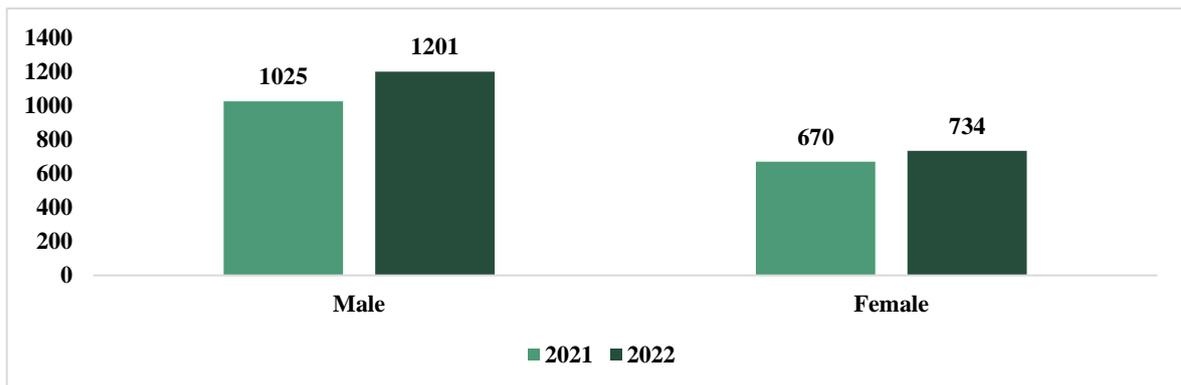

Source: National Directorate of Employment

f. Percentage Distribution of Youth that were Provided with Tools and Equipment to Establish and Run their Own Business by State, Sex, and Year (2021-2022)

In 2021, the total number of female beneficiaries was 670 while male beneficiaries stood at 1,025. In 2022, female beneficiaries increased to 734 and male beneficiaries increased to 1,201. Delta and Benue state had the highest number of female beneficiaries in 2021 with 65 and 40 respectively, while Bayelsa, Borno, Kano, FCT and Yobe had the lowest with 9 each. In 2022, Katsina state had the highest number of female beneficiaries with 158, followed by Imo state with 55, while no female benefitted in Sokoto and Kano states.

Figure 44: Number of Youths that were Provided with Tools and Equipment to Establish and Run their Own business by Sex, and Year (2021-2022)

4.7 Security Personnel

Crime and insecurity continue to pose significant obstacles for governments worldwide. This issue prompts governments at various levels (national, state, and local) to allocate substantial resources towards combating these problems. In Nigeria, numerous security

agencies have been established, each tasked with specific mandates to uphold laws, address various types of crimes, and hold offenders accountable through prosecution.

4.7.1 Police Officers by Rank

Table 23 shows the number of police officers and their ranks. In 2020, the number of male Senior Police Officers was 24,369, it rose to 32,708 in 2021 and declined to 22,060 in 2022. The number of female Senior Police Officers was 2,847 in 2020, it decreased to 2,813 in 2021 and 1,820 in 2022. In 2020, the number of male Inspectors was 78,091, it increased to 84,694 in 2021 and 92,137 in 2022. In contrast, there was a consistent decrease in the number of female inspectors in 2020, 2021 and 2022 with 14,330, 12,728 and 6,852 respectively.

Table 23: Total Number of Police Officers by sex, rank and year (2020 -2022)

Rank	2020		2021		2022	
	Male	Female	Male	Female	Male	Female
Senior Police Officers	24,369	2,847	32,708	2,813	22,060	1,820
Inspectors	78,091	14,330	84,694	12,728	92,137	6,852
Total	102,460	17,177	117,402	15,541	114,197	8,672

4.7.2 Nigeria Security and Civil Defence Corps

NSCDC has the mandate to maintain peace and order and to save civil society during the period of emergency such as war and terrorism. Aside from protecting lives and properties, they also ensure government properties are protected against vandalization.

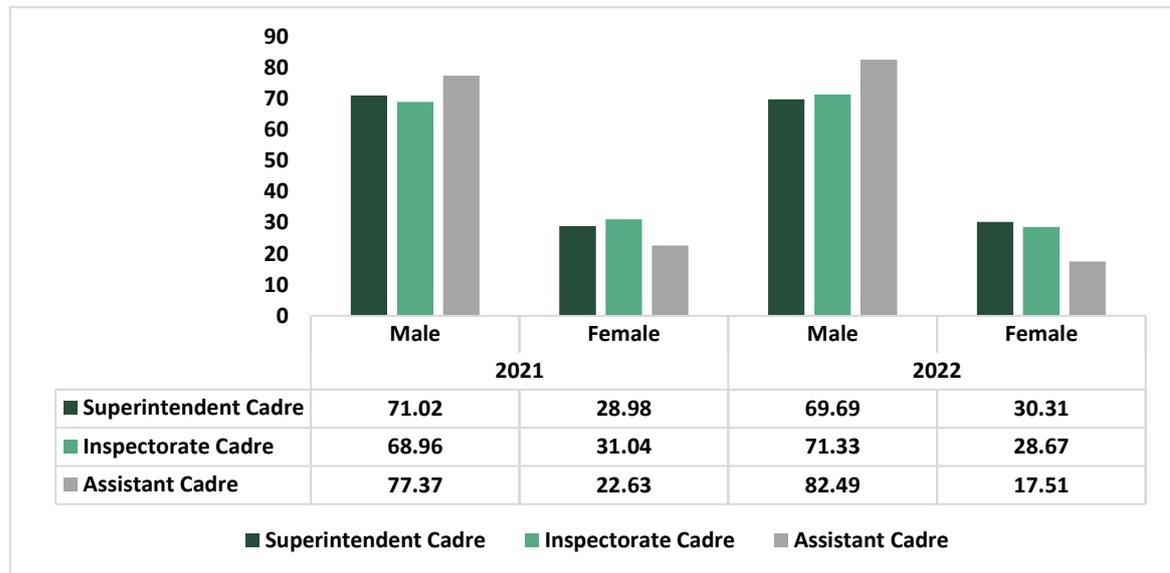

a. Nominal Roll Distribution by Sex and Year (2021-2022)

According to the NSCDC data, in 2021 the percentage of female Superintendent cadre was 28.98 per cent, it increased slightly to 30.31 per cent in 2022. The male Superintendent Cadre in 2021 was 71.02 but reduced to 69.69 per cent in 2022.

The percentage of female Inspectorate cadre was 31.04 per cent in 2021 but reduced to 28.67 per cent in 2022, while the male counterparts in 2021 and 2022 recorded 68.96 per cent, and 71.33 per cent respectively.

Similarly, men dominated the Assistant cadre position for the two years under review. In 2021, the female Assistant cadre represented 22.63 per cent, but it decreased to 17.51 per cent in 2022. In 2021 and 2022, male Assistant cadre recorded 77.37 and 82.49 per cent respectively (See figure 44).

Figure 44: Nominal Roll Distribution by Sex and Year

CHAPTER 5: POWER AND DECISION MAKING

Key Findings

- *Nigeria recorded the highest number of female Judiciary Officers (82) in 2022.*
- *Since independence, no woman has been appointed as the Secretary to the Government of the Federation.*
- *There were more male judges in the Federal Courts in 2020, 2021 and 2022 with 168, 184 and 191 compared to the female judges with 79, 92, and 92 respectively.*

5.1 Introduction

Historically, politics has been dominated by men, who have long exerted control over the political arena. This marginalization of women can be attributed to various barriers, including patriarchal norms, poverty, illiteracy as well as religious and cultural practices. However, the Universal Declaration of Human Rights enshrines every individual's right to participate in governance of their country. Ensuring women's freedom to vote and hold office has been a central focus of international, regional and national efforts towards more inclusive, and democratic governance. These rights and freedom apply not only to the political realm but to participation and leadership in public life, private sector and civil society at large. Establishing genuine democracy requires ensuring women have equal access to power, decision-making and leadership roles at all levels. Sustainable Development Goal (5) underscores the vital importance of women's full, effective involvement in political, economic, and public life, including equal opportunities to lead.

This chapter focuses on accessing the status and recent trends of women and men participation in position of power and decision making across the country, which covers politics and governance in the Executive, Legislative and Judiciary.

5.2 Politics and Governance

The domain of public governance serves as a clear reminder of the inequality between men and women. The noticeable disparities between men and women in political participation and decision-making hinders women access to political, social, and economic opportunities. The under-representation of women in decision-making bodies,

where crucial policy decisions are made and resources are allocated, often hinders women political, economic, and social prospects.

Despite the acknowledgment of the importance of women political empowerment within the Sustainable Development Goals framework, women continue to face obstacles in all aspects of politics and leadership positions.

