# Key Highlights

·Of a labor force of 85.08 million in Q3 2017, 77.55 million are engaged in some sort of economic activity for at least an hour a week, (8.46 million-1-19 hours; 18.02 million-20-39 hours; 51.06million-above 40 hours), while 7.53 million are doing absolutely nothing. (Note we classify those working less than 20 hours a week and those doing absolutely nothing as unemployed, while we classify those working 20-39 hours or doing jobs not commensurate with their qualifications and skills as underemployed).

Out of 8.46 million persons that work within 1-19 hours a week, 1.83 million or 21.67% work for pay/ wage, 5.84 million or 69.03% are self-employed working in agriculture (4.18million or 49.44%) and non-agriculture related activities (1.65 million or 19.58%), 83,978 or 0.99% are paid apprentice and 703,240 or 8.31% are unpaid houseworkers.

·Under this working hours category, Agriculture with 59.02% or 5.01 million persons dominates followed by Trade (9.7%), Professional, Scientific and Technical Services (7.0%)

Out of 18.02 million persons that work within 20-39 hours a week and classified as underemployed, 3.77 million or 20.96% work for pay/ wage, 11.60 million or 64.36% are self-employed working in agriculture (6.62million or 36.72%) and non-agriculture related activities (4.98 million or 27.64%), 231,671 or 1.28% are paid apprentice and 2.41 million or 13.39% are unpaid houseworkers.

Under this working hours category, Agriculture with 52.20% or 9.40 million persons dominates followed by Trade (13.2%), and Other services (7.0%)

Out of 51.06 million persons that work above 40 hours a week and classified as employed full time, 14.10 million or 27.62% work for pay/ wage, 33.80 million or 66.33% are self-employed working in agriculture (18.85 million or 36.92%) and non-agriculture related activities (15.01 million or 29.41%), 547,330 or 1.07% are paid apprentice and 2.54 million or 4.98% are unpaid houseworkers.

Of a total employed (full time employed and underemployed which is 20 and above working hours a week) of 69.09 million, 17.88million or 25.88% work for pay/ wage, 45.47 million or 65.82% are self-employed working in agriculture (25.47 million or 36.87%) and non-agriculture related activities (20.0 million or 28.95%), 779,002 or 1.13% are paid apprentice and 4.95 million or 7.17% are unpaid houseworkers.

Employment in Nigeria (20 and above working hours) is therefore dominated by agriculture with 32.35 million persons or 46.8% of the total employed population of 69.09 million, followed by Trade with 10.01 million persons or 14.5%, Manufacturing with 4.92 million of 7.0%, Other Services with 5.59 million persons or 8.1%, Professional, Scientific and Technical Services with 4.34 million persons or 6.3%, Education with 2.52 million persons or 3.7% and transportation and storage with 2.39 million or 3.5%.

If we add those that work 1-19 hours and termed unemployed to the total employed population to increase the employed population from 69.09 million to 77.55 million, then 19.71 million or 25.42% work for pay/ wage, 51.3 million or 66.17% are self-employed working in agriculture (29.65 million or 38.24%) and non-agriculture related activities (21.65 million or 27.93%), 862,980 or 1.11% are paid apprentice and 5.65 million or 7.30% are unpaid houseworkers.

Under the above scenario, Agriculture still dominates economic activity with 48.2% followed by Trade (14.0%), Other Services (7.9%) and Manufacturing (7%)

Agricultural, Other Services, Professional, Scientific and Technical Services, Education, Transportation and Storage, Human Health and Social Services, Accommodation and Food Services, Arts Entertainment Creation and Administrative & Supportive Services presented higher shares of employment than the corresponding shares of nominal GDP in 2017 Q3 indicating that these activities were more labor intensive than other sectors.

Mining and Quarrying, Information and Communication, and Real Estate contributed to sizable shares of nominal GDP (11.17%, 8.69%, and 7.52% respectively) in 2017 Q3 while they only provided limited employment (0.17%, 0.55%, and 0.09% respectively).

More males worked full-time than female, while a higher percentage of female worked part-time between 20-39 hours and below 20 hours per week. The absolute number of male full-time workers (34.85 million) was more than twice the number of female full-time workers (16.21 million) in the third quarter of 2017.

A larger percentage of males to females were self-employed in farming/agriculture work, while a larger percentage of females were self-employed in non-farming/agriculture work. Agriculture dominated both female and male labor markets.

Most economic sectors including Agriculture, Other Services, Manufacturing, Professional, Scientific and Technical Services, Transportation and Storage, and Construction employed more male workers than female workers.

