STATISTICAL REPORT ON WOMEN AND MEN IN NIGERIA

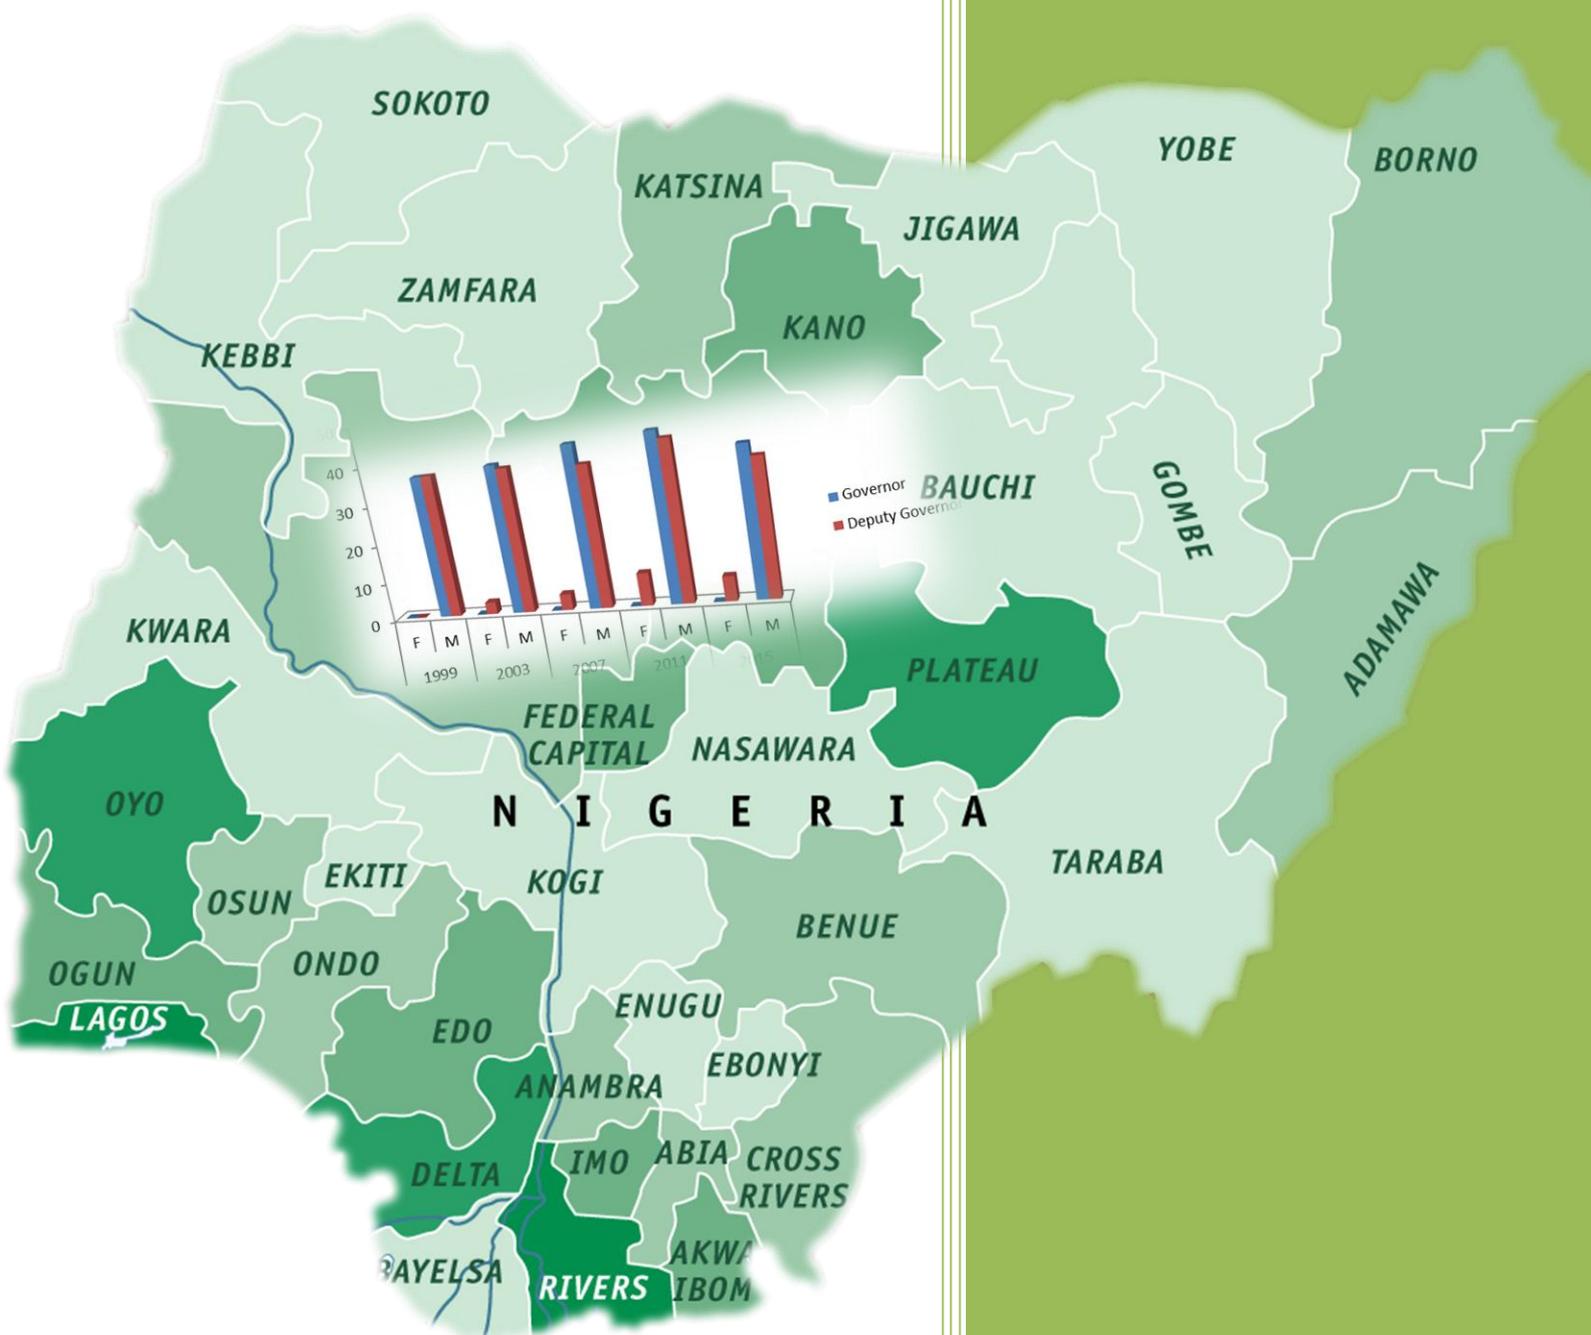

TABLE OF CONTENTS

TABLE OF CONTENTS	ii
PREFACE	vii
EXECUTIVE SUMMARY	ix
LIST OF TABLES	xiii
LIST OF FIGURES	xv
LIST OF ACRONYMS	xvi
CHAPTER 1: POPULATION	1
Key Findings	1
Introduction	1
A. General Population Patterns	1
1. Population and Growth Rate	1
2. Distribution of Population of the Elderly (60+ Years) by Year and Sex	2
CHAPTER 2: HEALTH	3
Key Findings	3
Introduction	3
A. Life Expectancy at Birth	4
B. HIV and AIDS	5
1. Percentage Distribution of HIV Patients by Year and Sex	5
2. Percentage Distribution of HIV Patients that have Access to Antiretroviral Treatment by Year and Sex	6
C. Reproductive Health	7
1. Total Fertility Rate	7
2. Adolescent Fertility	8
3. Antenatal Care	9
3. Contraceptive Use	11
D. Maternal Mortality Rate	12
E. Early Childhood Mortality Rate	13
1. Neonatal Mortality Rate	13
2. Infant and Under 5 Mortality	14
3. Child Mortality Rate	15
F. Health Personnel	15
Doctors and Dentists	15
CHAPTER 3: EDUCATION	16
Key Findings	16

Introduction	16
A. Educational Outcomes	17
1. Literacy	17
B. Participation in Education	17
1. Enrolment in Primary Education	17
2. Secondary Education	18
2.1: Percentage Distribution of Enrolment in Junior Secondary Schools by Sex, 2014 - 2016	18
2.2: Percentage Distribution of Enrolment in Senior Secondary Schools by Sex, 2014 - 2016	19
2.3. Completion rate	19
2.4: Distribution of West Africa Senior Secondary Certificate Examination (WASSCE) by Year and Sex	20
2.5: Distribution of West Africa Senior Secondary Certificate Examination (WASSCE) by Sex (November/December 2014 - 2017)	21
2.6: Distribution of NECO (SSC) Examination by Year and Sex (June/July)	22
2.7 Distribution of NECO (SSC) Examination by Year and Sex (Nov/Dec)	23
3. Tertiary Education	24
3.1 Enrolment and New Entrance into Nigerian Colleges of Education (2014/2015 – 2016/2017)	24
3.2 Enrolment and Out-Turn in Colleges of Health Science (2014/2015)	25
3.3 Enrolment and Out-Turn in Polytechnics (2013/2014 and 2014/2015)	26
3.4: Student’s Enrolment in Nigerian Universities (2017)	26
C. Teaching Staff/Non-Teaching Staff	27
1. Percentage of Teaching Staff in Institutions by Sex (2014/15 – 2016/17)	27
2. Non-Academic Staff of Federal Colleges of Education (2014/2015 - 2016/2017)	28
3. Academic and Non-Academic Staff of Nigerian Universities (2017)	29
4. Percentage Distribution of Professors in Nigerian Universities (2017)	29
CHAPTER 4: WORK	30
Key Findings	30
Introduction	30
A. Women and Men in State and Federal Civil Service	30
1. Employment in State Civil Service by Category	30
2: Distribution of Employment in State Civil Service by Grade Level, Year and Sex	32
3. Employment in Federal MDAs by Grade Level and Sex (2015 – 2017)	33
CHAPTER 5: POWER AND DECISION MAKING	34
Key Findings	34
Introduction	34

A. Politics and Governance	34
1. Executives	35
1a. Representation in Executive Arm of Government	35
1b. Appointive Ministerial Political Position	35
1c. Secretary to the Government of the Federation	36
1d. Representation at State Executives	36
1e. Representation at the Local Government Executive.....	37
2. Legislators.....	38
2a. Representation at the National Parliament	38
2b. Representation in State Houses of Assembly.....	40
2c. Representation of Principal Officers in States Assembly by Positions, Year and Sex	40
2d. Representation as Councilors at the Local Government.....	41
3. Judiciary	42
3a. Representation of Judges at Federal Courts.....	42
3b. National Judicial Officers by Position, Year and Sex	43
B. Civil and Public Service	43
1. Top Government Officials and Senior Administrators	43
CHAPTER 6: VIOLENCE AGAINST WOMEN/CRIME	45
<i>Key Findings.....</i>	<i>45</i>
Introduction.....	45
A. Prevalence and Incidence of Violence Against Women and Children	46
1. Rape Incidence	46
2. Female Genital Mutilation/Cutting (FGM/C)	47
B. Prison Inmates/Offenders.....	47
1. Number of Prison Inmates by Sex (2012 – 2016).....	47
2. Prison Admission by Type of Offence (2013 – 2016).....	48
C. Suspects Arrested for Drug-Related Offences.....	50
1. Number of Suspects Arrested for Drug-Related Offences by State, Special Area Command, Year and Sex.....	50
D. Trafficking in Persons.....	51
1. Number of Trafficked Persons by Age Group, Year and Sex.....	51
2. Number of Identified Victims of Trafficking for Prostitution by Age, Year and Sex.....	51
3. Number of Identified Victims of Trafficking for Forced Labor by Age, Year and Sex	52
STATISTICAL ANNEXES.....	53
STATISTICAL TABLES	53

ST 1: Nigeria Projected Population by Special Age Group Year and Sex, 2015 – 2017.....	53
ST 2: Distribution of HIV Patients by State, Year and Sex (2013-2016)	54
ST 3: Distribution of HIV Patients that have Access to Antiretroviral Treatment by State, Year and Sex (2013 - 2016).....	56
ST 4: Distribution of Total Fertility Rate by State 2016/17.....	58
ST 5: Female Adolescent Fertility Rate by State and Year	59
ST 6: Maternal Mortality Rate in Nigeria by State, 2016	60
ST. 7: Number of Doctors by State, Year and Sex (2015-2017).....	61
ST. 8: Number of Dentists by State, Year and Sex (2015-2017)	62
ST 9: Percentage of Women and Men age 15-24 years who are literate by State and Sex, 2016/17	63
ST 10: Percentage Distribution of Enrolment in Primary Schools by State, Year and Sex, 2014 - 2016.....	64
ST 11: Percentage Distribution of Enrolment in Junior Secondary School by State, Year and sex, 2014 -2016	65
ST 12: Percentage Distribution of Enrolment in Senior Secondary School by State, Year and Sex, 2014 -2016	66
ST 13a: Distribution of NECO (SSC) Examination Result by State, Subject, Year and Sex, (June/July), 2015.....	67
ST 13b: Distribution of NECO (SSC) Examination Result by State, Subject, Year and Sex, (June/July), 2016.....	68
ST 13c: Distribution of NECO (SSC) Examination Result by State, Subject, Year and Sex, (June/July), 2017.....	69
ST 14a: Distribution of NECO (SSC) Examination Result by State, Subject, Year and Sex, (Nov/Dec.), 2015.....	70
ST 14b: Distribution of NECO (SSC) Examination Result by State, Subject, Year and Sex, (Nov/Dec.), 2016.....	71
ST 14c: Distribution of NECO (SSC) Examination Result by State, Subject, Year and Sex, (Nov/Dec.), 2017.....	72
ST 15: Total Student Enrolment in Nigerian Colleges of Education by Institution, Ownership, Year and Sex (2014/2015 – 2016/2017)	73
ST 16: New Entrants into Nigerian Colleges of Education by Institutions, Year and Sex	75
ST 17: Colleges of Health Sciences Enrolments by Programmes, Type of Certificate and Sex (2014/15).....	77
ST 18: Colleges of Health Sciences Out-turn by Programmes, Type of Certificate and Sex (2014/15).....	77
ST 19: Students Enrolment in Polytechnics by Institution and Sex, (2013/2014) and (2014/2015)	78
ST 20: Total Enrolment (Undergraduate and Postgraduate), by Institution Sex (2017)	80
ST 21: Distribution of Academic and Non-Academic Staff in Federal Colleges of Education by Academic Session and Sex (2014/2015 – 2016/2017).....	83

ST 22: Distribution of Full Professors by Institutions and Sex (2017)	84
ST 23a: Employment in State Civil Service by State, Category, Year and Sex (2010 – 2013).....	88
ST 23b: Employment in State Civil Service by State, Category, Year and Sex (2014 – 2015) Cont.	89

PREFACE

There is an increasing need for development statistics, particularly gender disaggregated statistics, as the country continues to tackle the various social and economic challenges present today. Gender statistics can highlight inequalities and reflect the differences that exist in the lifestyles and livelihood of women and men across Nigeria. Indeed, the need to improve the production and use of gender statistics in policy and decision making is backed by the resolutions of the Convention on the Elimination of All Forms of Discrimination against Women (CEDAW), and the Beijing Platform of Action adopted at the Fourth World Conference on Women in 1995; the adoption of the 2030 Agenda for Sustainable Development, the Africa Agenda 2063; as well as national priorities encapsulated in the Economic Recovery and Growth Plan (ERGP). Ending all forms of discrimination against women and girls is not only a basic human right, it is also a crucial determinant of accelerated sustainable development, and it has been proven that the empowerment of women and girls has a multiplier effect on economic and inclusive growth in any country.

