# Brief Methodology

The CPI measures the average change over time in prices of goods and services consumed by people for day-to-day living. The construction of the CPI combines economic theory, sampling and other statistical techniques using data from other surveys to produce a weighted measure of average price changes in the Nigerian economy. The weighting occurs to capture the importance of the selected commodities in the entire index. The production of the CPI requires skills of economists, statisticians, computer scientists, data collectors and others.

Key in the construction of the price index is the selection of the market basket of goods and services. Every month, 10,534 informants spread across the country provide price data for the computation of the CPI. The market items currently comprise of 740 goods and services regularly priced.

The first stage in the calculation of the CPI is the collection of prices on each item (740 goods and services) from outlets in each sector (rural or urban) for each state. Prices are then averaged for each item per sector across the state. The next step is to use the average price to calculate the basic index for each commodity: The current year price of each commodity is compared with a base year's price to obtain a relative price.

Next we use the Laspeyres formula to compute an aggregated index for each class (which has a multitude of commodities which have similar consumption purposes): Here the sum of the product of weights (obtained from the expenditure survey) and relative prices for each item is divided by the sum of the weight of the items in that class, and the result multiplied by 100 gives the required index number. This index number is still classified according to the urban or rural classification sector for each of the 36 states and the FCT. This yields 85 classes then 48 groups which are then reclassified into 12 Divisions to derive:

1. The country composite index
2. The Urban National index
3. The Rural National index
4. The Combined Urban and Rural State Composite index

The survey methodology generates 3774 all items indices for all states and the FCT.

This edition of the Statistical News contains the revised Consumer Price Index (CPI) based on Nigeria Living Standard Survey (NLSS) 2003/2004. The consumption expenditure data were re-valued to November 2009, which is the base period for the revised CPI.

The May 2003 and September 1985 based indices are being continued using factors derived from the new CPI. These indices will yield the same price change for any commodity group contained in all the series.

A new sub index - Imported Food Index - is available in the revised CPI.

Note: The urban and rural indices were weighted with the ratio of their populations to the national i.e. 0.455 and 0.545 respectively to compute the composite indices at the 12 Classification of Individual Consumption by Purpose (COICOP) functions and all items levels. This may cause variance between a recalculated all items index using the weights published on table 2 and the published all items index because the published weights were computed only from consumption expenditure survey result. The following breakdown highlights a non-exhaustive list of the components of the current CPI:

The following breakdown highlights a non-exhaustive list of the components of the current CPI:

| FOOD AND NON-ALCOHOLIC BEVERAGES      | Food   | Bread and cereals | Meat                                  | Fish                     | Milk, cheese and eggs       | Oils and fats |
|---------------------------------------|--|-------------------|---------------------------------------|--------------------------|-----------------------------|---------------|
|                                       |  |                   |                                       |                          |                             |               |
|                                       | Food   | Bread and cereals | Meat                                  | Fish                     | Milk, cheese and eggs       | Oils and fats |
| ALCOHOLIC BEVERAGES, TOBACCO AND KOLA | Fruit  | Vegetables        | Potatoes, Yam & other tubers          | Food products n.c.c      | Coffee, tea and cocoa       | Soft drinks   |
|                                       |  |                   |                                       |                          |                             |               |
|                                       | Fruit  | Vegetables        | Potatoes, Yam & other tubers          | Food products n.c.c      | Coffee, tea and cocoa       | Soft drinks   |
| CLOTHING AND FOOTWEAR                 | Spirits  | Wine              | Tobacco                               | Narcotics                |                             |               |
|                                       |  |                   |                                       |                          |                             |               |
|                                       | Spirits  | Wine              | Tobacco                               | Narcotics                |                             |               |
|                                       | Clothing materials, other articles of clothing | Garments          | Cleaning, repair and hire of clothing | Shoes and other footwear | Repair and hire of footwear |               |
|                                       |  |                   |                                       |                          |                             |               |
|                                       | Clothing materials, other articles of clothing | Garments          | Cleaning, repair and hire of clothing | Shoes and other footwear | Repair and hire of footwear |               |

# All Items Index

The Consumer Price Index (CPI) which measures inflation started the year 2018 increasing by 15.13 percent (year-on-year) in January 2018. This was 0.24 percent points lower than the rate recorded in December (15.37 percent) making it the twelfth consecutive disinflation (slowdown in the inflation rate though still positive) in headline year on year inflation since January 2017.