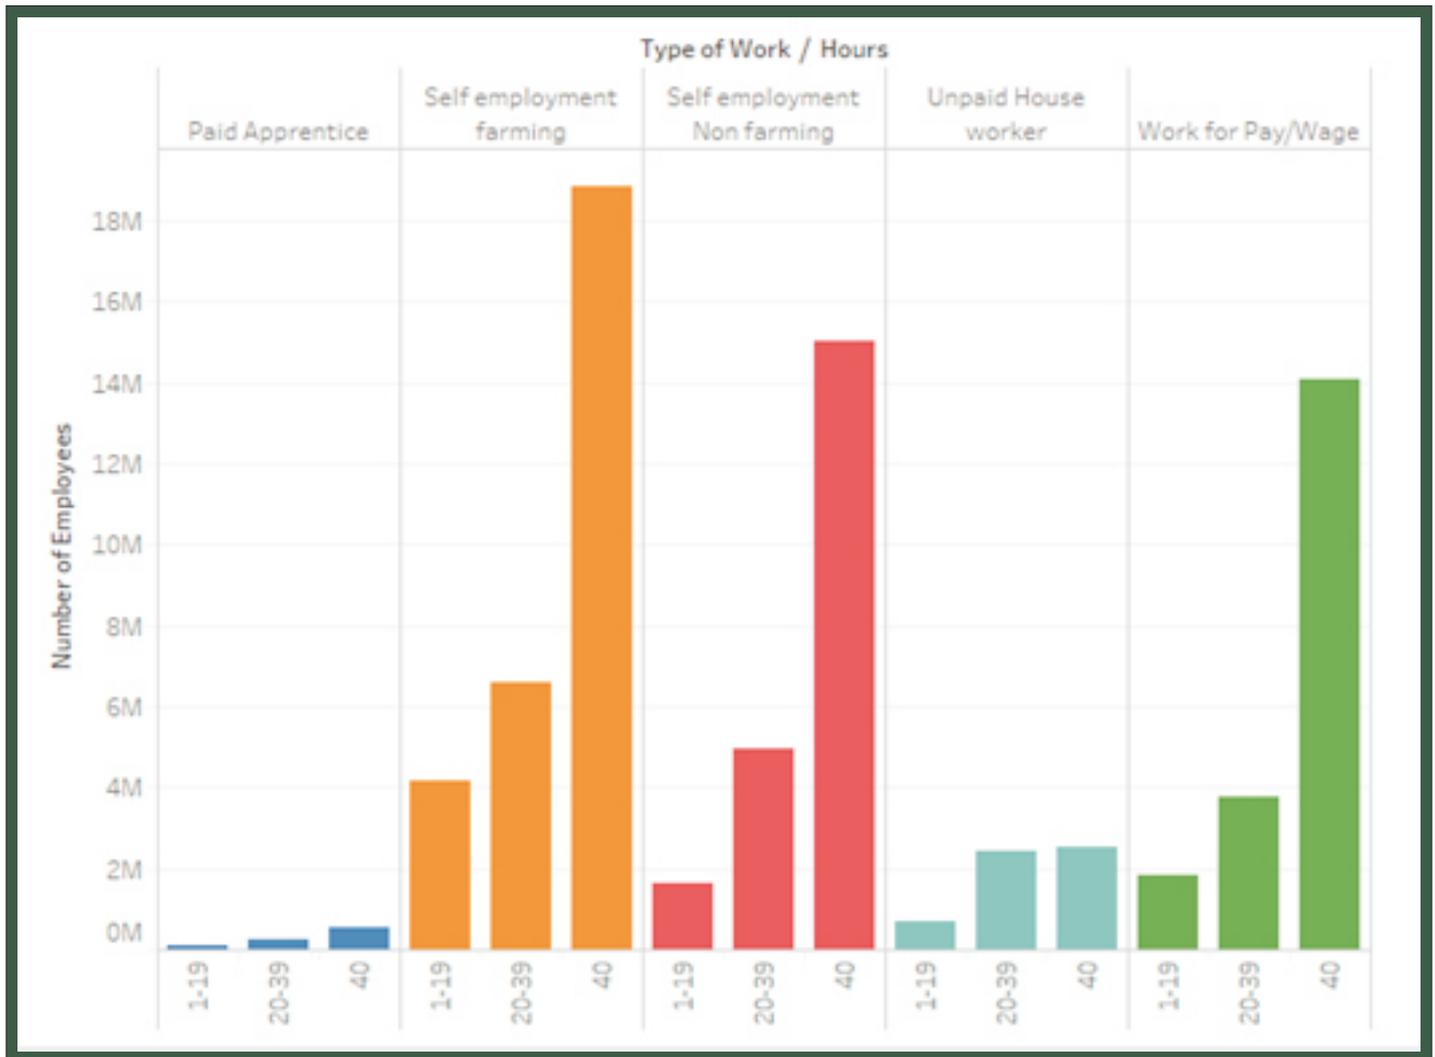

Aggregated into the Agriculture, Industry, and Services sectors; 48.19% of total employment from agriculture sector, with services sector at 44.67%, followed by, service sector at 7.14%.

Workers with higher educational backgrounds tended to work more hours per week and they were more likely to work for pay/wage. Over half of the labor population without formal education were engaged in self-employed farming/agriculture work.

72.18% of workers without formal education (16.67 million) were working in the Agricultural sector. Workers with secondary school education presented the largest percentage working in the trade sector (18.27% of the educational group or 4.83 million workers), followed by workers with primary and below-primary education, of 16.75% of the education group or 2.62 million workers.

