## 1 INTRODUCTION

---

In determining living standards, income and consumption are the most popular approaches. Income refers to earnings from productive activities and current transfers. Measuring consumption over a week or month provides an indication of a household's consumption habits over a year because it has a smooth flow to it in other words it is steady. Income however, tends to vary widely from week to week or month to month. Consumption data is much easier to collect than income data, particularly in agricultural communities or with self-employed persons. Consumption is therefore a better indicator of living standards.

The consumption pattern of a country depicts the aggregate demand of goods and services in the country, and in most cases it constitutes about 60 percent of the total GDP of the country. Consumption pattern also depicts the level of welfare and poverty that a nation is experiencing. This report is based on the Harmonized Nigeria Living Standard Survey (HNLSS) 2009/2010. The HNLSS is a combination of the Nigeria Living Standard Survey (NLSS) and the World Bank's Core Welfare Indicator Questionnaire (CWIQ).

The purpose of this report is to portray household consumption types by food and non-food items at the national, zonal level, and state level, and also the urban/rural split<sup>1</sup>.

---

<sup>1</sup> Note that the rural urban split in this report is based on the latest official published split by the National Population Commission which is 1991 and accordingly is subject to revision following updates from the National Population Commission.

The amount of money spent on consumables will be used in the computation of final household expenditure which is a component of our gross domestic product (GDP) compilation. The computation of GDP through the expenditure approach will not be complete without the household consumption/expenditure input. It is worth noting that when a country is experiencing a downturn trend, it implies that the aggregate demand (consumption) is in decline, poverty incidence is on the increase, unemployment rate rises, investments fall drastically and prices of goods and services will most likely rise too. On the other hand, when the aggregate demand (consumption) is high, firms will invest and be ready to employ idle resources, prices will fall (due to an increase in the supply of goods and services) and other economies of scale will be accrued to the nation as a result of the large size of its aggregate demand.

## 1.1 Consumption Patterns in Nigeria

---

The consumption pattern of a household is the combination of qualities, quantities, acts and tendencies characterizing a community or a human group's use of resources for survival, comfort and enjoyment.<sup>2</sup> Of course the type of food and non-food items consumed, vary from region to region. Consumption patterns normally contribute greatly to the social and economic policy of the country. In a developing country like Nigeria, the consumption pattern is skewed towards food i.e. food accounts for a higher proportion of the total expenditure, while in developed countries the opposite is the case.

---

<sup>2</sup> Taken from <http://www.eionet.europa.eu/gemet/concept?ns=1&cp=1745>. February 29<sup>th</sup>, 2012.

The more developed a society becomes, the less it spends on food and the more it spends on non-food items.

This report will avail researchers and policy makers the opportunity to test whether the consumption patterns of a state or zone, correlates with food items using valid statistical theory. Specifically, this report will open further examination of consumption /expenditure patterns within the country as it portrays the level of welfare (poverty).

Consumption patterns differ from one zone to another. Zonal variation exists at a close examination of a representative state within one zone when compared with another state within another zone. Specifically, the result of the HNLSS can be summarized to show that the consumption pattern in Imo State is representative of the entire South-East Zone. Similarly, Cross River State consumption pattern is representative of states within the South-South Zone. These zonal variations can be statistically explained as the states within each zone having similarities in consumption patterns. There were however variations where some states do not follow the same pattern and that is not unusual.

## **2 SURVEY METHODOLOGY**

---

### **2.1 Objectives of the Survey**

---

The Harmonized Living Standard Survey (HNLSS) was part of an effort of the Federal Government of Nigeria to provide statistical information on welfare and poverty trends in the country. The survey was designed to collect information needed to identify and classify target groups and provide basic

welfare indicators for monitoring poverty alleviation programmes. The specific objectives of the survey are to:

- Provide valid and reliable data for the development of effective intervention and provision of important tools for designing implementing and monitoring of economic growth and poverty reduction;
- Generate qualitative and quantitative data on poverty and welfare situations at the federal and state levels;
- Collect baseline information on the character and nature of poverty for monitoring and evaluating impact of poverty reduction programmes;
- Identify priority indicators of living standards for households and household members;
- Establish a database on poverty monitoring systems that will be updated continuously;
- Provide a comprehensive analysis for identification and targeting of the poor by different localities;
- Give in-depth enquiry into the structure and distribution of expenditures of Nigerian households; and
- Present and disseminate National Poverty report, giving the highlights of Statistical findings and results of in-depth analysis, understanding required to promote a sustainable campaign against poverty at the National and State Levels.