Increases were recorded in all COICOP divisions that yield the Headline Index.

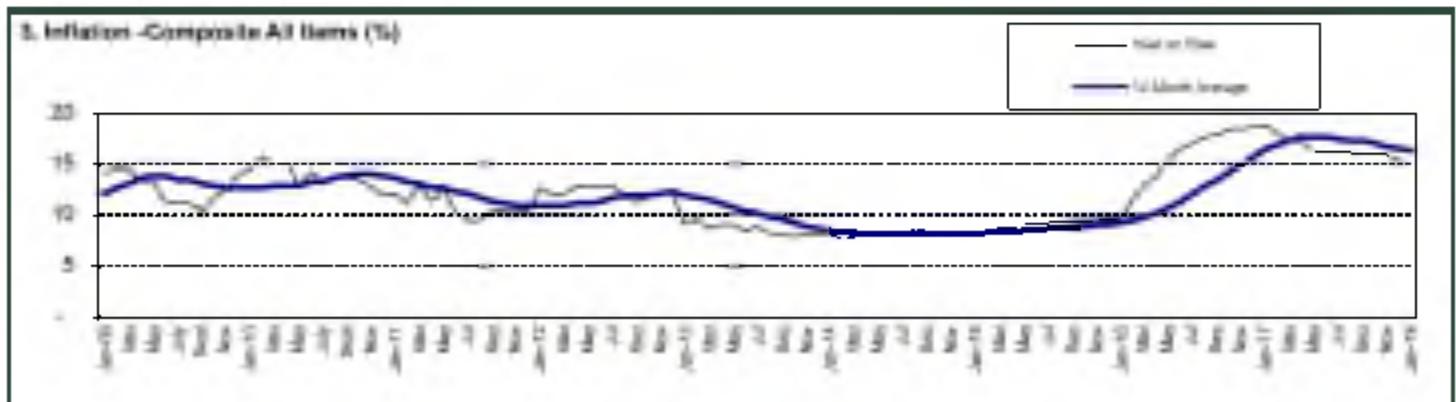

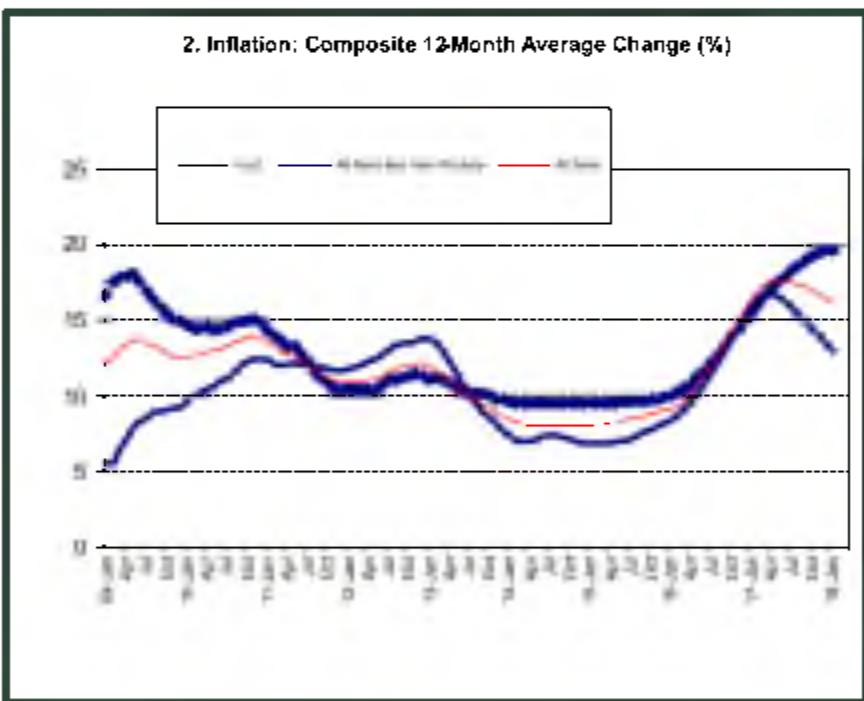

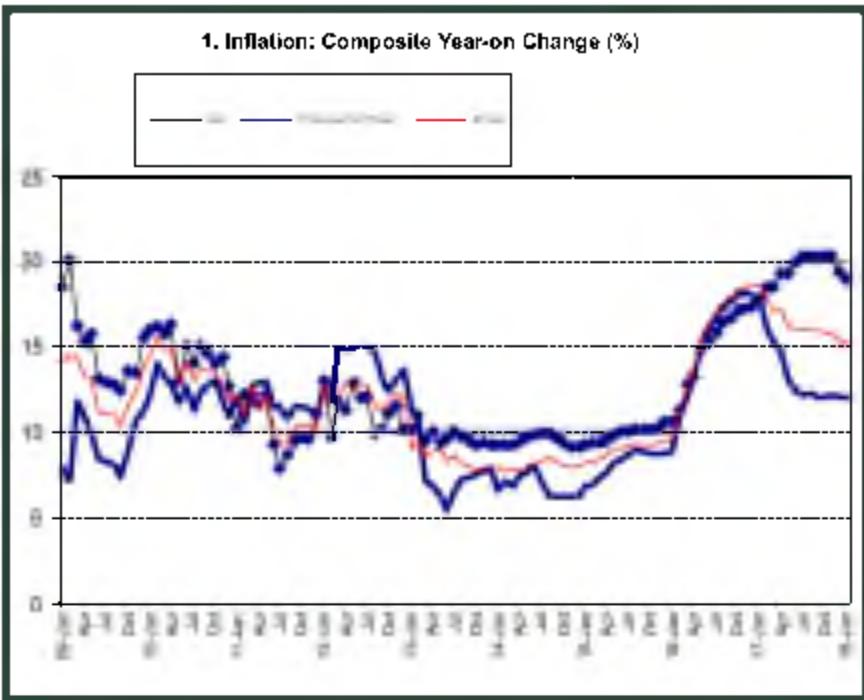

On a month-on-month basis, the Headline index increased by 0.80 percent in January 2018, 0.21 percent points higher from the rate of 0.59 percent recorded in December 2017.

