

CONSUMER PRICE INDEX
(BASE PERIOD NOVEMBER 2009 = 100)

No. 544
July 2015

nbs
NATIONAL BUREAU OF STATISTICS

BRIEF METHODOLOGY:

The CPI measures the average change over time in prices of goods and services consumed by people for day-to-day living. The construction of the CPI combines economic theory, sampling and other statistical techniques using data from other surveys to produce a weighted measure of average price changes in the Nigerian economy. The weighting occurs to capture the importance of the selected commodities in the entire index. The production of the CPI requires skills of economists, statisticians, computer scientists, data collectors and others.

Key in the construction of the price index is the selection of the market basket of goods and services. Every month, 10,534 informants spread across the country provide price data for the computation of the CPI. The market items currently comprise of 740 goods and services regularly priced.

The first stage in the calculation of the CPI is the collection of prices on each item (740 goods and services) from outlets in each sector (rural or urban) for each state. Prices are then averaged for each item according to sector across the state. The next step is to use the average price to calculate the basic index for each commodity: The current year price of each commodity is compared with a base year's price to obtain a relative price.

Next we use the Laspeyres formula to compute an aggregated index for each class (which has a multitude of commodities which have similar consumption purposes): Here the sum of the product of weights

(obtained from the expenditure survey) and relative prices for each item is divided by the sum of the weight of the items in that class, and the result multiplied by 100 gives the required index number. This index number is still classified according to the urban or rural classification sector for each of the 36 states and the FCT. This yields 85 classes then 48 groups which are then reclassified into 12 Divisions to derive:

1. The country composite index
2. The Urban National index
3. The Rural National index
4. The Combined Urban and Rural State Composite index

The survey methodology generates 3774 all items indices for all states and the FCT.

This edition of the Statistical News contains the revised Consumer Price Index (CPI) based on Nigeria Living Standard Survey (NLSS) 2003/2004. The consumption expenditure data were re-valued to November 2009, which is the base period for the revised CPI.

The May 2003 and September 1985 based indices are being continued using factors derived from the new CPI. All of these indices will yield the same price change for any commodity group contained in all the series. A new sub index – Imported Food Index- is available in the revised CPI.

Note: The urban and rural indices were weighted with the ratio of their populations to the national i.e. 0.455 and 0.545 respectively to compute the composite indices at the 12 COICOP functions and all items

levels. This may cause variance between a recalculated all items index using the weights published on table 2 and the published all items index because the published weights were computed only from consumption expenditure survey result. The following breakdown highlights a non-exhaustive list of the components of the current CPI:

FOOD AND NON ALCOHOLIC BEVERAGES

Food

Bread and cereals

Meat

Fish

Milk, cheese and eggs

Oils and fats

Fruit

Vegetables

Potatoes, Yam & other tubers

Food products n.e.c

Coffee, tea and cocoa

Soft drinks

ALCOHOLIC BEVERAGES, TOBACCO AND KOLA

Spirits

Wine

Tobacco

Narcotics

CLOTHING AND FOOTWEAR

Clothing materials, other articles of clothing

Garments

Cleaning, repair and hire of clothing

Shoes and other footwear

Repair and hire of footwear

HOUSING, WATER, ELECTRICITY, GAS

Actual and imputed rentals for housing

Water supply

Miscellaneous services relating to the dwelling

Electricity

Gas

Liquid fuel

Solid fuels

FURNISHINGS, HOUSEHOLD EQUIPMENT

Furniture and furnishings

Carpets and other floor coverings

Repair of Furniture

Household textiles

Major household appliances whether electric or not

Repair of household appliances

Glassware, tableware and household utensils
Non-durable household goods
Domestic services and household services
HEALTH
Pharmaceutical products
Medical services
Dental services
Paramedical services
Hospital services
TRANSPORT
Motor cars
Motor cycles
Bicycles
Vehicle spare parts
Fuels and lubricants for personal transportation
Maintenance and repair of personal transport
Passenger transport by road
Passenger transport by air
Passenger transport by sea and inland waterways
COMMUNICATION
Postal services
Telephone and telefax equipment
Telephone and telefax services
RECREATION AND CULTURE
Audio-visual, photographic and information processing equipment
Photographic development
Musical instrument
Recreational and sporting services
Games of chance
EDUCATION
Books & stationery
RESTAURANTS AND HOTELS
Catering services
Accommodation services
MISCELLANEOUS GOODS AND SERVICES
Hairdressing salons and personal grooming establishments
Appliances, articles and products for personal care
Jewellery, clocks and watches
Insurance
Other services.