## 2.2 Coverage

The survey was a nation-wide activity, covering all 36 States of the Federation and the Federal Capital Territory (FCT). The HNLSS was divided into Part A and B. In Part A the welfare approach was adopted, while in Part B it was the consumption approach. It was designed to investigate both urban and rural areas (as classified by the National Population Commission) of all the 774 Local Government Areas (LGAs) of the country. The welfare approach

component was conducted in 77,400 households which is an average of one hundred households per Local Government area. The consumption approach covered 50 households in each Local Government Area, which means 38,700 households were interviewed. Both the welfare approach and the consumption approach were linked together to produce the Nigeria Poverty Profile.

### 2.3 Survey Instruments

The questionnaire development was a joint effort by the National Bureau of Statistics with support from the World Bank. The survey instruments comprised of Questionnaire Part A: Household Questionnaire; Part B: Household Consumption Questionnaire; Prices Questionnaire and Household Diary Record Booklet; 2 survey manuals; and Occupation and Industry Code Booklets.

### 2.4 Data Collection

The NBS enumerators conducted interviews with household members. The data was collected on a quarterly basis, over a one year period from November 2009 to October 2010. There were 4 interviewer visits per household with 7 day intervals for every 30 days. A diary of daily consumption and expenditure was used to support the interviews and recorded in each household's Diary Record Booklet. Diaries were left with households, with at least one literate individual to complete. For non-literate households, a literate living in the same vicinity assisted the non-literate household to complete their diaries.

### 3 DATA ANALYSIS

#### 3.1 Classification of Food and Non-food Items

In developing the consumption pattern report for Nigeria, 162 food items have been classified into 18 major groups based on the Nigerian food basket. The table below provides the food and non-food classifications. 151 non-food items have been classified into 10 major groups. Classifications are provided in Table 1. A further breakdown of each of the food and non-food classifications is provided in Annex I and II respectively.

Table 1 Food and Non-Food Classification 2009/10

S/N	Food Classification 2009/10	Non-Food Classifications 2009/10
1	Maize	Clothing and footwear
2	Rice	Rent
3	Other Cereals	Fuel/Light
4	Bread & Similar Foods	Household Goods
5	Tubers & Plantain	Health Expenditure
6	Poultry	Transport
7	Meats	Education Expenditure
8	Seafood	Water
9	Dairy Products	Entertainment
10	Oils, Fats and Oils rich Nuts	Water Other services
11	Fruits	
12	Vegetables (excludes Pulses)	
13	Beans and peas	
14	Sugar, Jam, Honey	
15	Non-alcoholic	
16	Alcoholic	
17	Foods consumed in Restaurants and Canteens	
18	Food items not mentioned Above	

## 3.2 Summary Indicators

---

### 3.2.1 National Classification

At the national level, it is clearly shown that the total expenditure on food and non-food for 2009/2010 is **N24, 253, 670, 127, 758.80** (Twenty-four trillion, two hundred and fifty-three billion, six hundred and seventy million, one hundred and twenty-seven thousand, seven hundred and fifty-eight Naira, Eighty Kobo). 64.68% of the total household expenditure in 2009/2010 was spent on food, with the balance of about 35.32% spent on non-food items. Tubers and plantain were responsible for the largest proportion of household expenditure representing 14.6 percent of total household expenditure. This group was followed by rent, vegetables, other cereals and beans & peas each taking up 12.1, 9.9, 6.7, and 6.2% respectively of the total household consumption.