# Employment by Type of Engagement in Nigeria

Among the 77.55 million labor population who were engaged in some extent of economic activity, 38.24% of them or 29.66 million were self-employed engaged in farming/agriculture, and 27.93% or 21.66 million were self-employed in non-farming/agriculture sectors. A total of 19.72 million were working for pay or wage, which was equivalent to 25.42% of the total workers in 2017 Q3. Paid apprentices and unpaid house workers constituted 7.30% and 1.11% of the total working force engaged for at least one hour a week.

According to the survey outcomes, more than half of the total workers in Nigeria (51.06 million or 65.84% of total) worked full-time, or 40 hours per week. Among all the full-time workers, 18.86 million or 24.31% of total workers were engaged in self-employment farming/agriculture, 15.02 million or 19.36 of total were self-employed in non-farming/agriculture work, and 14.10 million or 25.42% of total are working for pay/wage. 23.25% and 10.91% of total workers were participating in 20-39 hours work per week and 1-19 hours work per week respectively.

# Labor Distribution by Economic Sector

## Employment by Economic Sector and Working Hours

The labor market in Nigeria was dominated by the Agriculture sector, followed by Trade, Other Services, Manufacturing, and Professional, Scientific and Technical Services. These five sectors attract 83.40% of the total workers in Nigeria, equivalent to 64.67 million workers. Likewise, these five sectors also employed the majority of full-time workers (82.12% or total full-time workers and 41.93 million in absolute number).

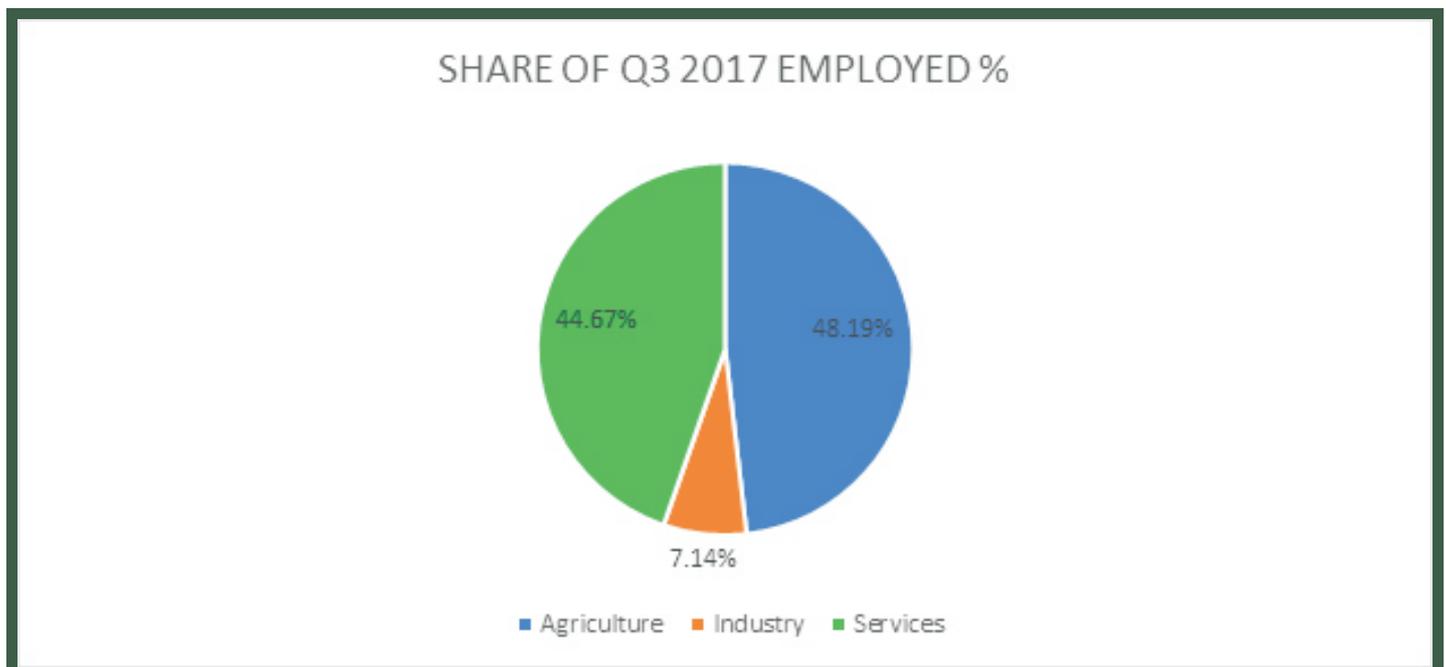

Until the third quarter of 2017, 48.19% of total workers in Nigeria were engaged in agricultural work, in which 29.59% of total workers worked full-time (40 hours per week), 12.13% worked 20-39 hours per week and 6.46% worked less than 20 hours per week. Trade, Other Services, and Manufacturing, and Professional, Scientific and Technical Services accounted for 13.97% (10.85 million), 7.89% (6.12 million), 6.89% (5.41 million), and 6.37% (4.94 million) of total working population respectively.