5.2.1 Executives

a. Representation in the Executive Arm of the Government

Since Nigeria's independence, political power positions have been mostly dominated by men. Across the three arms of government- executive, legislative and judiciary, women have rarely held representative office or leadership roles. It has become normative practice for men to occupy the highest political positions at the federal level, including President, Vice President, Senate President, Secretary to the Government of the Federation, and Ministerial appointments. This gross under representation of women in influential decision-making has prevailed within Nigeria's democratic leadership since the beginning of its nationhood. While women constitute around 50 per cent of the electorate and having secured the right to vote and hold public office across most states of the federation, their representation as members of national parliament remains significantly low. The significance of woman's political empowerment has been acknowledged within the framework of the Sustainable Development Goals (SDGs). One of the indicators use to monitor Goal (5), which focuses on promoting gender equality and empowering women, is the proportion of seats held by women in the lower and upper houses of the national assembly.

Table 24 provides a clear picture of the current state of female representation in the positions of President and Vice President, indicating that all these roles are currently occupied by men.

Table 24: Distribution of Number Occupying Elective Positions as President and Vice President in the Executive Arm and Number of Available Seats (2020 – 2022)

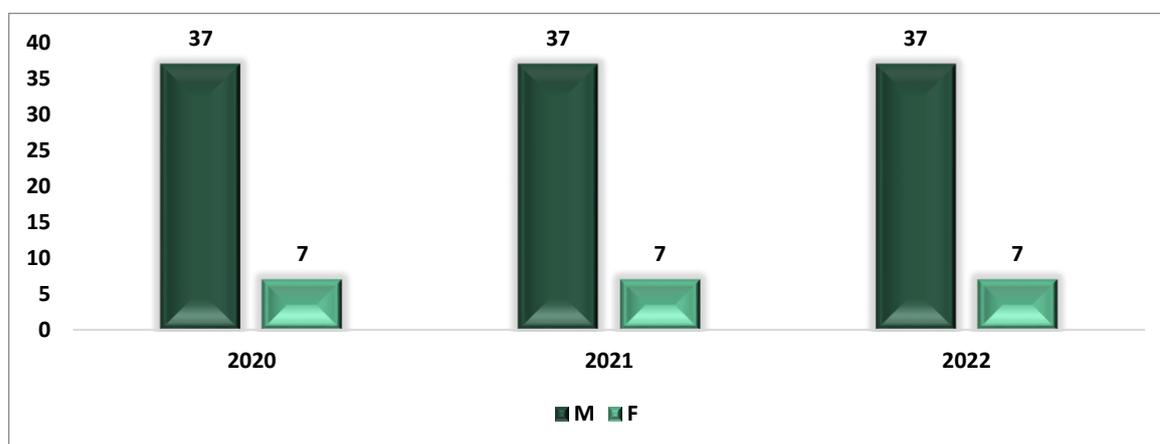

Position	2020				2021				2022			
	No. of Seat Available	% F										
President	1	0	1	0	1	0	1	0	1	0	1	0
Vice President	1	0	1	0	1	0	1	0	1	0	1	0

Source: Office of Secretary to the Government of Federation (OSGF)

b. Appointed Ministerial Political Position

Ministerial Appointee’s roles exist across all levels of governance, encompassing Federal, State, and Local governments. Nonetheless, this report will concentrate on ministerial appointees at the federal level, given the availability of data concerning these positions. Figure 45 illustrates the appointment of male and female ministers from 2020 to 2022. The number of female ministers has remained low throughout the period under review, compared to the male counterparts.

Figure 45: Appointed Ministerial Political Position by Sex (2020 – 2022)

Source: Office of Secretary to the Government of Federation (OSGF)

c. Secretary to the Government of the Federation

Since independence, women have not been appointed as the Secretary to the Government of the Federation. As clearly illustrated in the table 25, men have consistently held this position from 2020 to 2022.

Table 25: Distribution of Secretaries to the Government of the Federation from 2020 – 2022

5.2.2 Legislators

a. Representation at the National Parliament

In Nigeria, it is estimated that women make up nearly half of the total population. The representation of women in the National Parliament is measured by the proportion of seats held by both men and women in the lower and upper houses of the National Assembly. With the emergence of the current democratic dispensation in 1999 until the most recent election, there has been a notable lack of representation for women in the National Parliament.

The number of female legislators in 2015-2019 and 2019-2022 has been consistently low compared to male in the National Parliament. The number of female senators in both 2015-2019 and 2019-2020 was 7. This accounts for approximately 3.9 per cent of the total number of senators, of which 96.05 per cent were male. Similarly, in the House of Representatives, there has been a consistent decrease in the number of female representatives, declining from 23 in 2015 to 12 in 2019 (See table 26).

Table 26: Representation in the National Parliament by Year and Sex

Legislator	2015-2019		2019-2022	
	Number	%	Number	%
SENATE				
Male	102	93.58	98	93.33
Female	7	6.42	7	6.67

Source: National Assembly, Abuja

b. Principal Positions at the National Assembly by Sex

In the Senate, Principal offices were dominated by male, as there was no female senator holding any principal position in 2019.

Table 27: Number Occupying Principal Positions at the National Assembly by Type of Office, Sex and Year (Senate)

Type of Office	2019

5.2.3 Judiciary

a Representative of National Judicial Officers

In Nigeria, the number of females in National Judicial Officers shows a consistent increase across the years. In 2020, the number of female judicial officers was 64, which increased in 2021 and 2022 to 66 and 92 respectively. The number of male judicial officers also increased significantly in 2020, 2021 and 2022 with 114, 137 and 142 respectively.

b. The Total Number of Judges in Federal Courts by Sex and Year

Nationally, figure 46 illustrates the number of Judges in Federal Courts from 2020 to 2022. The number of female Judges in 2020 was 79, which increased in both 2021 and 2022 to 92. Meanwhile, there was a persistent increase in the number of male Judges in 2020, 2021 and 2022 with 168, 184 and 191 respectively.

Figure 46: Total Number of Judges in Federal Courts by Sex and Year

Source: National Judicial Council

c. Number of Judges in the Federal Courts

Table 30 shows the number of Judges in the Federal Courts of Nigeria. The Court of Appeal recorded the highest number of male Judges with 57 in 2020, 63 in 2021 and 59 in 2022, while female judges were 23 all through. This was followed by the Federal High Court with 54 male in 2020, which declined to 49 in 2021 and increased to 53 in 2022, while in 2020 and 2021 female judges was 25 each and increased to 26 in 2022. FCT Customary Court of Appeal recorded the least number of male Judges in the Federal Courts with 3 in 2020 and 2021, it increased in 2022 to 6, while FCT sharia Court of Appeal had no female judges in the period under review.

Table 30: Number of Judges in the Federal Courts by Type, Sex and Year

5.3 Political Positions at Local Government

Local governments are critical units of administration and political leadership closest to the citizens. Assessing women's participation in local governance is an indicator of gender empowerment and equality.

5.3.1 Number Occupying Political Positions at Local Government, by State and Type of Office

The number of Nigerians occupying political positions across local governments shows a consistent and significant under-representation of women relative to men. Table 31 illustrates the number of males and females occupying key political offices at Local Government level from 2020 to 2022. In 2020, 2021 and 2022, females occupied 1,198, 1,212 and 1,177 positions respectively. Meanwhile, in the same reference years, males occupied 9,569, 10,055 and 9,313 positions respectively. This indicates that men consistently maintain over 85 per cent of all seats.

Table 31: Number of Occupants of Political Positions at Local Government by State and Type of Office

Year	Chairman		Deputy Chairpersons		Secretaries		Leaders of Legislative Arm		Deputy Leaders		Majority Leaders		Member (Councilors)		Total

Key Findings

- *In 2020, 2021 and 2022, the percentage of females admitted into the Nigerian Correctional Centre stood at 4.90 per cent, 4.48 per cent, and 4.82 per cent respectively.*
- *The percentage of females trafficked for forced labour was 64.87 per cent in 2020, 59.93 per cent in 2021 and 59.14 per cent in 2022.*
- *The percentage of women aged 15 - 49 who have experienced physical violence since age 15 increased from 27.80 per cent in 2013 to 31.00 per cent in 2018.*
- *In 2021, 8.20 per cent of females aged 0 - 14 had been circumcised in Nigeria.*
- *Among women aged 15-49, the percentage that ever-experienced sexual violence irrespective of the person that committed the act was 7.40 per cent in 2013 and increased to 9.10 per cent in 2018.*
- *Female suspects arrested for drug-related offenses were 7.62 per cent in 2021.*
- *From 2020 -2022, the percentage of females aged 26 – 35 trafficked was 87.86 per cent, 91.08 per cent and 71.09 per cent respectively.*
- *In 2019, all victims trafficked for prostitution were females (100 per cent), however, it was 97.82 per cent, 99.72 per cent and 99.55 per cent in 2020, 2021 and 2022 respectively.*

6.1 Introduction

statistics reveal that the lifetime prevalence of physical violence experienced by women aged 15-49 has increased in Nigeria from 27.80 per cent in 2013 to 31.00 per cent in 2018. Globally, violence and crime are complex issues that occur in every society. Violence generally refers to the use of physical force or power to threaten against oneself, another person, or community that has a high possibility of resulting in injury, psychological harm, deprivation, or death.

In Nigeria, violence and crime rates vary significantly across the regions. This can occur in different forms such as assault, robbery, murder, domestic violence, or even acts of terrorism that can be committed by individuals, groups, or by states.