Further analysis of food expenditure by households in 2009/2010 reveals that total cereals (adding maize, rice and other cereals categories) and tubers and plantain accounted to a combined 46.7% of total household expenditure on food and 30.2% of total household expenditure. Household expenditure on non-food items were directed as aforementioned mostly at rent, clothing & footwear and 'other services' (which includes information technology and communication equipment as well as things like insurance, domestic help, and so on), and fuel and light, each representing 34.3%, 13.5%, 12.7% and 12.5% respectively of total non food expenditure and 12.1%, 4.79%, 4.5% and 4.43% of total household expenditure respectively.

Table 2 Household Expenditure by Type of Commodity: National 2009/10

<b>National</b>				
<b>S/N</b>	<b>Commodity</b>	<b>Expenditure</b>	<b>Percentage of Food</b>	<b>Percentage of Total Expenditure</b>
<b>Food</b>				
1	Maize	745,591,888,308.67	4.75	3.07

18	Other Non-Food Items	490,226,971,084.87	3.13	2.02
	<b>Sub-Total</b>	<b>15,686,669,043,081.70</b>		64.68
<b>Non-Food</b>				
<b>S/N</b>	<b>Commodity</b>	<b>Expenditure</b>	<b>Percentage of Non-Food</b>	<b>Percentage of Total Expenditure</b>
1	Clothing and foot wear	1,160,723,405,087.62	13.55	4.79
2	Rent	2,939,490,895,025.23	34.31	12.12
3	Fuel/Light	1,074,320,625,394.37	12.54	4.43
4	Household Goods	1,050,934,978,178.33	12.27	4.33
5	Health Expenditure	177,134,167,017.34	2.07	0.73
6	Transport	823,237,450,437.44	9.61	3.39
7	Education Expenditure	140,305,866,521.55	1.64	0.58
8	Entertainment	78,966,613,172.95	0.92	0.33
9	Water	31,447,536,201.87	0.37	0.13
10	Other Services	1,090,439,547,640.41	12.73	4.50
	<b>Sub-Total</b>	<b>8,567,001,084,677.10</b>		35.32
	<b>Total</b>	<b>24,253,670,127,758.80</b>		

### 3.2.2 Urban/Rural Classifications

Total expenditure in urban areas in 2009/2010 stood at **N10, 621, 489, 661, 829.40**, relative to **N13, 632, 180, 465, 929.50** in the rural areas.

The higher rate of expenditure in the rural areas as a total relative to the urban areas is largely due to the fact that this report is constrained by relying on the latest urban rural classification of the National Population Commission which was published in 1991 and gives a 30/70 split between urban and rural areas. It is also however, evident that in line with urbanisation trends that this split has moves in favour of urban areas and accordingly this ratio will be updated as soon as more recent estimates are available as official from the National Population Commission. Furthermore, some areas termed rural in 1991 will be clearly termed urban in 2009/2010 once this split is officially updated which will also affect the split above.

Against this backdrop and given the constraints to our urban/rural analysis stated above (see footnote 1), total expenditure on food in urban areas stood at **N5,878,792,876,448.58** in 2009/2010, while in rural areas it was **N9,807,876,166,633.18**. While the urban sector spent a higher proportion on rent, which took up 16.2% of its total expenditure, the rural sector spent most of its total expenditure, about 16%, on tubers and plantain. In the urban area for food tubers and plantain and vegetables were the highest consumables at 23.2% and 17.8% of the total food expenditure. In the rural sector as said earlier tubers and plantain were the highest expenditures for food, and also other cereals and vegetables, each consuming 22.2%, 14.3% and 14% respectively, of the total food expenditure. For non-food

expenditure, rent was the highest expenditure at 36.2% for urban and 31.9% for the rural areas. Other top non-food items for the urban areas were other services (which includes information technology, insurance, personal goods) fuel/light, clothing and footwear, and transport. For rural dwellers, household goods, clothing and footwear, and fuel/light were the other top items.