### Sectoral Employment vs. GDP composition

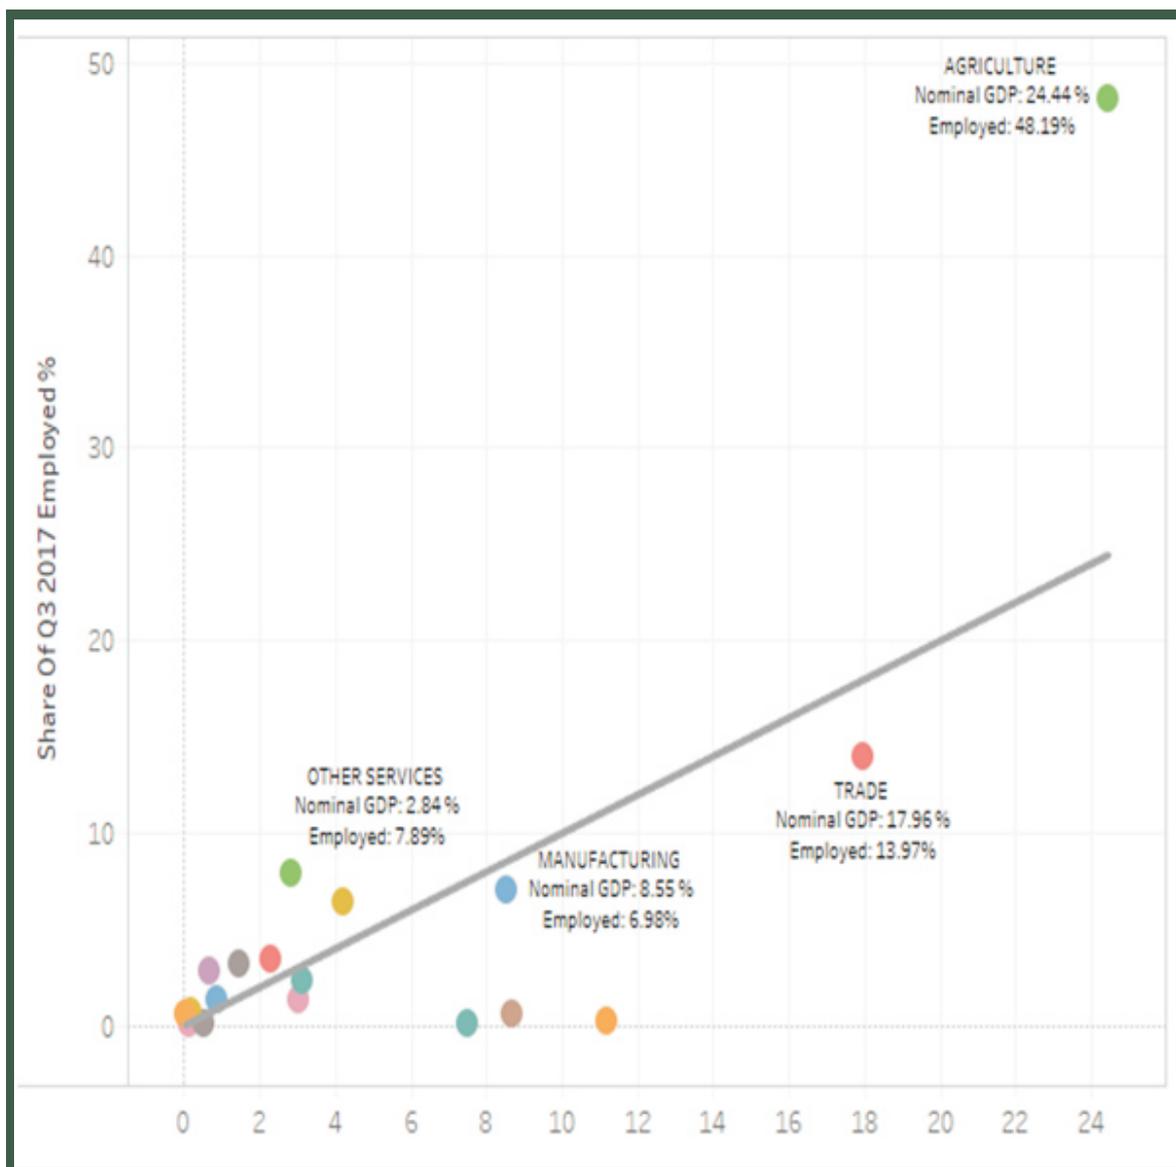

In 2017 Q3, 48.19% of employment were found in Agricultural sector, followed by 44.67% in Services. Only 7.14% of total workers were working in Industries. (Note this includes those working at least an hour a week).

In order to examine which sector was labor intensive by providing more shares of employment than the corresponding shares of production (GDP), the scatter plot below shows the distributions of share of employment and share of nominal GDP (2017 Q3) of different economic sectors. The grey reference line indicates positions where a sector's share of employment equals its share of nominal GDP in 2017 Q3.

