Brief Methodology

The CPI measures the average change over time in prices of goods and services consumed by people for day-to-day living. The construction of the CPI combines economic theory, sampling and other statistical techniques using data from other surveys to produce a weighted measure of average price changes in the Nigerian economy. The weighting occurs to capture the importance of the selected commodities in the entire index. The production of the CPI requires skills of economists, statisticians, computer scientists, data collectors and others.

Key in the construction of the price index is the selection of the market basket of goods and services. Every month, 10,534 informants spread across the country provide price data for the computation of the CPI. The market items currently comprise of 740 goods and services regularly priced.

The first stage in the calculation of the CPI is the collection of prices on each item (740 goods and services) from outlets in each sector (rural or urban) for each state. Prices are then averaged for each item per sector across the state. The next step is to use the average price to calculate the basic index for each commodity: The current year price of each commodity is compared with a base year's price to obtain a relative price.

Next we use the Laspeyres formula to compute an aggregated index for each class (which has a multitude of commodities which have similar consumption purposes): Here the sum of the product of weights (obtained from the expenditure survey) and relative prices for each item is divided by the sum of the weight of the items in that class, and the result multiplied by 100 gives the required index number. This index number is still classified according to the urban or rural classification sector for each of the 36 states and the FCT. This yields 85 classes then 48 groups which are then reclassified into 12 Divisions to derive:

1. The country composite index
2. The Urban National index
3. The Rural National index
4. The Combined Urban and Rural State Composite index

The survey methodology generates 3774 all items indices for all states and the FCT.

This edition of the Statistical News contains the revised Consumer Price Index (CPI) based on Nigeria Living Standard Survey (NLSS) 2003/2004. The consumption expenditure data were re-valued to November 2009, which is the base period for the revised CPI.

The May 2003 and September 1985 based indices are being continued using factors derived from the new CPI. These indices will yield the same price change for any commodity group contained in all the series.

A new subindex – Imported Food Index- is available in the revised CPI.

Note: The urban and rural indices were weighted with the ratio of their populations to the national i.e. 0.455 and 0.545 respectively to compute the composite indices at the 12 Classification of Individual Consumption by Purpose (COICOP) functions and all items levels. This may cause variance between a recalculated all items index using the weights published on table 2 and the published all items index because the published weights were computed only from consumption expenditure survey result. The following breakdown highlights a non-exhaustive list of the components of the current CPI:

The following breakdown highlights a non-exhaustive list of the components of the current CPI:

FOOD AND NON-ALCOHOLIC BEVERAGES	 Food	 Bread and cereals	 Meat	 Fish	 Milk, cheese and eggs	 Oils and fats
	 Fruit	 Vegetables	 Potatoes, Yam & other tubers	 Food products n.e.c	 Coffee, tea and cocoa	 Soft drinks

ALCOHOLIC BEVERAGES, TOBACCO AND KOLA	 Spirits	 Wine	 Tobacco	 Narcotics
--	--	---	--	--

CLOTHING AND FOOTWEAR	 Clothing materials, other articles of clothing	 Garments	 Cleaning, repair and hire of clothing	 Shoes and other footwear	 Repair and hire of footwear
----------------------------------	---	---	--	--	---

All Item Index

The consumer price index, (CPI) which measures inflation rose by 11.61 percent (year-on-year) in October 2019. This is 0.36 percentage points higher than the rate recorded in September 2019 (11.24 percent).

Increases were recorded in all COICOP divisions that yielded the Headline index.

