

CONSUMER PRICE INDEX
(BASE PERIOD NOVEMBER 2009 = 100)

No. 558
September 2016

nbs
NATIONAL BUREAU OF STATISTICS

BRIEF METHODOLOGY:

The CPI measures the average change over time in prices of goods and services consumed by people for day-to-day living. The construction of the CPI combines economic theory, sampling and other statistical techniques using data from other surveys to produce a weighted measure of average price changes in the Nigerian economy. The weighting occurs to capture the importance of the selected commodities in the entire index. The production of the CPI requires skills of economists, statisticians, computer scientists, data collectors and others.

Key in the construction of the price index is the selection of the market basket of goods and services. Every month, 10,534 informants spread across the country provide price data for the computation of the CPI. The market items currently comprise of 740 goods and services regularly priced.

The first stage in the calculation of the CPI is the collection of prices on each item (740 goods and services) from outlets in each sector (rural or urban) for each state. Prices are then averaged for each item according to sector across the state. The next step is to use the average price to calculate the basic index for each commodity: The current year price of each commodity is compared with a base year's price to obtain a relative price.

Next we use the Laspeyres formula to compute an aggregated index for each class (which has a multitude of commodities which have similar consumption purposes): Here the sum of the product of weights (obtained from the expenditure survey) and relative prices for each item is divided by the sum of the weight of the items in that class, and the result multiplied by 100 gives the required

index number. This index number is still classified according to the urban or rural classification sector for each of the 36 states and the FCT. This yields 85 classes then 48 groups which are then reclassified into 12 Divisions to derive:

1. The country composite index
2. The Urban National index
3. The Rural National index
4. The Combined Urban and Rural State Composite index

The survey methodology generates 3774 all items indices for all states and the FCT.

This edition of the Statistical News contains the revised Consumer Price Index (CPI) based on Nigeria Living Standard Survey (NLSS) 2003/2004. The consumption expenditure data were re-valued to November 2009, which is the base period for the revised CPI.

The May 2003 and September 1985 based indices are being continued using factors derived from the new CPI. All of these indices will yield the same price change for any commodity group contained in all the series. A new sub index – Imported Food Index- is available in the revised CPI.

Note: The urban and rural indices were weighted with the ratio of their populations to the national i.e. 0.455 and 0.545 respectively to compute the composite indices at the 12 Classification of Individual Consumption by Purpose (COICOP) functions and all items levels. This may cause variance between a recalculated all items index using the weights published on table 2 and the published all items index because the published weights were computed only from consumption expenditure survey result. The following breakdown highlights a non-exhaustive list of the components of the current CPI:

FOOD AND NON ALCOHOLIC BEVERAGES

Food

Bread and cereals

Meat

Fish

Milk, cheese and eggs

Oils and fats

Fruit

Vegetables

Potatoes, Yam & other tubers

Food products n.e.c

Coffee, tea and cocoa

Soft drinks

ALCOHOLIC BEVERAGES, TOBACCO AND KOLA

Spirits

Wine

Tobacco

Narcotics

CLOTHING AND FOOTWEAR

Clothing materials, other articles of clothing

Garments

Cleaning, repair and hire of clothing

Shoes and other footwear

Repair and hire of footwear

HOUSING, WATER, ELECTRICITY, GAS

Actual and imputed rentals for housing

Water supply

Miscellaneous services relating to the dwelling

Electricity

Gas

Liquid fuel

Solid fuels

FURNISHINGS, HOUSEHOLD EQUIPMENT

Furniture and furnishings

Carpets and other floor coverings

Repair of Furniture

Household textiles

Major household appliances whether electric or not

Repair of household appliances

Glassware, tableware and household utensils

Non-durable household goods

Domestic services and household services

HEALTH

Pharmaceutical products

Medical services

Dental services

Paramedical services

Hospital services
TRANSPORT
Motor cars
Motor cycles
Bicycles
Vehicle spare parts
Fuels and lubricants for personal transportation
Maintenance and repair of personal transport
Passenger transport by road
Passenger transport by air
Passenger transport by sea and inland waterways
COMMUNICATION
Postal services
Telephone and telefax equipment
Telephone and telefax services
RECREATION AND CULTURE
Audio-visual, photographic and information processing equipment
Photographic development
Musical instrument
Recreational and sporting services
Games of chance
EDUCATION
Books & stationery
RESTAURANTS AND HOTELS
Catering services
Accommodation services
MISCELLANEOUS GOODS AND SERVICES
Hairdressing salons and personal grooming establishments
Appliances, articles and products for personal care
Jewellery, clocks and watches
Insurance
Other services.