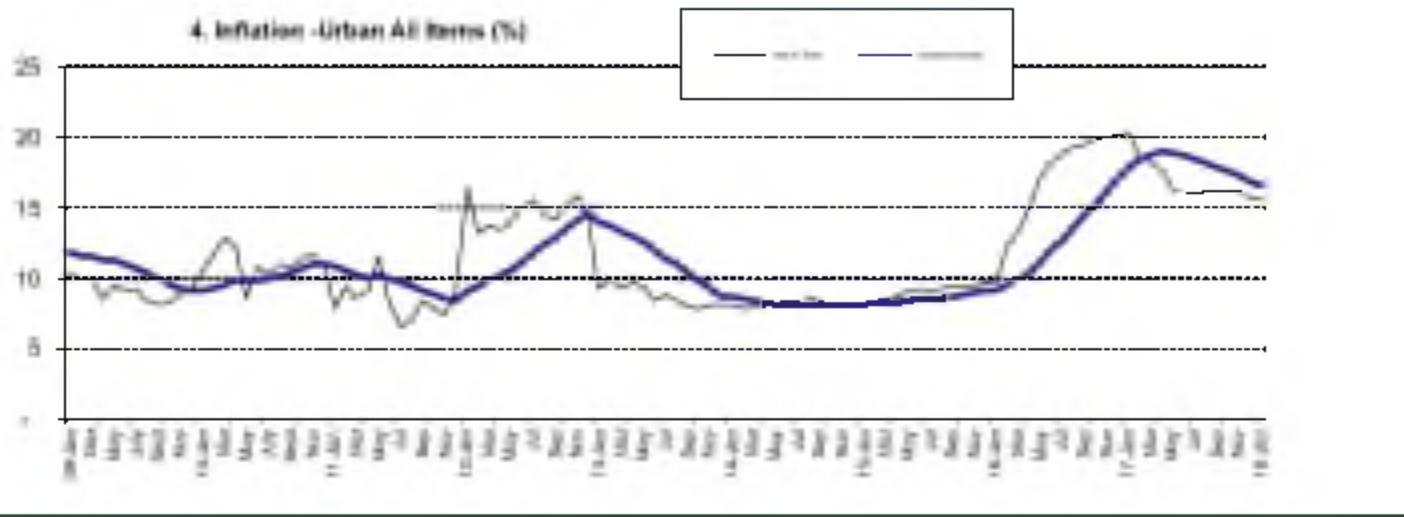

The percentage change in the average composite CPI for the twelve-month period ending January 2018 over the average of the CPI for the previous twelve-month period was 16.22 percent, showing 0.28 percent point lower from 16.50 percent recorded in December 2017.

The Urban inflation rate rose by 15.56 percent (year-on-year) in January 2018 from 16.78 percent recorded in December 2017, while the Rural inflation rate also eased by 14.76 percent in January 2018 from 15.02 percent in December 2017.

On month-on-month basis, the urban index rose by 0.83 percent in January 2018, up by 0.17 from 0.66 percent