Violence and crime data can be studied and analyzed to provide insights into various aspects of crime in society, including its prevalence, frequency, patterns, and demographics. This data will help researchers, policymakers, and law enforcement

agencies to better understand the nature and extent of violence and crime in a given area or population.

According to the Beijing Platform for Action, all governments and the United Nations must support research, gather information, and produce statistics on the incidence of all types of violence against women (particularly domestic abuse). The program also encourages stakeholders to promote study into the origins, character, gravity, and effects of violence against women, as well as the efficacy of measures taken to stop and address them. Goal (16) of the Sustainable Development Goals (SDGs) urges the development of peaceful, inclusive communities that provides access to justice for all people and advocates for peaceful, inclusive communities, which guarantee access to justice for all people and create inclusive institutions at all levels.

6.2 Prevalence and Increase of Violence against Women and Children

6.2.1 Physical Violence against Women

Physical violence against women is a serious issue that affects countless individuals around the world. It refers to any act of physical abuse, harm, or injury inflicted on women, usually by a spouse or someone known to them. This aggression can be expressed in several ways, including striking, slapping, punching, kicking, choking, or the use of weapons. Several factors contribute to physical violence against women, including deeply rooted gender inequality, cultural norms, social norms that condone and normalize violence, and lack of effective laws and policies to protect women. It is crucial to address this issue to ensure the safety and well-being of women.

Efforts to combat physical violence against women include implementing laws and policies that criminalize such acts, providing support services for survivors, raising awareness about the issue through education and campaigns, engaging men and boys in challenging harmful gender norms, and promoting gender equality.

Nationally, statistics reveal that the lifetime prevalence of physical violence experienced by women aged 15-49 has increased in Nigeria from 27.8 per cent in 2013 to 31.00 per cent in 2018. In 2013, Edo state registered the highest percentage of women aged 15-49 who have faced physical violence since age 15 (75.40 per cent), followed by Benue state with 72.10 per cent, while Kano state had the lowest rate with 1.10 per cent. By 2018, Taraba state had the highest prevalence with 67.60 per cent, followed by Edo state with 64.70 per cent, while the lowest state was Jigawa with 4.40 per cent. Among women reporting physical violence, violence “often or sometimes” accounted for 11.20 per cent

and 13.70 per cent in 2013 and 2018 respectively. The second highest proportion of women reported violence “sometimes” only, represented 9.50 per cent in 2013 and 11.70 per cent in 2018. Those whose violence occurred “often” accounted for 1.60 per cent in 2013 and 2.00 per cent in 2018 (See ST. 85).

a. Percentage of Persons Committing Physical Violence

Among ever married women who reported being involved in physical violence in 2013, 60.60 per cent suffered it from their ‘Current Husband/Partner’. This decreased to 58.00 per cent in 2018. Another category of persons that committed physical violence against ever married women was ‘Mother/Stepmother’ with 25.70 per cent in 2013 and 19.40 per cent in 2018, while ‘Father-in-law’, ‘Police/Soldier’ and ‘Current Boyfriend’ were the least perpetrators of physical violence against ever married women in the period under review. Current boyfriend recorded 0.20 per cent each in 2013 and 2018, while police/soldiers recorded 0.10 per cent each for the same period. Father-in-law was responsible for 0.10 per cent in 2013 but did not commit physical violence against ever married women in 2018.

Never married women who suffered from physical violence from their mother/stepmother was reported as 42.50 per cent in 2013 but decreased to 35.40 per cent in 2018. This was followed by ‘Sister/Brother with 31.70 per cent in 2013 and 22.50 per cent in 2018, while ‘Teacher’ recorded 29.50 per cent in 2013 and 17.1 per cent in 2018. Of all categories of persons that committed physical violence against never married women, ‘Police/Soldier’ contributed the least in the period under review with 0.20 per cent in 2013 and 0.00 per cent in 2018 (See table 32).

Table 32: Percentage of Persons Committing Physical Violence

b. Prevalence of Sexual Violence

Table 33 shows that the percentage of women aged 15-49 who experienced sexual violence, regardless of the perpetrator was 7.40 per cent in 2013 and increased to 9.10 per cent in 2018. In 2013, Adamawa state had the highest percentage with 38.40 per cent, followed by Taraba state with 28.10 per cent. Conversely, Kwara and Katsina states had the lowest percentage with 0.60 per cent each, followed by Kano state with 0.70 per cent. In 2018, Gombe state took the lead with 44.90 per cent, while Kebbi state had the lowest percentage with 0.40 per cent, followed by Sokoto state with 1.00 per cent.

Furthermore, the number of women who experienced sexual violence within the 12 months prior to the survey increased from 3.30 per cent in 2013 to 4.10 per cent in 2018. In 2013, Adamawa state had the highest with 24.10 per cent, while Zamfara had the lowest with 0.10 per cent. In 2018, Gombe state had the highest with 22.00 per cent, and Ogun state reported no incidents of sexual violence.

Table 33: Prevalence of Sexual Violence

STATE	2013		2018	
	Percentage Who Has Experienced Sexual Violence		Percentage Who Has Experienced Sexual Violence

c. Persons Committing Sexual Violence

Table 34 shows a higher percentage of sexual violence against women aged 15-49 who were 'ever married' was committed by their 'Current Husband/Partner'. This percentage increased from 57.90 per cent in 2013 to 64.80 per cent in 2018. The second highest was attributed to their 'Former Husband/Partner', which decreased from 21.60 per cent in 2013 to 18.40 per cent in 2018. Interestingly, even 'Never Married' women experienced sexual violence. Most of this violence was perpetrated by Strangers, accounting for 29.20 per cent in 2013 and 27.60 per cent in 2018. The next highest case was attributed to 'Current/Former Boyfriend' with 22.90 per cent in 2013 and 26.70 per cent in 2018. On the other hand, the involvement of the Police/Soldier and Others as perpetrators of sexual violence against women was relatively low in the period under review.

Table 34: Persons Committing Sexual Violence

Persons	Marital Status

d. Experience of Different Forms of Violence

In Nigeria, the prevalence of physical or sexual violence against women aged 15-49 increased from 29.60 per cent in 2013 to 33.40 per cent in 2018. Specifically, in 2013, 22.20 per cent of women experienced physical violence only, while in 2018, it was 24.20 per cent. Approximately 2.00 per cent of women experienced sexual violence only in 2013 and 2018. The percentage of women experiencing both physical and sexual violence rose from 5.60 per cent in 2013 to 6.70 per cent in 2018. In terms of age groups, the highest prevalence of physical or sexual violence was among women aged 30-39 in 2013 (31.50 per cent), which increased to 34.40 per cent in 2018. The percentage of women aged 30-39 experiencing physical violence only remained relatively stable at 23.80 per cent in 2013 and 23.90 per cent in 2018 (See table 35).

Table 35: Experience of different forms of violence

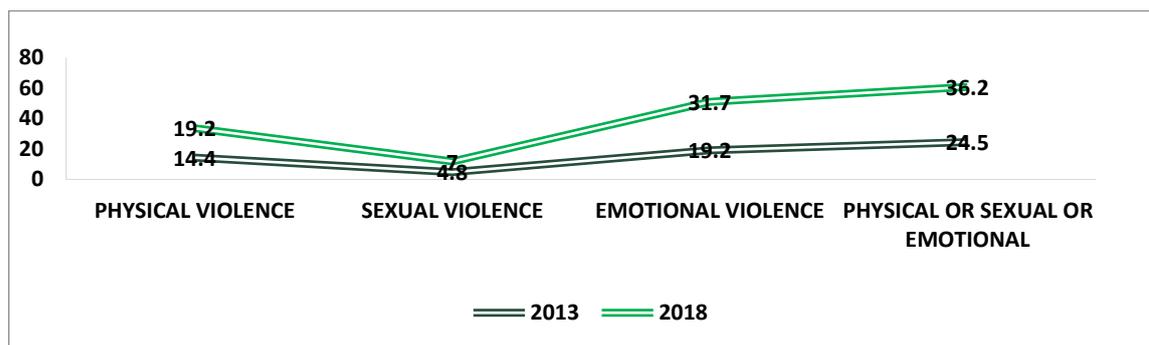

AGE	Physical Violence Only		Sexual Violence Only		Physical and Sexual Violence		Physical or Sexual Violence

e. Women's Experience of Spousal Violence

Figure 47 illustrates that there was an increase in all types of violence against women in 2018 compared to 2013. Specifically, the prevalence of spousal physical, sexual, or emotional violence rose from 24.50 per cent in 2013 to 36.20 per cent in 2018.