It should also be noted that household food consumption covers purchased food and "own food", which is food grown by the household. Own food which is largely prone to rural areas where food production largely takes place is added to food expenditure by rural households by calculating the monetary value of food reportedly produced and consumed by the households. As an observed theory, people are more likely to eat more food if they grow it than if they have to go out and buy it. This will also partly account for the higher amount expended on food by rural areas relative to urban areas.

Table 3 Household Expenditure by Commodity: Urban

Urban				
S/N	Commodity	Total Annual Expenditure	Percentage of Food	Percentage of Total Expenditure
<b>Food</b>				
1	Maize	207,830,052,344.73	3.54	1.96

### 3.2.3 Zonal Classification

Further disaggregation by the 6 geo-political zones reveals that the South-West region recorded the highest overall household expenditure. In the food category, the North-West had the highest expenditure, consuming 25.1% of the total food expenditure at the zonal level, while the South-South recorded the lowest numbers with 12.2% of the total food expenditure. The South West takes up almost a third of the total non-food consumption for the nation. The South-West spent 53% more than the South-South, the second highest in the non-food section, and 225% more than the region with the lowest expenditure for non-food items, the North-East. This magnitude is however significantly less when we consider food expenditure. The North-West, the highest in food expenditure, was about N3.9 trillion, while the South-West was about N3.6trillion for food expenditure. The South-South had the lowest food expenditure with N1.9 trillion.

A further breakdown of each of the zones by food and non-food classifications can be found on tables 6 to 11 below. Tubers and plantain were the highest expenditures for all the southern region zones and the North-Central zone for both food and non-food items. For the North-East zone, vegetable was the highest expenditure, while in the North-West cereals were the highest.

Table 5 Consumption Pattern of Households by Zone

Zone	Food Expenditure	% of Total Food Exp	Non-Food Expenditure	% of Total Non-Food Exp	Total Expenditure	% of Total Expenditure
North-Central	2,395,703,884,281.48	15.27	1,138,409,615,256.65	13.29	3,534,113,499,538.13	14.57

### 3.2.4 States' Classification

Lagos state recorded the highest consumption expenditure nationwide at N2,769,809,858,469.78 or 11.4%, followed by Kano (N1,494,644,625,136.15 or 6.1%) and Oyo State (N1,259,348,196,211.02 or 5.2%). Amongst the states, Lagos spent the most on food items at a total of **N1, 445, 033, 910, 544.72**. The average spent on food by all states in 2009/10 was **N423, 964, 028, 191.40**. For non-food items, Lagos state spent **N1, 324, 775, 947, 925. 06**, which was again the highest at the state level. Rivers was the second highest with an expenditure of **N508, 503, 563, 001.97**, which is less than half what Lagos state spent on non food items. The average spent on non-food items by states was **N231, 540, 569, 856.14**.

Overall, Lagos, Kano, Oyo, Kaduna and Rivers spent the greatest amounts, each at over 1 trillion Naira, for both food and non-food items. Yobe and Gombe had the least expenditure numbers on all consumables, each falling below 300 billion Naira in 2009/2010. The average total amount consumed for food and non-food items by states was **N655, 504, 598, 047.54**.

Table 12 gives a breakdown by state. Tables 13, 14 and 15 give state-level breakdown for food, non-food and both, respectively, from highest to the lowest. A more disaggregated breakdown for the states, depicting groups, is provided in Annex 3 of this report.

Table 12 Food, Non-Food and Combined by States

ANNUAL CONSUMPTION EXPENDITURE			
	FOOD	NON-FOOD	COMBINED
State	Amount	Amount	Amount
Abia	363,653,550,846.56	193,516,075,464.22	557,169,626,310.78

3	Biscuits
4	Meat Pie
5	Nodles

<b>E</b>	<b>Tubers and Plantains</b>
1	Yam flour
2	Cassava flour
3	Plantain flour
4	Cassava roots
5	Yam root
6	Gari-white
7	Gari-yellow
8	Cocoyam
9	Plantain
10	Sweet potatoes
11	Potatoes
12	Other root & tubers
13	Cooked fufu/(akpu)
14	Uncooked Fufu/(akpu)
15	Other starchy products
16	Amala

