

CONSUMER PRICE INDEX
(BASE PERIOD NOVEMBER 2009 = 100)

No. 552
March 2016

nbs
NATIONAL BUREAU OF STATISTICS

BRIEF METHODOLOGY:

The CPI measures the average change over time in prices of goods and services consumed by people for day-to-day living. The construction of the CPI combines economic theory, sampling and other statistical techniques using data from other surveys to produce a weighted measure of average price changes in the Nigerian economy. The weighting occurs to capture the importance of the selected commodities in the entire index. The production of the CPI requires skills of economists, statisticians, computer scientists, data collectors and others.

Key in the construction of the price index is the selection of the market basket of goods and services. Every month, 10,534 informants spread across the country provide price data for the computation of the CPI. The market items currently comprise of 740 goods and services regularly priced.

The first stage in the calculation of the CPI is the collection of prices on each item (740 goods and services) from outlets in each sector (rural or urban) for each state. Prices are then averaged for each item according to sector across the state. The next step is to use the average price to calculate the basic index for each commodity: The current year price of each commodity is compared with a base year's price to obtain a relative price.

Next we use the Laspeyres formula to compute an aggregated index for each class (which has a multitude of commodities which have similar consumption purposes): Here the sum of the product of weights (obtained from the expenditure

survey) and relative prices for each item is divided by the sum of the weight of the items in that class, and the result multiplied by 100 gives the required index number. This index number is still classified according to the urban or rural classification sector for each of the 36 states and the FCT. This yields 85 classes then 48 groups which are then reclassified into 12 Divisions to derive:

1. The country composite index
2. The Urban National index
3. The Rural National index
4. The Combined Urban and Rural State Composite index

The survey methodology generates 3774 all items indices for all states and the FCT.

This edition of the Statistical News contains the revised Consumer Price Index (CPI) based on Nigeria Living Standard Survey (NLSS) 2003/2004. The consumption expenditure data were re-valued to November 2009, which is the base period for the revised CPI.

The May 2003 and September 1985 based indices are being continued using factors derived from the new CPI. All of these indices will yield the same price change for any commodity group contained in all the series. A new sub index – Imported Food Index is available in the revised CPI.

Note: The urban and rural indices were weighted with the ratio of their populations to the national i.e. 0.455 and 0.545 respectively to compute the composite indices at the 12 COICOP functions and all items levels. This may cause variance between a recalculated all items index using the

weights published on table 2 and the published all items index because the published weights were computed only from consumption expenditure survey result. The following breakdown highlights a non-exhaustive list of the components of the current CPI:

FOOD AND NON ALCOHOLIC BEVERAGES

- Food
- Bread and cereals
- Meat
- Fish
- Milk, cheese and eggs
- Oils and fats
- Fruit
- Vegetables
- Potatoes, Yam & other tubers
- Food products n.e.c
- Coffee, tea and cocoa
- Soft drinks

ALCOHOLIC BEVERAGES, TOBACCO AND KOLA

- Spirits
- Wine
- Tobacco
- Narcotics

CLOTHING AND FOOTWEAR

- Clothing materials, other articles of clothing
- Garments
- Cleaning, repair and hire of clothing
- Shoes and other footwear
- Repair and hire of footwear

HOUSING, WATER, ELECTRICITY, GAS

- Actual and imputed rentals for housing

- Water supply

- Miscellaneous services relating to the dwelling

- Electricity

- Gas

- Liquid fuel

- Solid fuels

FURNISHINGS, HOUSEHOLD EQUIPMENT

- Furniture and furnishings
- Carpets and other floor coverings
- Repair of Furniture
- Household textiles
- Major household appliances whether electric or not
- Repair of household appliances

Glassware, tableware and household utensils
Non-durable household goods
Domestic services and household services
HEALTH
Pharmaceutical products
Medical services
Dental services
Paramedical services
Hospital services
TRANSPORT
Motor cars
Motor cycles
Bicycles
Vehicle spare parts
Fuels and lubricants for personal transportation
Maintenance and repair of personal transport
Passenger transport by road
Passenger transport by air
Passenger transport by sea and inland waterways
COMMUNICATION
Postal services
Telephone and telefax equipment
Telephone and telefax services
RECREATION AND CULTURE
Audio-visual, photographic and information processing equipment
Photographic development
Musical instrument
Recreational and sporting services
Games of chance
EDUCATION
Books & stationery
RESTAURANTS AND HOTELS
Catering services
Accommodation services
MISCELLANEOUS GOODS AND SERVICES
Hairdressing salons and personal grooming establishments
Appliances, articles and products for personal care
Jewellery, clocks and watches
Insurance
Other services.