Figure 47: Women’s Experience of Spousal Violence

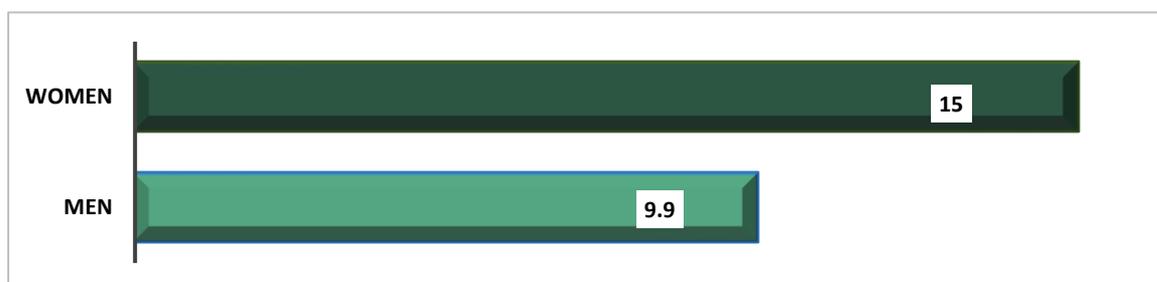

Source: NDHS 2013 and 2018

6.2.2 Women and Men Who Believed a Husband is Justified in Beating His Wife if She Neglects the Children

Domestic violence transcends socioeconomic backgrounds and educational levels, manifesting as a recurring pattern of behavior within intimate relationships aimed at asserting power and control. Its impact knows no boundaries of age, race, gender, religion, or social class. Figure 48 illustrates the prevailing attitudes of women and men in Nigeria regarding domestic violence and wife beating.

In some parts of Nigeria, there exists a belief that a husband is justified in resorting to violence if his wife engages in certain actions, such as going out without informing him, neglecting the children, engaging in arguments, refusing sexual intimacy, or mishandling food preparation. According to the 2021 MICS report, 9.9 per cent of men nationwide held the belief that a husband is justified in beating his wife if she neglects the children, while a similar perspective was shared by 15 per cent of women (See figure 48).

Figure 48: Percentage of women and men who believed a husband is justified in beating his wife if she neglects the children

Source: Multiple Indicator Cluster Survey (MICS), 2021

Across various states, Sokoto state had the highest percentage of women who believed that a husband is justified in beating his wife if she neglects the children with 36.80 per

cent and Anambra state had the least for both women and men with 2.10 per cent and 0.30 per cent respectively. Meanwhile, Kebbi state recorded the highest percentage of men who believed so with 31.90 per cent.

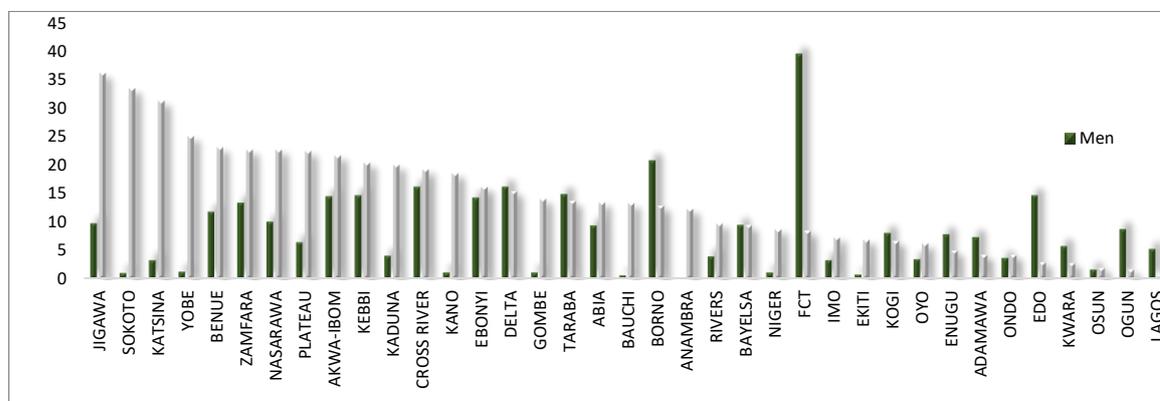

6.2.3 Women and Men Who Believed a Husband is Justified in Beating His Wife If She Goes out without Telling Him

These statistics suggest a significant variation in opinions on the justification of domestic violence, both across genders and different states in Nigeria. Figure 49 indicates that in some states, a relatively high percentage of both men and women believe that physical violence is justified in certain situations, such as argument.

It's important to note that these statistics reveal attitudes and beliefs, and they do not necessarily reflect actual incidences of domestic violence. Addressing such beliefs is crucial for promoting a culture of respect, equality, and non-violence within relationships.

However, 13.80 per cent of women believed that a husband is justified in beating his wife, if she goes out without telling him, while 7.30 per cent of men had the same opinion nationwide. Also, across the state, Jigawa state recorded the highest percentage of women who believed in a husband's justification for beating his wife if she goes out without telling him with 36.10 per cent. Conversely, Lagos state had the lowest response with 0.6 per cent. Meanwhile, FCT had the highest proportion of men (39.40 per cent) who believed in a husband's right to use violence in such circumstances, whereas Anambra state reported the lowest percentage with 0.1 per cent.

Figure 49: Percentage of women and men who believed a husband is justified in Beating his wife if She goes out without telling him

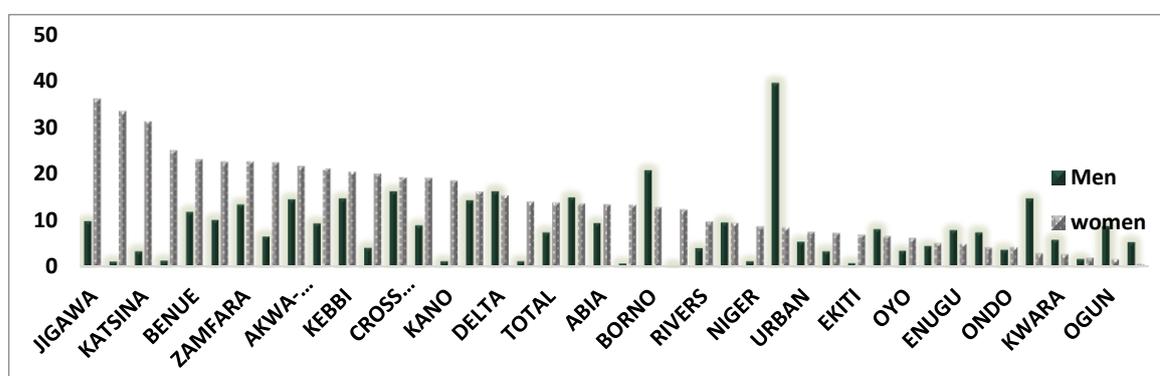

Source: Multiple Indicator Cluster Survey (MICS) 2021

6.2.4 Women and Men Who Believed a Husband is Justified in Beating His Wife If She Burns the Food

Figure 50 shows the Nigerian women and men who believe that burning a meal justifies spousal abuse. In 2021 nationwide survey, 8.10 per cent of both female and male respondents agreed domestic violence was acceptable under such circumstance.

For women, acceptance of such violence was highest in Jigawa state where 25.50 per cent considered beating permissible if food was burnt. Meanwhile, Lagos state registered the lowest rate with 1.00 per cent. Among Nigerian men, 39.70 per cent in Kebbi state condoned abuse in response to burnt meals compared to 0.00 per cent in Anambra state.

Figure 50: Percentage of women and men who believed a husband is justified in beating his wife if she burns the Food

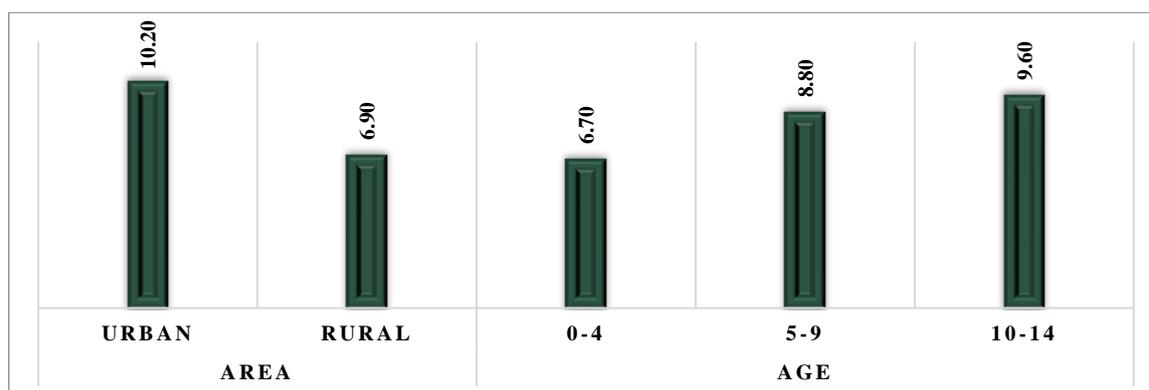

Source: Multiple Indicator Cluster Survey (MICS) 2021

6.3 Female Genital Mutilation (FGM) Among Girls

Female genital mutilation (FGM) is a cultural practice involving the ritual cutting or removal of some or all of a girl's external genitalia. This practice is typically performed on girls before age 15. FGM has no health benefits and can cause both immediate and long-term medical complications. As such, FGM constitutes a violation of female human rights, conflicting with Sustainable Development Goal (5.3) which calls for the elimination of harmful practices against women and girls.