<b>F</b>	<b>Poultry</b>
1	Live Chicken
2	Frozen Chicken
3	Live Turkey
4	Frozen Turkey
5	Duck
6	Guinea Fowl
7	Game Birds
8	Other Domestic Poultry
9	Agricultural Eggs
10	Local Eggs
11	Guinea Fowl Eggs
12	Other eggs(not chicken)

<b>G</b>	<b>Meats</b>
1	Beef
2	Mutton
3	Dried (Beef)
4	Pork
5	Bush Meat
6	Goat
7	Wild Game Meat
8	Ponmo (Meat Skin)
9	Other Meat (Excl Poultry)
10	Canned Beef

<b>H</b>	<b>Seafood</b>
1	Fish-Fresh
2	Fish-Frozen
3	Fish-Smoked
4	Fish-Dried
5	Fish-Fried
6	Cray Fish
7	Shrimp
8	Snails
9	Other Seafood (Lobster, Crab, Prawns, Etc)
10	Canned Fish/Seafood

<b>I</b>	<b>Oils, Fats and Oil rich nuts</b>
1	Palm oil
2	Coconut oil
3	Shea butter
4	Butter/Margarin
5	Cheese
6	Animal fats
7	Groundnut oil
8	Vegetable oil
9	Palm Kernel oil
10	Other oils & fats

<b>J</b>	<b>Dairy Products</b>
1	Fresh Milk
2	Milk Powder
3	Baby Milk Powder
4	Milk Tinned (Unsweetened)
5	Soya Milk
6	Yoghurt
7	Other Dairy Products

<b>K</b>	<b>Vegetables (excludes Pulses)</b>
1	Tomatoes
2	Onions
3	Garden eggs/eggplant
4	Okro fresh
5	Okro dried
6	Pepper Fresh
7	Pepper Dried
8	Cabbage lettuce
9	Cucumber
10	Cocoyam leaves
11	Other vegetables
12	Tomatoe puree
13	Other canned vegetables
14	Ketchup
15	Salad Cream

<b>L</b>	<b>Fruits</b>
1	Bananas
2	Water melon
3	Orange
4	Tangerine
5	Mangoes
6	Pawpaw
7	Avocado pear
8	Pineapples
9	Orange juice
10	Other fruit/juice
11	Fruit canned
12	Fruit juice canned

<b>M</b>	<b>Beans and Peas</b>
1	Beans
2	Cow peas brown
3	Cow peas white
4	Soya beans
5	Moimoi/Opa/Abari
6	Akara (bean cake)
7	Kulikuli (g'nut cake)
8	Locust bean (dawadawa)
9	Bambara nut
10	Groudnuts
11	Kola nuts
12	Palm nut
13	Cashew nut
14	Coconut
15	Other pulses
16	Other nuts/seeds

<b>N</b>	<b>Alcoholic</b>
1	Beer (Nigeria Brewed) Bottled
2	Beer (Nigeria Brewed) Canned
3	Beer (Imported) Bottled
4	Beer (Imported) Canned
5	Stout (Nigeria Brewed) Bottled
6	Stout (Nigeria Brewed) Canned
7	Stout (Imported) Bottled
8	Stout (Imported) Canned
9	Palm Wine
10	Burukutu
11	Pito
12	Akpeteshie and Other Spirits
13	Gin
14	Other Wines (Nigeria Brewed)
15	Other Wines (Imported)
16	Other Alcoholic Beverages

<b>O</b>	<b>Sugar, Jam, Honey, Chocolate and Confectionary</b>
1	Sugar
2	Jams
3	Honey
4	Confectionary-Frozen
5	Confectionary-not frozen
6	Ice Cream, Ice Lollipops
7	Sweets

<b>P</b>	<b>Food consumed in resturants and canteens</b>
1	Cooked Rice and Stew
2	Fufu and Soup
3	Tuo and Soup
4	Amala and Soup
5	Gari and Soup
6	Pounded Yam and soup
7	Other Hotel/Rests Meal