As the graph shows, sectors including Agricultural, Other Services, Professional, Scientific and Technical Services, Education, Transportation and Storage, Human Health and Social Services, Accommodation and Food Services, Arts Entertainment Creation and Administrative & Supportive Services had higher shares of employment than their shares of nominal GDP in 2017 Q3. Therefore, these sectors stated above can be considered relatively more labor-intensive than other sectors.

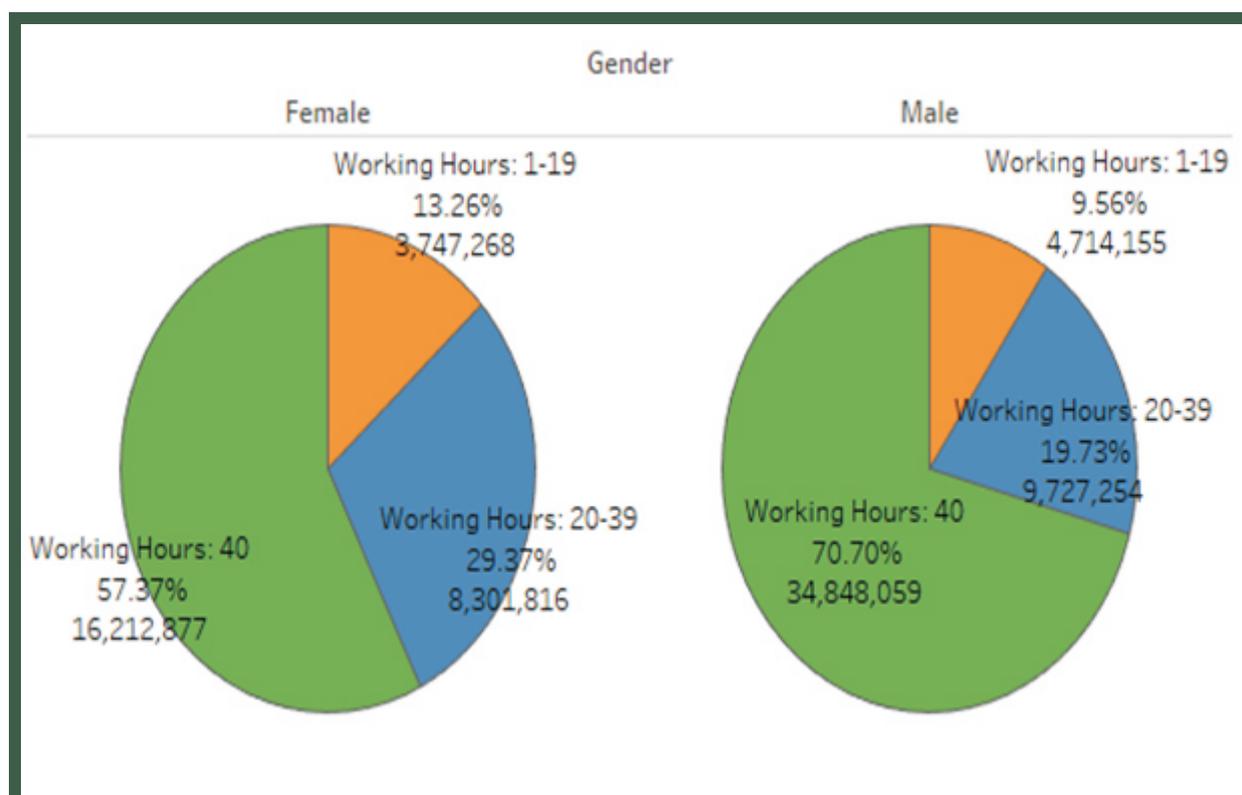

Two other leading economic sectors in Nigeria, Trade and Manufacturing, contributed to 17.96% and 8.55% of the third quarter's nominal GDP and provided 13.97% and 9.98% of total employment. Sectors including Mining and Quarrying, Information and Communication, and Real Estate contributed to sizable shares of nominal GDP (11.17%, 8.69%, and 7.52% respectively) in 2017 Q3 while they only provided limited employment (0.17%, 0.55%, and 0.09% respectively).

