Brief Methodology

The CPI measures the average change over time in prices of goods and services consumed by people for day-to-day living. The construction of the CPI combines economic theory, sampling and other statistical techniques using data from other surveys to produce a weighted measure of average price changes in the Nigerian economy. The weighting occurs to capture the importance of the selected commodities in the entire index. The production of the CPI requires skills of economists, statisticians, computer scientists, data collectors and others.

Key in the construction of the price index is the selection of the market basket of goods and services. Every month, 10,534 informants spread across the country provide price data for the computation of the CPI. The market items currently comprise of 740 goods and services regularly priced.

The first stage in the calculation of the CPI is the collection of prices on each item (740 goods and services) from outlets in each sector (rural or urban) for each state. Prices are then averaged for each item per sector across the state. The next step is to use the average price to calculate the basic index for each commodity: The current year price of each commodity is compared with a base year's price to obtain a relative price.

Next we use the Laspeyres formula to compute an aggregated index for each class (which has a multitude of commodities which have similar consumption purposes): Here the sum of the product of weights (obtained from the expenditure survey) and relative prices for each item is divided by the sum of the weight of the items in that class, and the result multiplied by 100 gives the required index number. This index number is still classified according to the urban or rural classification sector for each of the 36 states and the FCT. This yields 85 classes then 48 groups which are then reclassified into 12 Divisions to derive:

- 1. The country composite index
- 2. The Urban National index
- 3. The Rural National index
- 4. The Combined Urban and Rural State Composite index

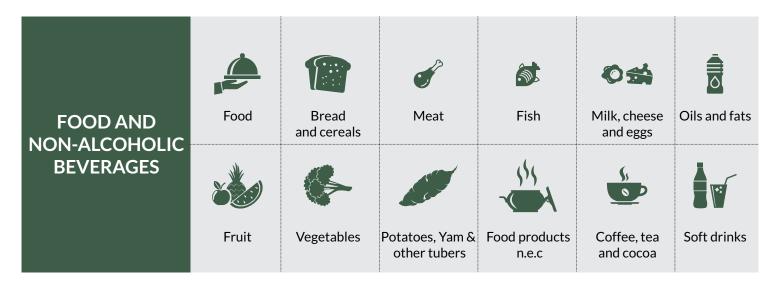

The survey methodology generates 3774 all items indices for all states and the FCT.

This edition of the Statistical News contains the revised Consumer Price Index (CPI) based on Nigeria Living Standard Survey (NLSS) 2003/2004. The consumption expenditure data were re-valued to November 2009, which is the base period for the revised CPI.

The May 2003 and September 1985 based indices are being continued using factors derived from the new CPI. These indices will yield the same price change for any commodity group contained in all the series. A new sub index – Imported Food Index- is available in the revised CPI.

Note: The urban and rural indices were weighted with the ratio of their populations to the national i.e. 0.455 and 0.545 respectively to compute the composite indices at the 12 Classification of Individual Consumption by Purpose (COICOP) functions and all items levels. This may cause variance between a recalculated all items index using the weights published on table 2 and the published all items index because the published weights were computed only from consumption expenditure survey result. The following breakdown highlights a non-exhaustive list of the components of the current CPI:

The following breakdown highlights a non-exhaustive list of the components of the current CPI:

