

CONSUMER PRICE INDEX
(BASE PERIOD NOVEMBER 2009 = 100)

No. 559
October 2016

nbs
NATIONAL BUREAU OF STATISTICS

BRIEF METHODOLOGY:

The CPI measures the average change over time in prices of goods and services consumed by people for day-to-day living. The construction of the CPI combines economic theory, sampling and other statistical techniques using data from other surveys to produce a weighted measure of average price changes in the Nigerian economy. The weighting occurs to capture the importance of the selected commodities in the entire index. The production of the CPI requires skills of economists, statisticians, computer scientists, data collectors and others.

Key in the construction of the price index is the selection of the market basket of goods and services. Every month, 10,534 informants spread across the country provide price data for the computation of the CPI. The market items currently comprise of 740 goods and services regularly priced.

The first stage in the calculation of the CPI is the collection of prices on each item (740 goods and services) from outlets in each sector (rural or urban) for each state. Prices are then averaged for each item per sector across the state. The next step is to use the average price to calculate the basic index for each commodity: The current year price of each commodity is compared with a base year's price to obtain a relative price.

Next we use the Laspeyres formula to compute an aggregated index for each class (which has a multitude of commodities which have similar consumption purposes): Here the sum of the product of weights (obtained from the expenditure survey) and relative prices for each item is divided by the sum of the weight of the items in that class, and the result multiplied by 100 gives the required

index number. This index number is still classified according to the urban or rural classification sector for each of the 36 states and the FCT. This yields 85 classes then 48 groups which are then reclassified into 12 Divisions to derive:

1. The country composite index
2. The Urban National index
3. The Rural National index
4. The Combined Urban and Rural State Composite index

The survey methodology generates 3774 all items indices for all states and the FCT.

This edition of the Statistical News contains the revised Consumer Price Index (CPI) based on Nigeria Living Standard Survey (NLSS) 2003/2004. The consumption expenditure data were re-valued to November 2009, which is the base period for the revised CPI.

The May 2003 and September 1985 based indices are being continued using factors derived from the new CPI. These indices will yield the same price change for any commodity group contained in all the series. A new sub index – Imported Food Index- is available in the revised CPI.

Note: The urban and rural indices were weighted with the ratio of their populations to the national i.e. 0.455 and 0.545 respectively to compute the composite indices at the 12 Classification of Individual Consumption by Purpose (COICOP) functions and all items levels. This may cause variance between a recalculated all items index using the weights published on table 2 and the published all items index because the published weights were computed only from consumption expenditure survey result. The following breakdown highlights a non-exhaustive list of the components of the current CPI:

FOOD AND NON-ALCOHOLIC BEVERAGES

Food

Bread and cereals

Meat

Fish

Milk, cheese and eggs

Oils and fats

Fruit

Vegetables

Potatoes, Yam & other tubers

Food products n.e.c

Coffee, tea and cocoa

Soft drinks

ALCOHOLIC BEVERAGES, TOBACCO AND KOLA

Spirits

Wine

Tobacco

Narcotics

CLOTHING AND FOOTWEAR

Clothing materials, other articles of clothing

Garments

Cleaning, repair and hire of clothing

Shoes and other footwear

Repair and hire of footwear

HOUSING, WATER, ELECTRICITY, GAS

Actual and imputed rentals for housing

Water supply

Miscellaneous services relating to the dwelling

Electricity

Gas

Liquid fuel

Solid fuels

FURNISHINGS, HOUSEHOLD EQUIPMENT

Furniture and furnishings

Carpets and other floor coverings

Repair of Furniture

Household textiles

Major household appliances whether electric or not

Repair of household appliances

Glassware, tableware and household utensils

Non-durable household goods

Domestic services and household services

HEALTH

Pharmaceutical products

Medical services

Dental services

Paramedical services

Hospital services
TRANSPORT
Motor cars
Motor cycles
Bicycles
Vehicle spare parts
Fuels and lubricants for personal transportation
Maintenance and repair of personal transport
Passenger transport by road
Passenger transport by air
Passenger transport by sea and inland waterways
COMMUNICATION
Postal services
Telephone and telefax equipment
Telephone and telefax services
RECREATION AND CULTURE
Audio-visual, photographic and information processing equipment
Photographic development
Musical instrument
Recreational and sporting services
Games of chance
EDUCATION
Books & stationery
RESTAURANTS AND HOTELS
Catering services
Accommodation services
MISCELLANEOUS GOODS AND SERVICES
Hairdressing salons and personal grooming establishments
Appliances, articles and products for personal care
Jewellery, clocks and watches
Insurance
Other services.