# Gender in Employment

## Employment by Gender and Working Hour

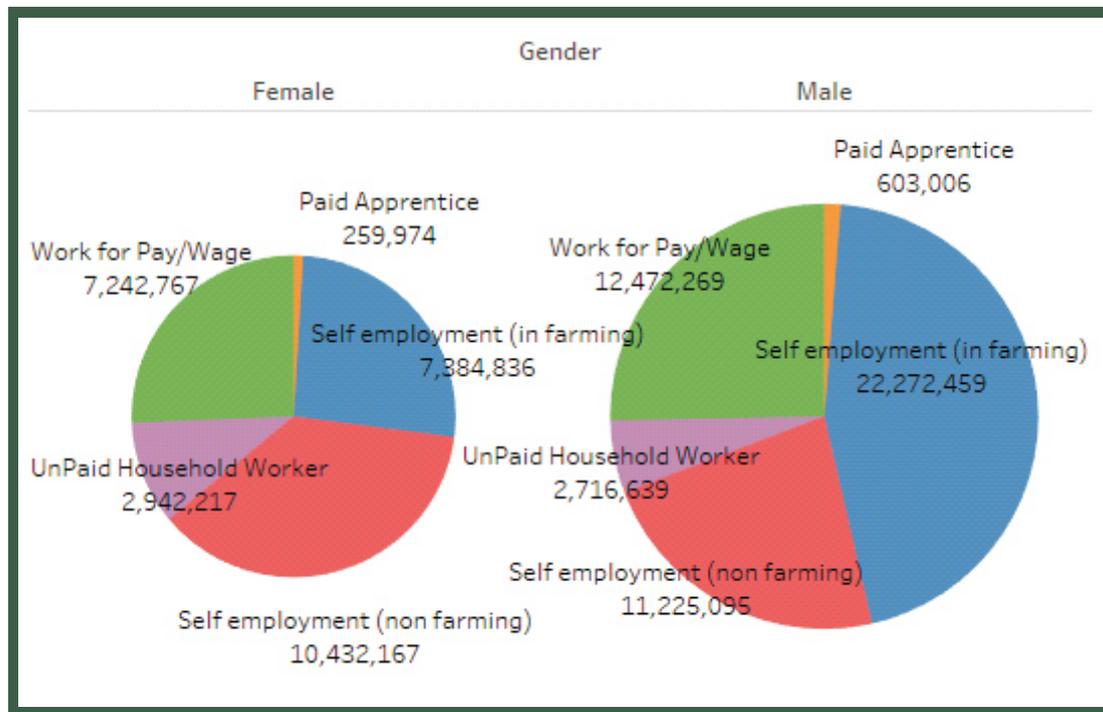

Among the 77.55 million employed for at least an hour a week, in Nigeria in 2017 Q3, 49.19 million (63.56%) were male and 28.26 million (36.44%) were female. Most male and female workers were working full-time, although a larger percentage of male workers (70.70%) were full-time workers compared with the percentage of female workers who were full-time workers (57.37%). The absolute number of full-time male workers (34.85 million) was more than twice of the number of full-time female workers (16.21 million) in the third quarter of 2017.

## Employment by Gender and Type of Engagement

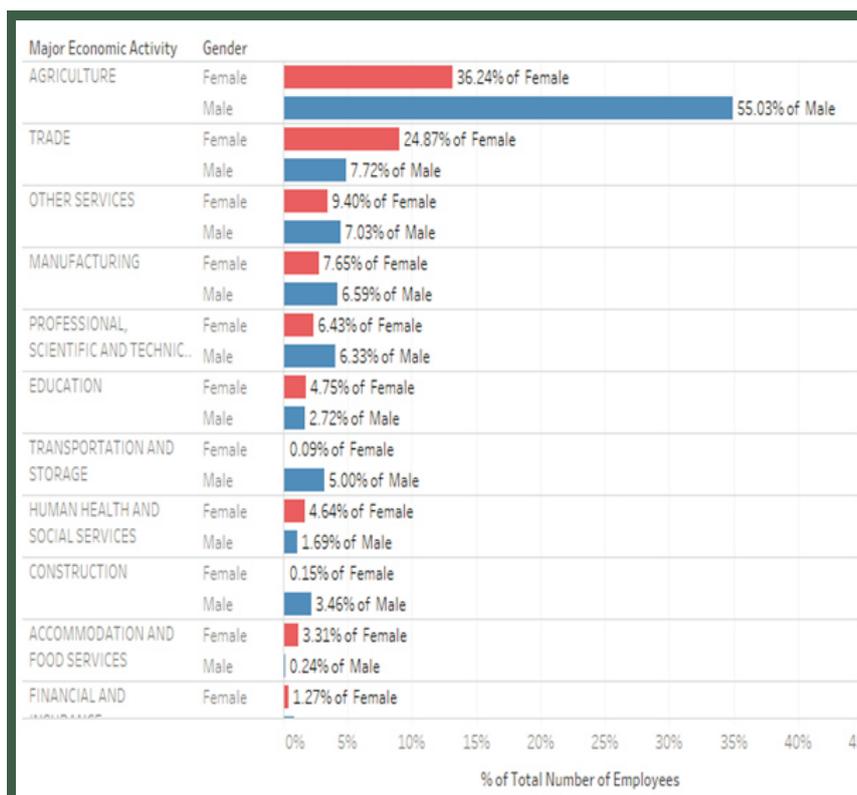

Male and female employments were similarly distributed across different types of work. Most female and male workers were engaged in farming/agriculture work and were self-employed, followed by non-farming/agriculture self-employment, and work for pay/wage. However, a larger percentage of male workers were engaged in self-employed farming/agriculture than female, and a larger percentage of female workers were engaged in self-employed non-farming/agriculture work compared with the percentage of male engaged the same type of work.

Similar percentages of male and female are working for pay/wage although the absolute number of male workers are much higher than the number of female workers in this work category.

### Employment by Gender and Economic Sector

Most economic sectors including Agriculture, Other Services, Manufacturing, Professional, Scientific and Technical Services, Transportation and Storage, and Construction employed more male workers than female workers. Specifically, more than half of the male workers (55.03% or 27.13 million) and 36.24% of female workers (10.24 million) were engaged in agricultural activities. Construction sector was completely dominated by male workers, with 1.70 male workers and only 0.41 million female workers registered in the third quarter. The bar graph below shows the percentages of females and males in different working sectors.