ALL ITEMS INDEX

In March, the Consumer Price Index (CPI) which measures inflation recorded a sharp rise for the second consecutive month. The headline index increased by 12.8% (year-on-year), roughly 1.4% points higher from rates recorded in February (11.4%) reflecting an increase in the prices of goods and services across the nation to a year-on-year high last recorded in July of 2012. The higher price level was reflected in faster increases across all divisions which contribute to the index with the exception of the Restaurants and Hotels division which increased, albeit at a slower pace for the second consecutive month.

Transportation costs, the planting season, and foreign exchange movements created significant upward pressures on the Food index in March. The Food index increased by 12.7%, up by 1.4% points from rates recorded in February as all major food groups which contribute to the Food sub-index increased at a faster pace. Similarly, imported items as well as other domestic shocks continued to have ripple effects across many divisions that contribute to the Core. The index increased by 12.2% in March, roughly 1.1% points from rates recorded in February.

While exhibiting a slower increase in the on a month-on-month basis, the Headline Index still recorded a notable increase in March relative to rates recorded in previous years. The index increased by 2.2%, in March, marginally lower from 2.3% recorded in February. Almost half of all divisions that contribute to the index increased, albeit at a slower pace, during the month notably the Housing Water, Electricity, Gas & Other Fuel; Health, Education, and Restaurants & Hotels divisions.

It should be noted that the Headline Index is made up of the Core Index

COMPOSITION OF THE MAJOR INDEX AND SUB-INDICES

All Items = Farm Produce + Core index

Food = Farm Produce + Processed Foods

Core = All Items – Farm Produce

and Farm Produce items. As Processed Foods are included in both the Core and Food sub-indices, this implies that these sub-indices are not mutually-exclusive.

Both the Urban and Rural indices recorded marked increases for the second consecutive month in March. The Urban index rose by 1.2% points from 12.3% (year-on-year) in February to 13.5% in March. In tandem, the Rural Index increased by 1.3% points from 10.7% in February to 12.0% in March. On a month-on-month basis, while the Urban index increased at a slower pace, from 3.0% in February to 2.0% in March, the Rural index increased at a faster pace, from 1.8% in February to 2.1% in March.

The percentage change in the average composite CPI for the twelve-month period ending in March 2016 over the average of the CPI for the previous twelve-month period was 9.8%, higher from 9.4% recorded in February. The corresponding twelve-month year-on-year average percentage change for the Urban index increased from 9.5% in February to 9.9% in March, while the corresponding Rural index also increased from 9.2% in February to 9.6% in March.

FOOD INDEX

The Food sub-index continues to record upward pressure from both imported foods as well as cereals. In March, the Food index increased by 12.7% (Year-on-year), 1.4% points higher from rates recorded in February and reaching a year-on-year high last recorded in May 2012. The highest price increases were recorded in the Fish, Vegetables, and Bread and Cereals groups for the third consecutive month. On a month-on-month basis, the Food sub-index increased by 2.3% in March, 0.9% points higher from rates recorded in

February. All groups which contribute to the Food Sub-index increased at a faster pace during the month. Month-on-month, the highest price increases were recorded in the Fish, Vegetables, Bread and Cereals; and Meats groups. The average annual rate of change of the Food sub-index for the twelve-month period ending in March 2016 over the previous twelve month average was 10.5%, 0.3% points from the average annual rate of change recorded in February at 10.2%.

ALL ITEMS LESS FARM PRODUCE

The knockon effect of foreign exchange movements which has inturn affected the prices of imported food and non food items, the importation of Premium Motor Spirit as well as the adjustment in the electricity tariffs nationwide have resulted in a surge of rates recorded by the "All items less Farm Produce" or Core sub-index. The index increased by 12.2% during the month, 1.1% points from 11.0% recorded in Febrary. All key divisions which contribute to the index increased at a faster pace with the exception of the Restaurants and Hotels division which increased at a slower pace.

On a month-on-month basis, the Core Sub-index increased at a slower pace in March relative to February increasing by 1.9%, 0.9% points lower than rates recorded in Febrary. In March, the highest price increases were recorded in the Electricity, Furniture and Furnishings, Passenger Transport by Road, Spare Parts and Liquid Fuels groups. The average twelve month annual rate of rise of the index was recorded at 9.1% for the twelve-month period ending in March 2016, 0.4% points higher from the twelve month rate of change recorded in February (8.7%).