The Beijing Platform for Action identified twelve critical areas of concern in ensuring women empowerment through full participation in economic, social, and political decision-making: poverty, education, health, gender-based violence, armed conflict, economic participation, inequality in power and decision making, lack of advancement opportunities, human rights, women and the media, natural resources and the environment, as well as issues around the girl child. Similarly, the Sustainable Development Goals (SDGs) lists 52 different gender indicators which aim to measure economic structures, participation in productive activities and access to resources, education, health and related services, public life and decision-making, human rights of women, and the girl child. These indicators and critical areas of concern underscore the significant need for information on the socio-economic status of women and men, and the Platform for Action specifically requires governments to generate and disseminate sex-disaggregated data and information for planning and evaluation as part of institutional mechanisms to advance women (BPA, 1995 – Strategic Objectives A1, A4, A3).

The National Bureau of Statistics, as the apex statistical agency in Nigeria, occupies a unique position in providing both granular and birds eye view on the status of various social, political, and economic issues. The data included in this compendium have been carefully and systematically collected, compiled, processed, and analysed from a wide variety of

primary and administrative data sources across the National Statistical System; and should serve as a useful resource for policy makers at all levels (national, state, & local), civil and private sector organizations, and the general public.

The conceptual approach of the Statistical Report on Women and Men in Nigeria is in line with those published from 2008 to date i.e. gender disaggregated analysis of key social and economic indicators across several areas of contemporary life within the country.

This edition covers six crucial policy areas of the economy- Population, Health, Education, Work, Power and Decision Making, and Violence against Women (VAW)/Crime. In each of these areas, statistics from primary and secondary sources were identified, compiled, processed and analyzed highlighting some differences between the status of girls, boys, women and men. Efforts have been made to ensure that these findings are easily accessible and easy to interpret, including the extensive use of graphical presentation and non-technical language. Further improvements have also been made to survey instruments to allow for better gender streamlining, for example the identification of gender profiles from non-traditional gender sectors such as economics has been made more intuitive rather than subjective.

It is my earnest hope that the present publication will be policymakers, government agencies, civil service organizations, development partners, and the private sector to advance an enabling social, political, and economic environment which supports the equal treatment of all its citizens, with special regard to the status of women in the country.

Dr. Yemi Kale

Statistician-General of the Federation/Chief Executive Officer

National Bureau of Statistics

EXECUTIVE SUMMARY

Introduction

In the Beijing Declaration adopted at the Fourth World Conference in 1995 on Women, the participating governments expressed their commitment “to advance the goals of equality, development and peace for all women everywhere in the interest of humanity”. This Statistical Report of Women and Men is being produced annually by the National Bureau of Statistics (NBS), under the requirements of the Beijing Platform for Action and the SDGs gender indicators, in order to assess the success of the previously stated goals.

This 2018 edition takes a cursory look at the status of women and men in the country over time, based on statistics from relevant Federal and State MDAs, and covers six focal policy areas of the economy: Population, Health, Education, Works, Power and Decision Making, and Violence against Women/Crime (VAW/C).

Concepts and Methods

Data was sourced from relevant State and Federal MDAs including but not limited to the Ministry of Health, Federal Ministry of Education, National Examination Council (NECO), West Africa Senior Secondary Certificate of Examination (WASSCE), National Board for Technical Education (NBTE), Nigerian Police Force, and the Nigerian Prison Service as well as from published sources e.g. MICS5 (2016/17), 1999 – 2015 Collation of data on Women and Men in Governance and in Politics (NCWD/NBS) and the 2016 Digest of Education Statistics in Nigeria (FME). The analysis of data – inferential statistics and graphics - was performed on Excel software and wherever possible, indicators have been disaggregated on the state level. A summary of indicators for each key thematic area is given below.

Population

Nigeria is the most populous nation in Africa and ranks the 7th in the world¹. In 2017, Nigeria population was estimated to be 199 million people compared to about 193 million in 2016 (NPopC). Women and men constituted 49.2 per cent and 50.8 per cent of this population respectively. Population growth rate is estimated to be 3.2 per cent while the sex ratio remained 102 men per 100 women. In 2017, the population of the elderly (60+ years) was 5,542,258 and 4,392,684 for men and women respectively.

Health

Life expectancy at birth depicts the average number of years a newborn child is expected to live given the current levels of mortality in a country. In 2016, life expectancy for males was 47 years, 51 years for female and 49 years for both (NBS, HDI 2018). The percentage of women living with HIV increased from 51.7 per cent in 2013 to 53.1 per cent in 2016, whilst that of men decreased from 48.3 per cent in 2013 to 46.9 per cent in 2016 (NACA). Women with access to Antiretroviral Treatment increased slightly from 66.6 per cent in 2013 to 69.7 per cent in 2014, while the percentage was 69.2 and 69 per cent in 2015 and 2016 respectively. In 2013 about 33.4 per cent male HIV patients had access to Antiretroviral Treatment while it was 30.3, 30.8 and 31 per cent in 2014, 2015 and 2016 respectively (FMH). In 2016/17, the total fertility rate was 5.8 births per woman, adolescent fertility rate was 120 births per 1,000 women in 2016, while approximately 49.1 per cent of pregnant women had 4 or more antenatal care visits within the 12-month period 2016/2017 (MICS5). According to the same report, the use of any contraceptive methods by women currently married or in union (or their partner) was 13.4 per cent in 2016, of which only 10.8 per cent are using modern methods, while 86.6 per cent were not using any contraceptive methods. In 2016, the maternal mortality rate was 567.5 per 100,000 live births (NBS, HDI 2018); child mortality rate was 54 per 1,000 live births (MICS5); the percentage of female registered medical doctors was below 35 per cent (34.1 for 2015/2016 and 34.6 per cent for 2017); and the percentage of female dentists was 29.5 per cent in 2015, 44.0 and 44.4 per cent in 2016 and 2017 respectively (Medical and Dental Council of Nigeria).

Education

The literacy rate among female age 15-24 years interviewed was 59.3 per cent and 70.9 per cent for their male counterpart in 2016 (MICS5). Available data from the Federal Ministry of Education shows that enrolment rate of school-aged girls in primary education was 48.6 per cent in 2014 which decreased to 47.4 per cent in 2015 and slightly increased to 47.5 per cent in 2016. Also, the completion rate for girls in primary, junior and senior secondary school in 2016 were 64.8 per cent, 38.9 per cent and 28.7 per cent respectively, showing a decreased completion rate as the student progresses.

A total of 3,318 enrolled for National Diploma in colleges of health science in 2014/15, of which 72.33 per cent are female, while 2,063 enrolled for Higher National Diploma,

which the share of female was 69.17 per cent. The percentage of female out-turn was 68.14 per cent for National Diploma and 69.08 for Higher National Diploma. (National Board for Technical Education (NBTE) Kaduna).

In Polytechnics, 40.10 and 40.74 per cent students enrolled were female for the 2013/2014 and 2014/2015 academic sessions respectively, the out-turn of female students was about 40 per cent for the two periods. (NBTE). Female enrolment in Nigeria Universities in 2017 was 43.1 per cent. The percentage of women lecturers in federal colleges of education was 33.8 per cent for the 2016/2017 academic session, while percentage of female professors in Nigerian Universities was 15.43 per cent for 2017, (NUC).

Work

The percentage of men employed in the State Civil Service from 2010 to 2015 was higher than that of women for both senior and junior positions. On average the percentage of women employees from 2010 to 2015 was 38.16 per cent for both junior and senior positions while it was 61.84 per cent men (for both subgroups).

Also, in federal MDAs, men dominated the civil service while women within grade level 01 – 17 plus the special grade level constituted 34.67, 35.08 and 32.79 per cent for 2015, 2016 and 2017 respectively.

Power and Decision Making

Despite all efforts to promote the contribution of women in the domain of politics and decision making, women have continued to record low representation at all tiers and levels of governance although they constitute almost half of the electorate. Findings reveal that males constituted 94.2 per cent of the members of the National Assembly in the periods from 1999-2015 (on average) while female participation remained low at 5.8 percent.

At federal courts, 29.4 per cent of Judges were female while 70.6 per cent were male from 2011 – 2016 (National Judicial Council). State Assemblies also record similar low participation rates for women at 5.2 per cent while men occupied 94.8 per cent of available positions from 1999 - 2015(State House of Assembly). At the local government level from 1999 to 2015, 9 per cent of chairpersons were females while 91 per cent were males. Women also constituted just 5.9 percent of Councilors compared with 94.1 per cent for men.

Violence/Crimes Against Women

According to data received from the Nigerian Police Force (NPF) and the Ministry of Justice, rape cases in Nigeria have been on the rise. The percentage of rape incidence for girls was 63.04 per cent in 2015, which increased to 72.13 per cent in 2016 but decreased to 69.33 per cent in 2017.

Over 90 per cent of suspects arrested for drug related offences in 2015, 2016 and 2017 (92.7, 93.5 and 93.8 per cent) respectively were men, while women made up 7.3, 6.5 and 6.2 per cent of the arrests for the same years respectively.

Women aged 45-49 had the highest percentage (27.6 per cent) of Female Genital Mutilation/Cutting (FGM/C) compared to other age groups, while women aged 15-19 had the lowest at 12.3 per cent (MICS5). The available data from the Nigerian Prisons Service (NPS) indicated that about 2 per cent of prisoners/inmates between 2012 and 2016 were female. During the same period, prison admission for stealing was 95 per cent male and 5 per cent female; while the percentage of women admitted into prison because of trafficking was 14.6 and 14.5 per cent (for 2015 and 2016 respectively) compared to 4.5 per cent and 2.9 per cent in 2013 and 2014. In addition, the offence of trafficking in persons occurred mostly in the 16-25 age group, where women constituted about 76.63 per cent of convicted persons for that crime for the years between 2013-2015 (NAPTIP).

CHAPTER 1: POPULATION

Key Findings

- *Nigeria's population in 2017 was estimated at 199 million people*
- *Women constitute 49.2 per cent and men 50.8 per cent*
- *Population growth rate was estimated at 3.2 per cent.*
- *Sex ratio remained 102 men to 100 women*

Introduction

Population size and growth patterns directly affect human living conditions across the globe. This chapter presents some statistics on general population dynamics, population patterns in the country, and the population of elderly men and women.

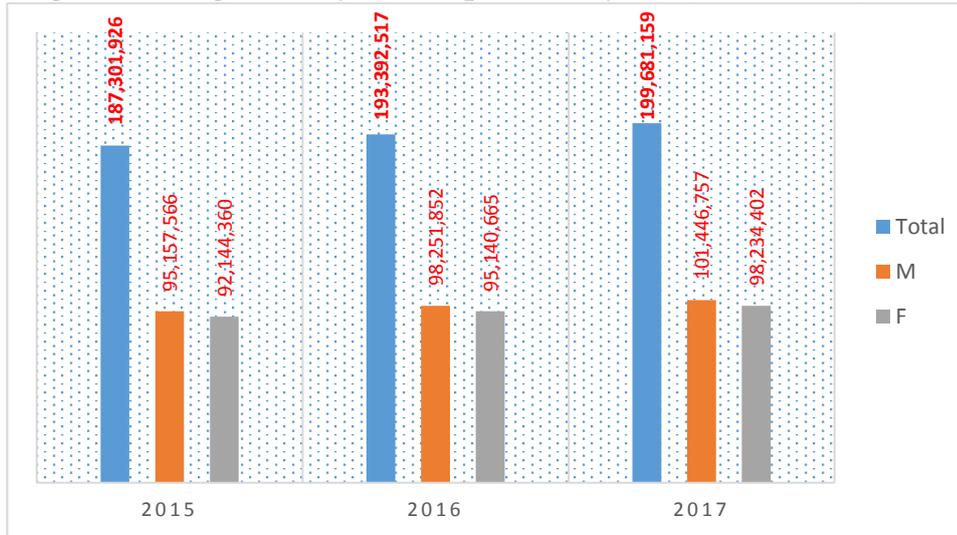

A. General Population Patterns

1. Population and Growth Rate

Nigeria is the most populous country in Africa and ranks the 7th in the world¹. In 2017, the population of Nigeria was estimated to be 199 million compared to 193 million in 2016 (NPopC) – a growth rate of 3.1 per cent. Increasing fertility rates coupled with decreasing mortality rates have contributed significantly to the relatively high rate of population growth. Notably, international migration has played a very negligible role in population size in Nigeria. According to the most recent estimates, women constitute 49.2 per cent of total population and men make up 50.8 per cent. The sex ratio remained 102 men to 100 women in 2017. See Figure 1.1 below and ST 1 in the Appendix.

¹ United Nations, 2015

Figure 1.1: Nigeria Projected Population by Sex (2015 – 2017)

2. Distribution of Population of the Elderly (60+ Years) by Year and Sex

In Nigeria, all citizens over the age of 60 years are classified as elderly. Like most African countries, Nigeria is also witnessing an explosion in the proportion of young people (aged 15-24) to the total population – a figure that is constantly increasing. This phenomenon, often referred to as the demographic dividend, is an opportunity for tremendous economic growth and transformation, since the population is young, active, and vibrant. Conversely, populations with high proportions of the elderly, are usually vulnerable to economic challenges and face the heightened challenge of access to adequate health and social care.

In 2015, the estimated elderly population was 9,319,025 and in 2016 and 2017 it increased to 9,622,057 and 9,934,942 respectively. The percentage of female elderly stood at 44.21 per cent for the years under review. See Table 1.1 below.

