Brief Methodology

The CPI measures the average change over time in prices of goods and services consumed by people for day-to-day living. The construction of the CPI combines economic theory, sampling and other statistical techniques using data from other surveys to produce a weighted measure of average price changes in the Nigerian economy. The weighting occurs to capture the importance of the selected commodities in the entire index. The production of the CPI requires skills of economists, statisticians, computer scientists, data collectors and others.

Key in the construction of the price index is the selection of the market basket of goods and services. Every month, 10,534 informants spread across the country provide price data for the computation of the CPI. The market items currently comprise of 740 goods and services regularly priced.

The first stage in the calculation of the CPI is the collection of prices on each item (740 goods and services) from outlets in each sector (rural or urban) for each state. Prices are then averaged for each item per sector across the state. The next step is to use the average price to calculate the basic index for each commodity: The current year price of each commodity is compared with a base year's price to obtain a relative price.

Next we use the Laspeyres formula to compute an aggregated index for each class (which has a multitude of commodities which have similar consumption purposes): Here the sum of the product of weights (obtained from the expenditure survey) and relative prices for each item is divided by the sum of the weight of the items in that class, and the result multiplied by 100 gives the required index number. This index number is still classified according to the urban or rural classification sector for each of the 36 states and the FCT. This yields 85 classes then 48 groups which are then reclassified into 12 Divisions to derive:

1. The country composite index
2. The Urban National index
3. The Rural National index
4. The Combined Urban and Rural State Composite index

The survey methodology generates 3774 all items indices for all states and the FCT.

This edition of the Statistical News contains the revised Consumer Price Index (CPI) based on Nigeria Living Standard Survey (NLSS) 2003/2004. The consumption expenditure data were re-valued to November 2009, which is the base period for the revised CPI.

The May 2003 and September 1985 based indices are being continued using factors derived from the new CPI. These indices will yield the same price change for any commodity group contained in all the series.

A new subindex – Imported Food Index- is available in the revised CPI.

Note: The urban and rural indices were weighted with the ratio of their populations to the national i.e. 0.455 and 0.545 respectively to compute the composite indices at the 12 Classification of Individual Consumption by Purpose (COICOP) functions and all items levels. This may cause variance between a recalculated all items index using the weights published on table 2 and the published all items index because the published weights were computed only from consumption expenditure survey result. The following breakdown highlights a non-exhaustive list of the components of the current CPI:

The following breakdown highlights a non-exhaustive list of the components of the current CPI:

FOOD AND NON-ALCOHOLIC BEVERAGES						
	Food	Bread and cereals	Meat	Fish	Milk, cheese and eggs	Oils and fats
ALCOHOLIC BEVERAGES, TOBACCO AND KOLA						
	Fruit	Vegetables	Potatoes, Yam & other tubers	Food products n.e.c	Coffee, tea and cocoa	Soft drinks
CLOTHING AND FOOTWEAR						
	Clothing materials, other articles of clothing	Garments	Cleaning, repair and hire of clothing	Shoes and other footwear	Repair and hire of footwear	