recorded in December 2017, while the rural index also rose by 0.77 percent in January 2018, up by 0.23 when compared with 0.54 percent in December 2017.

The corresponding twelve-month year-on-year average percentage change for the urban index is 16.55 percent in January 2018. This is less than 16.92 percent reported in December 2017, while the corresponding rural inflation rate in January 2018 is 15.89 percent compared to 16.10 percent recorded in December 2017.

## Food Index

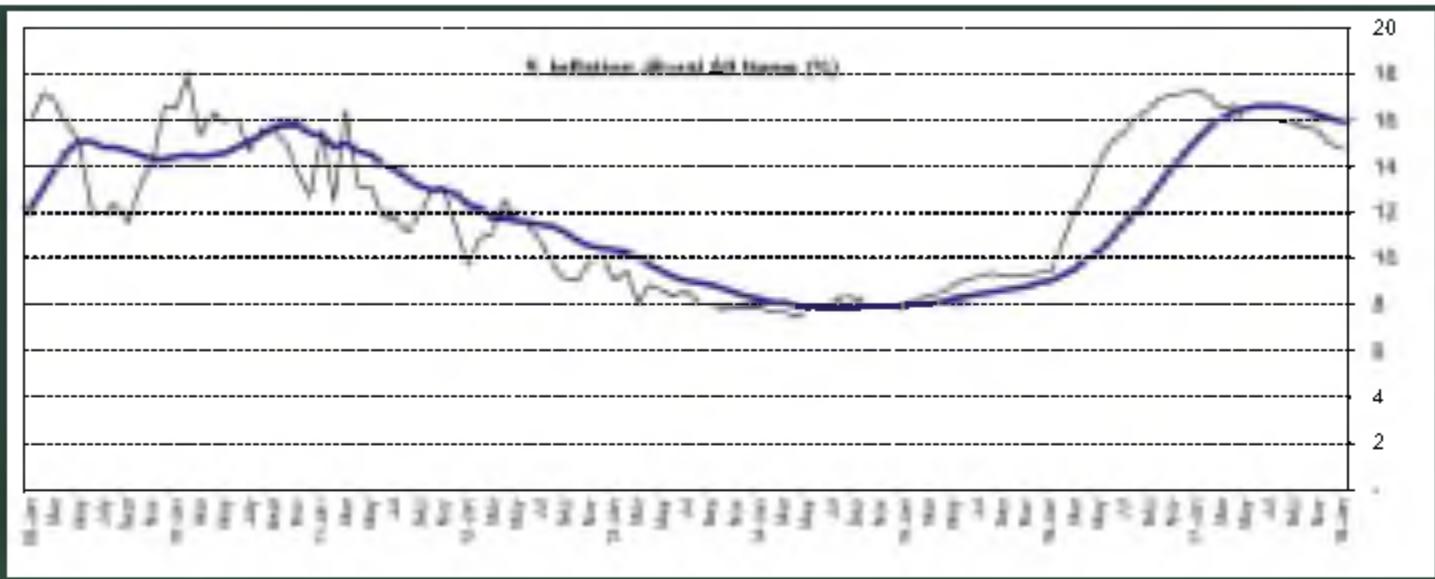

High year on year food prices and food price pressure continued into December though generally at a slower pace year on year.