ALL ITEMS INDEX

In July, the Consumer Price Index (CPI) which measures inflation rose by 9.2 percent (year-on-year), unchanged from the rate recorded in June. The Headline index has held at the same rate for the second consecutive month as a result of muted rises in the “Food and Non Alcoholic Beverages”, “Housing Water, Electricity, Gas and Other Fuel”, and “Furnishings & Household Equipment Maintenance” divisions amongst others.

The Food Sub-index rose by 10.0 percent (year-on-year) in July, increasing at the same pace for the second consecutive month. While the rates recorded in June and July are the highs for the year, a slower increase in the *Meats, Fish, Fruits* and “Potatoes, Yams and Tubers” groups weighted on the Food Sub-index as a whole. Faster price increases were observed in the “Bread and Cereals”, “Milk, Cheese and Eggs” and “Oils and Fats” groups, while the pace of increase in the price of vegetables held constant over the June and July.

The pace of advances recorded by the “All Items less Farm Produce” or Core sub-index increased at a faster pace in July. The Core Sub-index increased by 8.8 percent (year-on-year), 0.4 percentage points from 8.4 recorded in June with the highest pressures observed in the *Transportation, Education and Miscellaneous Good and Services* divisions. The pace of increases slowed in multiple divisions such as the *Communications, Recreation and Culture* and *Restaurant and Hotels* divisions.

It should be noted that the Headline Index is made up of the Core Index

COMPOSITION OF THE MAJOR INDEX AND SUB-INDICES

All Items = Farm Produce +
Core index

Food = Farm Produce +
Processed Foods

Core = All Items – Farm Produce

and *Farm Produce items*. As *Processed Foods* are included in both the *Core* and *Food* sub-indices, this implies that these sub-indices are not mutually-exclusive.

On a month-on-month basis, the pace of the increase in the Headline index eased for the second consecutive month, increasing by 0.7 percent in July, from 0.9 percent recorded in June. The Headline index increased at a slower rate as all COICOP divisions slowed during the period with the exception being the Health division.

The Urban index increased by 9.2 percent (year-on-year), relatively unchanged from rates recorded in June, while the Rural index increased marginally by 9.2 percent, from 9.1 percent in June. On a month-on-month basis, both the Urban and Rural indices increased by 0.7 percent, lower from 0.9 percent recorded in June.

The percentage change in the average composite CPI for the twelve-month period ending in July over the average of the CPI for the previous twelve-month period was 8.5 percent, marginally higher from the 8.4 percent rate recorded in June. The corresponding 12-month year-on-year average percentage change for the Urban index remained unchanged at 8.5 percent while the corresponding Rural index edged higher from 8.3 percent in June to 8.4 percent in July.

FOOD INDEX

Food prices increased at the same rate in July as in June; at 10.0 percent. While slower increases in the *Meats, Fish, Fruits, and “Potatoes, yams and Tubers” groups have weighed on the index, it remains a record high for the year, partly as a result of higher imported food prices and the Ramadan period.* On a month-on-month basis, the Food Sub-index increased at a slower pace of 0.8 percent, 0.3 percentage points

from 1.1 percent recorded in June. All groups which contribute to the Food Sub-index increased at a slower rate in July with the exception being the *Oils and Fats group.* The average annual rate of change of the Food Sub-index for the twelve-month period ending in July 2015 over the previous twelve month average was 9.6 percent, marginally higher from average annual rate of change of 9.5 percent rate recorded in June.

ALL ITEMS LESS FARM PRODUCE

The pace of increases recorded on the “All items less Farm Produce” or Core sub-index, which excludes the prices of volatile agricultural produce increased at a faster pace for the seventh consecutive month. Prices increased by 8.8 percent in July up by 0.4 percentage points from the rate recorded in June. On a month-on-month basis, the Core Sub-index increased by 0.6 percent, 0.2 percentage points lower from 0.8

percent recorded in June. The largest increases were recorded in the *Liquid Fuel (Kerosene), Solid Fuels (Charcoal), “Passenger Transport by Road”, Garments and “Furniture and Furnishings” groups.* The average 12 month annual rate of rise of the index was recorded at 7.2 percent for the twelve-month period ending in July 2015, 0.2 percentage points higher from the 12 month rate recorded in June.