Table 1.1: Distribution of Population of the Elderly (60+ Years) by Year and Sex

YEAR	Total Elderly 60+ years	Male Elderly 60+years	Female Elderly 60+ years
2015	9,319,025	5,198,666	4,120,359
2016	9,622,057	5,367,714	4,254,343
2017	9,934,942	5,542,258	4,392,684

Source: National Population Commission (NPopC)

CHAPTER 2: HEALTH

Key Findings

- *Life expectancy for males was 47 years, 51 years for females and 49 years for both in 2016.*
- *The percentage of women living with HIV increased slightly from 51.7 per cent in 2013 to 53.1 per cent in 2016, but that of men decreased slightly from 48.3 per cent in 2013 to 46.9 per cent in 2016.*
- *The percentage of woman with access to Antiretroviral Treatment increased from 66.6 per cent in 2013 to 69.7 per cent in 2014 and it was 69.2 and 69 per cent for 2015 and 2016 respectively. In 2013 about 33.4 per cent HIV male patients had access to Antiretroviral Treatment, while the indicator recorded 30.3, 30.8 and 31 per cent in 2014, 2015 and 2016 respectively.*
- *In 2016, the total fertility rate was 5.8 births per woman.*
- *Adolescent fertility rate was 120 births per 1,000 women in 2016.*
- *About 49.1 per cent of pregnant women had 4 or more antenatal care visits in 2016/17 in Nigeria.*
- *Only 10.8 per cent of Women in 2016 used modern contraceptive methods*
- *Maternal mortality rate was 567.5 per 100,000 live birth in 2016.*
- *Child mortality rate was 54 per 1,000 live birth in 2016/17.*
- *The percentage of Female Medical Doctors was 34.6 per cent in 2017*
- *Female Dentists was 44.4 per cent in 2017*

Introduction

Women have the right to the highest attainable standard of physical and mental health that is essential to their life and well-being and their ability to participate in all areas of public and private life² as posited by the 1995 Beijing Platform for Action (BPA, 1995). Health therefore “is a state of complete physical, mental and social well-being and not merely the absence of disease or infirmity”³ according to the World Health Organization (WHO). However, gender inequality persists in the provision of health services and women often find it challenging to access proper healthcare. Empowering women with the necessary knowledge and skills to fulfill these health potentials, while ensuring availability & accessibility of primary health care, is not only essential to their well-being but also to that of their children and families. Tackling gender inequalities in the provision of health services will enable all women and men to enjoy healthier lives, which will ultimately lead to greater gender equality in all spheres of life and the fulfillment of Sustainable Development Goals (SDG) 3 which is “also ensure healthy lives and promote well-being for all at all ages by 2030”.

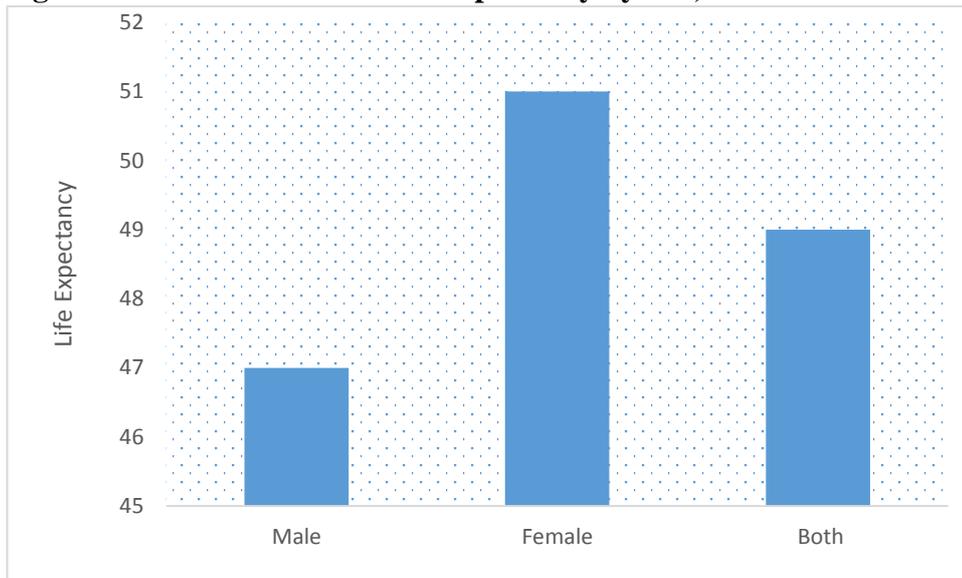

² United Nations, 1996, p.89

³ Constitution of WHO: Principle

A. Life Expectancy at Birth

Life expectancy at birth depicts the average number of years a newborn child is expected to live in a lifetime given the current levels of mortality in a country. This health indicator is derived from the age-specific mortality rates, and it provides a picture of the overall health status of a population as well as allowing for the investigation of the longevity of women and men separately. In 2016, life expectancy was 47 years for male, 51 years for female, and 49 years for both male and female. See Figure 2.1 below.

Figure 2.1: Distribution of Life Expectancy by Sex, 2016

Cross River state had the highest life expectancy for female which was 56 years, followed by FCT, Osun and Oyo state (55 years). Osun state had the highest life expectancy for male (52 years), followed by Oyo and Cross River states (51 years). Adamawa state had the least life expectancy for female (44 years) and for male (42 years). See Table 2.1 below.

Table 2.1: Distribution of Life Expectancy by State and Sex, 2016

B. HIV and AIDS

1. Percentage Distribution of HIV Patients by Year and Sex

Since early 1980s, HIV/AIDS has been a critical health issue for women and men in Nigeria. The epidemic continued to undermine development efforts worldwide and mostly afflict populations already beset by extreme poverty. It has been noted to particularly affect

the working population, preventing women and men from making meaningful contributions to economic and social development while impacting heavily on the structure of families. At the household level, the epidemic increases the burden of care and erodes savings. SDG Goal 3 - Target 3.3 aims at ending the epidemics of AIDS, tuberculosis, malaria and neglected tropical diseases and combat hepatitis, water-borne Diseases and other communicable diseases by 2030. Recent statistics indicate that approximately half of the population of HIV patients are women. From Figure 2.2 below, the proportion of women living with HIV increased slowly from 51.7 per cent in 2013 to 53.1 per cent in 2016, but that of men decreased slowly from 48.3 per cent in 2013 to 46.9 per cent in 2016. Also see ST 2 in the Appendix.

Figure 2.2: Percentage Distribution of HIV Patients by Year and Sex

2. Percentage Distribution of HIV Patients that have Access to Antiretroviral Treatment by Year and Sex

The percentage of women who had access to Antiretroviral Treatment increased from 66.6 per cent in 2013 to 69.7 per cent in 2014. The percentage decreased to 69.2 in 2015 and 69 per cent in 2016. In 2013, about 33.4 per cent male HIV patients had access to Antiretroviral Treatment, while it was 30.3, 30.8 and 31 per cent in 2014, 2015 and 2016 respectively. See Figure 2.3 below and ST 3 in the Appendix.

Figure 2.3: Percentage Distribution of HIV Patients that have Access to Antiretroviral Treatment by Year and Sex

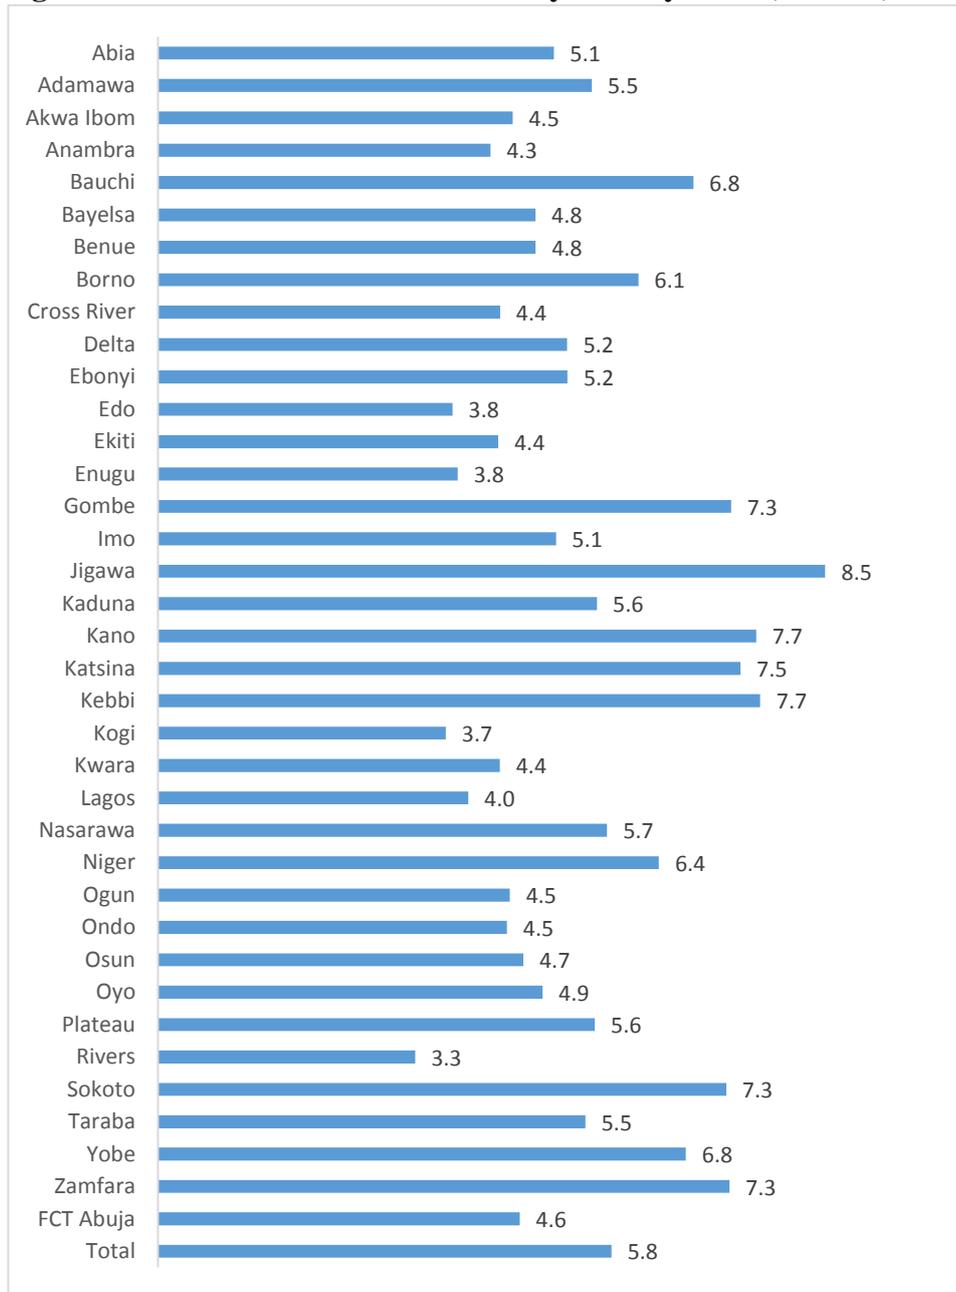

C. Reproductive Health

The reproductive years of women begin at puberty and lasts through to menopause. This is the period when most women experience important life events such as becoming sexually active, getting married and reproducing. It is also at these time that distinct health risks, such as pregnancy and childbirth related complications, can lead to significant illness and/or death for many women. For statistical purposes, the reproductive age is defined as occurring between the ages of 15-49.

1. Total Fertility Rate

Fertility, as a demographic indicator, refers to the natural ability of a human being to reproduce an offspring, and is currently measured by the number of children ever born. Childbearing practices depend greatly on the socio-cultural environment, tradition, education rates, and the overall level of development of a particular society or community. Furthermore, the age at which an individual becomes sexually active and the availability of contraception are two key determinants of fertility. The most commonly used measure or indicator of fertility is the total fertility rate (TFR), which is, the average number of live births per woman over the entirety of her childbearing years. From MICS5, 2016/17 on average, total fertility rate was 5.8 births per woman (i.e. 5,800 births per 1,000 women) in Nigeria – this indicates that each Nigerian woman had an average of 5.8 live births during their entire childbearing years. Jigawa state had the highest fertility rate of 8.5 birth per woman while Rivers state had the lowest (3.3 birth per woman). See Figure 2.4 below and ST 4 in the Appendix.

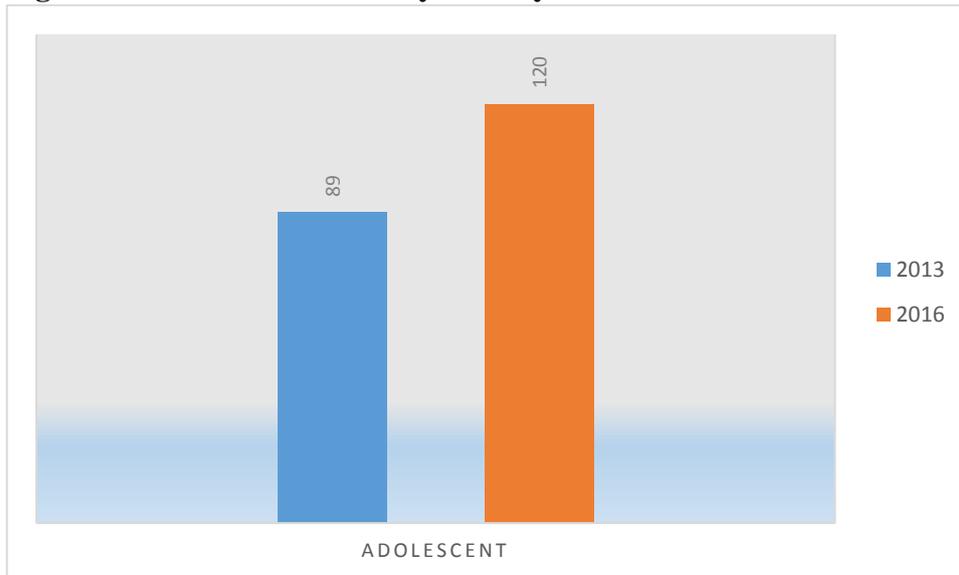

Figure 2.4: Distribution of Total Fertility Rate by State (2016/17)

2. Adolescent Fertility

Adolescent Fertility Rate is defined as the annual number of births to women aged 15–19 years per 1,000 women. It is also referred to as the age-specific fertility rate for women aged 15–19 years. The chart (figure 2.5 below) shows the adolescent fertility rate which was 89 births in 2013 and 120 births in 2016 per 1,000 women. Kebbi and Katsina had the highest at 169 and 218 births per 1000 women in 2013 and 2016 respectively, while Kogi and Rivers had the lowest rates within the same years with 6 and 18 births per 1000 women respectively. (ST 5 in the Appendix)

Figure 2.5: Adolescent Fertility Rate by Year

3. Antenatal Care

Antenatal care is known as the care given to a pregnant woman from the first trimester until the delivery of the baby in the third trimester. The standard of antenatal care requires a pregnant woman to visit a hospital or Primary Health Care (PHC) at least four or more times during the duration of the pregnancy to improve the outcome of pregnancy and birth. The practice is not only to monitor the health of the mother and fetus but also to allow early identification of potential complications. In addition, it provides women with information of needed nutrition during pregnancy and breastfeeding.

From Table 2.2 below, 49.1 per cent pregnant women had 4 or more antenatal care visits in 2016/17 in Nigeria. Lagos state had the highest percentage of women who had four or more visits for antenatal care (94.2 per cent). Kebbi states had the lowest percentage of women (20.9 per cent) with four or more visits for antenatal care. However, Sokoto State had the highest percentage (63.9 per cent) of no visit to antenatal care.