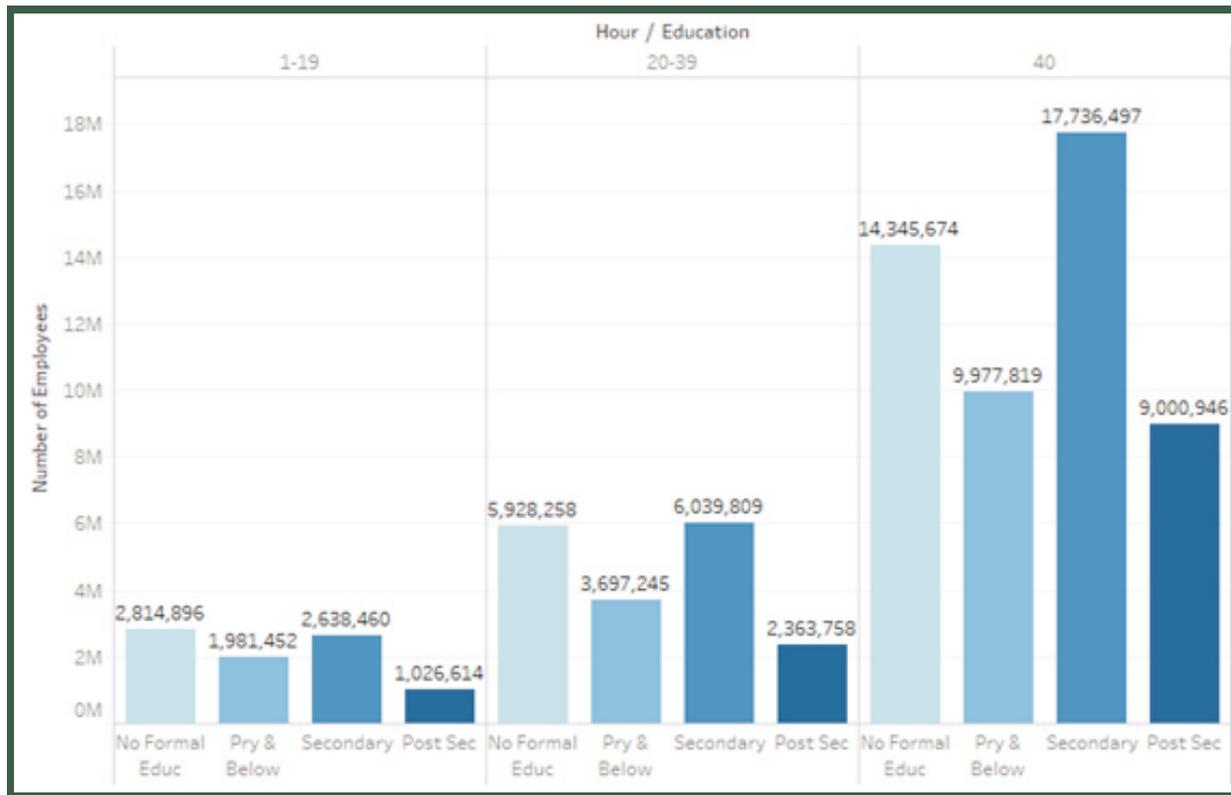

The following color table presents numbers of females and males working at different sectors (disaggregated by working hours). Male and female workers show similar patterns of hour disaggregation in different economic sectors as most sectors employ more full-time workers than 20-39 hours workers and 1-19 hours workers.

# Education in Employment

## Employment by Education and Working Hour

Workers with no formal education, primary & below primary education, secondary education and postgraduate education accounted for 29.77%, 20.19%, 34.06% and 15.98% of the total working force. Most workers in each educational group were performing full-time work.

However, a much larger percentage of workers with postgraduate education are engaged in full-time jobs (72.64% in this educational group) than the proportions of workers in other educational groups who are engaged in full-time jobs. In fact, there is almost a positive relationship between the level of education workers had and the number of hours they work per week, or how likely they are working full-time.

The table below shows the percentage of workers working for different number of hours per week in each educational group.

Hour	Education				Grand Total
	No Formal Educ	Pry & Below	Secondary	Post Sec	
1-19	12.19%	12.66%	9.99%	8.28%	10.91%

## Employment by Education and Work Type

Workers with different levels of educational background showed different preferences on the type of work they are performing in 2017 Q3. There appears to be a negative relationship between levels of education and the percentage of workers (within the sub-educational group) who were engaged in self-employed farming/agriculture work, and a positive relationship between levels of education and the percentage of workers within the sub-educational group who were working for pay/wage.

More than half of the workers (58.05% or 13.40 million) with no formal education were engaged in self-employed farming/agriculture work, and 21.70% of those without formal education were self-employed in non-farming/agriculture work. Only 10.16% of workers without educational background were working for pay/wage. In contrast, only 18.21% of the total workers (2.26 million) who have post-secondary education were self-employed and working in farming/agriculture/agriculture.