ALL ITEMS INDEX

In September, the Consumer Price Index (CPI) which measures inflation increased by 17.9 percent (year-on-year), 0.24 percentage points higher than the rate recorded in August 2016 (17.6 percent). Increases were recorded all COICOP divisions which contribute to the Headline Index. Communication and Restaurants and Hotels recorded the lowest rates of increase of the 12 divisions, growing by 5.6 percent and 9.6 percent respectively.

The Food Sub Index increased by 16.6 percent (year-on-year) in September, up by 0.19 percent points from rate recorded in August (16.4 percent). A number of groups within the food index recorded falls in the rate of price increases, including Fish, which had previously been a key driver, as well as Oils and Fats, and Fruits.

Price movements recorded by the All Items less farm produce or Core sub-index increased by 17.7 percent (year-on-year) in September, up by 0.5 percent points from rates recorded in August (17.2 percent). During the month, the highest increases were seen in Clothing materials, other articles of clothing and clothing accessories, Garments, Shoes and other footwear, Books and stationeries, Jewelry, clocks and watches, and Motorcycles.

Energy and energy related prices continue to be the largest increases reflected in the Core sub-index. In September, the Core sub-index increased by 17.7% during the month, up by 0.5% points from rates recorded in August (17.2%). During the month, the highest increases were seen in the Electricity, Liquid Fuel (kerosene), Solid Fuels, and Fuels and Lubricants for Personal Transport Equipment groups.

COMPOSITION OF THE MAJOR INDEX AND SUB-INDICES

All Items	= Farm Produce + Core index
Food	= Farm Produce + Processed Foods
Core	= All Items – Farm Produce

It should be noted that the Headline Index is made up of the Core Index and Farm Produce items. As Processed Foods are included in both the Core and Food sub-indices; this Implies that these sub-indices are not mutually-exclusive.

On a month-on-month basis, the Headline index eased, increasing by 0.8 percent in September, down from 1.0 percent in August. The Urban Index rose by 19.5 percent (year-on-year) in September from 19.3 percent recorded in August and the Rural Index increased by 16.4 percent in September from 16.1 percent in August. On a month on month basis, both the Urban and Rural Index eased, increasing by 0.8 percent a piece.

The percentage change in the average composite CPI for the twelve-month period ending in September 2016 over the average of the CPI for the previous twelve-month period was 13.5 percent, higher from 12.7 percent recorded in August. The corresponding twelve-month year-on-year average percentage change for the urban index increased from 13.6 percent in August to 14.4 percent in September, while the corresponding rural index also increased from 12.0 percent in August to 12.6 percent in September.

FOOD INDEX

The Composite Food Index rose by 16.6 percent in September. The rise in the index was caused by increase in prices of Meat, Bread and cereals and Oil and Fats. On a month on month basis the Food index increased by 0.8%, a slower rate than that recorded in the previous month of 1.2%, continuing the downward trend witnessed since May 2016.

The average annual rate of change of the Food sub-index for the twelve-month period ending in September 2016 over the previous twelve-month average was 13.2 percent, 0.5 percent points from the average annual rate of change recorded in August (12.7 percent).

ALL ITEMS LESS FARM PRODUCE

The "All Items Less Farm Produce" or Core sub-index, which excludes the prices of volatile agricultural produce increased by 17.7 percent during the month, 0.5 percent points from 17.2 percent in August as all key divisions which contributes to the index increased.

On a month on month basis, this sub-index increased by 1.0%, and slight increase relative to the 0.9% recorded in the previous, which ends a three-month period of decline in the month on month growth rate. As in the previous month,

Electricity, Solid Fuels and Liquid fuels were the groups to record the highest price increases, although the Imported Food group remained high.

The average 12-month annual rate of rise of the index was recorded at 12.98 percent for the twelve-month period ending in September 2016, 0.7 percent points higher from the twelve-month rate of change recorded in August, which was 12.25 percent.