According to the 2021 MICS/NICS data, 8.20 percent of girls between the ages of 0 and 14 have undergone circumcision. Among girls within the age group, circumcision was highest in the age group 10-14 with 9.60 percent, while 0 to 4 had the lowest circumcision with 6.70 percent. Moreover, the data reveals sectoral disparities, as approximately one in every ten girls (10.20 per cent) in urban areas have been subjected to FGM, compared to 6.9 percent in rural areas (See figure 51).

Figure 51: Percentage of Daughters Who Had Any Form of FGM by Age Group (0 - 14 Years)

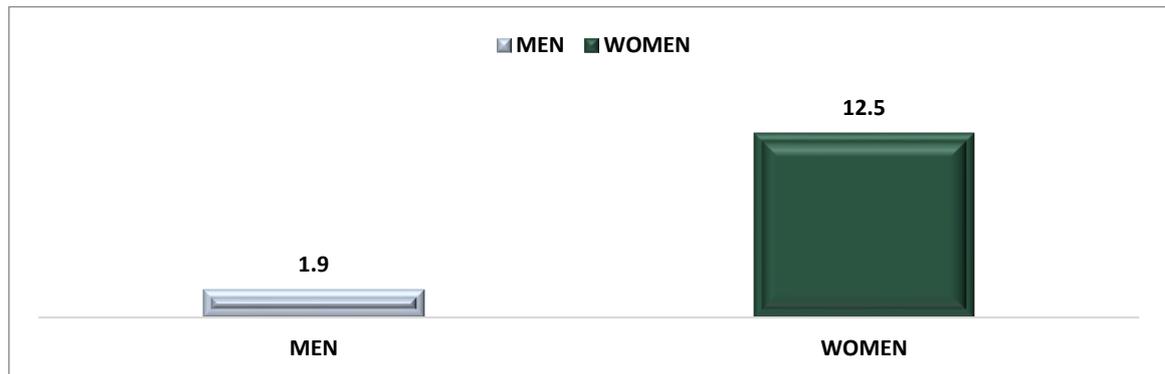

Source: MICS, 2021

6.4 Child Marriage

Ending child marriage is crucial to lifting households, communities, and even entire nations out of poverty in a sustainable way over time. Marriage before age 18 constitutes a human rights violation yet remains a reality for many children globally. The Universal Declaration of Human Rights upholds the right to freely and fully consent to marriage, noting that such consent cannot be deemed valid if one party lacks the maturity to make an informed decision about a life partner. Furthermore, within the UN's Sustainable Development Goals, child marriage is identified as a harmful practice which is targeted for elimination worldwide by 2030. Given the extensive negative impacts on health, education, economic opportunities, and overall welfare, especially for young brides, the international community agrees child marriage must be stopped in order to protect children from deprivation of their fundamental rights. It perpetuates inter-generational cycles of poverty and gender inequality. Ending the practice is crucial for achieving many Sustainable Development Goals.

Statistics also show that women who married before 18 tend to have more children and reduced access to maternal healthcare versus those marrying later. Moreover, pregnancy complications are a leading cause of mortality for married and unmarried adolescent girls aged 15-19. Ultimately, child marriage brings broad harm which disproportionately impact young brides to the detriment of their health, rights, and wellbeing. Figure 52 shows the percentage of women and men aged 15-49 who first married or entered a marital union before their 15th birthday. It further shows that 12.5 per cent of women aged 15 – 49 married or entered a marital union before their 15th birthday, while men stood at 1.9 per cent.

Figure 52: Percentage of Women and Men aged 15 - 49 who first Married or entered a Marital Union before their 15th Birthday

Source: MICS, 2021

6.5 Crime

Crime refers to the act of breaking rules or laws that are not permitted by society. This transgression is typically committed by an individual or a collective group. The motivations behind such unlawful acts can vary, including personal gain, pleasure, seeking retribution, or causing harm to others. Crimes can manifest in both aggressive actions, such as homicide, robbery, and assault, as well as nonviolent offenses, such as fraud, theft, and vandalism.

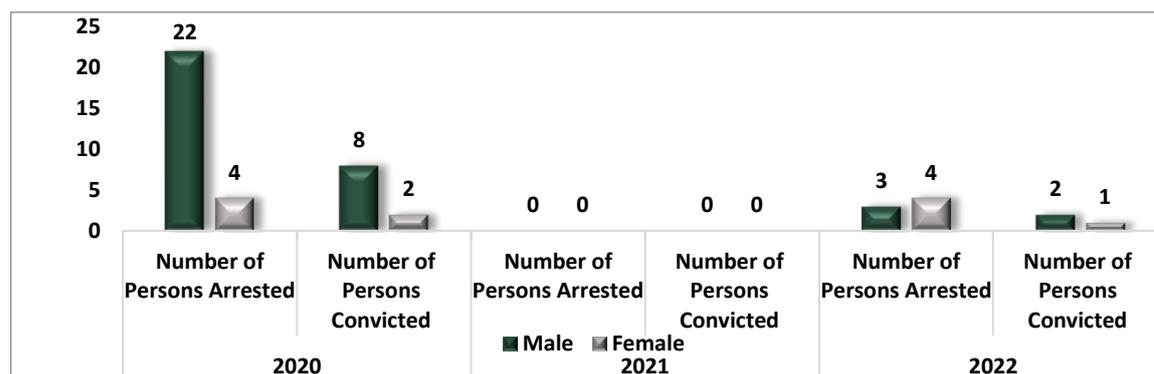

6.5.1 Bank Fraud in Nigeria by Category and Year (2020-2022)

Bank fraud constitutes a prevalent financial crime involving numerous illicit tactics to illegally obtain money or valuables from banks and their customers. Ranging from identity theft to fraudulent transfers and unauthorized withdrawals, bank fraud schemes weaponized deception and impersonation to exploit victims and institutions. Whether enacted by organized cybercriminal groups or opportunistic individuals, many bank fraud methods rely on impersonating legitimate banks or staff to facilitate theft and money laundering.

The scale and complexity of bank fraud has grown considerably with the digitization of banking and finance. As banks expand online and mobile services, so too do vulnerabilities open to exploitation. Techniques like sending emails or SMS messages trick countless people into surrendering account details and passwords. Meanwhile, technical weaknesses allow criminals to infiltrate systems and steal or reroute funds undetected. Both individuals and banks suffer immense losses, undermining consumer trust in financial systems.

From figure 53, there has been a decline in the crime of bank fraud in the period under review. In 2020, the number of persons arrested was 22 males and 4 females, whereas the number of persons convicted was 8 males and 2 females. This decreased in 2021 as there was no person either arrested nor convicted, while in 2022 there was an increase in the number of persons arrested with 3 males and 4 females and the number of persons convicted was 2 males and 1 female.

Figure 53: Number of persons involved in Bank Fraud in Nigeria

Source: National Police Force Hqtrs

6.5.2 Cases of Missing Persons in Nigeria

Nationally, the total number of missing persons was 179 males and 100 females in 2020. The number increased to 253 males and 174 females in 2021 but reduced to 169 males and 37 females in 2022 as seen in table 36.

Table 36: Cases of Missing Persons in Nigeria by Sex and Year

Cases	2020		2021		2022	
	Male	Female	Male	Female	Male	Female
No. of Persons Missing	179	100	253	174	169	37

6.5.3 Suspects Arrested for Drug-Related Offences

From figure 54, of all the suspects arrested for drug related offenses in Nigeria from 2020 to 2022, the percentage of male suspects (above 90 per cent) was far higher than the

females, while the percentage of female suspects arrested ranges between 7.35 to 7.62 per cent.

Figure 54: Percentage distribution of suspects arrested for drug-related offences by Sex and Year

Source: NDLEA

6.5.4 Trafficking in Person

Human trafficking is a serious crime and human rights violation both locally and globally. It involves the recruitment, transportation, harboring, or receipt of people through force, coercion, or deception for the purpose of exploitation. This can include forced labour, sexual exploitation, and other forms of abuse. It is considered a serious form of modern-day slavery. There are numerous ways in which victims of human trafficking can be exploited, such as forced labour, sexual exploitation, forced marriage, child soldiers, and organ trafficking. Traffickers frequently prey on vulnerable groups, including immigrants, refugees, and people who are poor.

Governments, international organizations, and NGOs collaborate to raise awareness, pass and enforce legislation, offer victim support services, and prosecute traffickers in order to combat human trafficking. Efforts also focus on addressing the root causes of trafficking, such as poverty, security, lack of education, and gender inequality.

6.5.5 Number of Trafficked Person by Age Group, Sex and Year

According to the National Agency for Prohibition of Trafficking in Persons (NAPTIP) data, women are more frequently trafficked than the men as shown in table 37. Nationally, the number of females that were trafficked moved from 865 in 2020 to 1,227 in 2021 and 2,229 in 2022. Moreover, females within the age categories of 6 – 15 years, 16 – 25 years,

and 26 - 35 years were most trafficked in 2020 and 2022 with (75.55 per cent, 85.43 per cent, & 87.86 per cent) and (74.63 per cent, 83.57 per cent, & 71.09 per cent) respectively. Whereas, in 2021, females within the age categories of 16-25 years, 26-35 years, and 36 years & above were mostly trafficked with 91.82 per cent, 91.08 per cent, & 82.76 per cent respectively.