The Food Index increased by 18.92 percent (year-on-year) in January 2017, down from the rate recorded in December (19.42 percent).

On a month-on-month basis, the Food sub-index increased by 0.87 percent in January 2018, down by 0.29 percent from 0.58 percent recorded in December.

The average annual rate of change of the Food sub-index for the twelve-month period ending January 2018 over the previous twelve-month average was 19.62 percent, 0.07 percent points from the average annual rate of change recorded in December 2017 (19.55) percent.

The rise in the food index was caused by increases in prices of imported food in general as well as bread and cereals, milk, cheese and eggs, Vegetables, Fish, Coffee tea and cocoa, meat, Potatoes, Yam and other tubers and Oil and fats.

## All Items Less Farm Produce/Core Inflation

The "All Items Less Farm Produce" or Core sub-index, which excludes the prices of volatile agricultural, stood during the month of January 2018 at 12.10 percent points, similar to rate recorded in December 2017.

On a month-on-month basis, the Core sub-index increased by 0.68 percent in January 2018, higher from 0.51 percent recorded in December.

The average 12-month annual rate of change of the index was 13.01 percent for the twelve-month period ending January 2018; this is 0.45 percent points lower than 13.46 percent recorded in December 2017.

The highest increases were recorded in prices of Fuel and lubricants for personal transport and transport equipment, Vehicle spare parts, Accommodation services, maintenance and repair of personal transport equipment, Appliances articles and products for personal care, hotels and restaurants, Hairdressing salons and personal grooming establishments, clothing materials and other articles of clothing, garments, non-durable household goods and solid fuels.

# State Profiles

In analyzing price movements under this section, note that the CPI is weighted by consumption expenditure patterns which differ across States. Accordingly, the weight assigned to a particular food or non-food item may differ from State to State making inter State comparisons of consumption basket inadvisable and potentially misleading.

## All Items Inflation

In January 2018, all items inflation on a year on year basis was highest in Kebbi (18.55%), Nasarawa (18.49%) and Bauchi (18.01%), while Delta (12.77%), Kogi States (13.28%) and Anambra (13.34%) recorded the slowest rise in headline Year on Year inflation.

On a month on month basis however, January 2018 all items inflation was highest in Kogi (2.72%), Bayelsa (2.39%) and Sokoto (1.68%), while Kebbi, Bauchi and Cross River recorded price deflation on a month on month all item basis in January 2018.

## Food Inflation

In January 2018, food inflation on a year on year basis was highest in Kwara (24.46%), Nasarawa (22.77%) and Bayelsa (22.60%), while Bauchi (13.34%), Anambra (14.63%) and Benue (14.78% recorded the slowest rise in food inflation.

On a month on month basis however, January 2018 food inflation was highest in Bayelsa (3.47%), Kogi (3.38%) and Nasarawa (2.26%), while Cross River, Kebbi, Yobe, Anambra and Delta all recorded food price deflation or negative inflation (general decrease in the general price level of goods and services or a negative inflation rate) in January 2018.

**Note:** Indices may not be used for inter-state price comparison because market baskets differ from state to state

**Table 5 Combined Urban And Rural State Consumer Price Index**

**Note:** Indices may not be used for inter-state price comparison because market baskets differ from state to state

# HEADLINE CPI IN JANUARY 2018 ROSE BY

**15.13%**

YEAR-ON-YEAR

(FROM 15.37% IN DECEMBER 2017)

**0.80%**

MONTH-ON-MONTH

(FROM 0.59% IN DECEMBER 2017)