Table: 2. 2: Percentage Distribution of Number of Antenatal Care Visits by State, 2016/17

STATE	No antenatal care visits	One visit	Two visits	Three visits	4 or more visits
Abia	8.7	0.9	1.3	2.4	86.1

Kogi	93.3	6.2	6.7
Kwara	72.9	23.7	27.1
Lagos	77.4	17.4	22.6
Nasarawa	83.0	13.8	17.0
Niger	88.8	8.1	11.2
Ogun	78.7	18.2	21.3
Ondo	78.2	18.8	21.8
Osun	75.4	22.9	24.6
Oyo	65.8	30.0	34.2
Plateau	79.9	19.2	20.1
Rivers	82.0	11.0	18.0
Sokoto	95.3	4.6	4.7
Taraba	93.3	5.6	6.7
Yobe	96.5	3.3	3.5
Zamfara	94.4	5.0	5.6
FCT Abuja	73.8	19.9	26.2
National	86.6	10.8	13.4

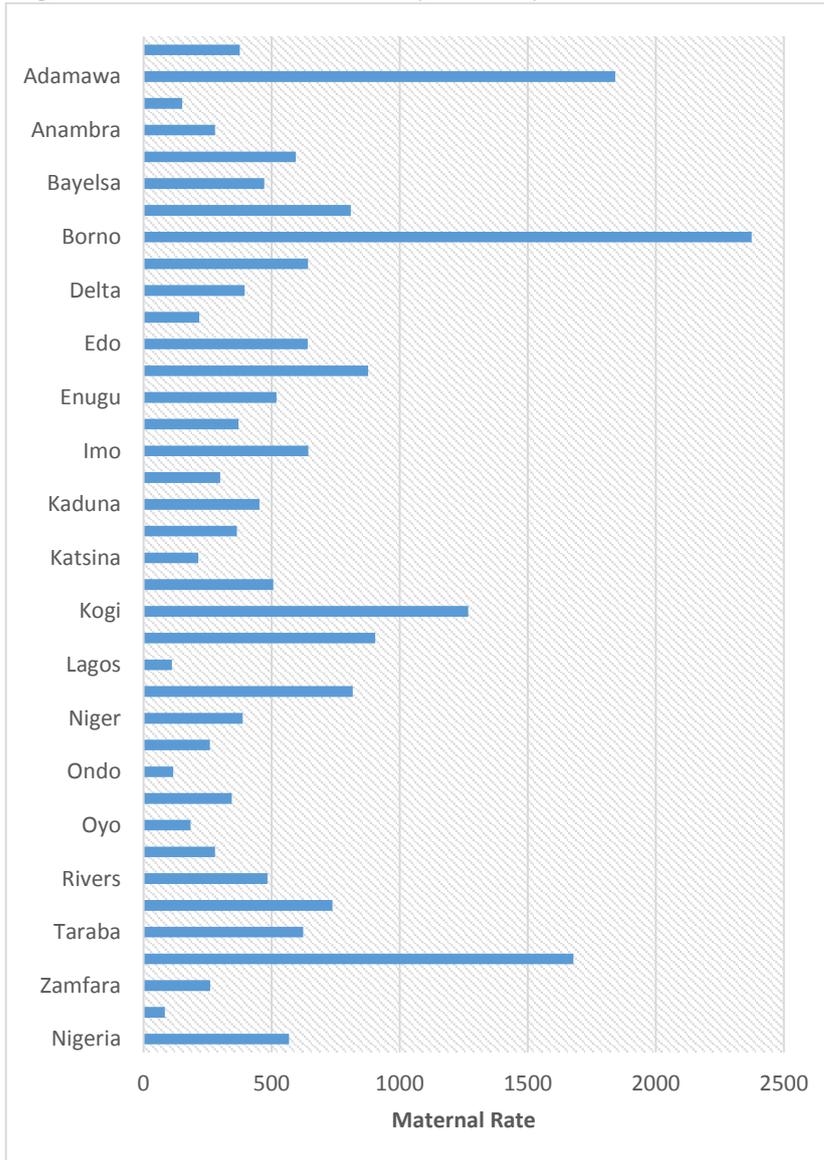

Source: MICS5, 2016/17

From Table 2.3 above, the percentage of women who are currently married or in a union who are using or whose partner is using contraceptive method for pregnancy prevention and family planning was on average 13.4 per cent in 2016, of which only 10.8 per cent are using modern methods, while about 86.6 per cent are not using any method whatsoever. Jigawa State had the highest percent of 98.7 per cent women currently married who are not using any method of contraceptive.

D. Maternal Mortality Rate

Maternal mortality or maternal death is the death of a woman during pregnancy, childbirth or within two months after delivery or termination of pregnancy per 100,000 births. The international community through SDG 3.1 has pledged to reduce the global maternal mortality ratio to less than 70 per 100,000 live births. According to the Human Development Index published by the NBS in 2018, the maternal mortality rate in 2016 was 567.5 per 100,000 live births. Borno State had the highest maternal mortality rate at 2,374.8 deaths per 100,000 live births, followed by Adamawa with 1,849.9 deaths per 100,000 live births while FCT Abuja had the lowest of 83.6 deaths per 100,000 live births followed by Lagos which had 110.4 deaths per live births. (Figure 2.6 below).

Figure 2.6: Maternal Mortality Rate by State, 2016

E. Early Childhood Mortality Rate

1. Neonatal Mortality Rate

This indicator is defined as the probability of children dying within the first month of birth.

The result of the recent MICS5 2016/17 revealed that neonatal mortality rate stood at 39 per 1,000 live births. See Table 2.4 below.

Table 2.4: Neonatal, Infant, Child Mortality and Under-five Rates

State	Neonatal mortality rate	Infant mortality rate	Child mortality rate	Under-five mortality rate

FCT-Abuja	27	44	28	71
Total	39	70	54	120

Source: MICS5, 2016/17

2. Infant and Under 5 Mortality

Infant mortality rate is the probability of children dying before reaching one year and under-five mortality rate is the probability of a child dying before the age of five. Infant Mortality rate was 70 per 1,000 live births while under 5 mortality was 120 per 1,000 live births in 2016/17 as recorded in MICS5 report. See Table 2.4 above.

3. Child Mortality Rate

From Table 2.4 above, child mortality rate was 54 per 1,000 live births in 2016/17. Jigawa state had the highest child mortality of 120 per 1,000 live births, while Kwara and Lagos states had the lowest of 6 per 1,000 live births each.

F. Health Personnel

Doctors and Dentists

From Table 2.5 below, the percentage of female medical doctors on the average was below 35 per cent. It remained at 34.1 per cent in 2015 and 2016 but increased slightly to 34.6 per cent in 2017). Also, the percentage of female dentists was 29.5 per cent in 2015, and 44.0 and 44.4 per cent in 2016 and 2017 respectively.

Table 2.5: Number of Doctors and Dentists by Year and Sex

Year	Doctors			Dentists		
	M	F	%F	M	F	%F
2015	23,061	11,943	34.1	1,686	704	29.5
2016	25,938	13,450	34.1	1,602	1,261	44.0
2017	26,121	13,791	34.6	1,614	1,287	44.4

CHAPTER 3: EDUCATION

Key Findings

- *Literacy rate among young women and men age 15-24 years was 59.3 per cent and 70.9 per cent in 2016 respectively.*
- *The percentage of girls' enrollment in primary school was less than 50 per cent. In 2014, it was 48.6 per cent but decreased to 47.4 and 47.5 percent in 2015 and 2016 respectively.*
- *The completion rate for girls in primary, junior secondary and senior secondary for 2016 were 64.8 per cent, 38.9 per cent and 28.7 per cent respectively.*
- *Female enrolment in Nigerian Colleges of Education was 46.1, 47.3 and 46.4 per cent (2014/2015, 2015/2016, 2016/2017 academic session)*
- *Enrolment in Nigerian universities was 43.1 and 56.9 per cent for Female and Male (2017)*
- *The percentage of women lecturers in federal Colleges of education was 33.8 per cent for 2016/2017 academic sessions.*
- *The percentage of Female professors in Nigerian Universities was 15.43 per cent in 2017*

Introduction

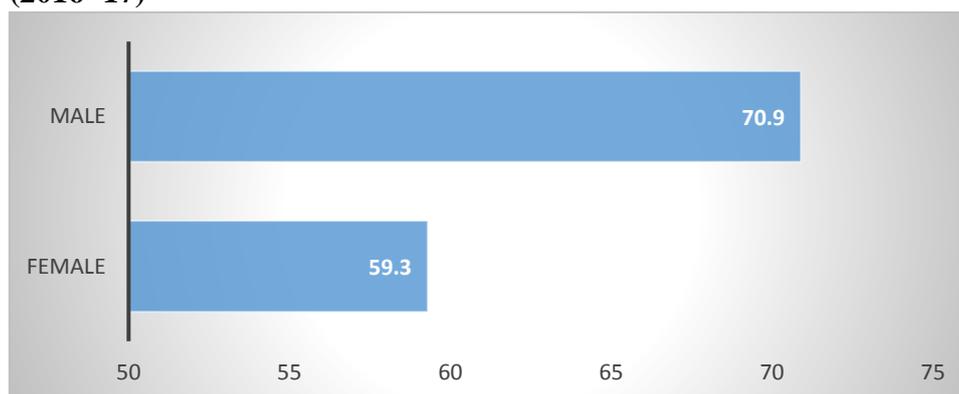

Education is the bedrock of human development and social progress of a nation. Accordingly, the importance of education in the advancement of women was highlighted in the Beijing Platform for Action – where it is identified as one of the 12 critical areas of concern and affirmed as critical for gender equality and women empowerment. The elimination of gender-based discrimination in education at all levels as well as the eradication of illiteracy among women, improving access to vocational training, science and technological education and continuing education are all highlighted as important measures on the Platform. Sustainable Development Goal (SDG) goal 4 also aims to ensure inclusive and equitable quality education alongside the promotion of lifelong learning opportunities for all by 2030.

A. Educational Outcomes

1. Literacy

According to The United Nations Educational, Scientific and Cultural Organization (UNESCO) (2004), literacy is the ability to identify, understand, interpret, create, communicate and compute, using printed and written (including visual) materials associated with varying contexts. It involves a continuum of learning to enable an individual to achieve set goals, to develop an individual's knowledge and potential, and to participate fully in the wider society. The result presented in Figure 3.1 shows that the literacy rate among female and male is relatively high in Nigeria. However, the literacy rate among female age 15-24 years interviewed is relatively low (59.3per cent) as compared to male (70.9per cent). (MICS5 2016/17) as shown in Figure 3.1.

Figure 3.1: Percentage of Female and Male age 15-24 years who are literate (2016 -17)

B. Participation in Education

1. Enrolment in Primary Education

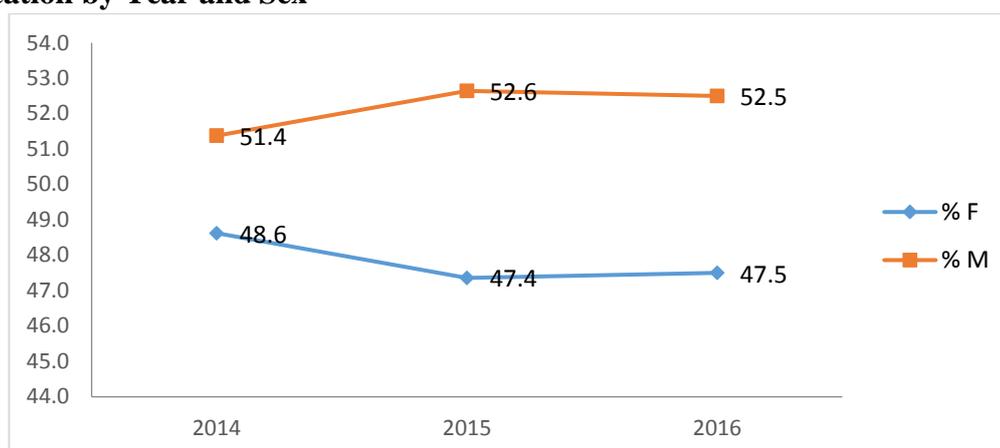

Data was collected from Federal and State Ministries of Education on the enrollment of school aged girls in primary education, disaggregated by year and sex, for the period of 2014 to 2016. Table 3.1 shows the distribution of the data. The table reveals that enrolment of school-aged girls in primary education was 48.6 per cent in 2014. However, there was a decrease in 2015 and 2016 to 47.4 and 47.5 per cent respectively. Further, Table 3.1 also shows that in 2014, more than half of primary school enrolment are boys (51.4 per cent). Although, the percentage increased in 2015 to 52.6 per cent and thereafter reduced to 52.5 per cent in 2016 as shown in Table 3.1.

Table 3.1: Distribution of Enrolment of School-Age Girls in Primary Education by Year and Sex

Year	M	F	% F	% M
2014	13,255,789	12,545,408	48.6	51.4
2015	13,393,310	12,049,225	47.4	52.6
2016	13,435,940	12,155,241	47.5	52.5

Source: Nigeria Digest of Education Statistics, Federal Ministry of Education

Figure 3.2: Percentage Distribution of Enrolment of School-Age Girls in Primary Education by Year and Sex

Literacy results disaggregated by state and gender (see ST 10 in the Appendix) show that Zamfara state had the lowest number of girls enrolled in primary schools and this figure ranges from 34.8 – 35.5 per cent in 2014 – 2016, while the number of boy’s enrollment was between 65.2 – 65.5 per cent for the reference period. No data is available for Borno state in 2014 and 2015. Although in 2016 the percentage of school girls enrolled was 46.1 per cent (see ST 10 in the Appendix).

2. Secondary Education

2.1: Percentage Distribution of Enrolment in Junior Secondary Schools by Sex, 2014 - 2016

Table 3.2 reveals the percentage distribution of enrollment in junior secondary schools by sex for the period of 2014 to 2016. The table shows that enrolment into junior secondary schools on the average was about 47 per cent for girls and 53 per cent for boys in the period under reference.

Table 3.2: Distribution of Enrolment in Junior Secondary School by Year and Sex, 2014 - 2016

Year	Junior Secondary			
	M	F	% F	% M
2014	3,311,470	2,891,624	46.6	53.4
2015	3,260,109	2,920,182	47.2	52.8
2016	3,181,810	2,786,332	46.7	53.3

Source: Nigeria Digest of Education Statistics, Federal Ministry of Education

In 2014 and 2016, Abia state had the highest percentage of girls enrolled in junior secondary school - 53.7 per cent and 55.6 per cent - respectively, while from 2014 to 2016, Kebbi state had the lowest percentage of girls enrolled in junior secondary school (33 per cent) (See ST 11 in the appendix).

2.2: Percentage Distribution of Enrolment in Senior Secondary Schools by Sex, 2014 - 2016

The data presented in Table 3.3 shows that the percentage of girls in senior secondary schools was below 50 per cent from 2014 to 2016. In 2014, it was 45.9 per cent but increased slightly to 46.5 per cent in 2015 then subsequently declined to 46.0 per cent in 2016. Comparatively, over half (54 per cent) of boys were enrolled in senior secondary schools from 2014 to 2016. See Table 3.3 below.