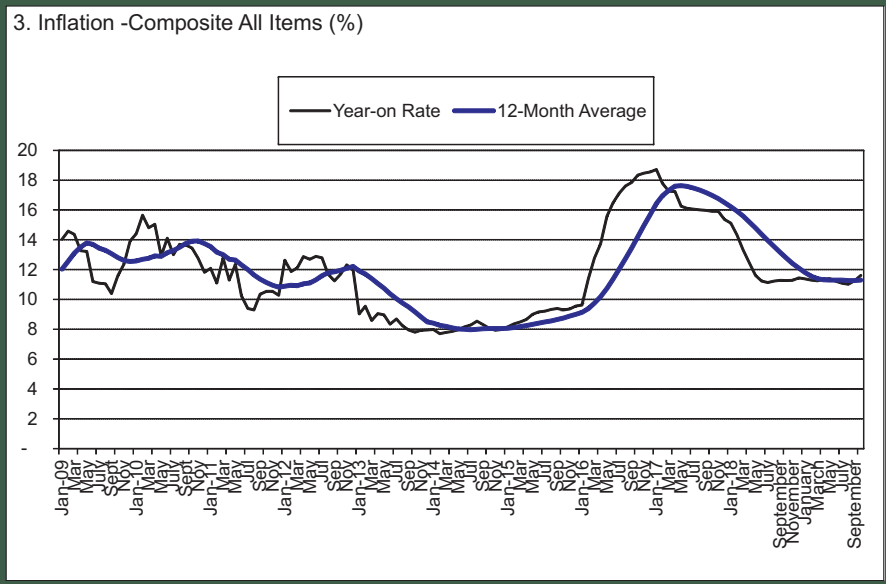

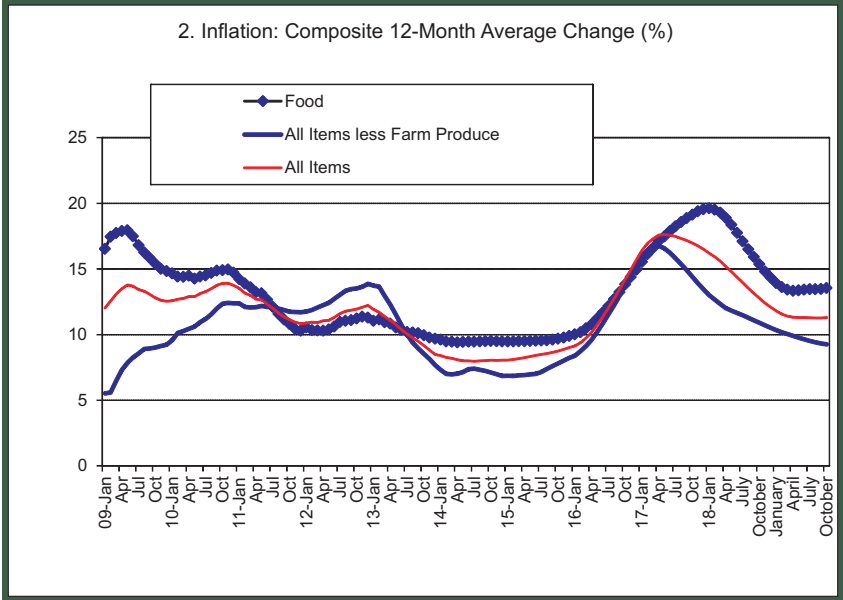

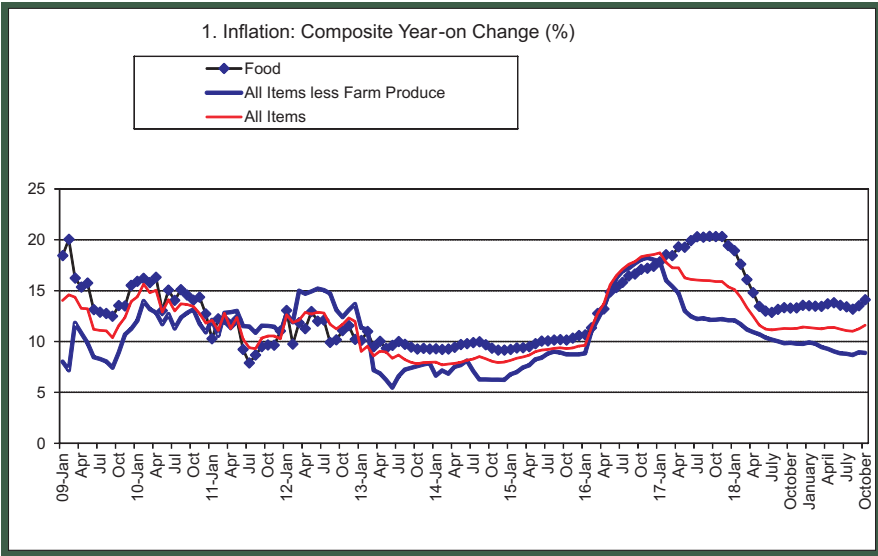

On month-on-month basis, the Headline index increased by 1.07 percent in October 2019, or 0.03 percentage points higher than the rate recorded in September 2019 (1.04 percent).

The percentage change in the average composite CPI for the twelve months period ending October 2019 over the average of the CPI for the previous twelve months period was 11.30 percent, showing 0.03 percentage point increase from 11.27 percent recorded in September 2019.