Table 37: Number of trafficked persons by age group and year

Age Group	2020			2021			2022		
	Female	Male	%F	Female	Male	%F	Female	Male	%F
0-5	27	35	43.55	54	37	59.34	58	50	53.70

6.5.6 Identified Victims of Trafficking for Forced Labour by Age Group and Year

Table 38 shows that in 2020, 2021 and 2022, female victims were more frequently trafficked for forced labour with 64.87 per cent, 59.93 per cent and 59.14 per cent respectively.

Furthermore, in the age group of 1-17 years, female recorded higher number of victims trafficked for forced labour, 65.41 per cent in 2020, 64.15 per cent in 2021 and 65.97 per cent in 2022. Also, within the age bracket of 18-27 years, female victims trafficked for forced labour stood at 64.29 per cent, 58.14 per cent and 62.03 per cent respectively. However, in age group 28 years & above, males recorded higher number of victims trafficked for forced labour with 59.26 per cent in 2021 and 54.94 per cent in 2022.

Table 38: Identified Victims of Trafficking for Forced Labour by Age Group, Sex and Year

AGE GROUP	2020				2021				2022			
	F	M	%M	%F	F	M	%M	%F	F	M	%M	%F

6.5.7 Identified Trafficking for Prostitution

Table 39 shows that females are the predominant victims of human trafficking for prostitution. In 2020, the number of females trafficked for prostitution was 97.82 per cent, it increased in 2021 and 2022 to 99.72 per cent and 99.55 per cent respectively. Furthermore, females in the age group 18-27 years were mostly victims of trafficking for prostitution with 58.35 per cent in 2020, 61.71 per cent in 2021 and 65.90 per cent in 2022.

Table 39: Identified Victims of Trafficking for Prostitution by Sex and Year

Age Group	2020			2021			2022

6.5.8 Distribution of Rape Incidences by State

Figure 55 indicates the percentage distribution of rape incidences across the state from 2020 to 2022. Nationally, the percentage of females who experience rape incidences increased on a yearly basis. In 2020, 29.00 per cent of females were victims of rape,

which increased significantly in 2021 and 2022 to 48.00 per cent and 65.00 per cent respectively. This indicates that women and the girl-child are most likely to be raped compared to their male counterparts. Meanwhile, across the states, FCT had the highest in 2020 with 10.00 per cent, Benue state recorded the highest incidence of rape for females in both 2021 and 2022 with 15.00 per cent and 12.00 per cent respectively.

Figure 55: Percentage Distribution of Rape Incidences by Sex and Year

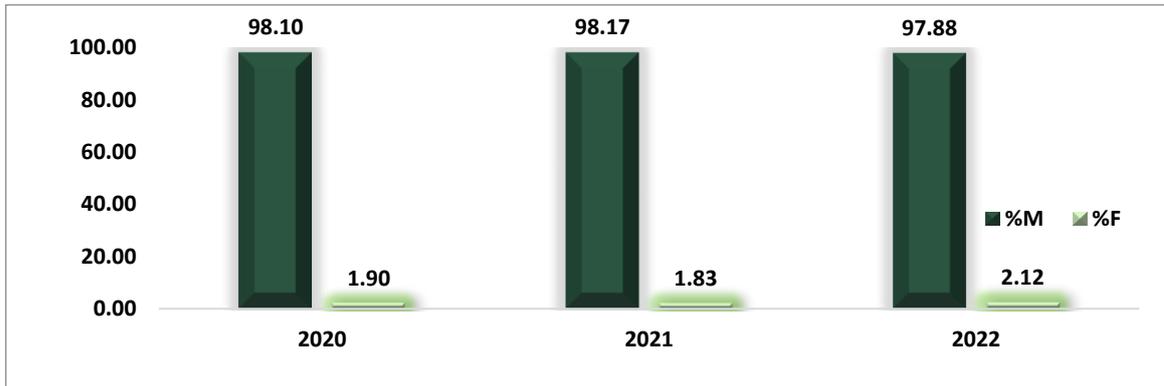

Source: National Agency for the Prohibition of Trafficking in Persons (NAPTIP)

6.5.9 Prison Inmates

Figure 56 shows the percentage distribution of prison inmates in the Nigerian Correctional Service. Nationally, there were more males than females in the Nigerian Correctional Service from 2020 to 2022. The percentage of male inmates in 2020 and 2021 stood at 98.10 per cent and 98.17 per cent respectively, which declined to 97.88 per cent in 2022. On the other hand, the percentage of female inmates in 2020, 2021 and 2022 were significantly low at 1.90 per cent, 1.83 per cent and 2.12 per cent respectively.

Disaggregated by states, Lagos state recorded the highest number of inmates for both male and female. Male inmates were 7,448, 7,594, and 8,088 in 2020, 2021 and 2022, while female inmates were 198, 183, and 237 respectively. Kogi state and Jigawa state had 1 as the least female inmates in 2020, Jigawa state recorded 2 as the lowest in 2021 and Kogi state had the least in 2022 with 5 (See ST. 88 in the Appendix).

Figure 56. Number of Inmates by Sex and Year

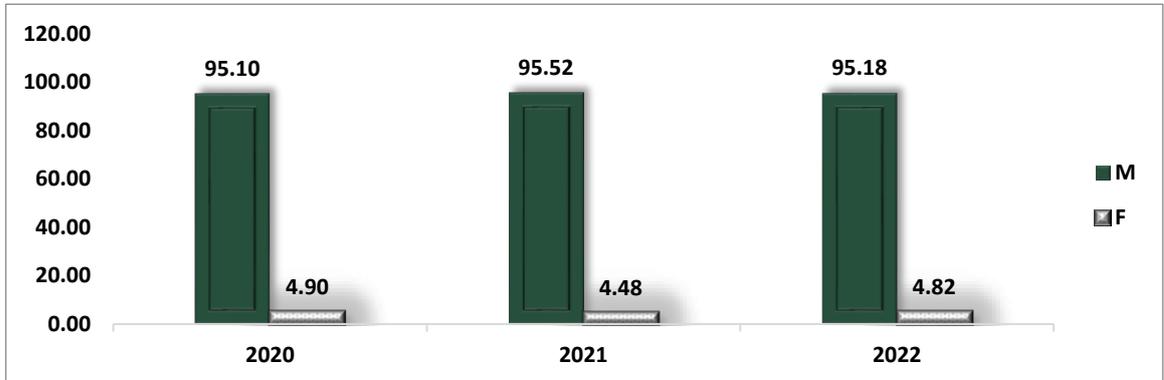

Source: Nigeria Correctional Service

6.5.10 Prison Admission

According to the Nigeria Correctional Service data, the percentage of female admitted into prison were 4.90 per cent, 4.48 per cent, and 4.82 per cent in 2020, 2021, and 2022 respectively. In 2020, 2021, and 2022, male inmates accounted for 95.10 per cent, 95.52 per cent, and 95.18 per cent respectively.

Figure 57: Summary of prison admission by types of offence, sex, and year

Source: Nigeria Correctional Service

Stealing was the most prevalent offence committed by both men and women, as shown in table 40. The number of men convicted in 2020 was 40,555, which declined in 2021 to 31,921 and increased to 44,477 in 2022. Similarly, the number of women admitted to prison for stealing in 2020 was 1,981, which decreased in both 2021 and 2022 to 1,320 and 1,272 respectively.

6.5.11 Percentage Distribution of Custodial Centre Admissions by Age Group

Figure 58 shows that nationally about 5 per cent of every person in the Custodial Centre in 2020, 2021 and 2022 were females (5.08 per cent in 2020, 4.48 per cent in 2021 and 4.67 per cent in 2022). Across the age groups, males within the age group 21 - 25 years recorded the highest number in the Custodial Centre in 2020 and 2021 with 26,844 and 20,203 but recorded its highest in 2022 with 18,800 within the age categories of 26 – 30 years. Females had the highest in 2020 and 2022 within the age categories 26 - 30 years with 1,498 and 951 respectively, while in 2021, it recorded its highest within the age categories 21–25 years with 951 (ST. 89 in the Appendix).

Figure 58: Percentage Distribution of Custodial Centre Admissions by Sex and Year

Source: Nigeria Correctional Service

6.5.12 Distribution of Custodial Centre Admissions by Religion (Nigerian)

According to the Nigerian Correctional Centre data, the number of males in the Custodial Centre in 2020 was 63,771, this declined in 2021 to 57,016 and increased in 2022 to 59,324. Also, under the categories of females, the number of females under the custodial centre in 2020 was 3,282, this decreased in 2021 and 2022 to 2,776 and 2,994 respectively. This was followed by the Christians in the Custodial Centre. The number of males in 2020 was 49,237, which also decreased to 36,531 in 2021, and 33,611 in 2022, while the number of Christian females in the Custodial Centre in 2020, 2021 and 2022 were 2,568, 1,704, and 1,637 respectively. The Atheist had the least Custodial Centre admission in the period under review.