Narcotics

Actual and imputed rentals for housing

Water supply

Miscellaneous services relating to the dwelling

Electricity

Gas

Liquid fuel

Solid fuels

FURNISHINGS, **HOUSEHOLD EQUIPMENT**

Furniture and furnishings

Carpets and other floor coverings

Repair of Furniture

Household textiles

Major household appliances whether electric or not

Repair of household appliances

Glassware, tableware and household utensils

Non-durable household goods

Domestic services and household services

HEALTH

Pharmaceutical products

Medical services

Dental services

Paramedical services

Hospital services

TRANSPORT

Motor cars

Motor cycles

Bicycles

Vehicle spare parts

Fuels and lubricants for personal transportation

Maintenance and repair of personal transport

Passenger transport by road

Passenger

Passenger transport by air transport by sea and inland waterways

COMMUNICATION

Telephone and telefax equipment

Telephone and telefax services

RECREATION AND CULTURE

Audio-visual, photographic and information processing equipment

Photographic development

Musical instrument

Recreational and sporting services

Games of chance

EDUCATION

Books & stationery

RESTAURANTS AND HOTELS

Accommodation services

MISCELLANEOUS GOODS AND SERVICES

Hairdressing salons and personal grooming establishments

Appliances, articles and products for personal care

Jewellery, clocks and watches

Insurance

Other services

All Items Index

The Consumer Price Index (CPI) which measures inflation increased by 18.72 percent (year-on-year) in January 2017, 0.17 percentage points higher from the rate recorded in December 2016 (18.55) percent. Increases were recorded in all COICOP divisions that yield the Headline Index.Communication and Restaurants and Hotels again recorded the slowest pace of growth in January, growing at 5.1 percent and 8.4 percent (year-on-year) respectively.

However, the faster pace of growth in headline inflation, year on year, were bread and cereals, meat, fish, oils and fats, potatoes, yams and other tubers, wine and spirits, clothing materials and accessories, electricity, cooking gas, liquid and solid fuels, motor cars and maintenance, vehicle spare parts and fuels and lubricants for personal transport equipment, passenger transport by road

On a month on month basis, headline inflation was driven by passenger transport by air, fuels and lubricants for personal transport equipment, liquid fuels, cooking gas, oils and fats, fruits, Miké cheese and eggs, fish, meat and bread and cereals

The Food Index increased by 17.82 percent (year-on-year) in January, up by 0.43 percent points from rate recorded in December 2016 (17.39) percent. During the month, all major food sub-indexes increased, with Soft Drinksrecording the slowest pace of increase at 7.8 percent (year on year).

Price movements recorded by All Items less farm produce or Core sub-index rose by 17.90 percent (year-on-year) in January, down by 0.20 percent points from rates recorded in December 2016 (18.10) percent. During the month, the highest increases were seen in Housing, Water, Electricity, Gas and Other Fuels, Education and Transport growing at 27.2, 21.0 and 17.2 percent respectively.

On a month-on-month basis, the Headline index increased albeit, at a slower pace in January 2017. The index increased by 1.01 percent point in January, 0.05 percent points from 1.06 percent rate recorded in December 2016.

It should be noted that the Headline Index is made up of the Core Index and Farm Produce items. As. Processed Foods are included in both the Core and Food sub-indices; this Implies that these sub-indices are not mutually-exclusive.

The Urban index rose by 20.31 percent (year-on-year) in January from 20.12 percent recorded in December, and the Rural index increased by 17.34 percent in January from 17.20 percent in December. On month-on-month basis, the urban index rose by 1.03 percent in January from 1.08 percent recorded in December, while the rural index rose by 1.00 percent in January from 1.04 percent in December.

The corresponding twelve-month year-on-year average percentage change for the urban index increased from 17.05 percent in December to 17.91 percent in January, while the corresponding rural index also increased from 14.54 percent in December to 15.18 percent in January.

COMPOSITION OF THE MAJOR INDEX AND SUB-INDICES

All Items = Farm Produce +Core index Food = Farm Produce +Processed Foods Core = All Items - FarmProduce

Food Index

The Composite Food Index rose by 17.82 percent in January 2017. The rise in the index was mainly driven by increases in prices of Bread and cereals, Meat, Oil and Fats, and Fish.

On a month-on-month basis, the Food sub-index increased by 1.29 percent in January, down by 0.04 percent points from 1.33 percent recorded in December.

The average annual rate of change of the Food sub-index for the twelve-month period ending in January 2017 over the previous twelve-month average was 15.54 percent, 0.59 percent points from the average annual rate of change recorded in December (14.95 percent).

All Items Less Farm Produce

The "All Items Less Farm Produce" or Core sub-index, which excludes the prices of volatile agricultural produce eased by 17.9 percent during the month, 0.20 percent points from 18.1 percent recorded in December as all key divisions which contributes to the index increased.

On a month-on-month basis, the Core sub-index increased by 0.68 percent in January, 0.06 percent points higher from 0.62 percent recorded in December. The highest increases were recorded in electricity, gas, passenger transport by air, liquid fuel, fuel and lubricants for personal transport equipment and solid fuels.

The average 12-month annual rate of rise of the index was recorded at 16.04 percent for the twelve-month period ending in January 2017, 0.73 percent points higher from the twelve-month rate of change recorded in December