HOUSING, WATER, ELECTRICITY, GAS

Actual and imputed rentals for housing

Water supply

Miscellaneous services relating to the dwelling

Electricity

Gas

Liquid fuel

Solid fuels

FURNISHINGS, HOUSEHOLD EQUIPMENT

Furniture and furnishings

Carpets and other floor coverings

Repair of Furniture

Household textiles

Major household appliances whether electric or not

Repair of household appliances

Glassware, tableware and household utensils

Non-durable household goods

Domestic services and household services

HEALTH

Pharmaceutical products

Medical services

Dental services

Paramedical services

Hospital services

TRANSPORT

Motor cars

Motor cycles

Bicycles

Vehicle spare parts

Fuels and lubricants for personal transportation

Maintenance and repair of personal transport

Passenger transport by road

Passenger transport by air

Passenger transport by sea and inland waterways

COMMUNICATION

Postal services

Telephone and telefax equipment

Telephone and telefax services

RECREATION AND CULTURE

Audio-visual, photographic and information processing equipment

Photographic development

Musical instrument

Recreational and sporting services

Games of chance

EDUCATION

Books & stationery

RESTAURANTS AND HOTELS

Catering services

Accommodation services

MISCELLANEOUS GOODS AND SERVICES

Hairdressing salons and personal grooming establishments

Appliances, articles and products for personal care

Jewellery, clocks and watches

Insurance

Other services

All Item Index

The Consumer Price Index (CPI) which measures inflation increased by 12.48 percent (year-on-year) in April 2018, this is 0.86 percent points less than the rate recorded in March 2018 (13.34) percent and represents the fifteenth consecutive disinflation since January 2017.

Increases were recorded in all COICOP divisions that yield the Headline Index.

On a month-on-month basis, the Headline index increased by 0.83 percent in April 2018, down by 0.01 percent points from the rate recorded in March 2018.

The percentage change in the average composite CPI for the twelve-month period ending April 2018 over the average of the CPI for the previous twelve-month period was 15.20 percent, showing 0.40 percent.

The Urban inflation rate eased by 12.89 percent (year-on-year) in April 2018 from 13.75 percent recorded in March, while the Rural inflation rate also eased by 12.13 percent in April 2018 from 12.99 percent in March.

On month-on-month basis, the urban index rose by 0.85 percent in April 2018, down by 0.01 from 0.86 percent recorded in March, while the rural index also rose by 0.82 percent in April 2018, recording no change from the figure obtained in March (0.82) percent.

The corresponding twelve-month year-on-year average percentage change for the urban index is 15.47 percent in April 2018. This is less than 15.87 percent reported in March, while the corresponding rural inflation rate in April 2018 is 14.95 percent compared to 15.34 percent recorded in March.