Table 41: Distribution of Custodial Centre Admissions by Religion (Nigerian)

CHAPTER 7: EXPOSURE TO MASS MEDIA

Key Findings

- *Nationally, the percentage of women and men that read a newspaper at least once a week was 7.40 and 17.20 per cent respectively (2021 MICS).*
- *Females who listened to the radio at least once a week were 34.40 per cent compared to 50.80 per cent males (2021 MICS).*
- *Almost half (48.90 per cent) of males and 42.70 per cent of females watched television at least once a week nationwide (2021 MICS).*
- *Females accounted for 13.40 per cent of those that ever used a computer, while males stood at 21.80 per cent (2021 MICS).*
- *Also, 2021 MICS report indicates that 78.60 per cent of females and 88.40 per cent of males used a mobile phone during the last three months.*
- *According to 2021 MICS, the percentage of males who ever used the internet was 41.60 per cent, while it was 24.00 per cent for females.*

7.1 Introduction

Information dissemination is of immense importance from the media's position. In addition to reading printed materials, more individuals are turning to television and radio for information. In 2021 MICS 6 polls, respondents were asked questions such as "how often they generally read newspapers or magazine, listen to the radio, or watch television in a week". The media channels that can be used to reach target audiences can be selected using this information. It's also critical to comprehend the potential of using the media to reach individuals.

Goal (16) of the Sustainable Development Goals (SDGs), which aims to create inclusive, peaceful societies with universal access to justice and effective, accountable, and inclusive institutions at all levels, will be aided by increased access to better and more effective media.

7.2 Exposure to Mass Media

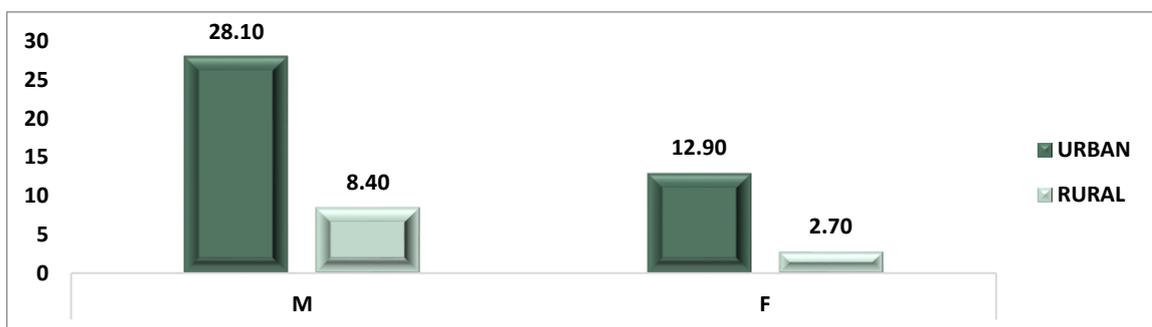

7.2.1 Percentage Who Read a Newspaper at Least Once a Week

According to the 2021 Multiple Indicator Cluster Survey data, a minimum of 7.40 per cent of women and 17.20 per cent of men were reported to have read a newspaper at least

once a week. The survey also reveals that men in the age group (40-44) and women in the age group (30-34) had the highest percentage of people who read a newspaper at least once a week with 25.40 per cent and 9.00 per cent respectively.

Additionally, people who read newspapers in urban areas were more than in the rural areas. The percentage of females who read a newspaper at least once a week in urban area was 12.90 per cent and 2.70 per cent in the rural area, whereas for males, it was 28.10 per cent in urban area and 8.40 per cent in rural area as shown in figure 59.

Figure 59: Percentage of those who read a newspaper at least once a week by residence

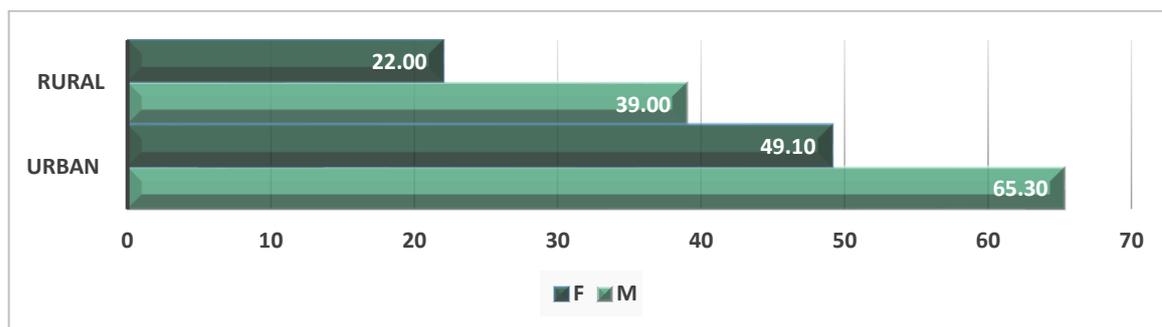

Source: MICS/NICS, 2021

Lagos state had the highest percentage with 53.70 per cent of men and 27.50 per cent of women that read a newspaper at least once a week, while Yobe had the least with 1.30 per cent of men and 0.40 per cent of women.

7.2.2 Percentage of those Who Listen to Radio at Least Once a Week

According to the 2021 MICS data, 34.40 per cent of women and 50.80 per cent of men listened to the radio at least once a week. Also, it was reported that in the rural areas, 22.00 per cent of women and 39.00 per cent of men listened to radio at least once a week, while 49.10 per cent of women and 65.30 per cent of men listened to radio at least once a week in the urban areas (See figure 60).

Figure 60: Percentage of those Who Listen to Radio at Least Once a Week by Residence

7.2.3 Percentage of Men and Women Who Watch Television at least Once a Week

The 2021 MICS results show that 48.90 percent of men and 42.70 per cent of women watched television at least once a week nationally. It also highlights the gender disparity in television watching habits in both urban and rural areas. The percentage of men who watched television at least once a week was higher (73.60 per cent) than the women (68.10 per cent) in the urban areas, whereas, in rural areas, the percentage of men was 28.80 per cent and 21.20 per cent for women (See figure 61).

7.3 Use of Computer

Computers have become indispensable in every sphere of life, finding applications in households, businesses, educational institutions, research organizations, healthcare, government offices, and entertainment industries. Their versatility knows no bounds, as they stand at the forefront of modern technology.

Table 43: Summary of those ever-used computer, those that used during the last three month and those that used it at least once a week during last three month.

Types	Women	Men
Ever use computer	13.4	21.8
During the last three month	6.4	12.1
At least once a week during the last three months	4.6	9.2

Source: MICS/NICS, 2021

Table 43 shows that the percentage of women who have ever used a computer was 13.40 per cent, while men was 21.80 per cent. Also, the percentage of women who used a computer during the last three months was 6.40 per cent, whereas that of men was 12.10 per cent. Furthermore, the percentage of women and men who used a computer at least once a week during the last three months was 4.60 per cent and 9.20 per cent respectively.

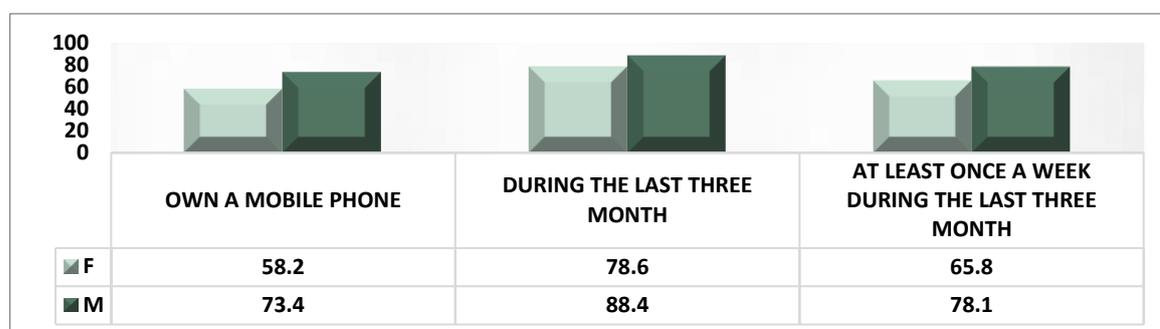

Enugu state had the highest percentage of women who have ever used a computer with 35.50 per cent, followed by Lagos state with 33.80 per cent, while Bauchi state had the lowest with 2.00 per cent. During the last three months, Lagos state had the highest percentage of women who used a computer with 20.60 per cent, followed by Enugu state with 18.70 per cent, while Jigawa state had the lowest with 0.50 per cent. For women who used a computer at least once a week during the last three months, Lagos state had the

highest percentage with 17.00 per cent, followed by the Federal Capital Territory with 13.40 per cent.

7.4 Use of Mobile Phone

The invention of mobile phones is regarded as a significant achievement for humanity, given its widespread usage in modern times. This gadget plays a crucial role in facilitating communication among individuals, including connecting with loved ones, colleagues, and a significant portion of the global population. According to the 2021 Multiple Indicator Cluster Survey (MICS)/National Immunization Coverage Survey (NICS), 58.2 per cent of women and 73.4 per cent of men owned a mobile phone.