Enugu state had the highest percentage of girls enrolled in senior secondary schools in 2014 and 2015 (55.4 per cent). Abia state had the highest in 2016 (55.9 per cent), while Kebbi recorded the lowest percentage (29.5 per cent) in the same year. See ST 12 in the Appendix.

Table 3.3: Distribution of Enrolment in Senior Secondary School by Sex, 2012 - 2016

Year	Senior Secondary			
	M	F	% F	% M
2014	2,321,183	1,971,306	45.9	54.1
2015	2,629,526	2,281,418	46.5	53.5
2016	2,417,192	2,058,117	46.0	54.0

Source: Nigeria Digest of Education Statistics, Federal Ministry of Education

2.3. Completion rate

Figure 3.3 displays the data obtained from the Federal Ministry of Education on the completion rates in primary and secondary schools in Nigeria by sex (Nigeria Education Indicator, 2016). As shown in Figure 3.3 the completion rate for girls in primary schools in 2016 was 64.8 per cent and 70.8 per cent for boys. For junior secondary schools, the

completion rates for girls and boys in the same year were 38.9 and 43.3 per cent respectively. The completion rates for girls and boys in senior secondary schools were lower than the completion rates in primary schools and junior secondary schools for both sexes, with an average of 30.0 per cent, (28.7 for girls and 33.2 for boys) respectively.

Figure 3.3: Distribution of Primary and Secondary Schools Completion Rate by Sex (2016)

2.4: Distribution of West Africa Senior Secondary Certificate Examination (WASSCE) by Year and Sex

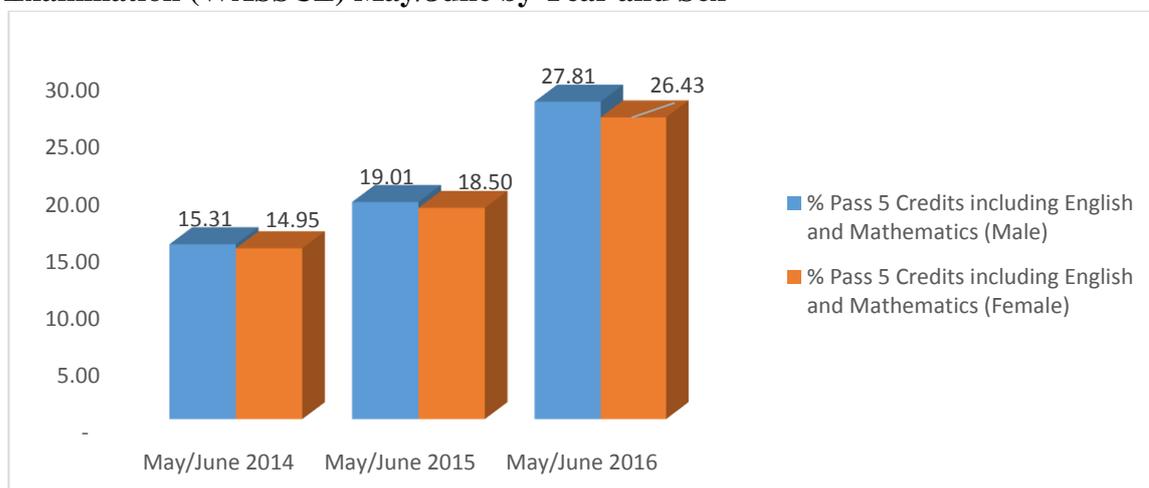

The number of students that sat for West Africa Senior Secondary Certificate Examination (WASSCE) in May/June 2014 was 1,673,824. The number of candidates that had 5 credits including English and Mathematics was 506,572 (30.26 per cent). The share of male and female was 15.3 and 15.0 per cent respectively. In May/June 2015, out of 1,575,960 candidates that took the examination, only 37.5 per cent had 5 credits including English and Mathematics - 19.01 per cent male and 18.5 per cent female. It should be noted that though these percentages increased in May/June 2016 to 27.8 and 26.4 percent for male and female respectively, the absolute number of candidates who sat for the examination decreased in that same period. The results are presented in Table 3.4 and Figure 3.4.

Table 3.4: Distribution of West Africa Senior Secondary Certificate Examination (WASSCE) May/June by Year and Sex

Figure 3.4: Percentage Distribution of West Africa Senior Secondary Certificate Examination (WASSCE) May/June by Year and Sex

2.5: Distribution of West Africa Senior Secondary Certificate Examination (WASSCE) by Sex (November/December 2014 - 2017)

The distribution of West Africa Senior Secondary Certificate Examination (WASSCE) by sex for the period of 2014 to 2017 was revealed in Table 3.5. The table shows the number of students who wrote the West Africa Senior Secondary Certificate Examination (WASSCE) in Nov/Dec. 2014 was 247,031. The percentage of candidates that passed the required five credits including English and Mathematics was 27.0 per cent, with the male share being 14.2 per cent and female 12.7 per cent. In 2015, the number of candidates who wrote the examination was 671,393, with 27.9 male and 28.3 per cent female passing the required five credits including English and Mathematics in the same year. A total of 172,825 sat for the examination in 2016, among which only 18.0 per cent male and 18.5

per cent female received five credits including English and Mathematics. Results are shown in Table 3.5.

Table 3.5: Distribution of West Africa Senior Secondary Certificate Examination (WASSCE) by Sex (November/December 2014 - 2016)

2.6: Distribution of NECO (SSC) Examination by Year and Sex (June/July)

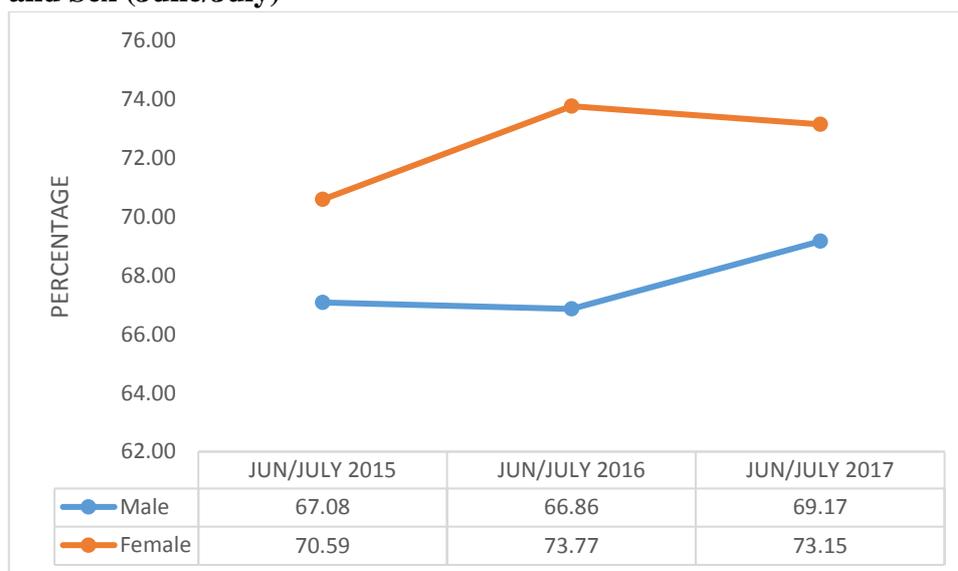

Results in Table 3.6 shows that a total of 559,086 male and 410,404 female candidates wrote the NECO (SSC) June/July Examination in 2015; 67.08 and 70.59 per cent male and female candidates passed the examination with five credits and above, including English and Mathematics. The next year (2016), a total of 595,534 males and 426,940 females' candidates who wrote the examination, amongst which 66.86 per cent were male and 73.77 per cent female passed with five credits including English and Mathematics. The percentage of candidates that passed with five credits including Mathematics and English was 69.17 per cent for male and 73.15 per cent for females in 2017 respectively among the 605,387 males and 446,085 females who wrote the examination.

Figure 3.5a: Percentage Distribution of NECO (SSCE) Examination Result by Year and Sex (June/July)

2.7 Distribution of NECO (SSC) Examination by Year and Sex (Nov/Dec)

In Nov/Dec 2015 a total of 28,489 male and 20,595 female students sat for the National Examination Council Senior Secondary Certificate Examination. The percentage of male and female candidates that passed the required five credits including Mathematics and English among the male and female total was 30.33 and 34.70 per cent respectively. Among the 27,346 male and 19,772 female candidates that sat for the examination in 2016 only 59.17 per cent males and 62.46 per cent females passed with five credits including English

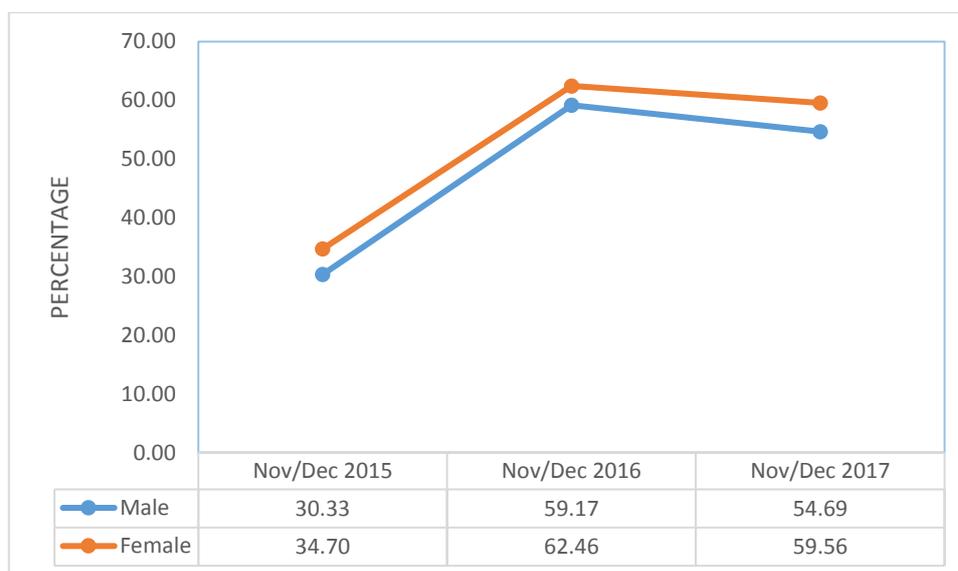

and Mathematics respectively. A total of 24,068 male and 18,361 females sat for the examination in 2017, among which only 54.69 per cent male and 59.56 per cent female had 5 credits including English and Mathematics. See Table 3.7 below.

3. Tertiary Education

3.1 Enrolment and New Entrance into Nigerian Colleges of Education (2014/2015 – 2016/2017)

On average, enrolment into tertiary institutions across the country was dominated by men. Tertiary institutions include Colleges of Education, Colleges of Health Science, Polytechnics, and Universities in Nigeria. Table 3.8 shows that the percentage of females

who enrolled in colleges of education in Nigeria for the reference period was below average, 46.1, 47.3 and 46.4 per cent for 2014/2015, 2015/2016 and 2016/2017 academic sessions respectively.

Table 3.8: Summary of Student Enrolment in Nigerian Colleges of Education by Type, Year and Sex

Figure 3.6: New Entrants into Nigerian Colleges of Education by Academic Session and Sex

Results in Figure 3.6 shows the percentage of new entrants into Nigerian colleges of education for three different academic sessions (2014/2015, 2015/2016 and 2016/2017). The percentage of males for the three sessions was above average at 53.8, 53.7 and 55.2 per cent, while female had 46.2, 46.3 and 44.8 per cent for the same sessions respectively.

3.2 Enrolment and Out-Turn in Colleges of Health Science (2014/2015)

Table 3.9 shows the enrolment and out-turn in Nigerian Colleges of Health Science for 2014/2015 academic session. A total of 3,318 enrolled for National Diploma of which females accounted for 72.33 per cent, while 2,063 enrolled for Higher National Diploma

and 69.17 per cent were female. Further, Table 3.9 shows the out-turn for the National Diploma and Higher National Diploma for 2014/2015 (2,332 and 1,093) respectively. The percentage of females enrolled was 68.14 per cent for National Diploma and 69.08 per cent for the Higher National Diploma.

3.3 Enrolment and Out-Turn in Polytechnics (2013/2014 and 2014/2015)

The results of enrollment and out-turn in polytechnics by academic session and sex are presented in Table 3.10. The table shows that in total, 40.10 per cent and 40.74 per cent of students who enrolled in polytechnics for the 2013/2014 and 2014/2015 academic sessions respectively were females. Additionally, the out-turn of female students was approximately 40 per cent for each of the two periods.

Table 3.10: Enrolment and Out-Turn in Polytechnics by Academic Session and Sex

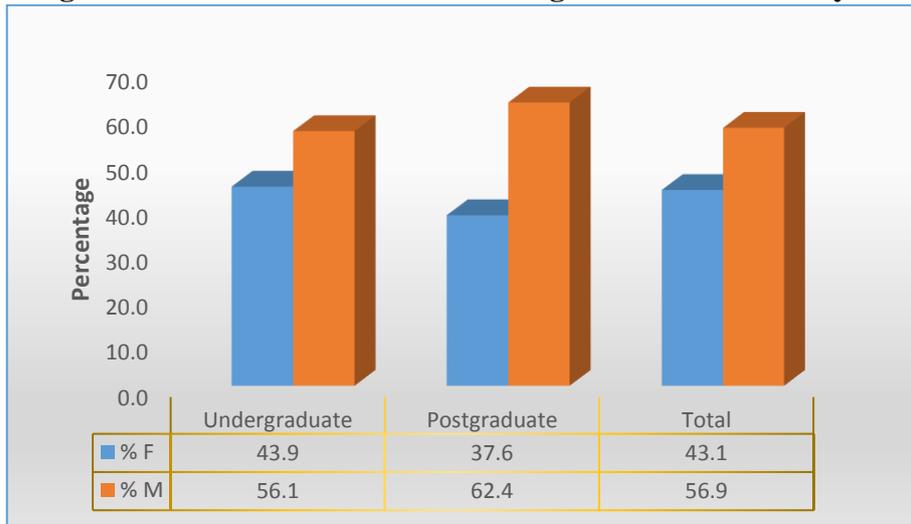

Academic Sessions	Enrolment			Out-Turn		
	F	M	%F	F	M	%F

Source: Nigeria Digest of Education Statistics, Federal Ministry of Education

3.4: Student's Enrolment in Nigerian Universities (2017)

Results from Figure 3.7 reveals that in total, female enrolment in Nigerian universities in 2017 was low at 43.1 per cent while more than half (56.9 per cent) of those enrolled were male. Among the enrolled female population, 43.9 per cent were enrolled in an undergraduate program and 37.6 per cent for postgraduate program.