## HIGHEST INCREASE RECORDED IN

Bread and Cereals

Vegetables

Meat

Potatoes, Yams and  
other Tubers

Coffee, Tea & Cocoa

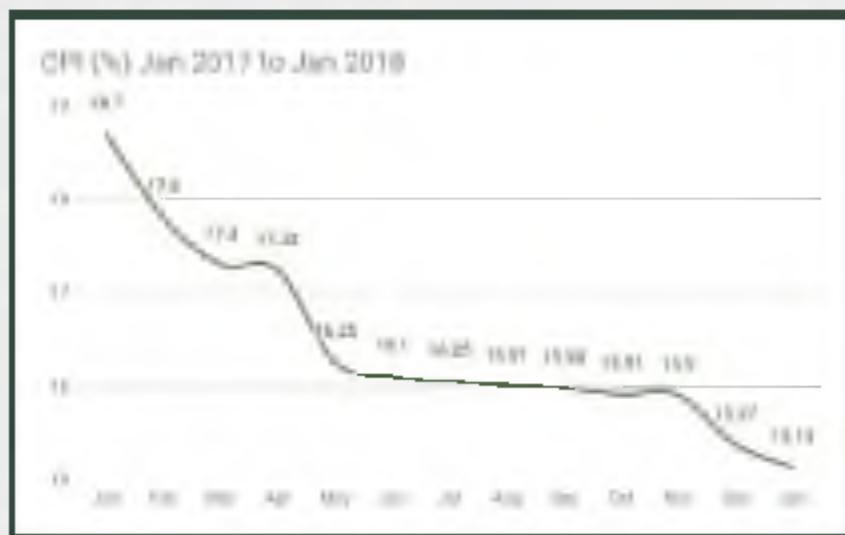

Milk, Cheese and Egg

Oil & Fats

Fish

The CPI (Consumer Price Index) measures the average change over time in prices of goods and services consumed by people for day-to-day living i.e it measures the inflation rate

# FOOD SUB-INDEX IN JANUARY 2018 ROSE BY

**18.92%**

YEAR-ON-YEAR  
(FROM 19.42% IN DECEMBER 2017)

**0.87%**

MONTH-ON-MONTH  
(FROM 0.58% IN DECEMBER 2017)

## HIGHEST INCREASE RECORDED IN

BREAD &  
CEREALS

VEGETABLES

MEAT

POTATOES,  
YAMS &  
OTHER TUBERS

COFFEE, TEA  
& COCOA

MILK, CHEESE  
& EGG

OIL & FATS

FISH

The CPI (Consumer Price Index) measures the average change over time in prices of goods and services consumed by people for day-to-day living i.e it measures the inflation

# CORE SUB-INDEX IN JANUARY 2018 ROSE BY

**12.10%**

YEAR-ON-YEAR  
(FROM 12.10% IN DECEMBER 2017)

**0.68%**

MONTH-ON-MONTH  
(FROM 0.51% IN DECEMBER 2017)

## HIGHEST INCREASE RECORDED IN

FUEL AND  
LUBRICANTS  
FOR PERSONAL  
TRANSPORT  
EQUIPMENT

VEHICLE SPARE  
PARTS

ACCOMMODATION  
SERVICES,  
MAINTENANCE AND  
REPAIR OF PERSONAL  
TRANSPORT EQUIPMENT

APPLIANCES ARTICLES  
AND PRODUCTS FOR  
PERSONAL CARE,  
HOTELS AND  
RESTAURANTS

HAIRDRESSING  
SALONS  
AND PERSONAL  
GROOMING  
ESTABLISHMENTS,

CLOTHING  
MATERIALS AND  
OTHER ARTICLES OF  
CLOTHING

GARMENTS

NON-DURABLE  
HOUSEHOLD  
GOODS

The CPI (Consumer Price Index) measures the average change over time in prices of goods and services consumed by people for day-to-day living i.e it measures the inflation rate

## URBAN INDEX IN JANUARY 2018 ROSE BY

**15.56%**

YEAR-ON-YEAR  
(FROM 16.78% IN DECEMBER 2017)

**0.83%**

MONTH-ON-MONTH  
(FROM 0.66% IN DECEMBER 2017)

## RURAL INDEX IN JANUARY 2018 ROSE BY

**14.76%**

YEAR-ON-YEAR  
(FROM 0.66% IN DECEMBER 2017)

**0.77%**

MONTH-ON-MONTH  
(FROM 0.54% IN DECEMBER 2017)

The CPI (Consumer Price Index) measures the average change over time in prices of goods and services consumed by people for day-to-day living i.e it measures the inflation rate