<b>Q</b>	<b>Non Alcoholic</b>
1	Coffee
2	Chocolate Drinks (Including Milo)
3	Bournvita
4	Ovaltine
5	Tea
6	Other Beverage
7	Bottled Water
8	Sachet Water
9	Malt Drinks
10	Soft Drinks (Coca Cola, Sprit, Etc) bottled
11	Soft drinks (Cocoa Cola, sprite, etc) Canned
12	Kunu
13	Other Non-Alcoholic Drinks

<b>R</b>	<b>Food Items not mentioned above</b>
1	Condiments
2	Salt
3	Other Foods (Not Mentioned)

## ANNEX 2: Non-Food Classification Disaggregated, 2009/10

---

A	CLOTHING AND FOOT WEAR
1	Cotton
2	Silk
3	Hand loomed: Aso-Oke
4	Ankara
5	Polyester material
6	Wool
7	Other Materials for clothing
8	Men's tailoring charges
9	Women's tailoring charges
10	Boy's tailoring charges
11	Girl's tailoring charges
12	Suits
13	Other ready-made
14	Smoked and other hand woven
15	Blouse, shirts
16	Boy's dress
17	Girl's dress
18	Men's dress
19	Women's dress (frock)
20	Men's raincoat
21	Baby dresses
22	Women's raincoat
23	Boy's raincoat
24	Girl's raincoat
25	Umbrella
26	Other clothing
27	Repairs of clothing
28	Shoe-leather
29	Shoes-canvas
30	Sandals-leather
31	Sandals (rubber type)
32	Other footwear
33	Repair of footwear

B	FUEL/LIGHT
1	Gas
2	Kerosene
3	Diesel for Generator
4	Petrol for Generator
5	Charcoal
6	Firewood
7	Palm Kernel Oil
8	Other Liquid Fuel
9	Other Solid Fuel
10	Light globes/Tubes
11	Candles
12	Petrol
13	Diesel
14	Lubricants (oil greese, etc)

C	HEALTH EXPENDITURE
1	Health Insurance
2	Hospital Charges
3	Doctor Fees
4	Nurses Fees
5	Cold Remedy
6	Therapeutic equipment
7	Malaria Drug
8	Antibiotics
9	Operation Charges
10	Vitamins Supplements
11	Other Health Supplememnts

D	RENT
1	Monthly mortgage charges
2	Othe housing charges (excl. water, fuel and power)
3	Rent Imputed

E	TRANSPORT
1	Other Transport repairs
2	City Bus (Intra City Fares)
3	Rail Fare
4	Boat Fare
5	Other Fares
6	Motor vehicle Tyres
7	Motor Cycle Tyres
8	Bicycles Tyres
9	Tubes
10	Car battery
11	Spare parts (excl. tyres)
12	Motor vehicle tools
13	Inter state bus
14	Air
15	Storage

F	HOUSEHOLD GOODS
1	Soap and washing Powder
2	Toilet Soap
3	Bar Soap
4	Detergent Powder
5	Insecticides
6	Disinfectant, Cleaners
7	Matches
8	Toilet Paper
9	Other Non-durable goods
10	Bed sheets, bd cover, blanket
11	Blanket
12	Pillow
13	Curtain and other linen
14	Carpet
15	Rug
16	Other furniture and fixtures
17	Repairs of soft furnishings
18	Repairs of furniture and fittings
19	Electric kettle
20	Food processor e.g Blender
21	Coal pot
22	Non-electric app.
23	Other appliances (specify)
24	Repairs of appliances
25	Glassware
26	Chinaware
27	Plastic Products
28	Cutlery and other tableware
29	Pots, pans, mortar and others
30	Other Househols utensils

G	EDUCATION EXPENDITURE
1	Newspaper
2	Books
3	Magazine
4	Other Newspaper and Magazine
5	Education Insurance
6	Writing and drawing equipment

H	Water
1	Water Rates

I	OTHER SERVICES
1	Domestic Staff/Maid/Lawn's boy
2	Postal (Stamps)
3	Postal (Courier)