Figure 3.7: Student's Enrolment in Nigerian Universities by Sex (2017)

C. Teaching Staff/Non-Teaching Staff

The quality of the teaching staff is a major determining factor for the quality of education rendered. Most importantly, gender balance among the teaching staff is critical for promoting gender parity in access to and achievement in education and for creating a supportive and non-discriminating learning environment for both women and men. There is evidence that proves that gender balance among teaching staff is closely related to the improvement of gender parity in enrolment⁴.

The feminization of the teaching profession particularly in states where women have lower socioeconomic status, can have a positive impact on younger women and their decision to pursue their studies, and for parents to choose to educate their daughters.

1. Percentage of Teaching Staff in Institutions by Sex (2014/15 – 2016/17)

Data in Table 3.11 displays the percentage of female teachers in institutions for the reference period (2014/2015 - 2016/2017). The percentage of female teachers in public primary schools was 48.36 per cent in 2014/2015 but slightly decreased to 47.83 per cent in 2015/2016. Similarly, the proportion of female teachers in junior secondary schools was 53.38 per cent for 2014/2015 but decreased to 47.75 per cent in 2015/2016. Among senior secondary school teachers, the percentage of female teachers was 52.29 per cent in 2014/2015 but reduced to 48.42 per cent in 2015/2016 session. The percentage of female teachers in polytechnics was 20.97 in 2014/2015 (Federal Ministry of Education).

⁴ Colclough et al, 2003

In Federal Colleges of Education, the percentage of female teaching staff was 34.3 per cent in 2014/2015, while 33.8 per cent was recorded for 2015/2016 and 2016/2017 respectively.

Table 3. 11: Distribution of Teaching Staff in Institutions by Academic Session and Sex

2. Non-Academic Staff of Federal Colleges of Education (2014/2015 - 2016/2017)

Figure 3.8 shows the percentage of non-academic staff in federal colleges of education for three academic sessions, 2014/2015, 2015/2016 and 2016/2017 respectively. The percentage of females for the reference period was 28.6, 43.37 and 29.21 per cent respectively.

Figure 3.8: Non-Academic Staff of Federal Colleges of Education

3. Academic and Non-Academic Staff of Nigerian Universities (2017)

Table 3.12 revealed the distribution of academic and non-academic staff of Nigerian universities in 2017. The table showed that in 2017, the percentage of female academic staff in the Nigerian Universities was very low (24.1 per cent) when compared to their male counterpart (75.9 per cent). The distribution amongst Non- Academic staff was 36.3 per cent for females and 63.7 per cent for males.

Table 3.12: Academic and Non-Academic Staff of Nigerian Universities by Sex, 2017

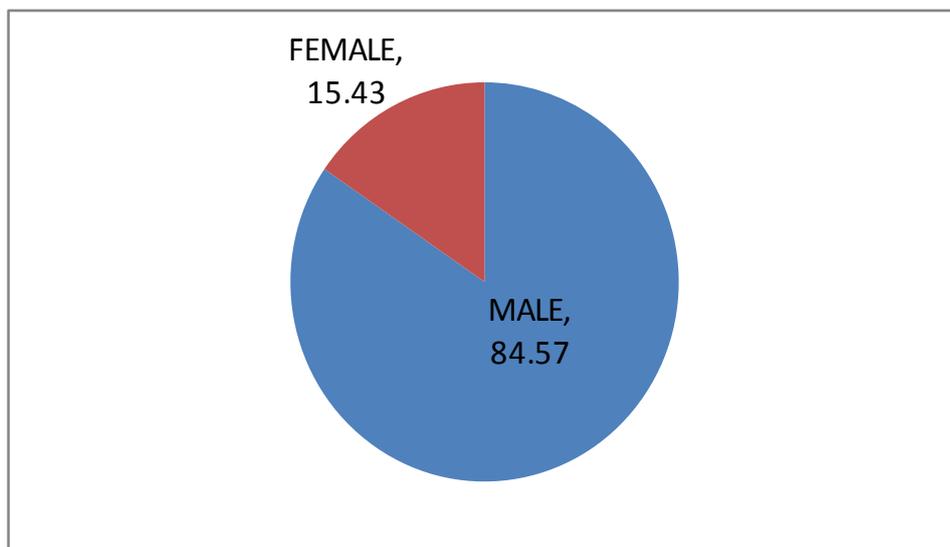

Category	Male	Female	Total	%Female	%Male
Academic	46,709	14,801	61,510	24.1	75.9
Non-Academic	78,610	44,713	123,323	36.3	63.7

SOURCE: National University Commission

4. Percentage Distribution of Professors in Nigerian Universities (2017)

The professors in the Universities are a major resource that contributes significantly to the quality of the institutions and the economy in a variety of ways. The results in Figure 3.9 revealed that female Professors are under-represented (15.43 per cent) when compared to male Professors (84.57 per cent) in Nigeria.

Figure 3.9: Percentage Distribution of Professors in Nigerian Universities by Sex (2017)

CHAPTER 4: WORK

Key Findings

- *The percentage of men employed in the State Civil Service from 2014 to 2015 was higher than the percentage of women for both senior and junior positions. The average percentage of women employed in the State Civil Service from 2010 to 2015 in each category (junior and senior) was 38.16 per cent, while it was 68.84 per cent for men.*
- *Also, men dominated employment in federal MDAs while women on grade level 01 – 17 plus Special grade level was 34.67, 35.08 and 32.79 per cent for 2015, 2016 and 2017 respectively.*

Introduction

Women constitute almost half of the Nigerian's population and its workforce. Yet the kind of work they do, the condition under which they work, and their access to opportunities for advancement at work place differ from that of men. Women are often disadvantaged in access to employment opportunities and in conditions of work as compared to men. In addition, many women forgo or curtail employment because of family responsibilities. The removal of obstacles and inequalities faced by women is advantageous to an economy's development. For example, the Beijing Declaration affirms a national commitment to the inalienable rights of women and girls and their empowerment and equal participation in all spheres of life including the economic domain⁵. Also, Goal 8, target 8.5 of the Sustainable Development Goals (SDG) is to achieve full and productive employment and decent work for all women and men (including for young people and persons with disabilities), as well as equal pay for work of equal value by 2030. In light of these measures, we collected and collated datasets on employment level of women from various ministries in Nigeria.

A. Women and Men in State and Federal Civil Service

Women's representation in the civil service was among the concerns raised in the Beijing Platform for Action. This report is limited to the available data from State Civil Service Commissions; and Federal Ministries, Department and Agencies (MDAs).

1. Employment in State Civil Service by Category

The available data from State Civil Service Commissions shows that the percentage of men employed in the State Civil Service for the reference period was higher than that of women

⁵ United Nations, 1995

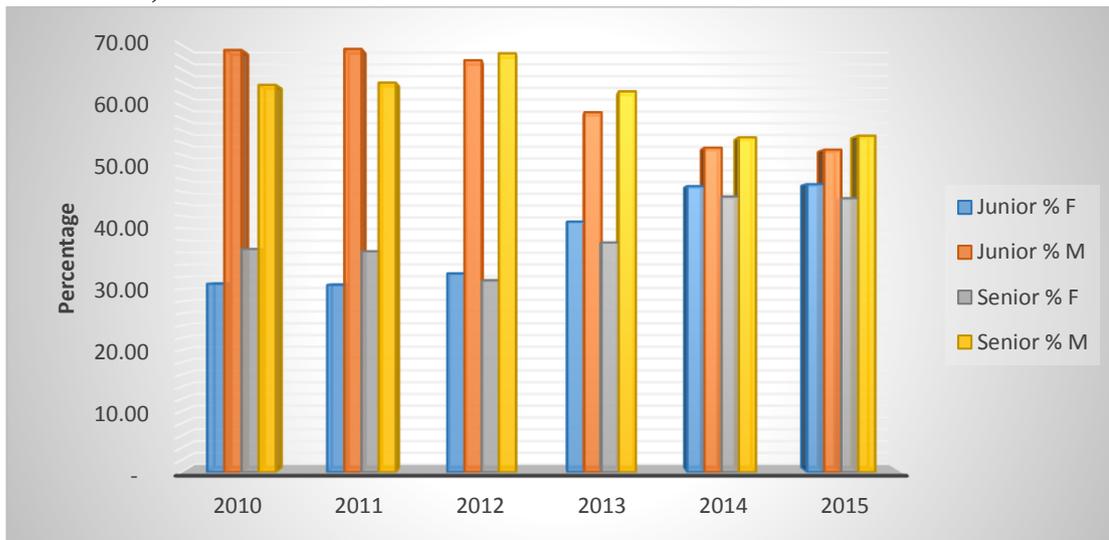

for both senior and junior positions. Results in Table 4.1 showed that the percentage of men employed in junior positions in the state civil service in 2010 was 69.14 per cent, however it decreased slightly to 69.32 per cent in 2011 and further to 52.82 per cent in 2015. Results in Table 4.1 revealed that among women in junior positions, the percentage increased from 30.86 per cent in 2010 to 47.18 per cent in 2015. Further, Figure 4.1 shows that in 2010, 63.43 per cent of senior employees in state civil service were men. The percentage of men who are senior employees in state civil service increased slightly in 2011 to 63.80 per cent. Similarly, in 2012, the percentage increased to 68.59 per cent among men who are senior employees but dropped to 62.38, 54.84 and 55.12 per cent in 2013, 2014 and 2015 respectively as shown in Table 4.1. Additionally, Figure 4.1 shows that among women, the percentage of female senior employees was recorded at 36.57 per cent in 2010, 45.16 and 44.88 per cent for 2014 and 2015 respectively.

Table 4.1: Distribution of Employment in State Civil Service by Category and Sex (2010 – 2015)

Figure 4.1: Percentage of Employment in State Civil Service by Category and sex (2010 – 2015)

2: Distribution of Employment in State Civil Service by Grade Level, Year and Sex

As recorded by the available data from State Civil Service Commissions, Table 4.2 shows that men dominated more at grade levels 15 – 17 and the special scale (2014 – 2016). Table 4.1 revealed that the percentage of men in grade levels 15 – 17 ranged from 50 to 51.5 per cent for the reference period while that of women of the same grade level 15 – 17 was below 50 per cent (48.5per cent). For the special level, men occupied over 88.57 per cent in 2014, 84.30 per cent in 2015 and 79.55 per cent in 2016 as shown in Table 4.2 respectively. The table also showed that the percentage of women at the special grade was 11.43 in 2014 however, it increased in 2015 to 15.70 per cent and 20.45 per cent in 2016.

3. Employment in Federal MDAs by Grade Level and Sex (2015 – 2017)

New data as forwarded by MDAs (who did not provide such data previously) have been incorporated into this report. As such, some totals have been updated to reflect the current table of information.

Current data available on employment at Federal MDAs similarly highlights male dominance in civil service. Table 4.3 shows that the proportion of women on grade levels 01- 17 and Special Grade was 34.67, 35.08 and 32.79 per cent for the year 2015, 2016 and 2017 respectively. The table further showed that from grade levels 01- 06 the proportion of females was 27.15 per cent in 2015 but later increased to 27.87 per cent in 2016 and dropped to 21.66 per cent in 2017. As shown in Table 4.3 grade levels 15 – 17 recorded 24.15 per cent in 2015 and increased to 24.63 per cent in 2016, although it increased to 26.93 per cent in 2017. Female employment for Special Grade was 17.02 per cent in 2015, it dropped to 14.12 per cent in 2016 and slightly increased to 15.22 per cent in 2017 as shown in Table 4.3.

CHAPTER 5: POWER AND DECISION MAKING

Key Findings

- *Women have never occupied the Presidency or the Vice Presidency post in the history of Nigeria.*
- *Representation at National Parliament was 94.2 per cent male and 5.8 per cent female (1999 – 2015)*
- *State Assemblies also has 5.3 per cent female and 94.7 per cent male from 1999 - 2015*
- *LGA Chairpersons were 9 per cent female and 91 per cent male from 1999 – 2015.*
- *Councillors were 94.1 per cent men and 5.9 per cent women from 1999 - 2015.*
- *Judges at the federal court constituted 29.4 per cent female and 70.6 per cent male (2011 – 2016).*

Introduction

Equal access to power, decision making and leadership at all levels is necessary for a proper and effectively functioning democracy. The Universal Declaration of Human Rights recognizes the right of every individual to take part in the government of his or her country⁶. Additionally, it is the goal of SDG 5 to ensure women's full and elective participation as well as equal opportunities for leadership at all levels of decision-making in political, economic and public life. The dominance of men in the political world is very high compared to women in Nigeria, and women are often politically marginalized compared to their male counterparts. Factors such as poverty, illiteracy, religious and cultural norms, are a few reasons for this marginalization. This chapter provides an assessment of the current situation as well as recent trends of the participation of women and men in positions of power and decision making in Nigeria. The chapter covers the three main areas of politics and governance in Nigeria: the Executive, Legislature and Judiciary.

A. Politics and Governance

The high-levelled disparities between the participation of men and women in the domain of politics and decision-making limit women's political, social and economic opportunities. The gender inequality in the domains stated above is owing to the limited number of female participation in government, especially, where key policy decisions are made and resource allocations are decided. Women have continued to experience limited opportunities in all facet of politics and leadership positions in Nigeria, despite the recognition of the importance of women's political empowerment within the framework of the SDGs.

⁶ United Nations, 1996 Article 21

1. Executives

1a. Representation in Executive Arm of Government

Since independence, Nigerian political strides have improved significantly, with the male being the major actors. Though Nigeria is running her 5th democratic administration since its emergence in 1999, women have rarely been represented in any of the three arms of government, as the topmost decision-making body is still dominated by men. It is becoming a norm that men play the most important roles in politics, particularly at the federal level with regards to the position of president, vice presidents and secretary to the government of the federation as well as appointive ministerial positions. Table 5.1 clearly shows this current status at the level of President and Vice President.

Table 5.1: Distribution of Number Occupying Elective Position as President and Vice President in the Executive Arm and Number of Available Seat (1999 – 2015)

Position	1999-2003		2003-2007		2007-2011		2011-2015		2015 -	
	No. of Seat Available	% F								
President	1	0	1	0	1	0	1	0	1	0
Vice President	1	0	1	0	1	0	1	0	1	0

Source: Office of Secretary to the Government of Federation (OSGF)

1b. Appointive Ministerial Political Position

Appointive positions cut across the three levels of governance, that is, the federal, state and local government. However, available and verifiable data allows us to focus the report only on the ministerial appointees at the federal level.