Figure 62: Percentage of those who used a mobile phone

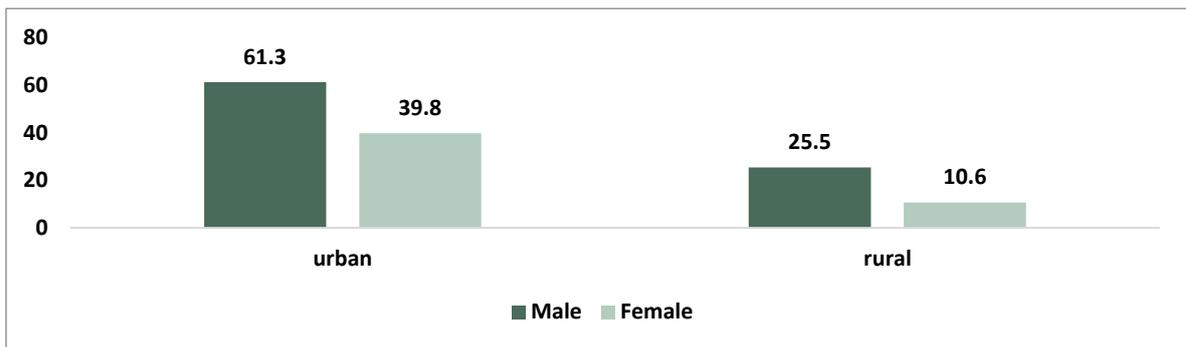

Source: MICS/NICS, 2021

Additionally, 78.60 per cent of women used a mobile phone in the last three months, compared to 88.40 per cent of men. Specifically, 65.80 per cent of women and 78.10 per cent of men used a mobile phone at least once a week during the three months.

7.5 Use of Internet

The internet is a convenient platform for uploading, downloading, and sharing data. It is also a valuable source of knowledge and entertainment, as it connects people from all around the world. Statistics show that the percentage of women and men who have ever used the internet was 24.00 per cent and 41.60 per cent respectively. According to 2021 MICS results, 61.30 per cent of men in urban areas used the internet compared to 25.5 per cent of men in the rural areas. Similarly, 39.80 per cent of women in the urban areas have ever used the internet compared to 10.60 per cent of women in the rural areas.

CHAPTER 8: SOCIAL PROTECTION

Key Findings

- *Male headed households receive more social support than female headed households with 22.4 per cent and 18.0 per cent respectively.*
- *In Nigeria, the female headed households received 0.3 per cent Social Support which was lower than the male headed households at 0.5 per cent.*
- *In the awareness of financial product, 68.3 per cent of men and 55.0 per cent of women are aware of Pension and 91.5 per cent of men and 77.5 women are aware of POS machines.*
- *According to the 2021 MICS survey, 47.2 per cent men and 35.4 per cent women own a bank account.*

8.1 Introduction

Social protection encompasses a diverse array of policies and programs, both publicly and privately administered, aimed at mitigating, alleviating, and eradicating economic and social vulnerabilities that pave the way for poverty and deprivation. The significance of social protection has been heightened by factors such as increased volatility at both macro and household levels, enduring inequalities and exclusion, and the threats posed by climate change and evolving population trends to sustainable development. These factors have fueled a growing recognition and political backing for social protection measures on a global scale.

8.2 Social Transfers

Social transfers or external economic support signify systematic and predictable direct allocations of resources, encompassing tangible goods and services as well as financial transfers to individuals or households. They serve as crucial tools for enhancing livelihoods, reducing poverty, and promoting economic resilience.

These transfers aim to protect and prevent individuals and households from being negatively impacted by shocks and to support the accumulation of human, productive, and financial assets. Examples of social protection schemes in Nigeria include N-power Conditional Cash Transfer, Household Uplifting Programme (HUP) "BETA DON COME", Retirement Pension, Trader Moni, Farmer Moni, Survival Fund, Anchor Borrower, health insurance cards, and other forms of ad-hoc support. It is important to

note that these transfers do not include assistance or transfers received from family members, relatives, or neighbors.

Table 44 shows the percentage of household members living in households receiving specific types of support in the last 3 months by type of transfers and benefits. 2021 MICS results show that male headed households receive more social transfer support than female headed households. Among male-headed households, 0.50 per cent of household members received support from N-Power Conditional Cash Transfer, 1.00 per cent from the Household Uplifting Programme (HUP), 2.00 per cent from any retirement pension, and 0.50 per cent from any other external assistance programs. For female-headed households, 0.30 per cent household members benefited from the N-Power Conditional Cash Transfer, 0.70 per cent from the Household Uplifting Programme, 1.30 per cent from any retirement pension, and 0.10 per cent from any other external assistance programs.

Table 44: Percentage of household members living in households receiving specific types of support in the last 3 months

SEX	N-Power Conditional Cash Transfer	Household Uplifting Programme (HUP)	Any retirement pension	Any other external assistance program	School tuition or school related other support for any household member age 5-24 years attending primary school or higher	Any social transfers or benefits ¹	No social transfers or benefit	Number of household members

8.3 Financial Inclusion

Financial inclusion, which refers to the widespread accessibility and availability of financial products and services for individuals and businesses, plays a pivotal role in advancing Sustainable Development Goals (SDGs). These global development objectives, established by the United Nations, include the eradication of poverty, the creation of employment opportunities, the enhancement of general welfare and living standards, and the promotion of overall economic growth. Financial inclusion is widely acknowledged as a catalyst for advancing seven (7) of the Sustainable Development Goals and holds significant importance in reducing poverty and fostering prosperity.

Figure 64 presents percentage of women and men who are aware of some financial products in Nigeria. Women' awareness for insurance was 38.10 per cent, 55.00 per cent for pension, 68.70 per cent for savings accounts, 55.00 per cent for debit cards, 75.50 per cent for POS machines, and 18.40 per cent for mortgages. In contrast, men had higher awareness for these products, with 53.0 per cent for insurance, 68.3 per cent for pension, 80.8 per cent for savings accounts, 67.7 per cent for debit cards, 91.5 per cent for POS machines, and 23.4 per cent for mortgages.

Figure 64: Percentage of women and men who are aware of financial products

Source: MICS, 2021

Table 45 shows the percentage of women and men aged 15-49 not having a bank account by reason. According to 2021 MICS report, nationally the percentage of women and men who own a bank account was 35.4 percent and 47.2 per cent respectively. 'Don't have a stable income' was a major reason for both men and women not owning a bank account at 50.5 per cent and 58.6 per cent respectively, this was followed by being unemployed/lost job at 32.3 per cent for men and 22.8 per cent for women.

Table 45: Ownership of Bank Account

SEX	Percentage who owns a bank account	Banks not available in my locality	It costs too much to reach the nearest bank	Don't have stable income	unemployed/lost job	I don't trust banks	Religious reasons	Time wasting because of documentation	I can't see the benefit of bank account	No reason	Others	Number of those who do not own a bank account

8.3.1 Savings

Savings, the cornerstone of financial stability, is the act of setting aside a portion of one's income for future use. It's the difference between living paycheck to paycheck and having

a financial cushion to weather life's unexpected storms. Savings serve as a safety net, ensuring that you have the means to cover emergency expenses, pursue opportunities, and achieve your financial goals.

Table 46 shows the percentage of women and men who save money and where they save money. The percentage of women and men who saved their money at home was 66.10 per cent and 62.10 per cent respectively, while 32.4 per cent women and 45.5 per cent men saved their money in the commercial banks.

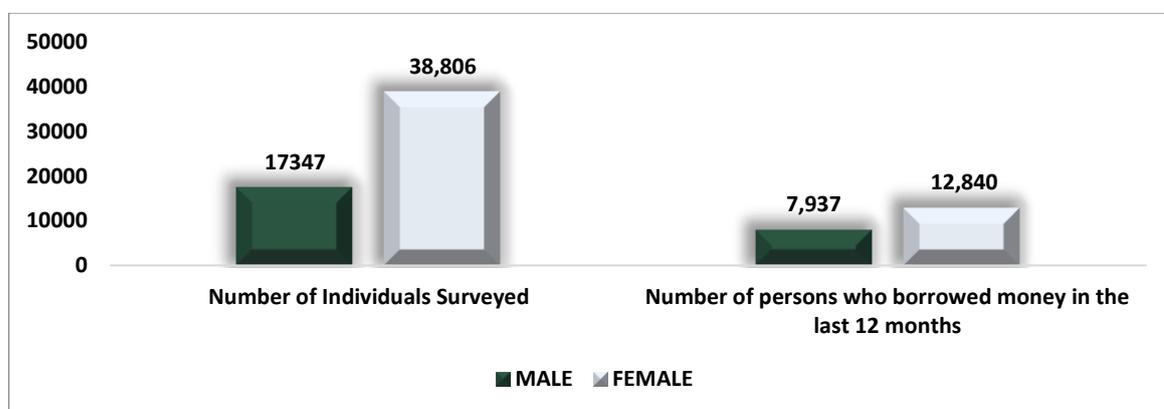

Table 46: Percentage of women and men aged 15-49 who save their money and where they save money, MICS, 2021