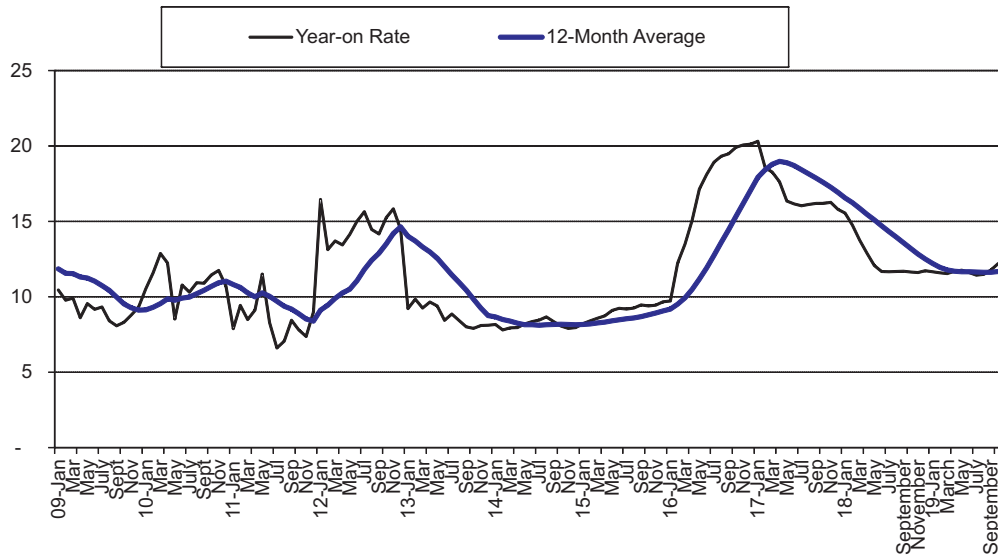

The urban inflation rate stood at 12.20 percent (year-on-year) in October 2019 from 11.78 percent recorded in September 2019, while the rural inflation rate was recorded at 11.07 percent in October 2019 from 10.77 percent in September 2019.

On a month-on-month basis, the urban index rose by 1.15 percent in October 2019, up by 0.02 percentage points from 1.13 percent recorded in September 2019, while the rural index rose by 0.99 percent in October 2019, up by 0.03 percentage points from the rate recorded in September 2019 (0.96 percent).

The corresponding twelve-month year-on-year average percentage change for the urban index was 11.68 percent in October 2019. This is higher than 11.63 percent reported in September 2019, while the corresponding rural inflation rate in October 2019 was 10.95 percent compared to 10.94 percent recorded in September 2019.

4. Inflation -Urban All Items (%)

Food Index

On a year on year basis, the composite food index rose by 14.09 percent in October 2019 compared to 13.51 percent in September 2019.

This rise in the food index was caused by increases in prices of Meat, Oils and fats, Bread and cereals, Potatoes, Yam and other tubers, Fish and Vegetables.

On a month-on-month basis, the food sub-index increased by 1.33 percent in October 2019, up by 0.03 percentage points from 1.30 percent recorded in September 2019.

The average annual rate of change of the Food sub-index for the twelve-month period ending October 2019 over the previous twelve-month average was 13.54 percent, equivalent to 0.07 percentage points higher than the average annual rate of change recorded in September 2019 (13.47 percent).

All Items Less Farm Produce

The "All items less farm produce" or Core inflation rate, which excludes the prices of volatile agricultural produce stood at 8.88 percent in October 2019 on a year-on-year basis, slower by -0.07 percentage points when compared with 8.94 percent recorded in September 2019.

On month-on-month basis, the core sub-index increased by 0.74 percent in October 2019, or -0.15 percentage points slower than the rate recorded in September 2019 (0.89 percent).

The highest increases were recorded in prices of Cleaning, Repair and hire of clothing, Hospital services, Major household appliances, Repair of household appliance, Glassware, tableware and household utensils, and Garments.

The average 12-month annual rate of change of the index was 9.25 percent for the twelve-month period ending October 2019; this is -0.08 percentage points slower than 9.34 percent recorded in September 2019.

State Profiles

In analysing price movements under this section, note that the CPI is weighted by consumption expenditure patterns which differ across states. Accordingly, the weight assigned to a particular food or non-food item may differ from state to state making direct interstate comparisons of consumption baskets potentially misleading and inadvisable.

All Items Inflation

In October 2019, all items inflation rate, on year on year basis was highest in Kebbi (15.20%), Bauchi (13.97%) and Ondo (13.74%), while Kwara (9.69%), Katsina (9.29%) and Bayelsa (9.07%) recorded the slowest rise in headline year on year inflation rate.

On month on month basis however, October 2019 All items inflation rate was highest in Benue (2.20%), Bauchi (1.87%) and Cross River (1.80%). Anambra recorded the slowest rise at 0.28%, while Bayelsa and Ebonyi saw decline in the headline month on month index by -0.13% and -0.35% respectively.

Food Inflation

In October 2019, food inflation rate on a year on year basis was highest in Kebbi (17.53%), Ondo (17.01%) and Ogun (17.00%), while Kogi (12.12%), Katsina (11.18%) and Bayelsa (9.55%) recorded the slowest rise.

On month on month basis however, October 2019 food inflation rate was highest in Oyo (2.56%), Osun (2.52%) and Lagos (2.05%) while Enugu (0.24%) and Abuja (0.14%) saw the slowest increases in month on month food inflation rate. Bayelsa, at -0.35%, recorded price deflation or negative inflation (that is, a decrease in the general price level of food or a negative food inflation rate).