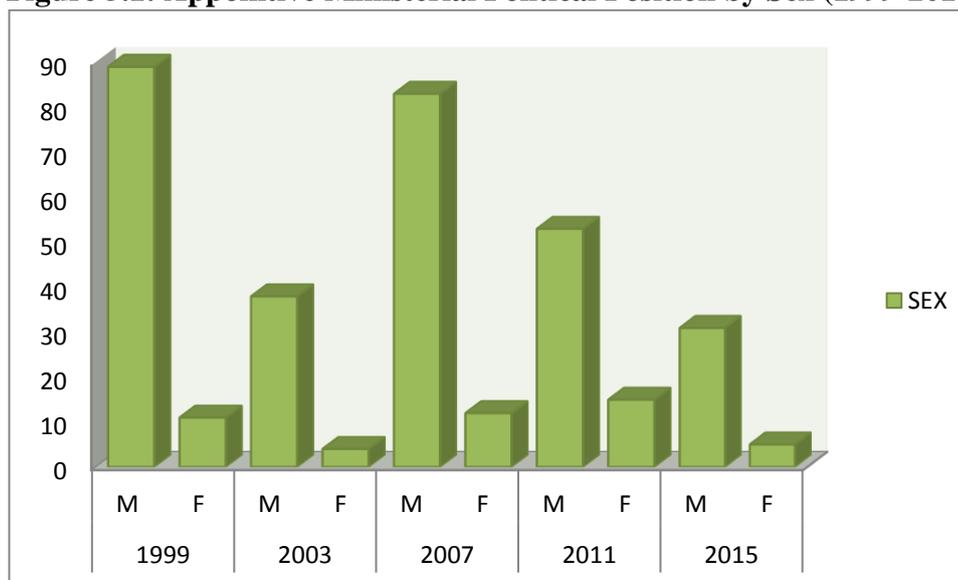

Table 5.2 and Figure 5.1 show that of a total of 341 ministers that served from 1999-2015, only 47 (14 per cent) were female, while 294 (86 per cent) were male which is an indication that males are also dominating in appointive positions. Though the number of females appointed as ministers in 2011 slightly increased to (15 women). The year 2003 appointments recorded the lowest number of female representation (4 women).

Table 5.2: Appointive Ministerial Political Position by Sex (1999 – 2015)

Figure 5.1: Appointive Ministerial Political Position by Sex (1999-2015)

1c. Secretary to the Government of the Federation

Results in Table 5.3 shows that women have never been appointed as a secretary to the government of the federation since independence. (Table 5.3).

Table 5.3: Summary Distribution of Secretaries to the Government of the Federation from 1999 – 2015

Sex	1999 -2007	2007 – 2008	2008 - 2011	2011 – 2015
Male	1	1	1	1
Female	0	0	0	0

Source: Office of Secretary to the Government of Federation (OSGF)

1d. Representation at State Executives

Nigeria as an entity runs the federal system of government with a replica of similar structure in the state and local government.

Available data shows that the representation of women, as governors or deputy governors compared to the number of candidates who showed interest at candidacy level in various states is still low. Results in Table 5.4 and Figure 5.2 show the representation profile of women and men.

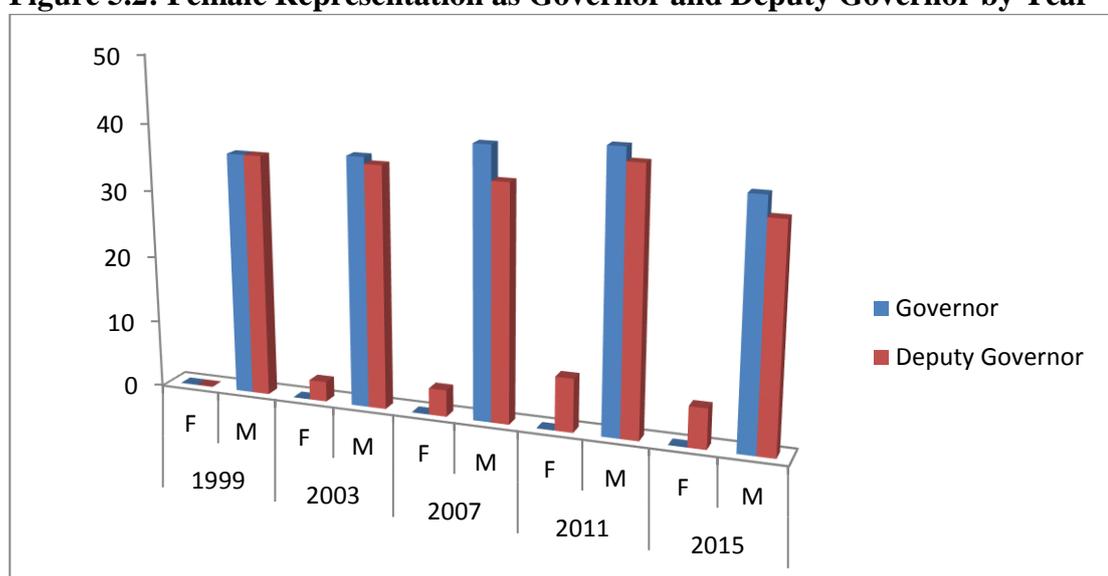

Table 5.4: Summary Table of Female Representation as Governor and Deputy Governor by Year

Office	1999		2003		2007		2011		2015	
	F	M	F	M	F	M	F	M	F	M
Governor	0	36	0	37	0	40	0	41	0	36
Deputy Governor	0	36	3	36	4	35	8	39	6	33

Source: NCWD/NBS Collation of data on women and men.

Table 5.4 shows that from the reviewed years (1999- 2015) women had not been governors in any of the states of the federation, however, very few had been elected as deputy governors in 2003, 2007, 2011 and 2015 as compared to men from 1999-2015. Women had the highest representation of 8 deputy governors in 2011, which decreased to 6 in 2015.

Figure 5.2: Female Representation as Governor and Deputy Governor by Year

1e. Representation at the Local Government Executive

Local government is the third level of government administration in Nigeria and its aim is to enable better representation and governance at the community level. In practice however, democratic governance at this level experiences inefficiencies as some state governments do not regularly conduct local government elections for varying reasons. In addition, most local governments had only caretaker chairpersons running the affairs. Consequently, election and resumption dates are staggered in almost all the states of the federation. This presents some challenges in data collection, verification, & collation amongst several states and the entire representation at several states were aggregated to provide a snapshot of the status of representation at the local government in those regions. (See ST 27 in the Appendix).

Figure 5.3: Percentage Representation of Local Chairpersons by Sex (1999 – 2015)

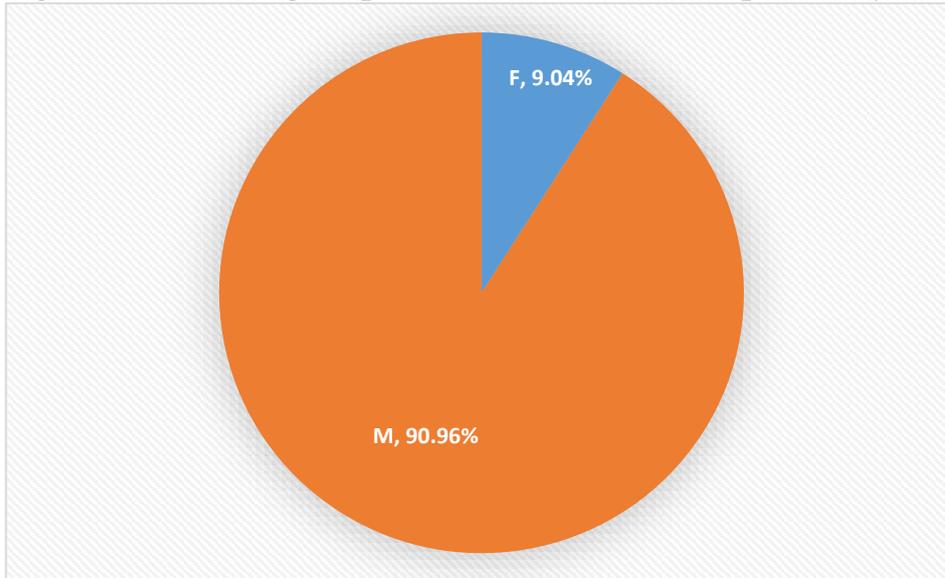

Figure 5.3 shows that males are more elected or appointed (90.96 per cent) to the positions of local government chairperson than females (9.04 per cent). The representation of female stood at about 9 per cent and the percentage of a male was approximately 91 per cent, which indicates that men overwhelmingly represented at the grassroots' level.

Note: No data was accessible for some states like Akwa-Ibom, Anambra, Bayelsa, Edo, Gombe, Ogun, Ondo and Taraba State for the years under review.

2. Legislators

2a. Representation at the National Parliament

Women population is estimated to account for almost half of the total electorate population, entitled to vote and be voted for to public offices. Representation at the National Parliament is currently measured as *the* proportion of seats held by women in the lower and upper houses of the National Assembly. From the return of democracy in 1999 to the last election in 2015, the female had the highest representation of 7.2 per cent in 2007-2011 and the lowest of 3.2 per cent in 1999-2003 for both houses (See Table 5.5).

Table 5.5: Representation in the National Parliament by Year and Sex

Source: National Assembly, Abuja

Further, Table 5.6 shows that there were no female principal officers at the Senate in 2003, 2007 and 2011. A total of 4 women principal officers was recorded in 1999 and only 1 woman was recorded in 2015.

Women held the position of deputy minority leader and chief whip in 1999 as well as two deputy minority whips that emerged at different times between 1999 and 2003. While only one woman got elected to the position of a deputy minority whip in 2015 as shown in Table 5.6.

Table 5.6: Elected Principal Officers at the Senate by Office, Year and Sex

2b. Representation in State Houses of Assembly

Table 5.7 and Figure 5.4 illustrate the representation of women and men in state assemblies. As in the National Parliament, the number of men far outweighs the number of women in the State Houses of Assembly.

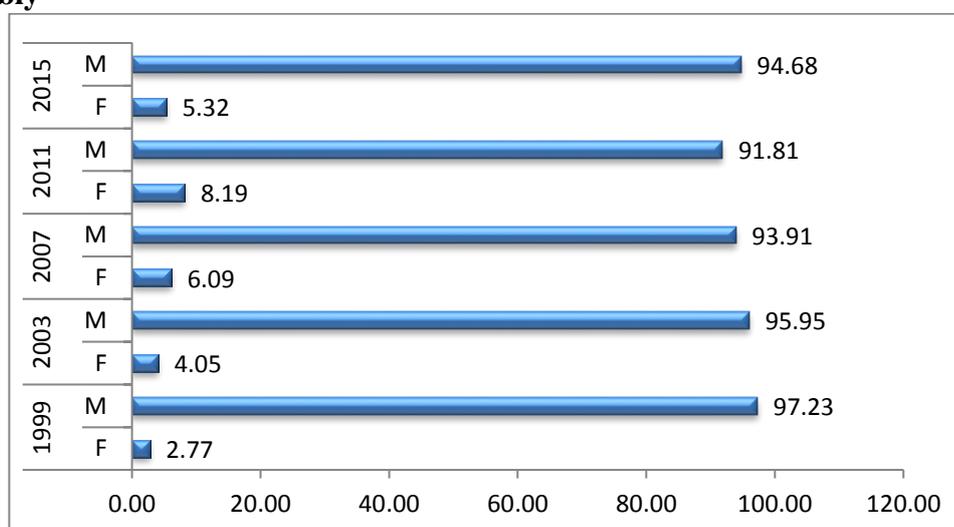

Table 5.7: Representation at States Assembly by Sex from 1999-2015

Legislator	1999		2003		2007		2011		2015	
	F	M	F	M	F	M	F	M	F	M

Source: NCWD/NBS Collation of data on women and men.

In 2011, women representation at states assembly was 58 as shown in Table 5.7 and is the highest recorded from 1999 to 2015. It has an increasing trend as it recorded 22, 30 and 43 in 1999, 2003 and 2007 respectively. However, the figure dropped in 2015 from 58 in 2011 to 37. Figure 5.4 gives the percentage representation.

Figure 5.4: Percentage Representation of Honorable Members at the State Houses of Assembly

2c. Representation of Principal Officers in States Assembly by Positions, Year and Sex

The compiled data in Table 5.8 shows that a total of 72 elected female officers (out of 1,005 officers in total) were recorded in 2011-2015, which was the highest figure for female representation in states assembly within the reference period. While the lowest number of 21 female principal officers was recorded in 1999-2003. Additionally, 64, 57 and 48 were

recorded for 2003-2007, 2007- 2011, and 2015-2019 respectively. No female has been elected as a deputy house minority leader in any of the state assemblies for the reference period (See Table 5.8).

Table 5.8: Representation of Principal Officers in States Assembly by Positions, Year and Sex

Type of Office	1999-2003		2003-2007		2007-2011		2011-2015		2015-2019		Total

Source: State House of Assembly

2d. Representation as Councillors at the Local Government

Councillors are a replica of Honorable members in the state assembly; they are representatives drawn from the local ward in various constituencies. They make citizens enjoy the dividend of governance through their activities at the local government area.

Figure 5.5: Percentage Representation of Councillors by Sex from 1999 - 2015

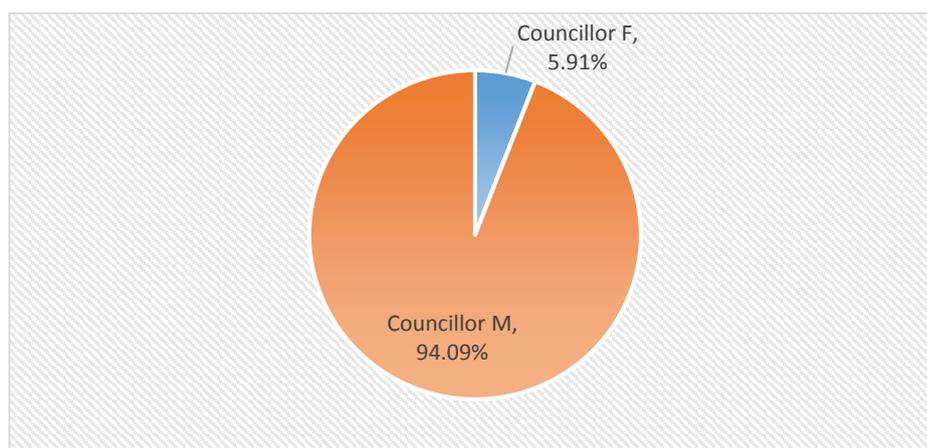

Figure 5.5 shows the summary of the percentage of local government councillors in various states, with female poorly represented than their male counterparts. Male councillors constituted 94.09 per cent while female recorded just 5.91 per cent.

NOTE: Data from the following state is not included due to inaccessibility: Abia, Adamawa, Anambra, Bayelsa, Borno, Edo, Gombe, Imo, Kaduna, Kogi, Lagos, Ogun, Ondo, Osun, Oyo, Taraba and Yobe.

3. Judiciary

3a. Representation of Judges at Federal Courts

The Judiciary is the third arm of government; it ensures logical interpretation of the constitution as they prevent the integrity and protection of human rights from being abused. The judiciary exists at the federal, state and local levels.