ALL ITEMS INDEX

The Consumer Price Index (CPI) which measures inflation increased by 18.3 percent (year-on-year) in October 2016, 0.48 percent points higher from the rate recorded in September (17.9 percent). Increases were recorded across almost all major divisions which contribute to the Headline Index. Communication and Restaurants and Hotels recorded the slowest pace of growth in October, growing at 5.7 percent and 9.4 percent year-on-year respectively.

The Food Index rose by 17.1 percent (year-on-year) in October, up by 0.47 percent points from 16.6 percent recorded in September. During the month, all major food groups which contribute to the Food sub-index increased with Fruits recording the slowest pace of increase at 11.5 percent.

Price movements recorded by the All Items less farm produce or Core sub-index rose by 18.1 percent (year-on-year) in October, up by 0.4 percent points from rates recorded in September (17.7 percent). During the month, the highest increases were seen in Housing, Water, Electricity, Gas and Other Fuels as well as, fuels and lubricants for personal transport equipment and Education.

Significant price movement under the Core Sub-index was also recorded for Clothing and Footwear, which recorded an increase of 17.8 percent year on year. The groups with least growth pace recorded in October were Communication (5.7 percent), Restaurants and Hotels (9.4 percent) and Recreation and Culture (10.3 percent).

COMPOSITION OF THE MAJOR INDEX AND SUB-INDICES

All Items	= Farm Produce + Core index
Food	= Farm Produce + Processed Foods
Core	= All Items – Farm Produce

It should be noted that the Headline Index is made up of the Core Index and Farm Produce items. As Processed Foods are included in both the Core and Food sub-indices; this Implies that these sub-indices are not mutually-exclusive.

On a month-on-month basis, the Headline index rose by 0.83 percent in October, higher from the rate recorded in September (0.81 percent).

The Urban index rose by 19.9 percent (year-on-year) in October from 19.5 percent recorded in September, and the Rural index increased by 16.95 percent in October from 16.4 percent in September.

On month-on-month basis, the Urban index rose by 0.81 percent in October from 0.79 percent recorded in September, while the Rural index rose by 0.84 percent in October from 0.83 percent in September. The percentage change in the average composite CPI for the twelve-month period ending in October 2016 over the average of the CPI for the previous twelve-month period was 14.2 percent, higher from 13.5 percent recorded in September. The corresponding twelve-month year-on-year average percentage change for the urban index increased from 14.4 percent in September to 15.3 percent in October, while the corresponding rural index also increased from 12.6 percent in September to 13.3 percent in October.

FOOD INDEX

The Composite Food Index rose by 17.1 percent in October 2016. The rise in the index was caused by increase in prices of Bread and Cereal, Fish, and Meat.

On a month-on-month basis, the Food sub-index increase by 0.86 percent in October from 0.81 percent recorded in September.

The average annual rate of change of the Food sub-index for the twelve-month period ending in October 2016 over the previous twelve-month average was 13.82 percent, 0.58 percent points from the average annual rate of change recorded in September (13.24 percent).

ALL ITEMS LESS FARM PRODUCE

The "All Items Less Farm Produce" or Core sub-index, which excludes the prices of volatile agricultural produce increased by 18.1 percent during the month, 0.4 percent points from 17.7 percent recorded in September as all key divisions which contributes to the index increased.

On a month-on-month basis, the Core sub-index rose by 0.75 percent in October, down by 0.21 percent points

from 0.96 percent recorded in September. The highest increases were seen in Housing, Water, Electricity, Gas and Other Fuels as well as, fuels and lubricants for personal transport equipment and Education.

The average 12-month annual rate of rise of the index was recorded at 13.76 percent for the twelve-month period ending in October 2016, 0.78 percent points higher from the twelve-month rate of change recorded in September.