More than 6.7 million workers with post-secondary education were working for pay/wage which accounted for 54.50% of the workers with post-secondary education. Quite differently, only 29.03% of workers with secondary education, 13.92% of those with primary and below-primary education, and 10.16% of those without formal education were working for pay/wage.

Workers with secondary education showed the highest percentage of whom self-employed in non-farming/agriculture activities (34.58% or 9.13 million), followed by workers with primary or below-primary education (30.49% or 4.77 million) and workers with post-secondary education (22.10% or 2.74%). Workers with no formal education presented the lowest percentage who are self-employed in non-farming/agriculture sectors (21.70% or 5.01 million).

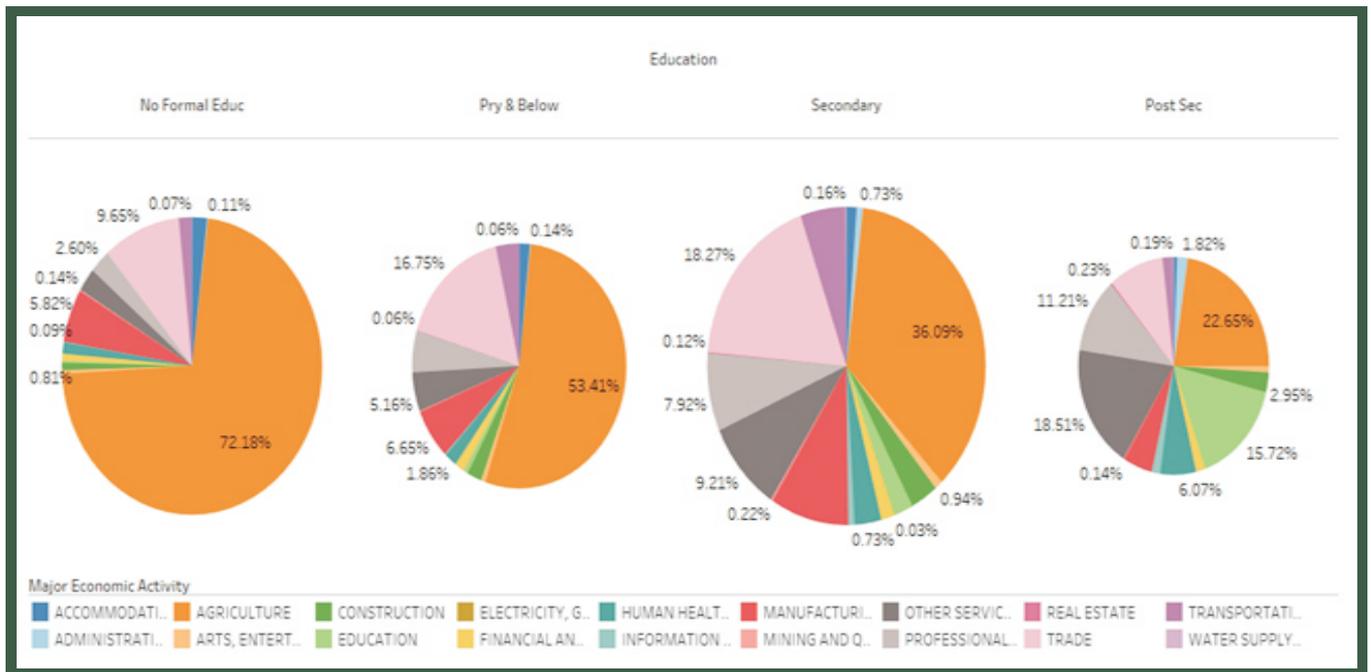

Education	Type of Work					Grand Total
	Paid Apprentice	Self employment (in farming)	Self employment (non farming)	UnPaid Household Worker	Work for Pay/Wage

Post Sec	0.90%	18.21%	22.10%	4.39%	54.40%	100.00%
Grand Total	1.11%	38.24%	27.93%	7.30%	25.42%	100.00%

## Employment by Education and Economic Sector

Workers with different levels of education also showed distinct economic sector distributions. Workers with less education were more likely to work in agricultural sector. Specifically, 72.18% of workers without formal education (16.67 million) were engaged in agricultural work. This sector attracted 53.41% of workers with primary and below-primary education (8.36 million) and 36.09% of workers with secondary education (9.53 million). Only 22.65% of workers with post-secondary education were working in agricultural sector.

Workers with secondary education presented the largest percentage who were working in trade sector, of 18.27% of the educational group or 4.83 million workers, followed by workers with primary and below-primary education, of 16.75% of the education group or 2.62 million workers.

Likewise, workers with secondary education were also active in manufacturing sector, professional, scientific and technical services and other services. Specifically, 2.41 million workers with secondary education found employment in manufacturing, accounting for 9.13% of those with this specific educational level; 2.09 million workers with secondary education found employment in professional, scientific and technical services, accounting for 7.92% of those with this specific educational level; 2.43 million workers with secondary education found employment in other services, accounting for 9.21% of those with this specific educational level.