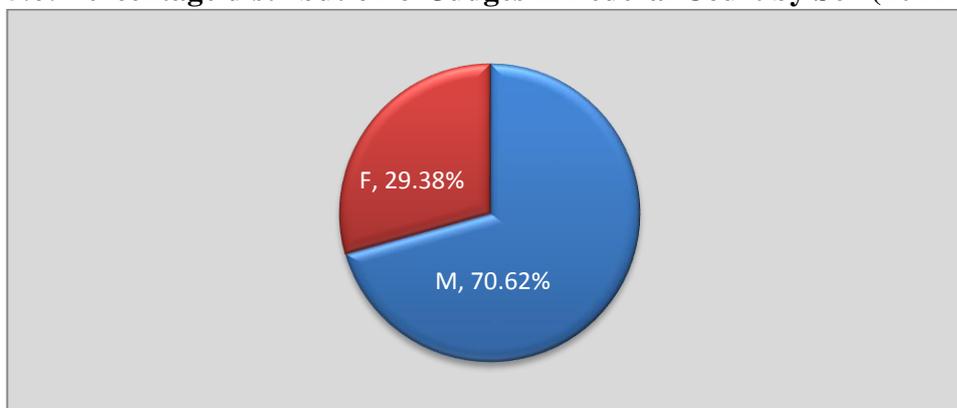

Table 5.9: Number of Judges in Federal Court by Court, Year and Sex

Court	2011		2012		2013		2014		2015		2016	
	M	F	M	F	M	F	M	F	M	F	M	F
Supreme Court Of Nigeria	11	3	13	3	13	3	13	3	14	3	11	4
Court Of Appeal	48	17	52	19	49	17	63	25	61	26	53	26
Federal High Court	43	16	40	15	45	20	38	17	36	17	57	23
National Industrial Court	5	3	5	3	11	9	11	9	11	8	11	8

Source: National Judicial Council

The results in Table 5.9 shows that male judges are more prevalent than female judges in all the federal courts. The Supreme Court had only 3 female judges in each year (2011 to 2015), and in 2016 the number increased to 4. The table further shows that the Court of Appeal had more female representation with 17 female judges recorded in 2011 and 2013, and the number increased from 2014 to 2016 from 25 to 26 judges. Table 5.9 further shows that the Federal High Court recorded 16, 15, and 20 female judges for the year 2011, 2012 and 2013 respectively, and the number increased from 17 to 23 from 2014 to 2016. The National Industrial Court had 3 female judges for 2011 and 2012, 9 for 2013 and 2014, and 8 recorded in 2015 and 2016. The share of male judges in federal courts from 2011 to 2016 was 70.62 per cent while the percentage of female judges was 29.38 per cent for the same period. See Table 5.9 and Figure 5.6.

Figure 5.6: Percentage distribution of Judges in Federal Court by Sex (2011- 2016)

3b. National Judicial Officers by Position, Year and Sex

As shown in Table 5.10, no female had been the President of the National Industrial Court or the Chief Registrar of the Supreme Court from 2013 to 2016. Only one female held the position of the Chief Justice of Nigeria in 2013. It is evident that women had a constant representation of 3 in every year as Justice of Supreme Court from 2013 to 2016 as shown in Table 5.10.

Table 5.10: Number of National Judicial Officers by Position, Sex and Year

B. Civil and Public Service

Women's representation in decision-making positions in the Civil and Public Service is among the concerns raised in the Beijing Platform for Action. The limited information available to assess levels and trends poses challenges in addressing gender disparities in these areas.

1. Top Government Officials and Senior Administrators

Available data from National Center for Women Development (NCWD) and National Bureau of Statistics (NBS) publication shows that women are underrepresented among high-ranking government administrators with decision making powers, as shown in Table 5.11.

Table 5.11: Top Government Officials and Senior Administrators, 1999-2015

Position	M	% M	F	% F
Head of Service	9	75.00	3	25.00
Permanent Secretary	95	86.36	15	13.64

Source: NCWD/NBS Collation of data on women and men.

The highest representation of women among high-ranking government administrators with decision-making powers was in the position of Special Assistant, which recorded 27.94 per cent, followed by Head of Service (25 per cent) and Special Advisers (22.86 per cent). Also, no woman has been nominated as the Central Bank Governor. See Table 5.11.

CHAPTER 6: VIOLENCE AGAINST WOMEN/CRIME

Key Findings

- Rape Incidence in Nigeria for women and girls was 63.04 per cent in 2015, it increased to 72.13 per cent in 2016 and decreased to 69.33 per cent in 2017 respectively.
- Women of 45-49 years' old accounted for the highest proportion who had any form of FGM/C (27.6 per cent), while 15-19 was the age group in which women recorded the lowest percentage (12.3 per cent)
- Women accounted for about 2 per cent of the total prisoners/inmates from 2012 – 2016.
- The percentage of females admitted to prison due to trafficking was 14.58 and 14.46 per cent for 2015 and 2016, compared to 4.50 per cent in 2013 and 2.86 per cent in 2014.
- On average, trafficking in persons occurred mostly in the age group of 16-25, where females constituted 76.63 per cent from 2013 – 2015.

Introduction

Violence and crime are social ills that threaten the peaceful co-existence of humanity and the realization of equality, development and societal peace. Due to gender-based violence, many women cannot enjoy their fundamental human rights and freedom. In some societies, women and girls are vulnerable to physical, sexual or psychological abuse that cuts across income, class and culture. This is usually exacerbated by the often low social and economic status of women which can be both a cause and a consequence of violence⁷. The Beijing Platform for Action requires all governments and the United Nations to promote research, collect data and compile statistics related to the prevalence of different forms of violence against women (especially domestic violence). The initiative also urges stakeholders to encourage research into the causes, nature, seriousness and consequences of violence against women, as well as the effectiveness of measures implemented to prevent and redress violence against women. Goal 16 of the Sustainable Development Goal (SDGs) promotes peaceful and inclusive societies which provide access to justice for all and build effective, accountable and inclusive institutions at all levels.

⁷ United Nations, 2005

A. Prevalence and Incidence of Violence Against Women and Children

1. Rape Incidence

The data from Nigerian Police Force/Ministry of Justice as shown in Table 6.1 reveals rape incidence from 2015-2017 in Nigeria. The table shows that generally, the National Rape Incidence for women and girls is on an increasing trend. In 2015 rape incidences reported stood at 63.0 per cent and it increased to 72.1 per cent in 2016 and decreased to 69.3 per cent in 2017. Furthermore, the table shows that rape incidence for women and girls (age 1 – 28 and above) at home was 67.5, 76.7 and 69.3 per cent in 2015, 2016 and 2017 respectively. In schools, it was 53.8 and 56.9 per cent in 2015 and 2016 respectively but increased to 93.4 in 2017. In other places, rape cases were 62.5, 73.0 and 54.6 per cent for 2015, 2016 and 2017 respectively. The percentages of rape incidence for girls (1 – 17 years) was very high at home, schools and other places (See Table 6.1).

2. Female Genital Mutilation/Cutting (FGM/C)

Female Genital Mutilation/Cutting (FGM/C) is a cultural practice involving the ceremonial circumcision of a female child. Though the ceremony can be carried out at any age, it is mostly done before a female child attains the age of 5 years. This practice has been widely criticized due to its immediate and long-term medical negative implications to the well-being of the female and her reproductive health and wellbeing. Therefore, FGM/C is considered violence against women because it is a breach of the right of women.

Figure 6.1 depicts the statistical data obtained from MICS5, 2016/2017 and the graph indicates that women in the 45-49 years age group had the highest percentage of those who had any form of FGM/C (27.6 per cent). However, women between 15 - 19 years old had the lowest percentage (12.3 per cent) as show in Figure 6.1, evidence of a declining trend amongst the generations.

Figure 6.1: Percentage of women age 15 -49 who had any form of FGM/C, 2016/17

B. Prison Inmates/Offenders

1. Number of Prison Inmates by Sex (2012 – 2016)

Table 6.2 illustrates the record of number of prison inmates/offenders by sex from year 2012 to 2016. The table shows that the number of prison inmates increased over the observed periods (2012-2016) with the majority of inmates being male. Only approximately 2 per cent of prisoners/inmates were women for each of the five years' periods.

Table 6.2: Number of Prison Inmates by Year and Sex

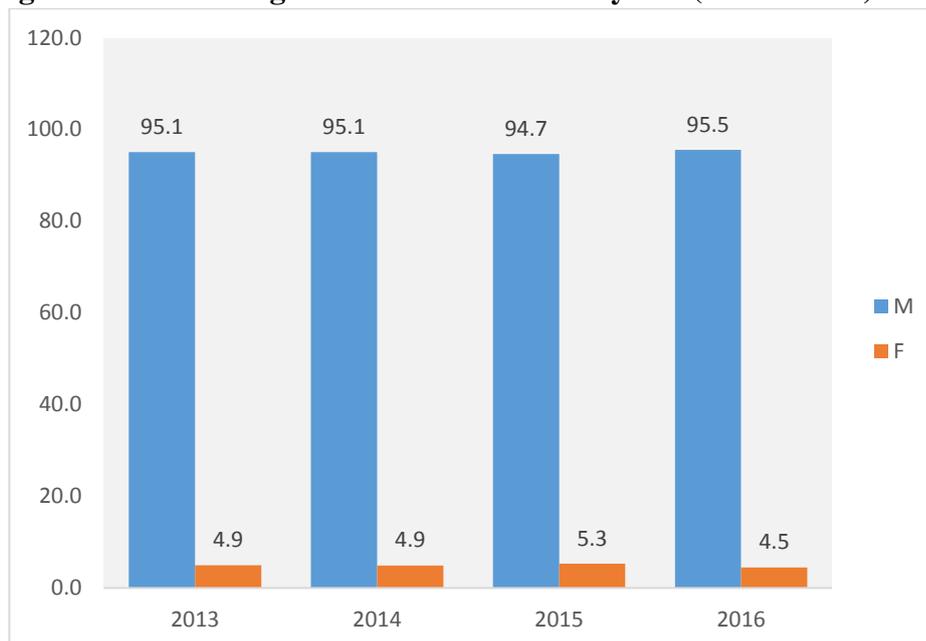

Year	Male	Female	% Female
2012	51,161	975	1.87
2013	54,151	885	1.61
2014	54,933	1,103	1.97
2015	63,668	1,365	2.10
2016	67,329	1,357	1.98
TOTAL	291,242	5,687	1.92

2. Prison Admission by Type of Offence (2013 – 2016)

The bar graph in Figure 6.2 demonstrates the statistics of prison admission by type of offence in Nigeria for the period of 2013 to 2016. From the figure, it is revealed that the proportion of males admitted to prison for any type of offence was very high at 95.1 per cent while that of females was low at 4.9 per cent in both 2013 and 2014. Although, the percentage of female admission into prison increased to 5.3 per cent in 2015 and decreased to 4.5 per cent in 2016 as revealed in Figure 6.2.

Figure 6.2: Percentage of Prison Admission by Sex (2013 – 2016)

Prison admission for stealing was the most common offence throughout the reference period compared to other offences that were listed in Table 6.3. For this crime, 95 per cent of inmates were male and about 5 per cent female. The percentage of women admitted to prison because of trafficking grew significantly to 14.58 and 14.46 per cent for 2015 and 2016 respectively, compared to 4.50 per cent in 2013 and 2.86 per cent in 2014 (see Table 6.3).

C. Suspects Arrested for Drug-Related Offences

1. Number of Suspects Arrested for Drug-Related Offences by State, Special Area Command, Year and Sex.

Statistical records of suspects arrested for drug related offences are shown in Table 6.4. The table reveals that over 90 per cent of suspects arrested for drug related offences in 2015, 2016 and 2017 (92.7, 93.5 and 93.8 per cent respectively) are men. While women recorded 7.3, 6.5 and 6.2 per cent for same years respectively. At the special area command level, the percentage of women arrested for drug offences was high in 2015 at 12.1 per cent, dropped to 7.3 percent in 2016, then slightly increased to 8.3 per cent in 2017. Further, Table 6.4 also revealed that arrests made at the Airport for female suspects on drug related offences was 10.3 per cent in 2015, it increased in 2016 to 17.0 per cent and dropped to 12.0 percent in 2017. Sea port arrest for women drug offenders was zero per cent for 2015 and 2016 but reached 28.6 percent in 2017. Similarly, the percentage of women arrested for drug related offences in Seme - Lagos border accounted for the highest arrest at ports of 7.9, 20.5 and 21.4 per cent in 2015, 2016 and 2017 respectively while at other border posts 7.1, 22.5 and 21.1 per cent were recorded for 2015, 2016 and 2017 respectively.

Source: Nigeria Drug Law Enforcement Agency (NDLEA)

Further, ST 30 (see appendix) shows that Edo state had the highest number (26.4 per cent) of women arrested for drug related offences in 2015, while in 2016 and 2017, Bayelsa state recorded the highest number (22.3 per cent and 32.1 per cent respectively) of women arrested for drug related offences in Nigeria. Additionally, records show that Yobe state had no women arrested in 2015. In 2016, Borno, Katsina and Yobe had no women arrested, while in 2017, Cross-River, Lagos, Kogi, Oyo, FCT, Gombe and Yobe recorded zero arrests for women.

D. Trafficking in Persons

1. Number of Trafficked Persons by Age Group, Year and Sex

Table 6.5 reveals the trends of trafficked persons by age group, year and sex from 2013 to 2015. The table shows that overall, the number of trafficked females kept increasing over the observed years. In 2013, proportion of trafficked individuals who were female was 48.65 per cent and it increased to 49.42 per cent in 2014 and reached its highest in 2015 (76.38 per cent). The table also revealed that of trafficked persons who are between age 0 - 5 years 19 were female and 20 were male in 2015 as compared to 2014 (28 and 26 respectively) for female and male.

Table 6.5: Number of Trafficked Persons by Age Group, Year and Sex

Age group	2013			2014			2015		
	F	M	% F	F	M	% F	F	Male	% F

2. Number of Identified Victims of Trafficking for Prostitution by Age, Year and Sex

Number of identified victims of trafficking for prostitutions by age, year and sex for the period of 2013 to 2015 in Nigeria are revealed in Table 6.6.

The table shows that trafficking for prostitution mostly occurred among females in the age group of 18-27 years compared to other age groups. Specifically, in 2013, the number was 202 but reduced to 141 in 2014 and then increased to 261 in 2015. In 2014, the age group 28 and above had the least number of females trafficked for prostitution, which recorded 20 and 7 in 2013 and 2014 respectively but increased to 41 in 2015 as revealed in Table 6.6.

Table 6.6: Number of Identified Victims of Trafficking for Prostitution by Age, Year and Sex

Age group	2013		2014		2015	
	Female	Male	Female	Male	Female	Male
1 – 17	47	0	25	0	37	0

3. Number of Identified Victims of Trafficking for Forced Labor by Age, Year and Sex

Table 6.7 revealed the number of identified victims of trafficking for forced labor by age, year and sex. The table shows that the percentage of female among identified victims of trafficking for forced labor was very high throughout the recorded years. In 2013, about three-quarter of the victims of trafficking for forced labor (75.76 per cent) were female although the percentage decreased to 64.00 and 64.77 per cent in 2014 and 2015 respectively. For the age group, 1–17, the number of females trafficked for labor increased from 106 in 2013 to 121 in 2014 and further increased to 130 in 2015 as shown in table 6.7.

Table 6.7: Number of Identified Victims of Trafficking for Forced Labor by Age, Year and Sex