4. Inflation -Urban All Items (%)

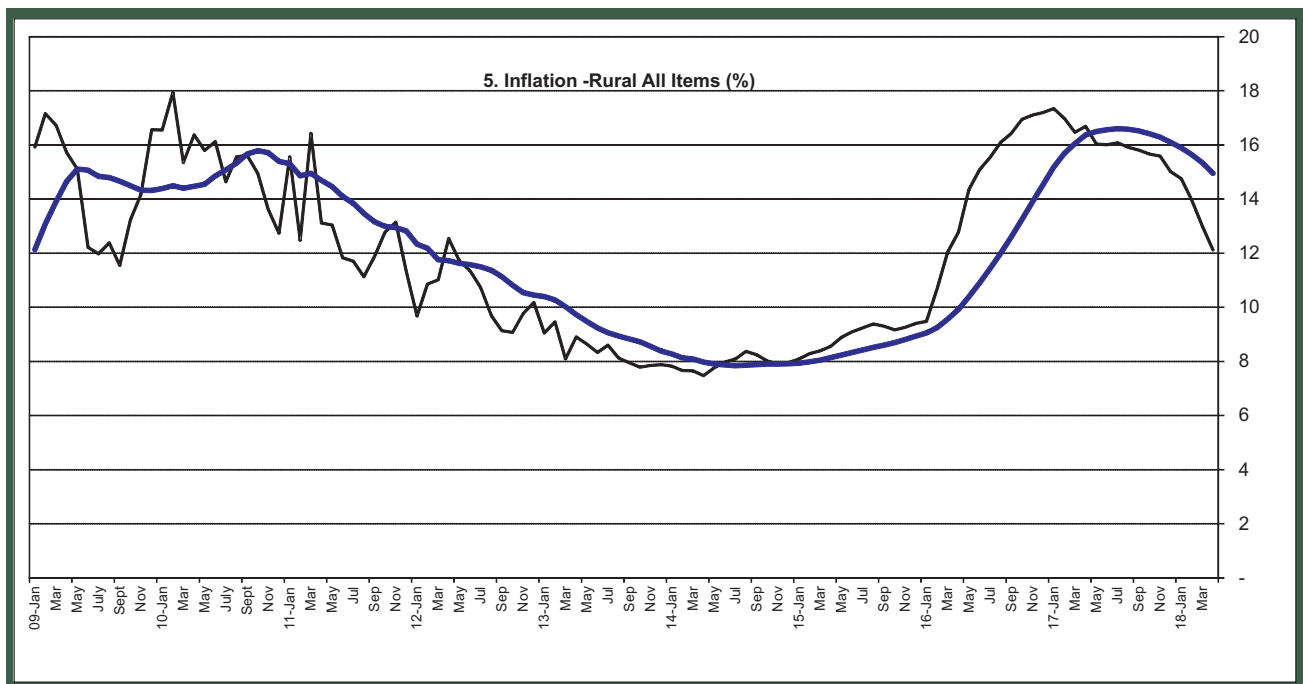

Food Index

The Composite Food Index rose by 14.80 percent in April 2018. The rise in the index was caused by increases in prices of Potatoes, yam and other tubers, Fish, Bread and cereals, Oil and fats, Vegetables and Meat.

On a month-on-month basis, the Food sub-index increased by 0.91 percent in April 2018, up by 0.01 percent points from 0.90 percent recorded in March.

The average annual rate of change of the Food sub-index for the twelve-month period ending April 2018 over the previous twelve-month average was 18.89 percent, 0.4 percent points from the average annual rate of change recorded in March (19.29) percent.

The rise in the food index was caused by increases in prices of Potatoes, Potatoes, Yam and Other Tubers, Fish, Bread and cereals, Oil and fats, Vegetables, Coffee, tea and cocoa, Meat, Milk, cheese and eggs.

All Items Less Farm Produce

The "All Items less Farm Produce" or Core inflation, which excludes the prices of volatile agricultural produce is 10.9 percent in April 2018, down by 0.3 percent points from the rate recorded in March (11.2) percent.

On a month-on-month basis, the Core sub-index increased by 0.87 percent in April 2018, this was up by 0.03 percent when compared with 0.84 percent recorded in March.

The average 12-month annual rate of change of the index was 12.02 percent for the twelve-month period ending April 2018; this is 0.31 percent points lower than 12.33 percent recorded in March.

The highest increases were recorded in prices of Fuel and lubricants for personal transport equipment, Vehicle spare parts, Garments and Clothing materials and other articles of clothing and clothing accessories, Hairdressing salons and personal grooming establishment, Paramedical services and Pharmaceutical products

State Profiles

In analyzing price movements under this section, note that the CPI is weighted by consumption expenditure patterns which differ across States. Accordingly, the weight assigned to a particular food or non-food item may differ from State to State making inter State comparisons of consumption basket inadvisable and potentially misleading

All Items InflationIn April 2018, all items inflation on a year on year basis was highest in Kebbi (15.94%), Rivers (15.01%) and Yobe (14.93%), while Kwara (9.77%), Delta (10.46%) and Benue (11.19%) recorded the slowest rise in headline Year on Year inflation.

On a month on month basis however, April 2018 all items inflation was highest in Kebbi (1.73%), Rivers (1.72%) and Lagos (1.60%), while Bauchi (0.01%) recorded slowest rise and Kaduna and Kano recorded price deflation on a month on month all item basis in April 2018.

Food InflationIn April 2018, food inflation on a year on year basis was highest in Kebbi (17.92%), Bayelsa (17.85%) and Nasarawa (17.71%), while Benue (10.95%), Kogi (12.27%) and Gombe (12.46%) recorded the slowest rise in food inflation.

On a month on month basis however, April 2018 food inflation was highest in Lagos (2.49%), Ekiti and Kebbi (2.0%) and Rivers (1.98%), while Benue, Borno, Kaduna, Kano and Nasarawa all recorded food price deflation or negative inflation (general decrease in the general price level of goods and services or a negative inflation rate) in April 2018.
